"All who understand clearly the developments of the past year consider that striking testimony of the soundness and strength of the banking system has been supplied. The rush of prosperity was entirely unprecedented so far as Canada was concerned. And few, if any, other countries have experienced such rapid relative development. If the banking system had been at all weak or unsound in any important respect the sudden check to the external borrowings and the transition from the rushing pace of a year or so ago to the quieter period of the present would have occasioned some great collapses. But not a single bank failure has occurred; the banks have gone ahead as usual paying all liabilities as they accrued and discounting paper for their customers, and, so far as is known, none of them have had to be helped."

UNDERWRITERS' AGENCIES IN BRITISH COLUMBIA

The Mainland Board at Vancouver, B.C., has adopted the following resolution:—

"All fire insurance companies and all underwriters' agencies and (or) annexes (not incorporated) composed of one or more companies, and maintaining a separate field and office force in the entire territory in which they operate, independent and distinct from the field and office force of the company or companies, composing such underwriters' agency and (or) annex; or underwriters' agencies and (or) annexes formed or maintained for the purpose of taking over, or continuing the business of a duly incorporated company or companies which has or have retired, legally qualified to transact business in the Province of British Columbia shall be eligible for membership. Any company or any underwriters' agency and (or) annex wishing to become a member shall make application in writing to the secretary-treasurer, upon which a vote shall be taken at the first subsequent meeting of the association as a whole, or of the voluntary committee hereinafter defined.

"Each member is limited to one representative in the association, and shall notify the name of the same to the secretary-treasurer."

WHY CANADA IS OFTEN IN MONEY MARKET

Towns must grow in Canada, and new towns must continue to spring up. Therefore, it is essential that public utilities shall be provided if the public health is to be properly guarded and the public necessities adequately met. These facts are stated in an article in the Cardiff Mail on "Financial Conditions in Canada," by Sir John Courtis, and W. Davies, who explain why the Dominion appears so frequently in the money market.

"In short," they continue, "many a Canadian city is compelled to accomplish as much in five or ten years as the most progressive English or Welsh town is given fifty years or more to bring about. That is the reason why Canadian municipal loans appear so frequently in the English money market.

"But one word of warning might be given some of the Canadian cities: they should allow a town to expand from the centre outwards. In most cases it must be admitted that this is done as a matter of sound policy. Calgary, for instance, is a compact city. Houses are not spread out with great gaps between them. Streets lengthen or new streets are added adjacent to those last finished and occupied. When this policy is followed the municipality is only called upon to make roads and to provide public utilities in accordance with actual existing needs. In some towns which were visited—and in one particularly—houses have been built where in the ordinary way of natural increase paved roads would not be required for many years to come. And not only roads, water supply and a sewerage system have to be carried a distance not warranted by the ordinary necessity based on the actual increase of population."

DIVIDENDS AND NOTICES

THE CANADIAN BANK OF COMMERCE

DIVIDEND NO. 107

The Transfer Books will be closed from 1st December to 15th December, 1913, both days inclusive.

By order of the Board.

LAWRENCE J. PASHLER,
Secretary-Treasurer.
Toronto, 21st November, 1913.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on **Thursday, the 8th day of January next.** The chair will be taken at 11 o'clock a.m.

E. L. PEASE,
General Manager.
Montreal, November 29th, 1913.

THE ROYAL BANK OF CANADA

DIVIDEND No. 105

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after **Monday, the 1st day of December next,** to shareholders of record of 15th November.

By order of the Board.
E. L. PEASE,
General Manager.
Montreal, P.Q., October 17th, 1913.

The closing date for tenders for Port Stanley, Ont., was extended from November 10th until to-day.

Steel on the Prince Albert Branch of the Grand Trunk Pacific has been completed to the south bank of the South Saskatchewan River and a siding constructed for the handling of material with which to construct a railway and traffic bridge. The piers will be put in this winter and the superstructure erected early in the spring.

The Royal Bank is opening a branch at Trenton, N.S.

An issue of $1,000,000 bonds of the Hamilton By-Products Coke Ovens, Limited, is being placed in the United States.

To pass a resolution at the forthcoming annual meeting of the Saskatoon Builders' Exchange favoring the establishment of a liability insurance commission, similar to the hail insurance commission of Saskatchewan, is the intention of the members of the exchange.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

Nov. 21st	31,113	30,489	+ 624

◆

RECORD OF TRADE DISPUTES

The Department of Labor reports that the industrial situation from the standpoint of the number of trade disputes in existence, was better in October than at any time during the year. The loss of time to employees through trade disputes actually commencing during that month was small, and in all there were only eight disputes in existence, this number including those already in existence at the beginning of the month, and those which commenced during October. On no occasion during the present year has the number been as small as this; the next best record being in September, when eleven disputes were reported. About 3,657 employees were directly and indirectly involved in the disputes of the month. About 70,000 working days were lost through strikes and lockouts during October as compared with 83,380 during September, and 98,000 in October, 1912. As in the previous months the most important dispute was that of coal miners on Vancouver Island. It is difficult to estimate the loss of time through this dispute, as it is probable that the strikers obtain work from time to time in other localities and that other men are taken on by the operators concerned. An estimate would show about 2,000 men out of work directly as a result of this dispute during October.

STEAMSHIP AND COKE COMPANIES' ISSUES

Navigation Merger to Float Debenture Stock in London —Two-Year Notes for Coke Company

Next month $6,106,000 5 per cent. debenture stock of the Canada Steamship Lines, Limited, will be issued in London. The debenture stock will be convertible into bonds at the option of the holder, and will be part of the total issue of $9,000,000, repayable in 1943 at 105.

Messrs. Brown, Shipley and Company and the London County and Westminster Bank, Limited, will receive subscriptions, and the trustees for the debenture stock will be the Prudential Trust Company, Montreal.

The assets of the company are $33,004,683 and of the $9,000,000 of debenture stock an amount of $534,983 will remain in the hands of the company for future issue, and in the meantime will be available for financing purposes.

It is proposed to give six 7 per cent. preference shares in the Canada Steamship Lines in exchange for every five common shares of the Richelieu and Ontario Navigation Company now held. In addition, there will probably be a bonus of the new common stock.

Estimate of Profits.

The consolidated net profits of the companies, as certified by the auditors for 1912, amounted to $1,494,554, as against $552,533 required to pay interest and sinking fund at present to be issued, including the amount reserved to retire underlying bonds, and to pay the balance of the cost of the new steamer Noronic.

On the basis of the increased gross earnings to August 31, 1913, shown by the accountant's report, net earnings of the company for this year are estimated at not less than $1,750,000. Interest at 5 per cent. and sinking fund at 1½ per cent., on $8,500,517 debenture stock will require $552,533, showing a surplus of $1,197,467. In 1914, when the improvements and economies effected by the consolidation have come into operation, it is figured, net earnings should reach at least $2,000,000.

Officers and Directors.

The following is the directorate of the Canada Steamship Lines, Limited:—Messrs. James Carruthers, president; William Wainwright, D. B. Hanna, W. D. Matthews, J. P. Steedman, Sir H. Montagu Allan, C.V.O., H. B. Smith, Edmund Bristol, John R. Binning, M. J. Haney, Aemilius Jarvis, Hon. J. P. B. Casgrain, C. A. Barnard and J. W. Norcross, managing directors. A London advisory board is composed as follows:—Sir Stephen Furness, Sir A. Trevor Dawson, Frederick W. Lewis, Albert Vickers, Sir Vincent Caillard, W. Grant Morden and Claude G. Bryan.

Canadian Coal and Coke Issue.

A block of $750,000 two-year notes of the Canadian Coal and Coke Company have been underwritten. United States bankers, who have become interested in the company's financing, will also advance $500,000 additional.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan.

Winnifred, No. 2853. Wm. Curry, Theresa.
Lambourne, No. 3086. J. Weight, Droxford.
Gaudet, No. 742, $800. R. Gareau, Garonne.
Island Lake, No. 44, $3,000. F. T. Graves, Davis.
Mackenzie, No. 3107, $1,300. B. F. Shaw, Schulz.
Salopian, No. 1216, $800. K. F. Oliphant, Tisdale.
Macklin, No. 2420. A. W. A. Corscadden, Macklin.
Golden Acre, No. 3064, $500. A. G. Schmidt, Hillsley.
Saskatoon, No. 13, $50,000. Wm. P. Bate, Box 1406, Saskatoon.

Alberta.

Peerless, No. 2370, $500. B. Janson, Peerless.
Scandia, No. 2913, $1,250. Y. J. Dokter, Bawlf.
Hanna, No. 2912, $45,000. H. M. Blois, Hanna.
Grainville, No. 2690, $1,500. R. H. Campbell, Alby.
Dow, No. 3010, $1,200. A. L. Parkinson, Pendent d'Oreille.

DEBENTURES AWARDED

Hibbert Township, Ont.—$5,000 5 per cent. 20-year, to Messrs. G. A. Stimson and Company, Toronto.

Scarboro Township, Ont.—$34,000 5½ per cent. 25-years, to Dominion Securities Corporation, Toronto.

CALGARY GETS BOND OFFERS

Edmonton Discovers Mistake in By-Law—Government Bonds and Investor

The finance committee of Calgary recently considered several offers for municipal debentures. Messrs. C. H. Burgess and Company, Toronto, offered 92 for $250,000 of 5 per cents. Messrs. Aemilius Jarvis and Company, Toronto, offered to purchase a block of sinking fund bonds and stated they could place large blocks if the terms were sufficiently attractive. The city clerk was instructed to write that 5 per cent. was the rate and nothing less than par would be considered. Messrs. Parson and Company, Chicago, offered to discuss purchase of industrial building and packing plant bond issues amounting to $600,000. The former issue totalling $250,000 has already been sold elsewhere. Calgary's finance committee expressed disapproval at the establishment of a precedent to peddle small lots of bonds.

City auditor Mouat of Edmonton reported that he had discovered a discrepancy of $15,432.24 in a 1913 local improvement by-law on which debentures were sold this year. The total shown on the schedule of a portion of the by-law was $151,157, and on this basis the debentures have been sold. The total shown is, however, according to the auditor, incorrect to the amount of $9,000 due to mistakes in addition, while further mistakes in including items makes the error $6,435.24 greater.

Commenting on these errors, the auditor says:—

"By-law No. 511 was amalgamated with others under by-law No. 521, and sold to Kleinworts, the date of issue being August 1st. Debentures have, therefore, been oversold to the extent of $15,435.24, made up of the discrepancies above outlined. The amount received for those debentures oversold at present lies in the general funds of the city, but it should not be permitted to remain there. There are two ways by which this amount can now be treated, as follows:—1. Place in the sinking fund; 2. Use to repurchase, on the open market, the debentures oversold. The second method itself is the one whereby, under the circumstances the smallest loss will accrue to the city, and it is recommended."

Government Bonds and Investor.

Government bonds do not appeal to the Canadian investor, for as the annual returns show the funded debt of the Dominion is practically all held in London. The reason for this is that the interest rate is too low to make such bonds attractive. The funded debt of Canada payable in London, amounts to nearly $260,000,000, according to the financial statement on October 30th. The same statement shows the funded debt payable in Canada to be $2,250,000. On November 1st the government paid off about $1,500,000 of this, being the amount of a domestic loan at 4 per cent. raised in 1883. This reduces the funded debt payable in Canada to about $750,000, consisting of savings bank stock issued many years ago.

◆

CANADA'S BANKING SYSTEM

Various happenings during the year have made banking a prominent topic in the Dominion, and the well-known book, Canadian Banking Practice, has often been consulted.

This volume deals with practically every point likely to arise during clients' dealings with a bank. Its author, Mr. J. T. P. Knight, a banker of long experience, has compiled an authoritative volume, which is worthy the best attention of every student and patron of the Canadian banking system.

Canadian Banking Practice. By J. T. P. Knight. Published by F. Wilson Smith, Montreal.

REDUCE THE FIRE WASTE

The greatest causes of the fires which make the $250,000,000 annual fire waste of the United States and Canada a matter of wonder and reproach in the eyes of the rest of the civilized world, are two in number:

Wooden shingles for roofs;
Wooden window sashes and frames.

The use of steel window frames and wired glass in the great cities of the United States, and in a less degree of Canada, has enormously lessened the devastation by fire of property in the last five years in those countries.

It is beginning to be discerned that the economical advantage of concrete and steel buildings is, in congested areas especially, lost when combustible roofs and window casings are combined with "fireproof" walls of steel and concrete in the same structures. The contents of great factories fitted with machinery and vast warehouses filled with merchandise are in vain sought to be protected by fire-resisting walls of steel or concrete, so long as fire-inviting roofs of wooden shingles and wooden window sash and casings are exposed, in these same buildings, to the terrible sweep of wind-driven flame.

The lesson of to-day for architects, builders and owners is that these inconsistencies of building must cease if the dreadful toll paid on this continent by property to the fire fiend is to be lessened.

This warning is perhaps the most forcible of those given to property owners in the admirable addresses to business men being delivered in Canada by Mr. F. H. Wentworth, of Boston, on the subject of fire prevention. The strength of such an admonition is emphasized when we remember that the lecturer named is the chief officer of the National Fire Protection Association, which of late years has done so much to arouse the attention of the public to the dangers of fire.

The statistics of fire waste with which his address abounded are appalling. But many of them have been published already. It is much to be wished that they shall awaken the attention of the commonwealth afresh to the curable ravages of fire and to the measures needful to reduce them.

CANNOT WIDEN GAP INDEFINITELY

The address of Mr. H. V. Meredith at the annual meeting of the Bank of Montreal is of especial interest because it is one of the first comprehensive reviews of the year, and because Mr. Meredith is one of the few men who remembers constantly that there should be a limit to an adverse trade balance. In his summary of conditions this week he shows that, in spite of tight money, Canada has not had such a bad year after all. The crops of the country are valued at approximately $492,000,000. Immigration has continued in satisfactory volume, and there are no signs of a bad trade depression, though a slowing down in many branches of trade is in evidence.

Regarding the financial situation, Mr. Meredith thinks that throughout the world there will be an era of economy which should have a beneficial effect generally. His remarks on this subject are of unusual interest and are printed in detail on another page.

Discussing the trade situation, Mr. Meredith pointed out the returns of the foreign trade of Canada are not unsatisfactory. Imports are falling off, in consequence of the monetary situation and the curtailment of foreign loans. In October the value of imports of merchandise was $8,664,000 less than in the corresponding month in 1912, while for the seven months ending October, the value of imports was only $4,300,000 in excess of last year. On the other hand, the export trade is expanding, the value of domestic products exported in October having been $23,360,000 in excess of the same month a year ago, and the exports for the seven months, $49,330,000 greater than in 1912.

The aggregate foreign trade of Canada for the seven months ending with October was $636,094,000, as against $582,444,000 a year ago, showing a gain of $53,650,000; and in this period the excess of imports over domestic exports has been cut down from $190,000,000 to $145,000,000. This trend of foreign trade is likely to continue for some time. The balance of foreign trade, as you are aware, has been heavily against Canada during the past decade.

In the last six fiscal years, imports exceeded exports in value by $850,000,000, and this considerable gap has been made, in certain quarters, the subject of adverse criticism of the country.

Mr. Meredith added, however, that in this period Canada has obtained immense sums of money from Great Britain for development purposes of various kinds, which money has been imported largely in the form of merchandise, paid for out of the proceeds of long-term loans. "While these loans must ultimately be liquidated from the earning power of this expenditure," he observed, "I may point out that, meanwhile, only the interest charge has to be met; in other words, the excess of imports representative of the proceeds of long-term borrowing, has to be balanced only to the extent of the interest on the loans. This is not, indeed, the whole conclusion of the many-sided subject, into which a variety of considerations enter. We cannot, moreover, expect to go on widening the gap between imports and exports indefinitely. Our annual interest charge on British and foreign loans is already a formidable item, to be provided either by exports or new borrowings. While monetary conditions abroad remain as at present, the stream of fresh capital will run less freely towards Canada."

LARGER MARKET FOR SILVER

Canadian government authorities agree that the new war fund of $30,000,000 to be created in Germany in silver coin will benefit Canada as an exporter of silver. Reporting to Ottawa, Mr. C. F. Just, Canadian Trade Commissioner at Hamburg, states that the German government obtained power from the Reichstag under the Defence Act of last session to create a new war fund (Kriegsschatz) of 120,000,000 marks ($30,000,000) in silver coin, which is to be added to the existing war fund of 120,000,000 marks in gold coin lying since 1873 in the fortress of Spandau near Berlin. At the present price of silver this new hoard will involve the purchase of some 25,000,000 ounces of silver. Germany is actually, and has been for years, a large coiner of silver, a fact which is explained by the enormous increase of population, and the great prosperity of the country.

Successive acts since 1900 have raised the legal limit to the minting of silver coin up to M.20 per head of population (Imperial Mint Act, 1909,) at which it stands today. The actual amount of silver coin of all denominations in circulation at the end of 1912 was 1,101,000,000 marks, with the legal limit to the coining of silver standing at 1,260,000,000 marks, if we take Germany's population at 68,000,000. The unexhausted margin represents nearly 50,000,000 ounces of silver which the Imperial mint will deal with within the next three or four years. Of course, the silver coin for the war fund referred to stands outside, and is in addition to the silver currency needs of the Empire as provided for by legislation. Germany, therefore, is likely to be in the market as a purchaser for very considerable amounts of silver during the next few years, says Mr. Just.

The net cost to the German government of one hundred marks in silver coin averages 45 per cent. of the nominal value, and on this basis, therefore, the cost of the 120,000,000 of marks in silver of the new war fund will be roughly 54,000,000 marks. The Imperial government have adopted the ingenious plan of paying for this new war fund out of the seigniorage or profit to the State on the silver that is being minted annually. During the last few years the Imperial mint has turned out annually 40,000,000 marks of silver coin, showing a seigniorage of 22,000,000 marks, all of which hitherto has been paid into the general revenue. But from the present year and in the future only 10,000,000 marks will be devoted to general revenue purposes, and the remainder is to be earmarked to meet the cost of the new silver war fund which it is hoped to have completed at the latest by 1916. Germany's total production of silver in 1911 was roughly 12,000,000 ounces, of which upwards of one-half was obtained from native ores, and the remainder from imported ores.

The Department of Trade and Commerce reminds us that Commissioner Just's remarks in regard to this new war fund are of interest to Canada from a trade point of view having regard to the fact that Canada now stands third among the silver producing countries of the world, being surpassed by Mexico and United States only. Since the fund must consist of actual bullion, the Dominion should be directly affected as an exporter of this metal.

SMALL CHANGE

Anyway, the Union Life had a strong name.

* * * *

Mexico and the mercury will probably fall during the month.

* * * *

British Columbia's concern is more that the Hindon't than do.

* * * *

For the next nineteen days, if money is really tight, we will have to turn stone into bread.

* * * *

Too bad that White River, Ont., the town in a draught, cannot begin its thermometer tricks.

* * * *

Confederation and *The Monetary Times Annual* have gone different ways, but they were both born the same year.

* * * *

Prince Alfred Hohenlohe-Schillingsfurst is the new Austrian consul at Montreal. The office boy is already calling him Alf for short.

* * * *

Sir Rodmond Roblin says the Manitoba government will spend $3,000,000 on good roads—possibly for verbal as well as vehicular traffic.

* * * *

Just as everyone was moralizing on market ethics and talking about the good boys that were staying at home, Canada shot out its hand for another loan.

* * * *

Controller Thomas Church, of Toronto, having make a joke, which passed unnoticed, he wrote it down and handed to the press. It will probably be returned "with the editor's regrets."

* * * *

Premier Borden, we are told, has just learned Russian from a bath attendant, having previously acquired Japanese from a cook. What a treat is in store next session!

* * * *

Now that British Postmaster Samuel has also got involved in a Home Rule debate, he will probably think that Canada is the famous land where "little boys should be seen and not heard."

MARKET FOR WHEAT UNASSAILABLE

Old Lands Will Look to Canada for Supply—British Confidence in the Dominion

While Canada has been exceedingly urgent in her borrowings, the pressing financial needs of the Dominion, indeed, have caused rates to go up in the London market, the fact remains that the British investor has still absolute confidence in Canada. However, there was always a limit to the loaning power of any country, even of so rich a country as Great Britain, stated Sir George Paish, editor of the London Statist, in an interview at Montreal.

During the Balkan troubles, France, also a very rich country, did not loan as much as usual, and consequently England had in a measure to furnish the difference. At the end of the current year England would have loaned during the twelve months the enormous sum of $1,200,000,000, and out if this sum about £40,000,000 was for the Dominion ot Canada. That, he added, was a great deal of money for any country to loan in one year, and as for the coming twelve months, the borrowing nations would also be very plentiful.

Speaking of the future position of Canada as an exporter of foodstuffs, Sir George said he had on apprehension whatever as to an over-supply. England to-day only produced one-third of her food supply.

No Over-production of Wheat.

Germany also had to import one-third of her total food consumption. If she grew only two-thirds now, her power of production would be constantly on the decline, so it was not a difficult matter to foresee the time when the German Empire would be looking to Canada for a very large wheat supply. If England took 23,000,000 bushels of No. 1 hard this year, it was not, of course, to be doubted that this quantity would be doubled and trebled in a few years to come.

"Then you think that if Canada's wheat crop amounts to, say, 800,000,000 bushels, instead of 200,000,000 as at present, there will be no difficulty of over-production?"

"Absolutely none. The demand for your wheat will increase as rapidly as the supply. The exporting power of the United States will decrease, but it is not a question of competitors in the export business on this side the ocean, but rather one of a very increased demand on the other side. England's requirements will be ever on the increase, as her growing power of foodstuffs will be getting less, and the same thing will apply to the German Empire, and what country is going to reap the benefit if not Canada, with her tremendous stretches of rich country, a great deal of which is being developed every year?"

Preference for Canadian Loans.

Sir George confirms the claim, though it may be questioned by certain people, that Canada gets her money from Great Britain at a cheaper rate than if she were outside the British Empire, and he declares the statement well founded, and that a foreign municipality, however prosperous, has to pay at least one per cent. more for its money than a city ot the Dominion of Canada.

Once more he affirmed that the preference to Canada in the matter of loans is far in excess of any benefit England secures out of Canada's preferential tariff. Canada, he added, can borrow cheaper than the United States or any other foreign country in the British money market, and the Dominion can likewise borrow money cheaper in England than in New York. So much, he says, for belonging to the British Empire apart from the question of patriotism.

Canada's greatest competitor, as far as the supply ot foodstuffs is concerned, will be Russia, which country will see a very great development, both in old Russia and Siberia, but Canada need have no fear, as her market will always be unassailable.

GOLD WITHDRAWALS FROM NEW YORK

No New Cause for Movement—Bank Statement Should Show Interesting Data

There is no new cause to attribute to the movement of gold to Canada on the present heavy scale, even if the aggregate outflow has already exceeded anything of its kind seen for some years past. To attribute this to any financial crisis in the Dominion is wrong. It is well known that money is fairly tight all over Canada just now, due to the movement of the crops, but this is more or less a healthy condition. It may be that gold is more than usually demanded in Canada this year under the operation of the new Canadian bank act, which provides that banks needing additional currency, after having increased their circulation to the extent of 15 per cent. of their capital and surplus by paying an additional tax, can only do so by the deposit of gold at the Canadian treasury, against which they can issue notes, dollar for dollar. In this connection, the Canadian bank statement for the current month should offer some interesting data. The selling of Canadian grain bills in this market against the movement of Canadian grain through American ports is, of course, the absorbing factor in the present situation, comments the Wall Street Journal.

Gold coin for the Dominion, making a total of $13,600,000 on the present movement, was withdrawn from New York.

Of the banks shipping the gold to Canada the American Exchange National Bank withdrew $1,500,000, the National City Bank $800,000, the Importers and Traders National Bank $300,000, and the Bank of New York $300,000.

Montreal exchange underwent an advance of 1-64 of 1 per cent., bringing it up to 1-16 of 1 per cent. discount. This may be the beginning of the advance which will automatically shut off the gold movement for the present. At all events, to-day is the last day that the Canadian banks can ship the gold to figure in their November 30 statement. Under ordinary conditions it is to be expected that a Canadian gold movement should end with the close of a month. Whether the extensive grain movement on this occasion will continue the gold shipments remains to be seen.

Sold Much Grain and Livestock.

Canada has already sold to foreign countries this season fully $200,000,000 worth of grain and livestock. This explains the gold movement in large part. But another reason is because the Dominion was able to work off her splendid grain harvests much more successfully both in point of time and in volume than in earlier years. Not only was this harvest season earlier than in 1912, but the weather for threshing, for delivery at local points and for carriage by rail to the upper lakes, as well as for shipping down the lakes, was all in favor of an early, liberal marketing of crops. The rapidity with which the Canadian grain growers and traders turned the staples into cash has seldom, if ever been succeeded in earlier seasons. Hence the concentration of demand for gold at the end of the first sixty days of marketing of the greater part of the 600,000,000 bushels of grain produced this season.

Last year Canada's grain matured rather slowly. There was serious delay in the beginning of October in harvesting operations. The railroads were not in position to handle promptly the rush of grain offered, and the terminals were congested to an extent which caused wide-spread complaint. To make matters worse, other grain countries underbid Canada.

Markets for Wheat and Oats.

There was a whole week, early in November, when Canada was without export orders, on account of free selling of Argentine and Russian wheat. This practically checked the export movement and failed to relieve the channels of storage and transport when, above all things, it was necessary to avoid hitches of any kind. Less than half of the grain crops in western Canada was moved last year at the close of navigation. The season of insurances for handling cargoes closed then on November 30. Port Arthur and Fort William had 32,000,000 bushels of grain in elevators and vessels, in December, against less than 20,000,000 bushels on November 20, this year.

During the current season, on the contrary, Europe's capacity to take Canadian wheat, and America's readiness to absorb Canada's oats, left little to be desired. The terminal facilities and the railway equipment were greatly improved over those of 1912. Removal of the tariff brought many thousands of livestock across the border this fall. Better markets and better methods resulted in piling up credits in New York against the gold withdrawals now being made.

MONTREAL STOCK MARKET

Brokers Are Somewhat Expectant—Canada Steamship Lines Financing

Monetary Times Office,
Montreal, December 3rd.

Montreal stock market has reflected the sanguine feeling which is found among a number of brokers on the street. Many of these express the view that from this forward money should become more plentiful, even though interest rates may not be affected for some time. It has been predicted that when the money market gets into shape there will be a sharp advance in most local stocks. Reference is usually made to Montreal Power as well as to a number of other stocks, such as Canadian Cottons preferred and common, Cement stocks, public utility stocks as a whole some of the iron stocks, Richelieu and textile stocks. In the case of Montreal Power the claim is made that the supply for the street was never so light as it is at the present time, and upon the appearance of anything in the nature of buying movement the price would advance sharply. This prediction has been more or less justified during the past week, Power having risen from around 210-11 to 216¾ at the close of to-day's market. Transactions on the upgrade, while showing considerable increase as compared with the recent trading, were fairly large.

Interest in Richelieu and Ontario.

Canadian Pacific Railway also showed a firm disposition this week. The price, however, is still quoted around 225½ as compared with 225 a week ago. As the stock has become ex-dividend 2½ per cent. in the meantime, it will be seen that a rise of about three points has taken place. Another stock which has occasioned interest during the past week is Richelieu and Ontario. The market for this stock has not been particularly strong, yet the price has advanced one or two points, and the quotation is now in the vicinity of 108½. The turnover some days has been quite large. The particular interest in this stock at the present time is due to the announcement that the financing of the Canada Steamship Lines, which has been delayed so long, has at last been accomplished and that Mr. J. Carruthers, president of the Richelieu and Ontario, has been instructed to turn that company over to the Canada Steamship Lines. Mr. Carruthers has been invited to become president of the Canada Steamship Lines.

Another stock which, after a weak turn, developed strength and is now selling at a good advance, is Dominion Steel Corporation. A week ago the stock was selling at 40. Thereafter it lost a fraction, but to-day it developed strength once more and then went to 41¼. There was moderate trading and at the close the price fell back again somewhat.

Ottawa Traction Companies.

Activity has also developed in Ottawa Power and the market has strengthened up from around 160 to 165, latest sales being at a slight recession from this figure. Activity is thought to be due to purchasing in the hope that something may be going on in Ottawa in connection with the new Ottawa Traction Company, which is supposed to be the holding company for the power company and electric railway.

Brazilian has been a strong stock during the week also. From 85 a week ago the price has fluctuated somewhat, but at the close to-night was within a small fraction of 87. There is active buying of the stock and it is reported that quite a little of it is going over to England. In fact, English buying is said to be one of the features of the market of late, the claim being made that English buyers have taken away quite a quantity of stock of various kinds from here. Brokers also assert that for a considerable time past they have been picking up small quantities of stocks for their customers throughout the country and that these stocks have been taken out of the market completely. This places stocks in a strong technical position for a rise whenever interest rates show a disposition to decline.

◆

"British investors will be more critical of Canadian securities in the future," said Mr. Cawthra Mulock on his return from Europe, "but they will continue to be large customers for the better class of Canadian offerings, an attitude which will be immensely beneficial to this country in the long run. The improvement in the outlook from a financial standpoint which has been marked during the past few weeks has effected a considerable change in sentiment abroad. The prospect is for a distinct easing in monetary conditions in 1914, with a consequent enhancement in the market values of bonds and other high-class securities."

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—New Stock Exchange Listings

CANADIAN FLOTATIONS IN LONDON IN NOVEMBER.

City of Saskatoon.—£169,700 5 per cents. at 93.

City of Toronto.—£1,200,000 4½ per cents. at 97½.

Dominion Steel Corporation.—£700,000 6 per cent. five-year notes at 97.

City of Montreal.—£1,500,000 4½ per cent. registered stock at 98½.

Porto Rico Railways Company.—$500,000 7 per cent. common preference shares.

Spanish River Pulp and Paper Mills, Limited.—£300,000 6 per cent. two and three-year notes at 96.

British Canadian Lumber Corporation, Limited.—$3,000,000 8 per cent. registered secured notes at 95, repayable on December 31, 1916 at 107 per cent.

NEW STOCK EXCHANGE LISTINGS.

The Canadian Fairbanks Morse Company, Limited, listed 15,000 shares of preferred stock on the Montreal Stock Exchange.

SPECULATIVE AND INVESTMENT OFFERINGS.

Canadian Jewellers, Limited.—$150,000 3-year 7 per cent. debentures at 95.

Maisonneuve Cast Stone Company, Limited.—Offering of $30,000 6 per cent. 10-year first mortgage bonds with 100 per cent. bonus of common stock.

The Oxygenated Stove and Heater Company, Limited.—Offering of 274,975 shares of ordinary stock and 25,000 shares of preference stock. Capital, $350,000.

Model Dairies, Limited.—Offering of $450,000 7 per cent. cumulative preferred stock at par, carrying with it a bonus of 50 per cent. common stock. Capital $1,000,000.

Canadian North-West Steamship Company.—A block of $135,000 6 per cent. first mortgage serial gold bonds of the Canadian North-West Steamship Company, Limited, of Port Arthur was offered by Messrs. Peabody, Houghteling and Company, Chicago. The bonds were issued for the purpose of refunding the present floating debt and supplying additional working capital.

NOVEMBER DIVIDEND CHANGES.

The London and Canadian Loan and Agency Company increased its dividend from 7 to 8 per cent.

The Dominion Bank declared the regular quarterly dividend of 3 per cent., with a bonus of 2 per cent., payable January 2nd.

The Canadian General Electric Company declared a dividend of 1¾ per cent. and bonus of 1 per cent., payable January 2nd.

Trust and Loan Company of Canada increased their dividend from 8 per cent. to 9 per cent. per annum.

West Kootenay Power and Light Company increased its dividend from 4 to 5 per cent., declaring a quarterly disbursement of 1¼ per cent., payable December 1 to shareholders of record of November 24.

The Hamilton Provident and Loan Society increased its dividend from 7 per cent. to 8 per cent.

The half-yearly interest, due on October 1st on $232,000 5 per cent. bond issue of the Intercolonial Coal Mining Company, was not paid.

The Unity Building Company, owners of the large Unity Building, Alexander Street, Montreal, decided to defer payment of their bond interest.

◆

Messrs. J. A. Stewart and W. E. Danner have purchased the entire stock of the Canadian end of Henry K. Wampole and Company, Limited, control of which was formerly held in Philadelphia. Mr. Stewart is the new president, Mr. Danner vice-president and general manager, and T. J. Maher, secretary-treasurer.

MANY COMMENTS ON DOMINION LONDON LOAN

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

DOMINION BORROWS TWENTY MILLIONS

To Retire Treasury Notes and Reimburse Government for Grand Trunk Bonds—London Writers Are Critical

The Canadian Government loan now being placed in London is the third public issue since the present government assumed office. The first was for £5,000,000 in February, 1911, for the purpose of retiring a loan of like amount maturing on May 1st, 1911. The next was for £3,000,000 in September last. Out of the proceeds of this issue a sterling loan of £1,700,000, maturing on October 1st, and a currency loan of $1,400,000, maturing November 1st, were paid off. The present issue is for £4,000,000, subscriptions being payable in four monthly instalments, as is usual in the case of Dominion flotations. Out of the proceeds will be paid £1,000,000 of treasury bills maturing in February and £1,000,000 maturing in March. The balance will partly recoup the government for expenditure in purchasing Grand Trunk Pacific Railway bonds guaranteed by the government as a result of the "implementing" agreement. The funds thus recouped became available for capital or other expenditure of the government. In addition to the above loans paid off during the past two years, debentures of the government to the amount of $2,500,000 were redeemed in March and April of the present year.

Hopes Loan Will be Supported.

The following cable indicates the effect of the loan on the market and the comments expressed regarding same:—

†London, December 1.—A new Canadian Government loan is being underwritten to the amount of four millions sterling 4 per cent. stock, due 1940-60, at 97 per cent. The full six months' dividend will be payable April 1st. The old stock was quoted Saturday at 99⅛.

This second early application by the Dominion to the London market is no doubt considered advisable in view of the fact that early in the new year a great number of capital issues on a gigantic scale from other quarters will be made. The more favorable reception accorded Canadian applications recently gives hope that the new loan, which is at a very favorable figure, will be well supported.

MARKET GRUMBLES AT APPLICATION

†London, December 2.—It is understood that the new Dominion loan is required to retire the treasury bills to pay for the Grand Trunk Pacific bonds which the government bought some little time back. The London market is inclined to grumble at this second early application by Canada.

"The appearance of this big loan is very inopportune," says the Daily News. "So inopportune, indeed, that the last Canadian loan, which was quoted at ⅛ per cent. discount to ⅛ per cent. premium on Saturdav, slumped to 2½ discount and consols dived down to a fresh low record when the quarterly dividend had been deducted. Of course, there are a lot more new loans to come, but not all are such a direct competition as that of Canada. Had Canada deferred her loan operation until the new year the effect would probably have been less, but in any case can it be wondered at, that existing high-class securities should shudder? The terms on which the new Canada loan are offered are clearly attractive. They must be attractive, else the loan will not be absorbed quickly."

The Morning Post says: "With such tidal waves as this new Canadian loan rolling up unexpectedly, it is best to be down in the cabin. The government has also disposed privately of some three million sterling in the London market in the course of the last half-year. This system of liquidating debts by the sale of two different sorts of securities in one market almost at the same time is novel. It seems to us also undesirable, and must make it impossible for the investor to have any clear idea of the financial position of the debtor. Besides, the small investor may well be vexed to find that he is lending to the government at 4 per cent. almost at the same time as his banker is lending at 4½ per cent."

FLOOD OF NEW ISSUES

(Central News cable to *The Monetary Times.*)

London, December 5.—As a result of the deadlock over the new French loan caution is being exercised in financial circles, and the financing of the floating indebtedness of the European governments, which aggregates approximately £220,000,000, has been delayed. It is not believed here that the French operation will come out this year.

A flood of new issues has had a chilling effect on dealings on the stock exchange. The new four million pound 4 per cent. Canadian government loan hampered Toronto's 4 per cent. loan of £1,200,000, only fifty per cent. being subscribed for. It had been understood on Monday that the Toronto flotation had been covered, but the tenders were withdrawn later. The result of the new Canadian government loan remains in doubt. There have been fears that the outcome will be an inquiry for gold from the Dominion. The city's allotment of half of the one million pound 4½ per cent. city of Stockholm loan was offered here to-day. The remainder will be disposed of on the continent.

Money is more plentiful, but rates for bills are hard. The Bank of England's minimum rate of discount was left unchanged at 5 per cent. to-day! There have been reports in the air that Paris will be a heavy purchaser of gold in January. It is believed that new loans will more than offset the funds that will be released after the first of the year.

There has been no improvement in the British labor situation. The employees of the home railways are particularly troublesome. The strike on the Great Western Railway is responsible for the throwing out of employment of about fifteen thousand coal miners in South Wales.

PUBLIC TOOK HALF TORONTO'S LOAN

†London, December 3.—The Canadian Associated Press understands that fifty per cent. of Toronto's 4½ per cent. loan at 97½ has been left with the underwriters. The issue is now quoted at 1¾ per cent. discount.

QUEBEC GOVERNMENT MAY ACQUIRE RAILWAY

*London, December 1.—It is understood among the creditors of the Charing Cross Bank, now in liquidation, that the Quebec Government is considering the purchase of the Atlantic, Quebec and Western Railway, whose bonds are the bank's chief asset.

Canadian groups hold options upon 400,000 acres of land, and the grant expires January 1st, 1914.

INVESTING PUBLIC ARE CANNY

†London, November 28.—News of the new Toronto loan has caused the city's issue of last January to drop to ninety to-day.

It is likely, however, that the new security will be in good demand, but the investing public has become uncommonly canny lately, often leaving a large portion of a new issue with the underwriters and taking it up later.

Montreal's recent success has put fresh heart into the Canadian market and several other new loans are mooted.

REVENUE SUFFICIENT TO PAY INTEREST

†London, November 28.—The prospectus appears this morning under the authority of Lloyd's Bank of the issue of the City of Toronto general consolidated load debentures for £1,200,000, bearing 4½ per cent. interest at the price 97½ per cent. The loan is redeemable in 1948, and both principal and interest payable at Lloyds Bank in London.

The estimated assessment of the city for the coming year as $102,000,000 and the value of municipal assets is stated at just over £8,000,000, while the estimated gross revenue is £2,349,000.

It is stated that the revenue of the city for 1913 from its proportion of receipts of the Toronto Street Railway, from the city waterworks and from other sources, apart altogether from the usual source of taxation, is estimated at £684,000, or more than sufficient to pay the interest on the entire debit of the city.

BRITISH COLUMBIA'S MANUFACTURERS

Harbor Improvements at Vancouver—Interests Want Franchises to Run Motor Buses

(Staff Correspondence.)

Vancouver, November 29th.

Complete details have not yet arrived regarding the improvements to Vancouver harbor, which are contemplated by the government, but some idea has been given relative to False Creek.

In Fasle Creek there is to be a channel 1,200 feet wide, with a depth below low water of 40 feet. Mr. Swan, the government engineer, is expected on the coast in connection with the development of this waterway.

Manufacturers and Home Industries.

Northern Pacific Railway officials paid a quiet visit to Vancouver this week, they made an inspection of the terminals at the head of False Creek and the docks of the Great Northern on Burrard Inlet. The Northern Pacific is allied with the Great Northern in its Vancouver terminal scheme.

Members of the recently organized British Columbia Manufacturers Association gathered together at a banquet, at which the president, Mr. F. T. Cope, outlined the aims and objects. Ninety-three firms are included in the membership. This organization will promote the use of goods manufactured in British Columbia, and take up matters like freight rates, new industries, cheaper sites, etc. It was reported at the banquet that the Alberta manufacturers would co-operate with those in British Columbia.

Want to Run Motor Buses.

Prominent Vancouver citizens have approached the councils of the municipalities in and about Vancouver for an exclusive franchise to operate motor buses. They agree to begin operation in Vancouver within six months of the date of an agreement between them and the city, to charge the same fares as the British Electric and to give transfers between different lines. The application has been made by Messrs. Fred. Buscombe, a former mayor of Vancouver; J. G. Woods, a sawmill man and shingle manufacturer; John W. Weart, a lawyer and former Reeve of Burnaby; and Joseph Martin, M.P., of London.

Ex-Alderman J. D. McNeill is principal in a syndicate which proposes to build a large dock on the south shore of False Creek at which big boats may dock. The expenditure involved will be about a quarter of a million dollars. A start will be made almost immediately in the building supply and coal business and expansion will be made as conditions warrant.

◆

COMPANIES INCREASING CAPITAL

The following companies in Manitoba have increased their capital stock:—

E. H. Briggs Company, Limited, from $40,000 to $200,000.

Federal Grain Company, Limited, from $40,000 to $100,000.

The following companies in Canada have increased their capital stock:—

Mexico Tramways Company, from $20,000,000 to $30,000,000.

The Consolidated Realty Company, Limited, from $90,000 to $500,000.

The John Ritchie Company, Limited, from $100,000 to $300,000.

The following companies in Ontario have increased their capital stock:—

Canadian General Securities Company, Limited, from $200,000 to $400,000.

La Mine D'Or Huronia, Limited, from $1,000,000 to $2,500,000.

Petrolia Wagon Company, Limited, from $100,000 to $500,000.

The Murray Shoe Company, Limited, from $50,000 to $100,000.

Gunn, Langlois & Company, Limited, from $250,000 to $500,000.

The American Laundry Machinery Company, Limited, from $40,000 to $150,000.

Getty & Scott, Limited, from $100,000 to $1,000,000.

The following companies in Alberta have increased their capital stock.

The Elrick Concrete and Construction Company, Limited, from $10,000 to $100,000.

Realty Investment Corporation, Limited, from $55,000 to $300,000.

VALUE OF LIFE INSURANCE

XLI.

When Money Is Dear

BY C. A. HASTINGS

When are ordinary securities, such as stocks and shares or deeds of property, least valuable? Surely they are when wanted as collateral and when it is most necessary that a loan be arranged to tide over a period of temporary embarrassment. Take any man who finds himself in such a position that he is forced to realize on gilt-edged securities in markets as they were a few months ago—is he not enduring a distinct hardship? But supposing he has deposited such securities with his bankers to cover a loan for business purposes, they (his bankers) may find it necessary to act more stringently than heretofore, and may decline the security deposited because markets are weakening and prices are diminishing—and at a time when the loan is most urgent; what is he going to do?

Cannot Diminish One Cent.

He must find some security that cannot diminish one cent in value, even in a panic—and which is also backed by the guarantee of a first-class financial corporation. He then discovers it is a life policy: that it is the only collateral security which is incapable of diminution in value, because the payment of each premium increases the value.

Can Demand the Money.

Reference has been made to banks, but the borrower, if his policy has been in force, say, half the period it calls for, can do much better by going to the life company. He can then demand the money, he has not got to undergo any doubt, and he can get it in cash at once, and last but not least, there is no demand for repayment. Is not that a splendid position to be in—to be able to demand a loan at low interest and keep it as long as you please?

◆

MONTREAL'S CIVIC BUDGET.

Montreal's budget for the year 1914, approximating a total appropriation of $12,330,172 of revenue, was laid before a meeting of the city council recently.

The budget is the largest in the history of the city. Last year the budget was for $10,384,473.

The following are the appropriations:—Interest and sinking fund, 1914, $3,452,000, 1912, $2,675,000; school tax, 1914, $1,940,000, 1913, $1,650,000; reserve fund, 1914, $959,905, 1913, $311,534; possible loss in the collection of taxes, 1914, $80,000, 1913, $100,000; officers of council, salaries, 1914, $13,000, 1913, $11,600; salaries and wages, 1914, $3,607,986, 1913, $3,061,704; maintenance, repairs and general expenses of administration, 1914, $2,735,776, 1913, $2,446,733; pensions and annuities, 1914, $31,505, 1913, $20,612; general contingent pension fund, readjustment of salaries, 1912, $100,000, 1913, $107,290.

The estimated amount available for 1914:—Rolls of 1913, assessments, $8,326,337; water rates, $1,187,509; business tax, $970,838; total, $10,484,744.10; other revenues, to October 31, $1,243,955; Montreal Street Railway percentage, $502,052; estimated revenue for November and December, $174,421; total, $124,951.72; curtailment on account of reduction of water rates, $75,000; total, $12,330,178.

The interest and sinking fund appropriation:—Funded debt, $69,746,270; interest, 1913, $1,896,118, 1914, $2,848,495; floating debt, 1914, $45,939; commissions, $12,000; interest on issues of treasury bills in anticipation of loans, 1914, $316,500; total, $3,227,934.

The projected loans in 1914 total $14,104,000.

Sinking funds, payments on loans in 1912 and 1913, total $229,066; total interest and sinking funds, $3,452,000.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended November 28th, 1913:—

Cobalt Townsite Mine, 80,800; La Rose Mines, Limited, 395,020; McKinley-Darragh-Savage Mines, 214,497; Nipissing Mining Company, 122,760; Kerr Lake Mining Company, 81,170; total, 894,247. The total shipments since January 1st are now 37,120,683 pounds, or 18,560 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

HANDLING SHIPPING IN PANAMA CANAL

Terminal Coal and Oil Facilities—Docks and Repair Shops

Development of plans for meeting the demands of shipping in the Panama Canal in the way of terminals, coaling stations, warehouses, wharves, dry docks and repair shops, are outlined in the report to the war department of the Isthmian Canal Commission for the year ended June 30 last. The report was prepared by Colonel George W. Goethals, chairman and chief engineer of the Corps of Engineers, U.S.A.

Terminal facilities for shipping, the report states, cannot be completed by the time the canal is ready for passing vessels. The reason for this is the fact that the authorization for preparing such facilities was not made by Congress till August 24, 1912, and active operations could not be begun until the fall of that year.

The Pacific terminals which are being constructed by the commission, will consist of a main dry dock capable of docking any vessel than can utilize the locks, a smaller dry dock for use of smaller craft, a plant for supplying coal and fuel oil to vessels, the necessary wharves and piers for commercial purposes, and the permanent shops for use in connection with the dry docks.

The Atlantic terminals consist of wharves and piers at Cristobal, including the Cristobal mole, all of which are being constructed by the Panama Railroad at its own expense, and the main plant for supplying coal and fuel oil to vessels. The cost of the coaling plant will be divided between the commission and the railroad, while the commission will furnish facilities for oil.

Provision for Coal Firms.

Numerous applications, the report states, have been received from coal dealers for loading space for the handling of their coal in supplying vessels that will use the canal. In order to encourage the business of furnishing coal to vessels which use the canal, the policy has been adopted of providing storage in connection with both coaling plants for the coal piles of individuals and companies who desire to participate. It was never intended that the government should exercise a monopoly of the coal business on the Isthmus, but to utilize the coal stored there for the use of the navy in maintaining uniform prices of this product to shipping. There will be a certain rental charge for the areas occupied by the coal dealers, and, in addition, a real estate tax of 1 per cent. of the value of the improvements, should any be made, and a merchandise tax of 5 cents for each 2,000 lbs. of coal sold.

The government will attend to all the handling and charges for putting the coal into storage and taking it out; charges for the use of coal barges, and other labor in connection with this service will be fixed at cost price to the government for such service.

Fuel Oil Supply.

The same policy has been adopted with reference to fuel oil. It is proposed to equip the wharf in the vicinity of the coaling station at the Pacific terminus and at two docks at Mount Hope on the Atlantic side with fuel oil supply and delivery mains in duplicate, together with the necessary pumps.

In anticipation of requirements that will develop after completion of the canal, investigations and inspections were made of the principal floating cranes in the United States, Canada and foreign countries. It was decided that two floating cranes of the largest size would be necessary to meet the conditions that might arise in handling lock and dock gate leaves. The cranes also will be required, as regards lifting capacity, to meet the needs of the navy department. The award was made to a German company, the Deutsche Maschinene Fabrik, for about $827,550 for the two cranes, to be delivered before January 1, 1915.

Of the Saskatchewan proposal to create a control authority for the supervision of municipal loans, the London Economist says:—"The Government of Saskatchewan is to be congratulated very warmly on having taken this initiative; and if the board be well considered, we believe, it might confer very great benefits upon the growing towns and villages of this vast province. It is impossible for a town with only a few thousand inhabitants to borrow successfully, at a reasonable rate of interest, from the London market, for a loan which is too large for a growing town is too small for investors owing to the restricted character of the market, which makes it very difficult to sell the stock. If the finance of the towns were strictly supervised by the board the small loans could be co-ordinated, and legitimate capital expenditure could be provided for on reasonable terms. There ought to be a central audit and a central valuer; the appointments should be made by merit and open competition."

IRON FROM MINES AND FURNACES

Added Substantial Sum to Canada's Mineral Returns

The total production of pig iron in Canadian blast furnaces in 1912 was 1,014,587 tons, valued at $14,550,999, of which it is estimated 978,232 tons, valued at $14,100,113, should be credited to imported ores, and 36,355 tons, valued at $450,886, to domestic ores. In 1911 the total production was 917,535 tons, valued at $12,307,125, of which 875,349 tons, valued at $11,693,721, should be credited to imported ores, and 42,186 tons, valued at $613,404, to domestic ores.

The exports of pig iron, including ferro-products, in 1912, were 6,976 tons, valued at $310,702, as against 5,870 tons, valued at $271,968, in 1911.

Iron and Steel Manufactures.

The imports of pig iron in 1912 were 272,565 tons, valued at $3,511,599, ferro-manganese, etc., 19,810 tons, valued at $469,884, and charcoal pig 115 tons, valued at $1,370, as compared with imports in 1911 of pig iron 208,487 tons, valued at $2,610,989, and ferro-manganese, etc., 17,226 tons, valued at $429,465, according to the figures of Mr. J. McLeish, B.A., of the department of mines.

The total exports of iron and steel and manufactures thereof, in 1912, were valued at $10,682,484, as against $9,907,281 in 1911. The imports of iron and steel and manufactures thereof during the calendar year 1912 were valued at $124,376,986, as compared with $93,171,817 during the calendar year 1911.

Shipments of Ore.

The total shipments of iron ore from Canadian mines in 1912 were 215,883 tons, valued at $523,315, as compared with 210,344 tons, valued at $522,319, in 1911. The exports of iron ore in 1912 were 118,129 tons, valued at $382,005, as against 37,686 tons, valued at $133,411, in 1911. The quantity of imported iron ore used in Canada in 1912 was about 2,019,165 tons, as compared with 1,628,368 tons of imported ore used in 1911.

RURAL TELEPHONE COMPANIES INCORPORATED

The following is a list of rural telephone companies incorporated in Saskatchewan, together with their capital and head office:—

South Kisbey Rural Telephone Company, Limited, Kisbey, $400.

Lynne Rural Telephone Company, Limited, Langham, $300.

◆

PERSONAL NOTES.

Mr. Keith Scott, chartered accountant, has opened offices at Regina and Swift Current, Saskatchewan.

Mr. C. B. Gordon has been elected a director of the Ogilvie Flour Mills Company, to fill the vacancy caused by Mr. Norton.

Mr. J. W. W. Stewart, managing director of the Monarch Life Insurance Company, Winnipeg, has been visiting Toronto with a view of increasing the company's organization.

Mr. George J. Webster, who has been connected with the Dominion Bond Company, Toronto, is leaving for Detroit, where he will become manager of the Lake Superior Iron and Chemical Company.

Mr. Frank W. Baillie, of Messrs. Baillie, Wood & Croft, and Mr. J. D. Montgomery, of Messrs. McMaster, Montgomery, Fleury & Company, have been appointed directors of the North American Accident Insurance.

Messrs. R. M. Hickson and A. E. Rex are the principals of a new Montreal financial house. The firm will go under the name of Messrs. Hickson & Rex, and will purchase the Stock Exchange seat of the late Mr. J. E. Gaudet, of J. E. Gaudet & Company, which firm is about to be dissolved.

◆

RECORD OF TRADE DISPUTES

The Department of Labor reports that the industrial situation from the standpoint of the number of trade disputes in existence, was better in October than at any time during the year. The loss of time to employees through trade disputes actually commencing during that month was small, and in all there were only eight disputes in existence, this number including those already in existence at the beginning of the month, and those which commenced during October. On no occasion during the present year has the number been as small as this; the next best record being in September, when eleven disputes were reported. About 3,657 employees were directly and indirectly involved in the disputes of the month. About 70,000 working days were lost through strikes and lockouts during October as compared with 83,380 during September, and 98,000 in October, 1912. As in the previous months the most important dispute was that of coal miners on Vancouver Island. It is difficult to estimate the loss of time through this dispute, as it is probable that the strikers obtain work from time to time in other localities and that other men are taken on by the operators concerned. An estimate would show about 2,000 men out of work directly as a result of this dispute during October.

FIRE PREMIUMS AND LOSSES

How the Insurance Companies From Several Lands Fared Last Year in Canada

During 1912, the latest year for which official statistics are available, the business of fire insurance in Canada was carried on by 80 companies; of these 28 were Canadian, 23 British, 27 United States, and 2 French. This list of companies differs from that of the previous year by the addition of four Canadian companies (the British Colonial, the British Northwestern, the Mount Royal, and the North West Fire), one British company (the Palatine), eleven United States companies (the American Central, the American Insurance, the California Insurance Company, the Fireman's Fund, the Firemen's Insurance Company, the Germania Fire, the Insurance Company of the State of Pennsylvania, the Niagara Fire, the Northwestern National, the Providence Washington, and the Westchester Fire, and one French company (Compagnie d'Assurances Générales).

Since the beginning of 1913 the Equitable Fire and Marine Insurance Company has received a license for fire business.

Fire Premiums and Losses.

Cash received for premiums during the year in Canada amounted to $23,194,518, being greater than that received in 1911 by $2,619,263, and the amount paid for losses was $12,119,581, which is greater than that paid in 1911 by $1,182,633. The ratio of losses paid to premiums received is shown in the following table:—

Companies.	Paid for losses.	Received for premiums	Rate of Losses paid per cent. of premiums received.	The same for 1911.
	$	$		
Canadian	2,731,761	5,063,409	53.95	53.29
British	6,319,064	12,092,125	52.26	55.17
United States and other	3,068,756	6,038,984	50.82	48.16
Totals	12,119,581	23,194,518	52.25	53.16

How the Companies Fared.

Taking the totals of premiums and losses paid for the forty-four years, 1869-1912, according to the nationalities of the companies, the following are the results:—

Companies.	Premiums received.	Losses paid.	Rate of losses paid per cent. of premiums received.
Canadian	$76,555,581	$48,581,432	63.46
British	212,554,440	133,819,249	62.96
United States and other	54,125,749	31,214,209	57.67
Totals	$343,235,770	$213,614,890	62.24

The loss rate for 1912 (52.25) is 9.99 below the average for the forty-four years over which the Dominion government's records extend.

Obtaining an approximation to the losses incurred during the year, by excluding the estimates for losses outstanding at the beginning of the year, and including the amounts estimated for those of the year still unsettled, the ratio of the losses incurred to premiums received comes out 51.12 per cent., which is 1.42 per cent. less than the 52.54 of the previous year, and is 7.67 per cent. less than the average for the last fifteen years (58.79). The following are the rates of incurred losses from 1907:—

Companies.	1912.	1911.	1910.	1909.	1908.	1907.
Canadian	52.59	53.08	60.41	55.87	72.11	53.28
British	50.95	53.80	57.01	49.74	58.07	55.22
American and other	50.21	48.95	59.72	46.72	55.74	51.36
Totals	51.12	52.54	58.40	50.46	60.77	54.02

Gross Amount of Policies.

The gross amount of policies, new and renewed, taken during the year by fire companies was $2,374,161,732, which is greater by $386,521,141 than the amount taken in 1911. The premiums charged thereon amounted in 1912 to $30,639,867, being $3,772,698 greater than the amount charged the previous year. The rate of premiums (1.291) is lower than that of 1911 (1.352). The loss rate (52.25) is 0.91 per cent. lower than the loss rate of the previous year (53.16) and 9.99 per cent. less than the average loss rate (62.24) from the past forty-four years.

The rate per cent. of premiums charged upon risks taken is shown in the following table:—

Companies.	Gross amount of risks taken during the year.	Premiums charged thereon.	Rate of premiums charged per cent. of risks taken.	The same for 1911.
	$	$		
Canadian	653,582,426	8,882,416	1.36	1.41
British	1,148,396,318	14,451,466	1.26	1.33
United States and other	572,182,988	7,305,984	1.28	1.33
Totals	2,374,161,732	30,639,866	1.29	1.35

The increase in the amounts taken in 1912 as compared with 1911 among Canadian companies is $81,516,414. Among British companies there is an increase of $150,294,771, and among United States companies there is an increase of $154,709,956.

In 1911 the increases in amounts written among Canadian, British and United States companies reporting to the office were $53,972,445, $62,003,939 and $64,608,522 respectively.

◆

MR. EASSON AT TORONTO.

Mr. C. H. Easson, the well-known banker, has been appointed as manager of the Toronto branch of the Bank of Nova Scotia. His connection with this bank extends over 25 years, with a short interval last year. Late in 1912, Mr. Easson assumed the general managership of the Bank of New Brunswick, which institution has since been amalgamated with the Bank of Nova Scotia, the aforesaid appointment accruing from this joining of forces.

MR. C. H. EASSON.

GRAND TRUNK'S OCTOBER STATEMENT.

The Grand Trunk Railway's October statement shows profits as follows:—Grand Trunk proper, increase, £26,900; Canada Atlantic, decrease, £3,050; Grand Trunk Western, decrease, £900; Grand Trunk and New Haven, increase, £2,850; whole system, increase, £28,500.

◆

GREAT LAKES SHIPPING LOSSES.

Cable despatches received from London state that the liability of Lloyds for shipping losses during the November 9 to 11 storm on the Great Lakes is calculated to exceed $7,500,000; while losses to marine companies in the United States and Canada, including the Great Lakes Protective Association, will be nearly half that amount. This means a property loss of $11,275,000. The loss of life has been placed at 277.

MANUAL LABOR A GOOD UNIVERSITY

Young Men Who Play With Canada's Credit Should Try the Pick and Shovel

Discussing the problems arising from immigration to Canada, Mr. W. Sanford Evans of Winnipeg in an address to the Associated Canadian Club at Hamilton said that one of the general conditions in which there is the most danger is the chance there has been for making "easy money." With so many transactions and so great a volume of money passing, it has been possible for many to get a "rake off," to make "easy money." Men have left banks to go into the real estate and financial business. "They have even left the Church," he continued. "They have left everything for the performance of a function which temporarily has been highly profitable, but only temporarily, because that condition can only be temporary. There is no objection to agents arising to meet an opportunity for agency and everyone is glad to see someone else make money, but what effect is this having on the nation's character and on the nation's point of view?

Is a Great University.

"In the list of the men in Canada who worked on the construction of the Canadian Pacific Railway, or on some of the other pioneer lines in this country, are many of the strongest, most successful and most useful citizens of Canada. Are any Canadians working on railway construction to-day? I believe that the building of the Canadian Pacific Railway, the actual manual labor with pick and shovel and axe, was the greatest university this country ever had. It developed more real quality than any other institution. Are we training any more of the native born in the same kind of school to-day? You know what the Canadian is now apt to say:—'It is not white man's work; leave that to the Dago or the Galician, it is good enough for them.' Is there any significance in this fact? There are any number of young men who by accident of the present situation are playing with finance and playing with the credit of Canada, who for their own good and for the good of Canada ought to be working on railway construction for the next ten years. There is no honest work that is not white man's work, that is not good enough for any one.

Men Who do the Work.

"We may lay it down in general that that class will rule this country, which, first, has the right attitude towards work, which, second, appreciates and practices sound finance, and which, thirdly, builds homes. If we, the native born, are carried away with the idea of making 'easy money' and leave other people to get down and do the real work, it will not be long before we are pushed to one side and the people who are doing the real work will come to the top. The same will be true if we fail to appreciate and practice sound finance. Much of this 'easy money' making is unsound finance and cannot last. It is hard to believe that any man can trifle with national credit or borrowed capital. Such people commit a great national wrong, many of them not intentionally, but because they have had no experience or financial training. By accident an opportunity has come and they recklessly assume to play the part of the directors of the distribution of capital. If we are going to gamble in this country, let us gamble with our own money. What we need from outside is bond money and it is of the first national importance that we prove worthy of bond money. We need and should strive to deserve cheap money. Those who act in the best interests of the nation in this respect will serve ultimately their own best interests for the class which appreciates and practices sound finance must come to the top. The others will make mistakes and lose as fast as they win. It is the men who know how to wait and really base their operations on sound finance who will inevitably move to the front."

◆

ALBERTA PAYS ELEVATOR INSTALMENT.

The first instalment of the Alberta provincal government loan to the Farmers' Co-operative Elevator Company has been paid. It amounted to $300,000, and represents 50 elevators in operation. Briefly, the scheme is that the province advances 85 per cent. of the cost of elevators, when local farmers subscribe the stock, so that in effect only 15 per cent. of the cost is required from the farmers, the balance being repaid the government in 20 annual instalments, with interest at 5 per cent. It is estimated that with so good a start for this the first year, there should be under the control of the co-operative elevators, a capacity for handling 12,000,000 or 15,000,000 bushels of Alberta grain—about one-fifth of the portable quantity in 1914.

SOME PHASES OF RECIPROCITY

Minister of Trade and Commerce Speaks at New York—Canada's Purchases of United States Merchandise

"Reciprocity, interchange, is always growing greater and greater between Canada and the United States. There is a higher reciprocity than the reciprocity of butter and eggs, tomatoes and potatoes. What a wide reciprocity we have of language and ideals and literature! That kind of reciprocity is going on freely, and long may it continue and develop, while material reciprocity is also going forward.

"There is reciprocity in immigration, too," suggested Hon. G. E. Foster, at the New York Canadian Club banquet. "When the United States was young and weak, Canadians in thousands came across and settled there. With their brawn and brain they helped to build up well the institutions of the United States. You did not recognize it at the time.

Action and Reaction.

"Now you must not be offended if men of brawn and brain are coming across the border to help us build up the great plains of our far west. They are coming to the number of 130,000 to 140,000 a year, and they make the best kind of Canadian citizens, for they are taking up a work they know well. They speak the same language and have the same ideals as our people and they find themselves at home.

"There is also a financial reciprocity, with some $600,000,000 of your American money invested in Canadian properties. You send over your dollars and we send them back to you with interest, except when you are foolish enough to invest them in improving some town 30 or 100 miles away from anywhere.

United States Cannot Complain.

"You may be taking a lot of pride in that last tariff act of yours and the feeling that you have allowed Canadian products to come into your country under reduced duties now. I am glad you are proud of it. But you are confessing thereby that in the past you fell short of your duty toward Canada, who raised no such high tariff walls against you as you did against her. You must not think you have been especially generous to her; you must revise your tariff again by half to get on an even keel with Canada.

"You have cut, but you must cut that in half again before you reciprocate with Canada. The United States cannot complain in any event. It buys annually from the Dominion merchandise of the value of $1.10 per capita. Canada buys from the United States merchandise of the value of $50 per capita."

COMPANIES DECREASING CAPITAL

The following company in Manitoba has decreased its capital stock:—

Winnipeg Insurance and Vessel Agency, Limited, from $100,000 to $15,000.

CANADA'S NOVEMBER FIRE LOSS

Shows That Seventy-three Thousand Dollars Per Day Went Up In Smoke

The Monetary Times' estimate of Canada's fire loss during November amounted to $2,200,486, compared with October loss of $1,383,572, and $1,184,010 for the corresponding period of last year. The following is the estimate for the November losses:—

Fires exceeding $10,000	$1,683,250
Small fires	230,217
Estimates for unreported fires	297,019
	$2,200,486

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,945	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868
June	1,500,000	1,151,150	4,229,412	3,069,446
July	6,386,674	5,384,300	1,741,371	2,579,698
August	1,667,270	920,000	1,164,760	3,034,775
September	894,125	1,123,550	883,949	1,468,324
October	2,195,781	580,750	1,416,218	1,383,572
November	1,943,708	1,506,500	1,184,010	2,200,486
December	1,444,860	2,866,950	1,769,905	......
	$23,593,315	$21,459,575	$22,900,712	$24,992,318

Large Fires.

The fires at which the loss was estimated at $10,000 and over were:—

Oct. 25—Beeton, Ont.	Flour mill	$ 13,000
Oct. 27—Winnipeg, Man.	Malting company	54,750
Oct. 30—Wigwam, B.C.	Lumber mill	30,000
Nov. 1—Strome, Alta.	Business section	50,000
Nov. 3—St. Catharines, Ont.	Freight sheds	50,000
Nov. 4—Oakville, Ont.	Town hall	10,000
Nov. 5—Lion's Head, Ont.	Mill	30,000
Nov. 7—Blenheim, Ont.	Coal-hoist	50,000
Nov. 8—Oakville, Ont.	Barn and gymnasium	35,000
Nov. 9—Nepigon, Ont.	Business section	75,000
Nov. 10—Toronto, Ont.	Business block	15,000
Nov. 11—Brockville, Ont.	Residence	10,000
Nov. 13—Cumberland, B.C.	Sawmill	26,000
Nov. 13—Carlyle, Sask.	Business block	25,000
Nov. 13—Chilliwack, B.C.	Business block	14,000
Nov. 17—Vancouver, B.C.	Business block	300,000
Nov. 18—Yarker, Ont.	Store	11,000
Nov. 18—Arcola, Sask.	Barn, etc.	13,000
Nov. 21—Quebec, Que.	Store	14,000
Nov. 22—Moose Jaw, Sask.	Abattoir	140,000
Nov. 23—Saint Marie, Que.	Village	250,000
Nov. 23—Pincher Creek, Alta.	Business section	30,000
Nov. 25—Edmonton, Alta.	Business block	178,500
Nov. 25—Grouard, Alta.	Store	18,000
Nov. 27—Vancouver, B.C.	Warehouse	155,000
Nov. 27—Montreal, Que.	Business premises	10,000
Nov. 27—Wingham, Ont.	Warehouse	10,500
Nov. 29—Montreal, Que.	Wool warehouse	35,000

Much Valuable Property Destroyed.

The structures damaged and destroyed were 92 residences, 33 stores, 29 barns and stables, 16 sheds, 12 business blocks, 8 factories, 6 hotels, 5 sawmills, 3 business sections, 3 schools, 3 hospitals, 3 warehouses, 2 elevators, 2 cheese factories, 1 each coal hoist, restaurant, barracks, oil house, bridge, bank, laundry, flour mill, picture theatre, town hall, bakery, power-room, animal house, mine plant, sugar-house, evaporator, abattoir, boathouse, and bath-house.

Of the presumed causes, 15 were attributed to incendiaries, 10 children and matches, 8 defective chimneys and flues, 6 overheated stoves, 6 overheated stovepipes, 6 dropped cigars and cigarettes, 6 upset and exploded lamps, 4 furnaces, 3 electrical defects, 3 hot ashes, 3 persons smoking, 2 defective gas stoves, 2 gasoline, 2 mice and matches, 1 overheated motor, 1 hot metal, 1 lighted candles, 1 spontaneous combustion.

There were destroyed 83 horses, 15 cows, 23 pigs, 240 chickens, 34,800 bushels wheat, 1,200 bushels oats, 310 tons hay, 40,000 shingles, 4 sets harness, 5 carriages, 3 wagons, 4 buggies, 18 launches, 5 autos, 1 private rail car.

During November, 24 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	18
July	4	15	110	9	9
August	17	11	22	16	29
September	10	10	13	6	27
October	26	16	17	21	15
November	34	19	20	22	24
December	33	19	17	28	..
Totals	219	256	317	203	223

The fires at which the fatalities occurred were:—

November Deaths.

Guelph, Ont.	Fell over stove	1
Parkhill, Ont.	Clothes set alight	1
Rosetown, Sask.	Burning building	1
Qu'Appelle, Sask.	Gasoline explosion	1
Blenheim, Ont.	Gasoline explosion	1
St. Johns, Que.	Set clothing alight	1
Hazelton, B.C.	Burning building	2
Windsor, N.S.	Set clothing alight	1
West Lorne, Ont.	Fell on stove	1
Hall's Lake, Ont.	Set clothing alight	1
Saskatoon, Sask.	Fell on burning pile	1
Bounty, Sask.	Gasoline explosion	1
Rimouski, Que.	Burning building	3
Windsor, Ont.	Set clothing alight	1
North Sydney, N.S.	Set clothing alight	1
Moncton, N.B.	Burnt while cooking	1
Kirkfield, Ont.		1
Tyrone, P.E.I.	Set clothing alight	1
Glace Bay, N.S.	Set clothing alight	1
Montreal	Burning building	1
Toronto	Smoking in bed	1

The fire waste in each province for first ten months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$ 7,853,708
Quebec	4,269,121
Alberta	3,938,334
Saskatchewan	2,172,683
Manitoba	2,134,959
Nova Scotia	1,571,487
British Columbia	1,516,015
New Brunswick	1,080,920
Prince Edward Island	455,091
	$24,992,318

◆

BANK OF MONTREAL.

A pleasing statement was submitted at the 96th annual meeting of the Bank of Montreal, showing profits amounting to $2,646,402, which with balance of $802,814 made $3,451,217 available for distribution.

This was the first report of Mr. H. V. Meredith as president and he drew attention to the fact that the savings had been well maintained notwithstanding the large withdrawals for investment. Current loans, etc., had been increased by taking on new business, these were $128,935,567, and the loans to cities, towns, municipalities and school districts were $5,227.905, this being one of the new items referred to by the president as required by the new bank act, while to meet the demands of customers it became necessary to reduce call loans.

Shareholders received in dividends and bonuses $1,920,000; provision for bank premises totalled $485,000 and the balance of profit and loss carried forward was $1,046,217.

Deposits compared with the present year are as follows:

	1913.	1912.
Deposits not bearing interest	$ 45,134,956	$ 45,338,954
Deposits bearing interest	144,437,882	141,970,011
Totals	$189,572,838	$187,308,965

Complete returns are given elsewhere in this issue.

This satisfactory report reflects the strong position attained by this prominent Canadian institution, and also the executive ability of the managerial and official administrators.

FOX COMPANIES STILL A FEATURE

Of Canada's Incorporated Companies—Large Gas and Power Company

Canada continues to add to her lengthy list of companies. This week new incorporations number 50, the head offices of these companies are located in five provinces. The total capitalization amounts to $9,344,800, the largest companies being as follows:—

Economical Gas, Light and Power Company Montreal	$1,000,000
Canadian Contracting Company, Limited, Ottawa	1,000,000
Canadian Bull Tractor Company, Limited, Winnipeg, Man.	1,000,000
The Rice Lake Gold Mines, Limited, Winnipeg, Man.	2,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Manitoba	11	$3,370,000
British Columbia	7	200,000
Ontario	16	2,473,900
Quebec	10	2,103,900
Prince Edward Island	6	1,197,000
Totals	50	$9,344,800

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—D. Morton Company, Limited, $20,000.

New Westminster, B.C.—Public Supply Stores, Limited, $30,000.

Kelowna, B.C.—Kelowna Implement Company, Limited, $25,000.

Cornwall, Ont.—Beach Furniture, Limited, $99,900. R. H. Perry, J. Freeman, M. Perry.

Verdun, Que.—J. P. Dupuis, Limited, $300,000. J. P. Dupuis, G. N. Monty, P. Morin.

London, Ont.—Globe Casket Company, Limited, $40,000. F. W. Coles, R. I. Watson, F. H. Coles.

London, Ont.—Thames Realty Company, Limited, $40,000. A. Snyder, W. Wigmore, W. J. Roy.

Westmount, Que.—Westmount Motors, Limited, $50,000. W. K. McKeown, L. Choquette, E. A. Barnard.

Windsor, Ont.—Ojibway Subdivisions, Limited, $40,000. E. E. Samuel, H. E. Bailey, L. W. Cummings.

Watford, Ont.—C. B. Matthews and Son, Limited, $40,000. F. Campbell, J. J. Kew, A. G. Robertson.

Levis, Que.—The National Drop Forge Company, Limited, $49,000. I. B. Doris, E. Belleau, N. Belleau.

Ottawa, Ont.—Canadian Contracting Company, Limited, $1,000,000. E. Belleau, N. Belleau, J. E. Labadie.

Port Arthur, Ont.—Port Arthur Hardware, Limited, $40,000. E. L. Devereaux, E. L. Obergh, N. C. Devereaux.

Thorold, Ont.—Inland Pulp and Paper Company, Limited, $200,000. G. H. Levy, A. H. Gibson, S. W. C. Scott.

Kemptville, Ont.—The Kemptville Investors, Limited, $24,000. S. W. Fenton, J. W. Montgomery, T. K. Allan.

Quebec, Que.—La Compagnie La Canadienne, Limited, $100,000. A. Corriveau, K.C., O. N. Shink, E. A. Doucet.

Warwick, Que.—The Warwick Woolen Manufacturing Company, $49,900. H. Captin, A. C. Letarte, J. E. Tessier.

North Bay, Ont.—The City Garage Company of North Bay, Limited, $40,000. D. Johnston Elliott, D. E. Shields, J. Fee.

Hamilton, Ont.—Citizens' Fuel and Ice Company, Limited, $500,000. W. P. Gillespie, L. W. McClennan, C. G. Gillespie.

Georgetown, Ont.—The Century Pressed Brick and Tile Company, Limited, $250,000. J. W. Ramshaw, J. R. Peacock, D. Menzies.

Vancouver, B.C.—The Success Business College, Limited, $25,000. Tong Yick Company, Limited, $60,000. The Canadian Steel Studding and Manufacturing Company, Limited, $30,000. Frank Sweatman Publishing Company, Limited, $10,000.

Toronto, Ont.—Tomack's, Limited, $40,000. W. O. Menger, J. V. O'Brecht, A. J. Leonard. Riverdale Settlement, J. Johnston, S. Small, E. E. McMurray. Capital Lands Corporation, Limited, $40,000. H. Riley, J. F. MacGregor, T. S. H. Giles. Cliffside Park, Limited, $40,000. J. F. MacGregor, T. S. H. Giles, C. A. McKay. A. C. Thomson Realty Company, Limited, $40,000. A. C. Thomson, F. Courtemanche, W. T. Thomson.

Montreal, Que.—Wasserman Medical Institute, Incorporated, $20,000. D. Houde, A. L. Larose, J. C. Lesage. Economical Gas, Light and Power Company, $1,000,000. A. Carrillo, L. Hoz, B. Bassi. The Weldon Motor Company, Limited, $10,000. R. Billson, C. L. Weldon, E. Greenwood. McNulty Brothers, Limited, $25,000. A. Wainwright, M. Alexander, C. Sinclair. Lachine Rapids Power Company, Limited, $500,000. W. K. McKeown, L. Choquette, J. R. Law.

Prince Edward Island.—George Morrison Company, $5,000. J. G. Gass, J. E. Trainor, G. Morrison. Crapaud Fox Ranching Company, Limited, $17,000. G. L. Nicholson, D. S. McQuarrie, G. R. McQuarrie. The International Fur Farming Company, Limited, $625,000. J. A. Lea, H. P. Cleveland, F. S. Morrison. The Hackett Silver Black Fox Company, Limited, $90,000. J. Raynor, C. Blackie, J. A. Hackett. The Glenaladale Silver Black Fox Company, Limited, $60,000. J. J. McDonald, J. Egan, Major C. McKinnon. Mount Edward Silver Black Foxes, Limited, $400,000. A. W. Sterns, J. R. Dinnis, W. Leitch.

Winnipeg, Man.—Excelsior Investments, Limited, $100,000. J. E. Lidholm, C. Roed, D. L. Bastedo. Linton-May-Lush Electric Company, Limited, $20,000. E. N. Linton, J. R. C. May, H. S. Lush, J. H. Brooke. The Westlands Development Company, Limited, $100,000. W. M. McLeod, J. A. Partington, G. W. Davey. Regent Billiard Parlors, Limited, $30,000. M. M. Boyd, A. J. Fisher, G. Pumpelly. Sherwood and Dawson, Limited, $40,000. T. W. Johns, F. N. Donnelly, S. E. Richards. Canadian Bull Tractor Company, Limited, $1,000,000. L. A. Cannon, W. Pace, W. H. McWilliams. The Rice Lake Gold Mines, Limited, $2,000,000. F. E. Evans, A. L. Anderson, C. Andrews. Mulloy, Beardsley, Limited, $40,000. A. E. Mulloy, J. L. Anderson, C. B. Beardsley. The Busines Brokers, Limited, $20,000. B. N. Fraser, W. A. Gabb, P. L. Leach. Detergene Company, Limited, $10,000. D. O'Keefe, H. C. Nolan, J. A. Barry. Rabbit Auto Sales, Limited, $10,000. H. Rustad, L. G. White, C. W. White.

◆

QUEBEC BANK'S ANNUAL RETURNS.

The ninety-sixth annual statement of the Quebec Bank, presented at the annual meeting of the bank by Mr. B. B. Stevenson, the general manager, is another indication of the sound policy of the officials of this bank which is so near its centenary of operations.

Net profits for the year, after making provision for interest due to depositors for all bad and doubtful debts and operating expenses, amounted to $309,228.14, which is an increase of $10,424. There has been paid out of this, quarterly dividends amounting to $185,721.76; the sum of $5,000 was added to the pension fund; $22,841.20 has been expended on premises at the branches; $20,339.51 has been paid out for business taxes, and the sum of $75,000 has been reserved for depreciation in the value of bonds and securities held by the bank.

The sum of $56,962.50 has been received as premium on new capital stock issued, and this sum has been transferred to the rest account, making it $1,306,962.50.

Compared with the previous year's returns, the figures are as follows:—

	1913.	1912.
Balance brought forward	$ 24,678	$ 22,283
Profits	309,228	294,804
Premium new stock	56,962	....
Totals	$390,869	$317,088

Expenditures on bank premises is somewhat lower. The bank opened seven new branches and closed four thus showing a net gain of three branches. A registry for the bank shares was opened at the Toronto branch. Modifications in the bank's by-laws and the appointment of auditors required by Canada's new bank act were made at the annual meeting at Quebec. The directors were re-elected, Mr. J. T. Ross is president and Mr. V. Boswell vice-president.

The Royal Bank has opened a branch at Yonge and Carlton Streets, Toronto.

The minister of trade and commerce has postponed indefinitely the opening of grain sample markets at Winnipeg and Fort William. They were to have been inaugurated on December 15th.

METRIC SYSTEM IN ORIENTAL COUNTRIES

Britain May Have to Adopt It—Progress in America

Editor, *The Monetary Times*:—

Sir,—In the parliamentary debate of March, 1907, the small majority opposed to the Weights and Measures (Metric System) bill was obtained in part by the argument that our trade with the east might suffer through suspicion and distrust on the part of our Oriental customers if we presented to them such a novelty as the metric system in selling goods. America, also, it was said, might take advantage of this by continuing to use the yard and pound so popular in the east.

This objection was groundless, because the bill did not relate to foreign trade at all, and permitted manufacturers to make goods for export of any size, pattern, mark, or description, and to sell them as they chose.

The time is soon coming when metric usage, instead of being regarded as a hindrance to British trade with the far east, will have to be adopted as a necessity in our dealings with China, Japan, and Siam, which have each taken definite steps to establish that system. Already the advisory council of China has passed the first reading of a law to that effect, and there are now in Paris two Chinese gentlemen studying at the International Bureau of Weights and Measures the technical details of the subject with a view to completing what is planned.

Japan has for the present four legal systems of weight and measure:—(1) The metric, (2) the shaku-kwan, (3) the kujira-shaku and (4) the British yard and pound. The government has declared its preference for the metric system by making it obligatory for the services of the customs excepting a few articles. It is taught in all the public schools, and is prescribed for the army, for medicine and for electrical work. The carat for precious stones is now 200 milligrams. A specially heavy charge (more than threefold) is made for the verification of British weights and measures, and the public registers show a steady increase in metric usage.

Russia Converted to Metric System.

Siam has for some years employed the metric system with much success on its railways and public works, and last year joined the international convention of the metre, from which it has received the apparatus needed for a central bureau of standards at Bangkok. It should interest India to know that the Sanskrit element in the Siamese language has proved useful in connection with the names of the metric units. Siam proposes not to make metric reform compulsory at one and the same time in all parts of the kingdom, but to deal with each province separately at convenient times—a plan which might perhaps be usefully followed by Russia, China and India.

Russia also, which is now one of the great powers of the far east, has adopted the metric system for several purposes, and has announced to the Decimal Association by a recent letter from the ministry of commerce and industry that the metric system is favored, but has to await the necessary arrangement of control and inspection throughout the empire with its 165 millions of people. This conversion of Russia is notable as completing the solidarity of all continental Europe in metric reform, and as being likely to hasten the action of China, her eastern neighbor.

Progress on American Continent.

This note is mainly devoted to metric progress in far eastern countries, but it must not be forgotten that all South and Central America are either metric or tending to be so. The Australasian dominions of Great Britain have urgently pressed the question on her notice, and last, but most important of all as a source of external influence, are the United States of America, which have gone far in preparing for reform, and will act with vigor when the time comes, for they know the truth declared in 1790 by Thomas Jefferson, afterwards their president, that the decimal system then established by him in their money would also in weights and measures bring "the calculation of the principal affairs of life within the arithmetic of every man who can multiply and divide plain numbers." The whole world has now approved his words, and the United States of America are on the way to fulfil them.

Yours, etc.,
The Decimal Association.

London, Eng., November.

Fire Chief Turner reports that during October there were five fires in Point Grey, B.C. The total risk involved to the buildings threatened and their contents was $71,500: the total insurance, $30,500, and the loss sustained only $105.

ANTIMONY, COBALT AND NICKEL

Nearly Forty-five Million Pounds of Nickel Produced in Canada Last Year

The production of nickel contained in nickel-copper matte produced in Canada and exported for refinement was, in 1912, 44,841,542 pounds, as compared with a production of 34,098,744 pounds in 1911. During 1912 there were smelted 725,065 tons of ore, producing 41,925 tons of matte, as against 610,834 tons of ore smelted in 1911, producing 32,607 tons of matte. Small quantities of nickel oxide are also produced in connection with the treatment of the Cobalt District silver ores, remarks Mr. J. McLeish, B.A., of the department of mines, in his annual report. The exports of nickel contained in ore, matte, etc., during 1912, were 44,221,860 pounds, valued at $4,661,758: being 5,072,867 pounds to Great Britain and 39,148,993 pounds to the United States. In 1911 the exports were 32,619,971 pounds, valued at $3,676,396: being 5,023,393 pounds.

No Antimony Exported Last Year.

The production of antimony during the past two years was limited to a few pounds of refined antimony recovered at the lead refinery at Trail, B.C. Shipments of antimony ore in 1910 were reported as 364 tons, valued at $13,906, whilst there was no production of refined antimony in 1910. There is no export of antimony ore recorded in 1912, as against 50 tons valued at $4,946, in 1911. The imports of antimony or regulus thereof, in 1912, were 998,045 pounds, valued at $60,456, and of antimony salts 55,683 pounds, valued at $7,197, or a total value of imports of $67,653. In 1911, the imports were antimony and regulus of 561,046 pounds, valued at $36,405, and antimony salts 18,420 pounds, valued at $2,418, or a total value of $38,823.

Canadian Smelters Produce Cobalt Oxide.

Cobalt oxide and cobalt material are being produced in Canadian smelters, the production in 1912 of cobalt oxide and nickel oxide being 349,054 pounds, valued at $156,256, and of cobalt material and mixed cobalt and nickel oxides 1,285,280 pounds, valued at $163,988. During 1911, the shipments included 154,174 pounds of cobalt and nickel oxide, and 1,260,832 pounds of cobalt material and mixed cobalt and nickel oxides, the value being $221,690.

◆

HERE IS A WARNING

In sentencing two men at Victoria, found guilty of conspiracy in connection with the operations of the Bankers' Trust Company, Judge Gregory said:—

"I might have given you both seven years in the penitentiary, but I have decided that the interests of justice will be fully met if I sentence you each to serve three years and one-half in the Provincial penitentiary. There must be a lesson taught to people who promote companies and sell stock that they cannot enter into extravagant statements. The half year I have added so that you will each serve a full three years as your punishment."

◆

WHERE CANADA DOES BUSINESS

The countries with which Canada did business in 1912-13 are as follows, the figures being those of merchandise exported to and entered at customs for consumption, the latter being usually somewhat less than the total value of imports given:—

	Exports to	Entered from
United Kingdom	$177,982,000	$138,761,000
United States	167,110,000	411,142,000
France	2,564,000	15,379,000
Germany	3,402,000	14,214,000
Spain	48,000	1,258,000
Portugal	49,000	343,000
Italy	605,000	1,713,000
Holland	2,741,000	3,100,000
Belgium	4,808,000	4,020,000
Newfoundland	4,728,000	2,056,000
West Indies	6,237,000	10,576,000
China and Japan	1,881,000	4,256,000
South America	4,352,000	10,528,000
Australia	3,996,000	....
Switzerland	....	4,296,000
Other countries	12,722,000	23,857,000

GOOD AGRICULTURAL RESULTS IN BRITISH COLUMBIA

Fruit Industry is Responsible for Increase in Small Holdings—Number of Sheep and Horses Doubled in Ten Years

In 1849 Vancouver Island was formally erected a British colony with Victoria as the capital. The first representative assembly was convened in 1856. The mainland, which now constitutes the greater portion of the province and known at an early date as New Caledonia, was in 1858 by an imperial edict established under the name of British Columbia with New Westminster as its capital. The two colonies were united under the name of British Columbia in 1866, and the legislature for the united provinces met for the first time on December 17th, 1867. On July 1st, 1871, it became a province of the Dominion.

The province has an area of 226,186,370 acres land and 1,560,830 acres water, making a total area of 227,747,200 acres or 355,855 square miles which is nearly three times the area of the United Kingdom and 1¾ times greater than either France or Germany. The province has a land area greater than the total area of Belgium, Denmark, Holland, Norway and Sweden combined.

In 1901 the population was 178,657, of which 88,478, or 49.5 per cent. was rural, while the returns of the last census show that 188,796, or 48.1 per cent. out of a total population of 392,480 was rural. As at the date of the census there were no incorporated towns or villages in the province the classification of the population as urban and rural is not strictly comparable with the other provinces where town and village municipalities exist.

Eighteen Thousand Farm Holdings.

The number of farm holdings in 1901 was 6,739, of which 5,938 contained five acres and over as compared with 14,071 farms of five acres and over, and 4,396 of less than five acres, or a total of 18,467 holdings in 1911. The number of holdings of 50 acres and under increased from 2,086 in 1901 to 11,000 in 1911, which is a gain of 427 per cent. in ten years. The number of holdings over 50 acres was 4,653 in 1901, as against 7,467 in 1911, a gain of 60 per cent. in the decade. The development of the fruit industry is no doubt responsible for the rapid increases in the number of small holdings.

The area of improved land in 1911 was 477,576 acres as compared with 473,646 acres in 1901, an increase of only 3,930 acres in the decade. This small increase is more apparent than real owing to the stricter interpretation given the term "improved land" in the 1911 census. In this census only such areas as had been brought under cultivation and had produced a crop and were fitted for producing crops were regarded as "improved land." In previous censuses no clear definition was given of the term "improved land" with the result that under this heading were included non-tillable areas and natural meadows used as pastures.

Nine Millions for Field Crops.

Land in field crops increased from 171,424 acres in 1900 to 239,820 acres in 1911. The number of acres under crops in 1910 was 214,069, being an increase in the area under field crops in 10 years of 42,645 acres. The land under orchard and nursery increased from 7,502 acres in 1901 to 33,606 acres in 1911; land in vegetables increased from 2,840 acres to 9,213 acres; land in vineyards increased from 18 acres to 309 acres.

The acreage under small fruits, which in 1901 was included with vegetables, is placed in this census at 1,280 acres.

While the area under grain crops fell from 56,979 acres in 1900 to 47,402 acres in 1910 the land under hay and clover and alfalfa increased from 102,751 acres in 1900 to 137,058 acres in 1910, and the land devoted to hoed crops rose from 11,694 in 1900 to 29,609 acres in 1910. For 1911 the area under grain crops was 67,462 acres, under grasses 141,776 acres, under hoed crops 30,582 acres, being increases of 20,060 acres, of 4,718 acres and 973 acres respectively in one year.

The statistics of horticulture show that there were increases in the number of bearing and non-bearing fruit trees and in the production of fruit for 1910 over 1900. This is especially noticeable in non-bearing trees which represent the advancement made in more recent years.

The average yield per acre for grain crops in 1910 does not on the whole show any wide differences from the figures of the previous census.

The total value of field crops, vegetables and fruits in 1910 was $9,619,281 as against $3,536,371 in 1900, being an average per holding for the last census of $520.88 as compared with $524.73 in the previous one. The large acreage represented by non-bearing fruit trees, indicates the setting out of new orchards and not being producing, the consequence is that the average value of farm products per holding is kept down.

Horses and Sheep Doubled in Numbers.

The statistics of live stock for 1911 places the number of horses at 57,415, of milch cows at 33,953, of other horned cattle at 105,230, of sheep at 39,272, of swine at 33,604, of turkeys at 8,926, of geese at 6,808, of ducks at 27,898 and of hens and chickens at 967,841 as compared with 37,325 horses, 24,535 milch cows, 100,467 horned cattle, 33,350 sheep, 41,419 swine, 2,790 turkeys, 3,786 geese, 9,371 ducks and 346,480 hens and chickens in 1901. The figures show increases for all classes of animals except swine. The number of pure-bred horses and of sheep have more than doubled in the decade, and an increase of 65 per cent. is shown in the number of pure-bred cattle.

The average value of horses in 1911 was $136, of milch cows $58.88, of other horned cattle $28.56, of sheep $6.71, of swine $10.75, as compared with an average value for 1901 of $55 for horses, of $43.22 for milch cows, of $23.83 for other horned cattle, of $5 for sheep, and of $6.55 for swine. The total value of live stock in 1911 was $14,135,477 against a total value of $6,184,313 in 1901.

The value of live stock sold in 1910 was $3,296,647 which is an increase of $2,860,853 or 656 per cent. over the figures of ten years ago. The value of animals slaughtered on the farm rose from $307,397 in 1901 to $413,614 in 1911. The value of dairy products which was reported at $1,159,993 in 1901 increased to $2,620,495 in 1911. There was an increase in the value of wool of $10,463 and of eggs of $601,247.

Gross Earnings of Farming Business.

The number of weeks of hired labor on the farm in 1910 was 159,088, and the value $1,952,875 being an average wage per week of $12.28 as against 135,597 weeks in 1900 with a total value of $1,223,230 and an average of $9.02 per week. This is an increase in the cost per week of farm labor of over 36 per cent. from 1900 to 1910.

The total value in 1911 of lands owned, buildings, farm implements and live stock on hand was $179,359,601, with an average value per holding of $9,712 as compared with a total value of $33,386,886 and an average value of $4,954 in 1901. The gross returns to the farmers of the province as represented by field crops, fruits, live stock sold, dairy products, animals slaughtered on the farm, wool, eggs, honey and wax aggregated in the last census $17,874,932, or an average per holding of $968 as compared with $5,879,412 and an average per holding of $872. From the gross earnings must be deducted the cost of seeds, of feed for animals and of labour before the net earnings can be even approximately estimated.

◆

HOW IT IS DONE.

Extract from a report of the Union Life inquiry at Toronto.—

Further along the line of disbursements the official enquirer found a bill for $9,525 which had been paid to a Mr. Wm. Schooling. Mr. H. P. Evans, corrected this sum up to $10,500. Mr. Schooling, he added, was an insurance expert who wrote for various English papers, chiefly for Truth and the Telegram. In addition to his services along this line, Mr. Schooling had revised the prospectus and spent a great deal of time in its preparation.

"To us, in the colonies," Mr. Masten suggested, "that seems a large sum of money to expend for such a purpose. Why did you agree to pay it?"

"I wanted to make the issue a success. I may say he also had a large meeting among newspaper men and addressed them. He kept the name of our stock prominently before the papers."

"It is a lot of money to pay out for that purpose," Mr. Masten continued.

"Anyway, it is what we did," added Mr. Evans.

Twenty-five freighters carrying about 8,000,000 bushels of grain cleared from Fort William on November 30 to avoid having their insurance extended.

THE BANK OF MONTREAL

Proceedings of the 96th Annual Meeting of the Shareholders

The 96th Annual General Meeting of the Shareholders of the Bank of Montreal was held at noon yesterday in the board room at the Bank's headquarters.

Among those present were: Messrs. H. E. Rawlings, D. Morrice, J. McK. Rea, Wm. Hanson, G. L. Ogilvie, W. R. Miller, H. B. McDougall, Alfred Piddington, E. Fiske, J. B. Learmont, J. Patterson, W. B. Blackader, H. M. Stanway, Sir William Macdonald, Hon. Robert Mackay, Sir Thomas Shaughnessy, Messrs. D. Law, William McMaster, T. Durnford, Preble Macintosh, C. R. Black, W. H. Evans, Henry Joseph, George Caverhill, Dr. H. B. Yates, George G. Foster, J. Rodger, Hamilton Gault, C. B. Gordon, C. R. Hosmer, D. Forbes Angus, J. A. Hawthorne, H. R. Drummond, R. B. Angus, Dr. Shepherd, Charles Chaput, H. V. Meredith, F. F. Archibald, Campbell Nelles, E. B. Greenshields, A. Falconer, Guy Drummond, and J. J. Reid.

On motion of Mr. R. B. Angus, Mr. H. V. Meredith was requested to take the chair.

Mr. Hartland B. McDougall moved, and Mr. A. Piddington seconded, that Messrs. W. R. Miller and David Law be appointed to act as scrutineers, and that Mr. James Aird be the Secretary of the meeting. This was carried unanimously.

The Chairman then, in the absence of the General Manager, called upon Mr. A. D. Braithwaite, Assistant General Manager, to read the Annual Report of the Directors to the Shareholders at their 96th Annual General Meeting, held Monday, December 1st, 1913.

THE ANNUAL REPORT

The Directors have pleasure in presenting the Report showing the result of the Bank's business for the year ended 31st October, 1913:—

Balance of Profit and Loss Account, 31st October, 1912		$ 802,814 94
Profits for the year ended 31st October, 1913, after deducting charges of management, and making full provision for all bad and doubtful debts		2,648,402 80
		$3,451,217 80
Dividend, 2½%, paid 1st March, 1913	$ 400,000 00	
Dividend, 2½%, paid 1st June, 1913	400,000 00	
Bonus, 1%, paid 1st June, 1913	160,000 00	
Dividend, 2½%, paid 1st September, 1913	400,000 00	
Dividend, 2½%, payable 1st December, 1913	400,000 00	
Bonus, 1%, payable 1st December, 1913	160,000 00	
	$1,920,000 00	
Provision for Bank Premises	485,000 00	
		$2,405,000 00
Balance of Profit and Loss carried forward		$1,046,217 80

Since the last Annual Meeting, Branches have been opened at points in the following provinces, viz.:—

In Quebec—Bleury Street (Montreal), Notre Dame de Grace (Montreal), Windsor Street (Montreal).

Ontario—Schreiber, St. Catharines, Queen Street East (Toronto), Welland.

North-West—Dauphin, Man.; Prince Albert, Sask.

British Columbia—Alberni, Lumby.

London, England—Waterloo Place, Pall Mall.

The Branches at Suffield, Alta., and Sapperton, B.C., have been closed.

The Branch at Gretna, Man., destroyed by fire was not reopened.

The Shareholders are aware that the Bank Act has been under revision for some time past, and a new Act, as revised, went into force on 1st July, 1913. The main changes are:—

In the published statements the condition of the Bank is shown in greater detail than formerly.

The establishment of "Central Gold Reserves," where the Bank can deposit gold or Dominion notes and increase its circulation by a similar amount when necessary.

Under Section 56 of the new Act you are required at this meeting to appoint Auditors for the Bank and to vote the amount of their remuneration.

With deep regret the Directors have to record the death of Mr. James Ross, who had been a member of the Board for nearly fourteen years. The vacancy caused thereby was filled by the election of Mr. William McMaster.

The Directors have also to record with much regret the resignation of Mr. R. B. Angus as President of the Bank, owing to his advancing years. His association with the Bank will, however, be continued as a Director.

Mr. H. V. Meredith was elected to succeed him as President, remaining also Chief Executive Officer.

All the offices of the Bank, including the head office, have been inspected during the year.

(Signed) H. V. MEREDITH,
President.

Bank of Montreal, 1st December, 1913.

THE GENERAL STATEMENT

The general statement of the position of the Bank on October 31st, 1913, was read as follows:—

LIABILITIES

Capital Stock			$ 16,000,000 00
Rest		$ 16,000,000 00	
Balance of Profits carried forward		1,046,217 80	
		$ 17,046,217 80	
Unclaimed Dividends		250 50	
Quarterly Dividend, payable 1st December, 1913	$400,000 00		
Bonus of 1%, payable 1st December, 1913	160,000 00	560,000 00	
			17,606,468 30
			$ 33,606,468 30
Notes of the Bank in circulation		$ 17,061,665 00	
Deposits not bearing interest		45,1[illegible]4,956 54	
Deposits bearing interest		144,437,882 33	
Balances due to other Banks in Canada		519,808 13	
Due to Banks and Banking Correspondents elsewhere than in Canada		583,130 65	
Bills Payable		919,308 65	
			208,656,751 30
Acceptances under Letters of Credit			$ 2,523,824 95
			$244,787,044 55

ASSETS

Gold and Silver coin current		$ 11,015,339 47	
Government demand notes		11,149,460 25	
Deposit in Central Gold Reserves		1,000,000 00	
Deposit with Dominion Government required by Act of Parliament for security of general bank note circulation		790,000 00	
Due from Banks and Banking Correspondents elsewhere than in Canada..	$ 6,126,729 75		
Call and Short Loans in Great Britain and United States	51,240,795 02		
		57,367,524 77	
Dominion and Provincial Government Securities		530,880 74	
Railway and other Bonds, Debentures and Stocks		12,403,169 79	
Notes and cheques of other Banks		9,443,052 22	
			$103,699,427 24
Current Loans and Discounts in Canada and elsewhere (rebate interest reserved) and other assets		$128,935,567 24	
Loans to Cities, Towns, Municipalities and School Districts		5,227,905 74	
Debts Secured by mortgage or otherwise..		285,281 83	
Overdue debts not specially secured (loss provided for)		115,037 55	
			$134,563,792 36
Bank Premises at Montreal and Branches			4,000,000 00
Liabilities of Customers under Letters of Credit (as per Contra)			2,523,824 95
			$244,787,044 55

H. V. MEREDITH,
General Manager.

THE PRESIDENT'S ADDRESS

Mr. Meredith, in moving that the report of the Directors and the accounts, as read, be adopted and the same be printed for distribution among the shareholders, said:—

Gentlemen,—In moving the adoption of the Directors' Report, I will refer to the changes which have taken place during the year in the Balance Sheet, a copy of which has been furnished you, before alluding to general and financial conditions. The Bank has experienced another good year and its business has been well maintained. The Authorized Capital remains at $25,000,000, the Paid-up Capital at $16,000,000, and the Rest at $16,000,000. Out of net earnings, which, for the year, amounted to $2,648,402.86, $243,402.86 was transferred to Profit and Loss Account, bringing that balance up to $1,046,217.80, and there has been set aside for Bank Premises Account during the year an amount of $485,000. A Bonus of 1 per cent. was paid to Shareholders on 1st June and 1st December over and above the quarterly dividend of 2½ per cent.

Deposits not bearing interest remain practically unchanged. Interest-bearing deposits show an increase of $2,500,000. A portion of these is always of a temporary nature, but I am pleased to say that, notwithstanding the fact that considerable sums have been withdrawn during the year for investment at the tempting rates prevailing, the aggregate of the Savings Bank deposits has been well maintained.

Turning to our assets, the current loans and discounts in Canada and elsewhere and other assets, amounting to $134,160,000, show an increase of $15,000,000, caused by taking on new business and by the increased legitimate requirements of our customers. Investments in railway and other bonds are $12,933,000. Bank premises, Montreal and branches, remain at $4,000,000. Call and other loans in Great Britain and the United States are $51,240,000, against $55,150,000 a year ago, which deduction, with $8,000,000 withdrawn from foreign correspondents and agencies of the Bank outside of Canada, has been used to provide for the increased demands of our Canadian customers, mentioned above. Our bills payable amount to $919,308, as compared with £1,717,000 as at the same date last year. At that time, however, the amount was shown as a contingent liability instead of being included in the General Statement as at present.

The delayed decennial revision of the Bank Act was finally completed at the last session of Parliament. On the whole, the new measure may be characterized not only as workable, as preserving the fundamental principles of past laws, but as well designed to promote and safeguard the interests of the public, which, I need scarcely add, are identical with the interests of the Bank.

As the measure was a non-contentious one, I think I am at liberty to add my tribute of praise to the Finance Minister, Hon. Mr. White, for the very capable manner in which he supervised the revision of the Act. Throughout the protracted discussion of the bill, he exhibited a thorough grasp of the subject and a keen desire to make the measure conform as fully as possible to the needs of the public, the safety and stability of the banks.

THE GENERAL SITUATION

In regard to the general situation, the year 1913 may be truly described as a memorable one. In Great Britain it has been disturbed and disappointing. The demands of borrowing countries, both old and new, have outrun capital supplies, and there has been an ever-increasing difficulty in obtaining loans, however sound the security might be, and, when obtainable, the rates and terms have been far more onerous than for many years past.

As is well known, there have been several factors combining to produce these stringent conditions; the Balkan War and record public flotations, which in London alone totalled not less than £200,000,000 to the end of October, exclusive of special borrowings and treasury bills, of which no less an amount than £54,000,000 were Canadian emissions. Then there has been world-wide trade activity, a rise in the price of commodities, coupled with serious political disturbances in France and Germany, and the continuous and heavy gold demands of such importing countries as Argentina, Brazil, Egypt and India, heavier requirements for home trade in Great Britain, and accumulations by joint stock banks in their private vaults. Added to all this, the position was aggravated by the prolongation of the Balkan War, and social unrest in England.

In France, the economic position has been less favorable than usual. The severe political shocks I have mentioned occasioned a withdrawal of funds from Germany, and hoarding has been continuous and constant. A vast aggregation of loans to finance the Balkan States and for increased home armaments still await flotation. In Germany, the situation shows a marked betterment in the improved condition of the Reischsbank and a curtailment of that country's excessive trade activities.

In the United States, conditions throughout that country are thought to be fundamentally sound. Politics have affected business activities, and with the exception of wheat, there is a shortage of crops throughout the country. A disposition to go slow and not to make commitments beyond actual requirements is apparent, so that no undue strain is likely to take place, but, rather, an era of economy, which should have a beneficial effect on the situation generally. The money situation has proved to be of greater ease than was at one time expected, and the usual Fall stringency has not so far materialized. The principal cause for the prolonged ease may, I think, be put down to the early preparations to meet the contingency of dear money, the slowing down in general business, and the depositing of Government funds in the banks of the West and South, thereby relieving the Eastern banks of a portion of the burden of financing the crops, for which they had been prepared.

The condition in Great Britain and abroad, which I have endeavored to outline, will no doubt take time to ameliorate, and improvement will probably be brought about by reduced trade activity gradually releasing money for investment purposes and hoarded funds; but the process will of necessity be slow.

I have thought it well to make these somewhat extended remarks in regard to financial conditions in other and neighboring countries, as they have an important bearing upon existing conditions here.

TRADE OF CANADA

The returns of the foreign trade of Canada are not unsatisfactory. Imports are falling off, in consequence of the monetary situation and the curtailment of foreign loans. In October the value of imports of merchandise was $8,664,000 less than in the corresponding month in 1912, while for the seven months ending October, the value of imports was only $4,300,000 in excess of last year. On the other hand, the export trade is expanding, the value of domestic products exported in October having been $23,360,000 in excess of the same month a year ago, and the exports for the seven months, $49,330,000 greater than in 1912. The aggregate foreign trade of Canada for the seven months ending with October was $636,094,000 as against $582,444,000 a year ago, showing a gain of $53,650,000, and in this period the excess of imports over domestic exports has been cut down from

$190,000,000 to $145,000,000. This trend of foreign trade is likely to continue for some time. The balance of foreign trade, as you are aware, has been heavily against Canada during the past decade. In the last six fiscal years, imports exceeded exports in value by $850,000,000, and this considerable gap has been made, in certain quarters, the subject of adverse criticism of the country. It is to be borne in mind, however, that in this period Canada has obtained immense sums of money from Great Britain for development purposes of various kinds, which money has been imported largely in the form of merchandise paid for out of the proceeds of long-term loans. Now, while these loans must ultimately be liquidated from the earning power of this expenditure, I may point out that meanwhile only the interest charge has to be met; in other words, the excess of imports representative of the proceeds of long-term borrowing has to be balanced only to the extent of the interest on the loans. This is not, indeed, the whole conclusion of the many-sided subject, into which a variety of considerations enter. We cannot, moreover, expect to go on widening the gap between imports and exports indefinitely. Our annual interest charge on British and foreign loans is already a formidable item, to be provided either by exports or new borrowings. While monetary conditions abroad remain as at present, the stream of fresh capital will run less freely towards Canada.

The recent reduction in the tariff of the United States can hardly fail to enlarge the markets of that country to Canadian products. Many agricultural items, such as eggs, milk, live stock, are now on the American free list; so are lumber, timber, fish, meats, coal, and many manufactured articles made in Canada. Already the movement of these articles to our neighbor's markets in increased volume has begun. Some advance in prices has resulted therefrom, and there appears no reason to doubt that our sales to the United States will augment in future.

Immigration returns have continued to be of a highly satisfactory character, both in regard to number and desirability. The figures for the year ending 30th September, 1913, reached a total of 431,050 souls, of whom 122,230 were from the United States and the remainder from European countries, principally Great Britain.

The value of the field crops in Canada this year at present prices is estimated at $500,000,000, or approximately the value of the crop of the preceding year.

LEGITIMATE TRADE GOOD

In view of the foregoing, it is not surprising to find that legitimate business generally in Canada continues to be in a satisfactory condition. There are no signs of trade depression, though a slowing down in many branches of trade is in evidence, and there is a disposition to confine commitments to actual requirements. More economy is being exercised than has been the case for some time past. The flow of money, which came in great volumes in the past few years from the British Islands and abroad, both for investment and for speculative purposes, and created a somewhat unhealthy expansion, has met with a check. It had much to do with the outbreak of land speculation in the West, which, owing in a measure to a wise precaution of the Bank Act, was limited to individuals and has not affected the country generally in an adverse manner to any appreciable extent. Advantage was unfortunately taken of the ease with which money could be obtained and of the popularity of Canadian securities in Great Britain by certain individuals on both sides of the Atlantic to exploit the London market with securities of a doubtful nature, to their own advantage, and some of these enterprises, owing to over-capitalization or incompetent management, or both, have met with disaster, causing suspicion to be cast on many undertakings of a thoroughly sound character seeking capital. There has been a collapse of the land speculation in the West of which I have spoken. Municipal expenditure has been restricted to actual necessities and with due regard to the ability of the municipality to find a market for its securities. In this connection it may be noted that the American market has relieved the situation in London and in Canada by purchasing, in the first ten months of the year, a sum of no less than $29,000,000 of our municipal, industrial, corporation and public utility bonds, without taking into consideration an amount difficult to estimate sold through Canadian brokers.

PROVINCE OF ONTARIO

Viewing the country by sections, in the Province of Ontario the year, as a whole, may be said to have been satisfactory. Crops have been a full average and the farmers prosperous.

Manufacturing industries in general have had a fair year and a considerable amount of American capital is coming into the province. The rural population, unfortunately, continues to slowly decrease, while among the cities, Toronto, with a present estimated population of 488,000, shows an estimated increase of 63,000 souls.

QUEBEC PROVINCE

General conditions throughout the province have been good. Crops have been up to average. Hay, the chief crop, turned out better than at first anticipated, and other crops have been satisfactory both as to quantity and price. Among manufacturing industries, the cotton industry has had a good year. Other manufacturers have hardly done so well. The year has been a good one for lumber, both as regards demand and price, and it is anticipated that the recent removal of the United States duty should further increase the profits of the business. It is thought not unlikely that one result of the removal of the duty will be to give a further impetus to the increasing proportion of lumber shipped to the United States instead of Great Britain and Europe. Pulpwood and paper shipments have been large both from Canada and Newfoundland. With regard to this industry it would be well that care be exercised in order that production may not exceed the demand.

MARITIME PROVINCES

General conditions throughout the Maritime Provinces for the past year have been uniformly satisfactory. The farmers have had a favorable year, and all crops, apart from fruit, have been above the average. The fishing has been good, with higher prices, and the lumber cut was fair, and prices, on the whole, satisfactory. The output of the coal mines has exceeded all previous records; and the tonnage of pig iron produced was 25 per cent. greater than last year. Manufacturing industries generally have had an output up to the average. Railway building has not been extensive, but large sums are to be expended in providing terminals at St. John and Halifax for the Intercolonial Railway and in establishing a car ferry with Prince Edward Island.

In Newfoundland the high prices obtained for fish have induced a period of prosperity. The building of branch lines of railway, the development of the mining of iron ore at Belle Isle and the growth of the pulp and paper industry have all improved conditions.

NORTH-WEST PROVINCES

Although business affairs are rapidly becoming more diversified, the production of wheat and other cereals is, of course, first in importance. The crop this year has been larger in quantity and better in quality than ever before, but the price at present is somewhat lower than at the corresponding date last year. The comparative crop figures are:—

	1912. Bushels.	1913. Bushels.
Wheat	183,000,000	190-195,000,000
Oats	221,000,000	240,000,000
Barley	26,000,000	28,000,000
Flax	21,000,000	15,000,000

and the estimated value of the 1913 crop is $209,000,000, against $192,000,000 in 1912.

The immense additions to mileage made by the railway companies, especially the Canadian Pacific Railway, in double-tracking and terminals and rolling stock, have enabled this enormous crop to be delivered with unprecedented rapidity. The rapid growth of population and the springing up of new towns have continued. The population of the three North-West Provinces, according to the census of 1911, was about 1,300,000, and is now placed at 1,600,000, and the immigration generally is a high class, a satisfactory feature being that two-thirds of the population are rural.

The method of harvesting the North-West crops will in time, no doubt, be reduced to a more systematic basis. In past seasons farmers have rushed their wheat to market in the short period intervening between harvest and the close of navigation on the Great Lakes, thereby producing more or less congestion of the markets, to their own loss. An amelioration of this condition has begun by the provision of greater storage accommodation, not only at the lake ports, but what is more to the purpose, at interior points, where the Government, as well as private corporations and individuals, are proceeding with the erection of elevators at the principal grain producing centres. In this way local markets will be created for the farmers where their grain can be readily disposed of. Mixed farming continues to be an urgent need of the North-West. I am pleased, however, to observe a betterment in this respect. From the figures which have been furnished me, there has been an increase in the past five years of 640,000 in the number of horses, cattle, sheep and swine. It is a matter of regret that the returns from the other provinces do not exhibit a similar satisfactory increase, but rather a diminution.

BRITISH COLUMBIA.

The province generally has not been as prosperous as in 1912. The salmon fishing season has been a good average and the pack has been sold at remunerative prices. The same may be said of the halibut and herring fishing, and the free admission of British Columbia fish to the United States will be of advantage to the trade. Conditions in the lumber trade have been very unsatisfactory. The prairie demand has been poor and the prices so much lower than in 1912, that it is a question if many of the mills have made money. The foreign lumber trade has fallen off both in volume and in price, and the free admission of lumber to the United States is not likely to be of much benefit, as the lumbering states on the

American side of the line can supply their own market. Mining has probably given the most satisfactory results of any industry in the province, the product of the mines increasing in value $9,000,000 over the preceding year. The total mineral output was over $32,000,000, of which coal and copper contributed, respectively, say, $9,000,000 and $8,000,000. Crops have been good and prices satisfactory. The fruit industry in the Okanagan and other districts has realized higher prices and market arrangements have been improved. New railway construction has only been undertaken to a moderate extent, and new power development has consisted chiefly of extensions, designed to supply the City of Vancouver. The stringent money conditions which have existed throughout the year have checked new enterprises of all kinds, especially municipal undertakings, and the probability is that there will be considerable unemployment during the coming winter.

MEXICO.

In Mexico general conditions continue to be disturbed, and the outcome is impossible to predict. We feel that our interests there are in safe and capable hands.

WORDS OF CONFIDENCE.

My last words are of counsel and confidence. The finger of prudence points to a policy of conservatism. While the financial sky remains clouded over in Europe, we shall do well to hasten slowly. It is not a time to attempt enterprises of a speculative nature, nor to undertake new commitments prior to the financing thereof, and an accumulation of stock by merchants and manufacturers should, as far as possible, be avoided. The excellent harvest, particularly in the North-West, should do much towards liquidating debts and ameliorating the situation, but it seems probable we will be compelled to pause awhile in the wonderful progress of expansion of the last ten years. On the other hand, the commercial condition of Canada is fundamentally sound. Business as a whole, as I have said, continues good. Our vast natural resources have scarcely been scratched. Immigration is large, railway construction active, new territory and new resources of wealth are being steadily opened, the confidence of British and foreign capitalists in our country is unabated. A temporary halt can only refresh Canada for yet greater achievements.

Mr. R. B. Angus seconded the motion for adoption of the report, which was carried unanimously.

The chairman stated that under the provisions of the new Bank Act, it would be necessary for the meeting to appoint three auditors.

Mr. C. R. Hosmer thereupon moved, and Mr. Huntly Drummond seconded, that there be appointed three auditors of the Bank to hold office until the next annual general meeting, and that this meeting do now proceed to their nomination and appointment.

Mr. C. B. Gordon moved, and Mr. Wm. McMaster seconded, that the remuneration of the auditors to be appointed be not more than $15,000, to be divided equally between them (or to be otherwise divided as may be thought best).

The following nominations were made:—By Mr. J. B. Learmont, Mr. George Hyde, C.A., of Montreal; by Mr. G. L. Ogilvie (in the absence of Mr. Bartlett McLennan), Mr. J. Maxtone Graham, C.A., of Edinburgh; by Mr. W. B. Blackader (in the absence of Mr. W. Stanway), Mr. James Hutchison, C.A., of Montreal.

Mr. Meredith mentioned that he would deposit one ballot, representing the Directors and other Shareholders who had sent him their proxies, which was all that would be necessary, unless any Shareholder wished to deposit a ballot himself. The ballot was unanimous.

It was moved by Mr. J. B. Learmont and seconded by Dr. H. B. Yates that the thanks of this meeting be presented to the President and Directors for their attention to the interests of the Bank.

Mr. R. B. Angus, in reply, on behalf of the President and Directors, expressed in a few well-chosen words, their appreciation of the thanks tendered them.

Mr. David Morrice moved that the thanks of the meeting be given to the General Manager, Assistant General Manager, the Superintendents, the Managers and other Officers of the Bank for their services during the past year. In speaking to the motion, Mr. Morrice expressed in the highest terms his appreciation of the Bank officials he had met in his long experience covering a great part of the country, and said he had no hesitation whatever in presenting this motion rendering thanks to the Management and Staff of the Bank.

Mr. D. Forbes Angus seconded the motion, which was carried unanimously.

Mr. William H. Evans moved, and Mr. Charles Chaput seconded, "that the Shareholders at this annual meeting of the Bank of Montreal learn, with deep regret, of the resignation of Mr. R. B. Angus from the Presidency of the Bank, and desire to express their keen appreciation of his long and faithful services in the interests of the Bank. The Shareholders, however, sincerely hope that Mr. Angus will co-operate with his co-directors for many years to come."

Mr. Chaput, in seconding, said that the motion was a well-deserved compliment to Mr. Angus.

Returning thanks, Mr. Angus said:—"I thank you for that expression of your goodwill."

Mr. Braithwaite said that he desired, on behalf of the Staff, to thank the shareholders for the very kind expression of appreciation of their services, and he thanked Mr. Morrice especially for the very kind words he had spoken. The prosperity of the Bank must always be to a large degree dependent upon the outside managers and the rank and file officers of the Bank. "I can assure you," he added, "of my own knowledge of the absolute loyalty and devotion of the Staff to the interests of the Bank and of the hard work done by them. I cordially thank you and assure you that you have a Staff second to none."

ELECTION OF DIRECTORS.

The result of the ballot for the election of Directors was declared by the Chairman as follows:—Messrs. R. B. Angus, D. Forbes Angus, A. Baumgarten, Huntly R. Drummond, C. B. Gordon, E. B. Greenshields, C. R. Hosmer, Sir William C. Macdonald, Hon. Robert Mackay, Messrs. Wm. McMaster, H. V. Meredith, D. Morrice, Sir Thomas Shaughnessy, K.C.V.O., Right Hon. Lord Strathcona and Mount Royal, G.C.M.G., G.C.V.O.

The meeting then terminated.

At a subsequent meeting of the Directors, the following officers were elected:—Hon. President, Lord Strathcona and Mount Royal; President, Mr. H. V. Meredith.

WOOD-USING INDUSTRIES

Ontario Has Many of Them and Grows the Kinds They Utilize

Practically all industries are more or less dependent on wood. In Ontario alone, exclusive of the manufacturers of rough lumber, over thirty-eight industries, represented by 1,200 different firms, supplied the statistics recently compiled and published by the Forestry Branch, Ottawa, in a bulletin. These firms in 1912 purchased 807,456,000 feet, board measure, of rough lumber, valued at $19,161,384, which, when manufactured into several hundred finished products, ranging from handles to hearses, represent a turning over of several times this amount of capital.

Not only is it remarkable that so many different industries, even including foundries, require wood to carry on their operations, but it is equally noteworthy that twenty-six of the thirty-four kinds of wood used should grow in Ontario.

Forestry Commissioner States.

The supplies of some of them, it is true, are nearing exhaustion, but this was not always the case, nor is it likely, with the steady rise in wood prices, that this will long continue to be the case.

Mr. E. J. Zavitz, Ontario forestry commissioner, says: "There is at present in the old settled portion of Ontario an aggregate of about 8,500 square miles of farmers' woodlands. It is safe to say that there is, in addition to the assessed woodland, another area of 8,500 square miles which is suited only for forest growth. This means that southern Ontario could eventually have over ten million acres of private woodland." Ontario was once a land of valuable hardwoods, and will be so again.

Maple Has Hundred Uses.

Another thing indicated is the variety of uses to which woods, still common in Ontario, may be put. Elm and basswood are used in thirty-one industries, and ash is another valuable hardwood with a wide range of use. Maple, Ontario's most important hardwood, has over one hundred listed uses, while birch and beech are being increasingly used, especially for hardwood flooring. Pine forms 21.7 per cent. of all the wood purchased by these industries, but is being gradually replaced by spruce, as the supply is nearing exhaustion. By observing the uses and then consulting the classified directory of manufacturers, markets may be ascertained for cherry, apple, sumac and other supposedly little-used hardwoods, and also for many forms of wood-waste.

Russell KNIGHT

Had we been satisfied to let the public do the "proving"—we could have marketed the "Russell-Knight" *in quantities* twelve months ago.

But we preferred to prove it ourselves.

Thousands of dollars and months of time were spent in refining every detail of the Russell to a point where further improvement could not be foreseen.

The new Russell-Knight you buy to-day is a *proven* product—free from every element of uncertainty encountered in the purchase of most new cars.

Former owners of other high-priced cars best appreciate the sterling merits of the Russell-Knight. Their letters are offered in evidence.

Hull, Que., Nov. 25, 1913
Russell Motor Car Co., Ltd.,
West Toronto.

Gentlemen:

The "Six" I bought from you last spring is the ninth car that I have had, the last four being Russells, so I can speak freely from a few years' experience.

The first Russell I had was a Model "R," exchanging that for a "38." Both gave great satisfaction. My son is driving the "38" now. In this car I thought I had the last word in motors, but the "Six" is superior in every way.

The last Russells were about perfect, but this "Six" is a winner. We have taken numerous long tours, but have never had the slightest trouble. It is the most comfortable car I ever rode in, and my friends all say the same, for it is easier riding than an electric and more comfortable. The heating system is perfect.

The second last car, a "38," never had the engine opened all the time I drove it, and the "Six" seems to more than equal that record. The engine runs better and quieter, and each day it runs more smoothly. The car itself glides along without a shock. It is also very easy on tires and gasoline, and, so far as trouble goes, I don't know what the word means.

It is great to think that this beautiful car is produced in this country. In my estimation it out-classes any car made or imported into Canada to-day.

Very truly yours,

(NAME ON REQUEST)

Ridgetown, Ont., Nov. 8, 1913
Russell Motor Car Co., Ltd.,
West Toronto.

Dear Sirs:

I just saw your ad. in the daily papers headed "Russell-Knight 1914." Now it is only the fortunate fellow who owns one that knows the real meaning of the word "Russell-Knight."

The pleasure and satisfaction I have had with the Knight-engine car, bought from your Company two years ago is beyond description.

Furthermore, in these days of high price of gasoline, I can run twenty-six to thirty miles on a gallon of gasoline, without additional equipment, and on any kind of dry roads by actual test.

To some this would sound "inflating"—re the gasoline consumption described—but it is a fact by actual test, which I have found by proper adjustment of the carburetor.

Wishing you unbounded success, I remain,

Yours truly,

(NAME ON REQUEST)

DEBENTURES FOR SALE

DEBENTURES FOR SALE

TOWN OF MORINVILLE, ALTA.

Sealed tenders addressed to the undersigned will be received for $16,000 6 per cent. local improvement debentures, $10,000 payable in 19 years and $6,000 payable in 20 years.

J. B. DALPHOND,
Secretary-Treasurer.

Morinville, Alta.

A NATION OF CITIES.

"Is Canada becoming a nation of cities?" is the attractive title of a book which answers this query from various practical and interesting viewpoints; it points to a phase of Canada's development not often considered. In the 135 pages useful information is contained, and many representative illustrations are given, together with a railway map. This little volume can be obtained from the firm named below and should be acquired by those interested in the many developments taking place in the Dominion.

["Is Canada becoming a nation of cities?" Published by International Securities Company, Limited, Winnipeg.]

◆

Messrs. Smith, Mackenzie and Hall, general insurance agents, Toronto, have issued a blotter on which the following is printed:—"Canada's egg crop for 1912 was worth $23,000,000. Canada's fire loss was also $23,000,000. Moral —Increase the egg crop and cut the fire loss down."

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

WHAT THE BANK OF ENGLAND DOES

Simple Explanation of Its Operations—Why It Seeks Gold

In a notable speech in England the other day Sir Edward Holden, Bart., analyzed in an interesting way the functions of the Bank of England and the indications of its weekly balance sheet. The statement is divided into two parts: (1) The issue department, and (2) the banking department.

Before the Bank Act of 1844, said Sir Edward, every bank could issue bank notes or currency and thus inflate prices. As a consequence gold flowed out from this country, and as the bank notes at that time had no gold held against them, they could not be paid, crises occurred, and a number of private banks failed. To prevent the recurrence of such a state of things Sir Robert Peel, in 1844, brought in his famous Bank Act, under which any bank established after that date was not allowed to issue notes, and this Act practically placed the privilege of issuing notes exclusively in the hands of the Bank of England. Since then the notes issued against securities have increased from £14,000,000 to their present amount of £18,450,000.

Drives Out Gold.

It is affirmed that the issuing of notes against securities drives out gold, and for the following reason: The amount of notes in the issue department, as you see, is now about £54,000,000. Experience has proved that for the purposes of our trade it is necessary to have a Bank of England note-issue of about this amount. Let us assume, that instead of the present system, the law obliged the bank to have gold coin or bullion, pound for pound, for every note issued; we then should have about £54,000,000 in gold in the issue department. If it were then desired to alter that system and issue £18,450,000 of notes against securities, then gold to that amount would be driven out of the issue department, and its place taken by the securities.

The bank at the present time is working under the latter system. The notes issued are covered partly by £18,450,000 worth of securities, consisting of (1) a debt of £11,000,000 due by the Government to the issue department of the Bank of England, and (2) of other securities amounting to £7,435,000. We do not know what kind of securities the latter consist of, but we assume they are written down to market value. The balance of the cover for the notes consists of gold. Thus, you see in this statement the gold held as part cover for the notes amounts to nearly £36,000,000. This is the national reserve of gold, but it is not the only gold, because, as I have already stated, the joint-stock banks hold a large amount.

Silently Gathering Gold.

The total amount of gold in the German State Bank and war chest is now about seventy millions sterling, and is being further increased. It behoves us to take up this question as seriously as Germany has done. It really falls to the duty of three groups to take action. First, the joint-stock banks; secondly, the Chancellor of the Exchequer, and, thirdly, the Bank of England. The joint-stock banks are working silently to the desired end by gradually accumulating gold, and I believe they would satisfy the country that they are doing their duty if they would carry out the suggestion to publish in their balance-sheets once a year the amount of gold which they hold. But they are not unanimous.

The First Lord of the Admiralty, year by year, increases his expenditure on ships. The Minister of War, year by year, increases his expenditure on the army, but no attempt is made by the Chancellor of the Exchequer to provide the gold necessary for operating these two arms of the service in case of emergency. If he would gradually pay off the Government debt of £11,000,000 in the issue department of the bank, then this amount, together with the increasing amount of gold held by the joint stock banks, and the average amount held by the Bank of England, would, in two or three years, aggregate about 100 millions sterling.

Inflow and Outflow of Gold.

For every ounce of bar gold of a certain fineness paid into the issue department of the Bank of England bank notes are issued to the owner of the gold at the rate of £3 17s. 9d. per ounce. The gold in the issue department consists (1) of sovereigns, (2) of foreign coins, and (3) of bar gold. When the bar gold is sent to the Mint for coinage into sovereigns, the Mint will give out for every ounce of gold three sovereigns and seventeen shillings and tenpence halfpenny; thus, leaving interest out of the question, there is a profit of three halfpence per ounce on the transaction.

When bar gold comes from South Africa, it passes through the hands of the assayers and the bullion dealers, and if anyone desires to purchase this gold, he has to pay at least one farthing per ounce more than the Bank of England pays. The Bank of England is understood to have a rule that it will not give more than £3 17s. 9d. per ounce, and as almost the whole of the South African gold has recently been sold to foreigners at £3 17s. 9¼d. per ounce, the Bank of England has received very little, and has consequently been obliged to put up its rate to 5 per cent., and may even have to go to 6 per cent. in order to protect the gold which it has, and in the hope of attracting more from abroad.

Any departure from the rule of not paying more than £3 17s. 9d. per ounce is deprecated, because it is alleged that the discount rate would fall to such an extent as to turn the exchanges against this country, and, consequently, more gold might be taken than had been purchased by giving a higher price. In theory, this might appear true, but in practice, at the present time it is very much open to doubt, and can only be proved to be universally true or otherwise by judiciously (I wish to emphasize the word "judiciously") making the experiment.

Coming now to the banking department of the Bank of England. The notes given out of the issue department in exchange for gold are placed to the credit of their owners in the "other deposits" on one side of the balance-sheet, and, as a contra-entry, they are included in the reserve on the other side of the balance-sheet. It is the rise or fall in the amount of this reserve which causes a rise or fall in the Bank of England rate.

If, therefore, gold is flowing out, the Bank of England raises its rate and the market rate follows it, and by this means we not only check the outflow of gold, but gold is attracted to this country.

Outflow from the Bank.

We have dealt with the case of an inflow of gold into the bank; we will now deal with the case of an outflow from the bank. If a firm desires to export gold, it may take it from the bullion dealers in bars, or by presenting cheques on the joint stock banks and taking payment in Bank of England notes or coin. These notes are presented to the issue department of the Bank of England, when gold, either in the form of sovereigns, foreign coin, or bars, may be taken in exchange. It may also be taken by means of a cheque drawn on the banking department. This cheque would go to the debit of the "other deposits," and notes would be taken out of the reserve, which would thereby be diminished and a rise in the bank rate rendered possible. The notes would then, as before, be presented at the issue department and exchanged for gold.

Gold Exporting Point.

Both bankers and traders here are interested in the exchange when it reaches gold exporting point, because they know that the reserve in the banking department as well as the gold in the issue department will both be reduced, which would result in a rise in the bank rate. As the bank rate governs the rate for overdrafts and loans both in London and the country, borrowers would have to pay a higher rate to lenders, and, in addition, the discount rate rising places a heavier charge on the manufacturer and merchant, thus reducing their profits.

Those who wish to go deeper into this subject will find there is standard gold and fine gold—that is, pure gold.

Standard gold consists of eleven parts of pure gold out of twelve and one part alloy. It is, therefore, said to be eleven-twelfths fine, and when exporters buy gold, it is on the basis of standard gold, the minimum price of which is £3 17s. 9d. per ounce, because the Bank of England is compelled to give that price.

If you invested a sum of money in standard gold which you shipped to New York, the New York Treasury would assay it and buy it as fine gold, giving in exchange 20.6718325 dols. per ounce.

But we all know you would have to pay charges for its conveyance to America. These charges would be for freight, insurance, commissions, cost of packing and interest. You would first debit your gold account with the amount paid for the gold, and, secondly, with the amount paid for the charges. Having received from the Treasury the amount in dollars for the gold, you would buy therewith sterling exchange on London, and you would credit your gold account with the proceeds of that exchange when it arrives in London. The balance of your gold account would, therefore, be the profit or the loss. The lower the rate of exchange you pay for your sterling the larger will be your profit or the smaller will be your loss.

The sterling exchange may be bought either before, during, or after the shipment, the precise time being dependent on the rate of exchange.

INSURANCE COMPANIES

The following insurance companies have been registered to do business in Alberta:—

Employers' Liability, the Prudential of America, Northwestern National of Milwaukee, German American of New York, Metropolitan Life of New York, Mutual Life of Canada, National Life of Canada, Commercial Union.

DIVIDENDS AND NOTICES

DIVIDEND NOTICE

THE COLONIAL INVESTMENT AND LOAN COMPANY

HALF-YEARLY DIVIDEND

Notice is hereby given that a dividend of three per cent. on the Permanent Preference Stock of this Company has been declared for the half-year ending December 31st, 1913, and that a dividend of three per cent. upon the Ordinary Permanent Stock of the Company has been declared for the half-year ending December 31st, 1913, and that the same will be payable on and after **Friday, the 2nd day of January next.**

The Transfer Books of the Company will be closed from the 15th to the 31st of December, inclusive.

By order of the Board.

A. J. JACKSON,
General Manager.

Dated this 2nd day of December, 1913.

AMES HOLDEN McCREADY, LIMITED

QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of one and Three-Quarters (1¾) per cent. upon the Preferred Capital Stock of the Company, now issued and outstanding, for the current quarter, to Shareholders of Record on the Transfer Books of the Company on the 20th day of December, 1913, will be payable at the office of the Company in Montreal on and after the **2nd day of January, 1914.**

By order of the Board,

W. A. MATLEY,
Secretary-Treasurer.

Montreal, December 6th, 1913.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on **Thursday, the 8th day of January next.** The chair will be taken at 11 o'clock a.m.

E. L. PEASE,
General Manager.

Montreal, November 29th, 1913.

Tenders for Capital Stock

OF THE

Consumers' Gas Company
of Toronto

Sealed tenders, addressed to the Consumers' Gas Company of Toronto, 19 Toronto Street, Toronto, Ont., and marked "Tender for Capital Stock," will be received by the Consumers' Gas Company of Toronto until **12 o'clock noon of the 11th day of December, 1913,** for the purchase of 15,000 shares of the unissued capital stock of the said company (each share having a par value of $50.00), subject to certain conditions and terms of sale, the particulars of which, together with the form of tender to be used, may be had on application to the General Manager of the Company at the above address.

Dated at Toronto this 17th day of November, A.D. 1913.

By order of the Board of Directors.

ARTHUR HEWITT,
General Manager.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

(Incorporated A.D. 1876.)

Authorized Capital	$1,000,000.00
Subscribed Capital	900,000.00

Reserve Fund	436,000.00
Total Assets	3,156,265.08

Notice is hereby given that a dividend of **five per cent.** for the current half-year (being at the rate of **ten per cent.** per annum) upon the paid-up capital stock of this institution has been declared, and that the same will be payable at the Society's office, corner Wyndham and Cork Streets, Guelph, Ontario, on and after **Friday, January 2nd, 1914.**

The transfer books will be closed from the 20th to the 31st of December, 1913, both days inclusive.

J. E. McELDERRY,
Managing Director.

Dated December 2nd, 1913.

REGINA HAS CARRIED OUT PROGRAMME.

Regina's commissioners report on the city's finances as follows:—

Regina has maintained a satisfactory financial credit during the year. At the beginning of the year a change was made in the system of accounting, by which provision was made in the current estimates for 1913 for the payment of sinking fund and interest charges on the whole of the city's debentures for three six-months' periods, so that these charges accruing and falling due on the first of January, 1914, have been fully provided for in this year's estimates, the custom in previous years having been to treat this payment of sinking fund and interest as a liability of the new year.

This change in system burdened the current estimates with an additional expenditure of some $70,000; yet in spite of this, and the necessary and legitimate increase in the cost of the administration of the city's affairs, the year's estimates were so carefully framed and revised that a tax rate was struck the lowest for many years, and the burden of the taxpayer thus relieved as far as possible, and at the same time the city embarked upon a programme of municipal works and improvements by far the largest it has ever undertaken, thus providing necessary work for an army of mechanics and laborers, and at the same time assisting to establish and maintain a financial record of which it has reason to be proud.

This programme has been carried out, or is in hand, practically in its entirety, and while the city has some debentures on its hands authorized and unsold, no necessity exists for the sale of same until the spring of 1914, by which time it is hoped the money market will have resumed a more normal tone, and the city can then place its securities at a price approaching that obtained this spring.

JUDICIAL DECISION REGARDING HINDU IMMIGRANTS.

Chief Justice Hunter has given a decision condemning as illegal all the federal orders-in-council which have hitherto kept Hindus out of British Columbia. The only grounds on which a Hindu may now be excluded are those of idiocy, disease, crime or mendicancy, merely grounds which apply against British-born citizens entering Canadian eastern ports.

The decision specifically is in favor of a priest named Bhagwan Singh. The chief justice gave an oral judgment giving Bhagwan Singh his freedom on habeas corpus proceedings. Later Chief Justice Hunter added a written judgment which went further than his brief court pronouncement.

As to the order-in-council referring to natives or citizens coming by a continuous journey from India, and which had been previously declared ultra vires by Mr. Justice Morrison in the case in re Rahim, the learned chief justice concurs, as the order-in-council refers to "natives or citizen," whereas the statute merely says "a native or naturalized citizen."

His lordship says he assumed the legislature had some manifest intention when it amended the act in 1908 to insert the word "naturalized" to give it larger classification. He holds that the word "native" is to be used as an adjective qualifying the word citizen.

◆

RURAL MUNICIPALITIES EMPOWERED TO BORROW MONEY

The following municipalities in Saskatchewan have been empowered to borrow money:—

Grassy Creek, No. 78. $5,000. J. B. Lorge, Kelstern.
Golden West, No. 95. $5,000. Edgar Mott, Glenada.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

NOVEMBER MUNICIPAL BOND SALES

Domestic Borrowings for Eleven Months Exceeds Previous Year's Total

The municipal bond sales in Canada for November, as compiled by *The Monetary Times*, amounted to $2,481,062, compared with $2,768,782 for October, and $1,396,664 for the corresponding period of last year, and making a total for the year of $19,936,673.

Souris, Man., sold $40,000 6 per cent., 1943, to a Toledo house. The following are the particulars by provinces:—

Ontario	$1,314,393
Manitoba	454,484
Saskatchewan	234,000
Alberta	184,200
Nova Scotia	158,985
British Columbia	85,000
Quebec	50,000
	$2,481,062

The following are the monthly totals during 1910, 1911, 1912 and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	383,826
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	2,435,726
July	1,536,424	1,594,566	1,967,476	1,591,924
August	1,312,953	1,493,507	1,649,547	661,300
September	2,841,486	1,748,778	1,998,605	1,663,260
October	2,211,461	1,730,075	1,060,597	2,768,782
November	2,292,781	2,915,765	1,396,664	2,481,062
December	566,113	1,243,596	491,590	....
Total	$29,043,325	$30,295,838	$19,767,356	$19,936,673

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Swanson Village, Sask.—The council has been authorized to borrow $500. W. W. Brown, secretary-treasurer.

Imperial Village, Sask.—The council has been authorized to borrow $1,000. J. G. Hobman, secretary-treasurer.

Marcelin Village, Sask.—The council has been authorized to borrow $600. A. Lacerte, secretary-treasurer.

Cut Knife Village, Sask.—The council has been authorized to borrow $2,000. W. W. Johnston, secretary-treasurer.

Morinville, Alta.—Tenders are invited for $16,000 6 per cent. debentures. J. B. Dalphon, secretary-treasurer. (Official advertisement appears on another page.)

Goderich, Ont.—A by-law authorizing Goderich to guarantee the bonds of the American Road Machine Company for $50,000 and give it a fixed assessment of $10,000 for a period of ten years has been passed.

Transcona, Man.—By-laws for sewage and waterworks systems, and for exemption from taxation for a term of years to the Dominion Tar and Chemical Company are to be submitted to the ratepayers at the coming elections.

DEBENTURES AWARDED

County of Lincoln, Ont.—$19,000 5 per cent. 10 years, to Messrs. Wood, Gundy & Company, Toronto.

New Liskeard, Ont.—$17,000 6 per cent. 10 and 15 years, to Messrs. G. A. Stimson & Company, Toronto.

Saskatoon Separate School District.—$40,000 5 per cent. 30 years, to R. C. Matthews & Company, Toronto.

Dundas, Ont.—$44,421.40 4½ per cent., 5 per cent. and 5½ per cent. debentures, to R. C. Matthews & Company, Toronto.

Midland, Ont.—$14,800 5½ per cent. 30-year instalments, guaranteed by the County of Simcoe, to R. C. Matthews & Company, Toronto.

Niagara Falls, Ont.—$14,423 5 per cent. 10 years, $4,332 5 per cent. 20 years, $18,879 5 per cent. 30 years, to Messrs. Wood, Gundy & Company, Toronto.

UPON SAME BASIS AS TRADING CORPORATIONS.

Mr. A. N. Mouat, city auditor, in a report on Edmonton's municipal administration, states:

"In giving consideration to the organization, and to the accounting system, the fact must not be overlooked that in addition to the ordinary affairs of a municipality, Edmonton is engaged in large commercial enterprises. With its public utilities, comprising:—Electric light and power, telephone, power plant, waterworks and street railway.

"The city occupies the position of that of a large trading corporation. It is essential therefore that the organization and accounting system cover not only the ordinary municipal affairs, but that they be adjusted to suit the requirements of the commercial departments of the city. What is required is an organization and system under which the affairs of the city may be conducted upon practically the same basis as that of any large trading corporation, and that there may be readily obtainable accurate information of the true condition of affairs in regard to all matters relating to the city's business."

COMPENSATION AND CHARACTER.

Now that Ontario is considering a workmen's compensation act modelled after the German law, we are hearing much in Canada as to how too much paternal legislation has affected national character. A large number of these acts are said to have developed new ailments. For instance we are told that Dutch doctors now specially differentiate between "accident neuresthenia" and "accident law neuresthenia." The latter form of illness is a morbid desire to remain an invalid and in Europe is called "pension hysteria." In France, since the passage of the French accident law of 1898, there has been born a new disease which the doctors call "sinistrosis." It is described as a "physical accident" and is caused by the fixed idea which takes possession of the injured workman that every accident occurring in the course of work constitutes a damage admitting of indemnity.

Germany has had about thirty years' experience of compulsory workmen's compensation insurance. Ontario is about to begin. At present, in Germany, there are some 14,000,000 people insured against sickness, 25,000,000 against accident and about 16,000,000 against old age and invalidism. Since the passing of the insurance laws some nine milliards of marks ($2,250,000,000) have been expended in payments, with a regular annual average in recent years of 750,000,000 marks ($1,850,000). The number of individuals to whom these payments are made amounts to about 100,000,000 and every year adds 8,000,000. These are remarkable figures.

It is not difficult to imagine how a mania for insurance pay could take deep root among the working classes, as similar manias have taken root among other classes. The worst possible thing for a young country such as Canada is the introduction of paternalistic laws which tend to undermine the individual spirit of enterprise and responsibility, a quality of which Canada has boasted much.

AGAINST THE MUNICIPAL BONUS

There appears to be growing in Western Canada a disposition to regard unfavorably the municipal bonus to new industries. *The Monetary Times* always has been opposed to the practice. Ontario, which used to bonus indiscriminately, learned some bitter lessons at the hands of adventurers who played with municipal credit. At the last session of the Alberta legislature important steps were taken towards prohibiting cities of that province from giving bonuses. The following clauses were added to the charters of five of six cities that applied to the legislature for amendment to their charters.

"Notwithstanding any provision herein contained the city shall have no power:—

"(1) To grant a bonus or any other aid to any person, company or corporation for the construction, establishment or operation of any manufactory, mill or railway or any other business or concern whatsoever either within or without the municipality.

"(2) To exempt from taxation any such manufactory, mill or railway or other business or concern nor subscribe for stock in or guarantee the bonds, debentures or other securities thereof.

"Providing that the provisions of this section shall not apply to any agreement in existence at the time of the passing of this amendment between the city and any person, firm or corporation.

"Providing, also, that if the council of any city attempt to pass a by-law contrary to the above provisions in regard to bonusing, each member of the council voting in favor of such by-law shall be liable on summary conviction to a penalty not exceeding one hundred dollars exclusive of costs and such members of council shall be disqualified from holding any municipal office for a period of two years.

"And provided further, that the city may sell to any person, firm or corporation, lands at any sum not less than the actual cost thereof to the city, plus interest at six per cent. per annum from the date of purchase or acquisition to the date of sale, or lease any lands, buildings or portion thereof to any person, firm or corporation at a rent equivalent to six per cent. per annum of the cost thereof to the city; and may also sell, distribute or deliver to any person, firm or corporation, light, heat, power, water, gas, oil, electricity or coal at any price not less than the actual cost thereof to the city."

The town act of Alberta already contains provisions prohibiting bonusing. These were further strengthened at the last session of the provincial legislature by the addition of the following clause: "Provided also that if the council of any town attempt to pass a by-law contrary to the above provisions in regard to bonusing each member of the council voting in favor of such by-law shall be liable on summary conviction to a penalty not exceeding one hundred dollars exclusive of costs, and such members of council shall be disqualified from holding any municipal office for a period of two years."

Alberta is to be commended for taking this step. The bonusing practice is pernicious. Industries worth having will go to the town or city which affords the right factors for the success of that particular industry. Industries that will go anywhere, from the arctic circle to the maritime provinces, just to get a municipal bonus, are not worth having.

BACK TO THE LAND AND——

There are important problems with which Canada must deal soon concerning its agricultural life. First, it is necessary to get men to go on to the land and then they must be kept there. That would help to prevent the drift of population from rural to urban communities, which in turn would help to remove the difficulty of getting men back to the land from the city. Mr. N. W. Rowell, leader of the Ontario opposition, is advocating a royal commission to report on repopulation of the agricultural districts and upon agricultural conditions generally.

An Ottawa dispatch states that "suggestions in regard to immigration policy that have been recently made with a view to increasing agricultural production in Canada and thus reducing the cost of living, include still greater efforts to restore and maintain the farming population of Ontario, the eastern townships of Quebec and the maritime provinces; an endeavor to attract to Eastern Canada some of those people of Great Britain and other European countries who understand intensive cultivation; and also an active policy of colonization of the fertile north lands of Ontario and Quebec. The last census showed a loss of 100,000 in the rural population of Ontario in the preceding decade. This has resulted in less efficient agricultural work and much lower production than would otherwise be the case."

The populating of agricultural lands is very important and every possible inducement should be made to make farm life attractive. The same Ottawa dispatch adds this note: "It is felt that agriculturists from England, Belgium and elsewhere who understand how to get the highest possible returns from cultivation of the soil could be induced to settle here, especially near our large centres of population where there would be an unlimited market and top prices for their products, their presence would not only increase the actual production, but help to teach our own people the value of intensive cultivation as practised in Europe."

This makes good reading, but an analysis of the actual position in Canada shows that there is another phase of the problem which needs serious attention,—that is the marketing of the farmers' produce. It is one thing to teach the people intensive cultivation and it is another to give them the proper facilities to market their stuff. In a recent paper read at Ottawa, Mr. R. H. Coats, of the Department of Labor, gave a vivid view of the loose marketing system which prevails in most parts of Canada and particularly in Ontario where so much garden truck is grown. Those who have visited the producing districts cannot fail to have noticed the wide price gap between the figure received by the farmer and that paid by the consumer, and also the large amount of produce which rots on the ground in the country, while the city is complaining of high prices.

President Ripley, of the Atchison Railway, is sending a message to farmers in his territory that if they will continue to include garden truck and fruit in the scheme of crop diversification and increase their acreage his railroad will install a special refrigerator service for picking up their products in small quantities and transporting them to profitable markets. Officials of the road meet the farmers in conference at convenient places, in town commercial clubrooms, in country school houses, and in farm houses. These officials give detailed information about supply of and demand for vegetables and fruit, location of available markets, and character of service proposed. The farmers are taking a lively interest in the campaign, and promise an increased acreage of garden truck for next year. The campaign will extend throughout thirteen States. The general plan will be similar to that adopted for handling small shipments of poultry and dairy products, which has grown to enormous proportions in the last few years. Refrigerator cars will, on stated days, be sent over the lines to pick up small shipments of fruit and vegetables, in addition to present regular refrigerator train service. At terminal points these small shipments probably will be transferred, and each kind of shipment go in carload lots to available markets. By the bulletin service the farmers, through station agents, will be advised of market conditions. "The science of commerce is collecting things where they grow, or are manufactured, and taking them to places where people need them," President Ripley said. "By co-operation suggested, we believe it is possible for farmers to sell all the garden stuff and fruit that can be produced, and at a satisfactory profit. We ask the farmers to consider the proposition carefully, and in arranging for diversification of their crops next spring to include the garden stuff."

LENDING v. PERMANENT INVESTMENT

An important point is raised by a correspondent, Mr. H. K. S. Hemming, on another page regarding Canada's position as a borrower. It is that we must not take for granted that the future development of the Dominion is to be financed upon borrowed rather than permanently invested capital. There is much truth in his assertion that Canadians have of late years engendered the borrowing habit partly because they have been encouraged by the lenders, but mainly because outsiders have not cared to do otherwise than "lend" their money to Canada. In short, Mr. Hemming thinks that by making the permanent investment in Canadian undertakings in every way desirable to those in other countries who have a supply of surplus money, Canada will place herself in a better position to control her own development and the disposal of her own natural resources. The alternative is, when the limit of her borrowing is reached, that she will be compelled to beg for money at almost any price.

Some will be inclined to differ perhaps on minor phases of this question, but few will disagree with the main contention. It is exceedingly easy to develop a borrowing habit—just as easy for the nation as for the individual, for the corporation as for the municipality. With undue extension of the borrowing habit, comes naturally a strain upon credit.

Our correspondent seeks to gain the desired end by a proper system of censorship of Canadian securities and consequently, Canada's credit. We have censorship already in several forms, but there is no comprehensive scheme and it may be difficult to find one. If Mr. Hemming can develop a practical solution of the censorship problem it will be of considerable interest.

PAYING THE PIPER

A Cleveland dispatch says that subscribers of the Great Lakes Protective Association have been called on to pay an assessment of fifty per cent. of the initial contribution, which was four per cent. of the insurance valuation. The association carries 25 per cent. of the insurance of its subscribers.

The action of the advisory committee was taken after careful examination of losses sustained by subscribers as a result of the storm of November 9th. These losses, it was shown made the initial contribution insufficient to meet the claims for the entire season.

The assessment of fifty per cent. will amount to about $250,000. Whether all this will be needed to meet the claims for the season of 1913 will not be known until all the claims are presented, and attempts to recover certain steamers have been successful or are abandoned.

This is a reminder that those who undertake to do their own insurance business, such as some of the Lake steamship companies, having called the tune, have to pay the piper whatever happens. The reputable fire or marine insurance company pays its losses whatever happens. The marine protective association and the civic fire insurance fund may be excellent when passive, but when they are needed most, such as after a hurricane or a conflagration, they are helpless.

DOMINION LOAN IN LONDON WAS WISE MOVE

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

TO AVOID NEW YEAR RUSH

That is Why Dominion Took London Market's Breath and Four Millions Sterling

Amount of Loan	**£4,000,000**
Security	**4 per cent. stock.**
Issue price	**97**
Left with underwriters	**83 per cent.**

Undoubtedly, the issue of the Dominion loan in London last week was a surprise to the market. The result, namely, that the public took only 17 per cent., naturally is not a reflection upon Canada's credit. As the loan was underwritten, the Dominion gets the money and incidentally learns the true nature of market conditions, information which other countries have also noted with interest. Other recent loans overseas have also suffered. One of the latest, the offering of £350,000 5 per cent. debentures at 92 loaded the underwriters with 85 per cent. No colonial government loan in London has been fully subscribed for the last eighteen months.

The Canadian loan dropped ½ discount, a slight change which was taken to mean that the result was not regarded as very unsatisfactory, all circumstances considered. There is a disposition to believe that Canada was wise to obtain funds now, in view of anticipated large borrowings from European countries, following the Balkan War, and other issues.

Buyers Come Later.

Commenting on the result, the London Daily News and Standard both agree that whatever disappointment may be felt at the ill-success of the loan will be quickly dispelled by the strong demand that sprang up shortly after, when the scrip recovered to ½ discount. Insurance and kindred companies were heavy buyers, one firm alone purchasing $40,000 of stock.

There is now a good demand for the loan, and as a Canadian Associated Press dispatch reports, the experience of this loan is similar to that of previous emissions, investors awaiting a favorable opportunity to get in on the "ground floor." Brokers reported a good investment demand, beyond that already mentioned and the underwriters should soon be relieved of a large portion of their burden.

Finance Minister's Opinion.

Discussing the loan, at Ottawa, Hon. W. T. White, minister of finance, said that the response of the public while somewhat disappointing was not surprising in the light of the uncertainty in the London market as to flotations and funding operations, which will undoubtedly be upon a large scale at the beginning of the new year.

A new York view is that London financial authorities preceding the offering commented unfavorably upon the proposition as being untimely, in view of the extraordinary renewed congestion of the investment market at the British capital, that the London financiers designedly sought to emphatically impress the futility of further applications for new capital at that centre until the turn of the year at the earliest. It is surmised that the Dominion authorities, in offering the loan meant to forestall the competition of the great mass of new offerings expected early in the new year.

Of the Previous Loan.

The previous Canadian Government loan was in October for three millions. This loan met far better success than the last one, only fifty-seven per cent. going to the underwriters when loan was floated. It was issued at a quarter premium, but on the announcement of the result receded to a half discount.

FEWER CANADIAN IMPORTS

†London, December 8.—Official returns show that the November imports of wheat from Canada were nearly £200,000 less value than those during the previous November. Bacon imports were 294,000 pounds less, and cheese 283,000 less.

PRINCE ALBERT LOAN

†London, December 8.—The new loan for the city of Prince Albert, Saskatchewan, being underwritten here, is given as $1,000,000 in fives at 90.

MUNICIPAL SCRIP VARIES

†London, December 8.—Despite the ill-success of the government loan, Montreal and Saskatoon's recent scrip are both at a half premium to-day. The Toronto loan is at three-quarters discount.

HOW ISSUES WERE RECEIVED

*London, December 6.—The amounts subscribed in the latest new issues are as follows: city of Stockholm, £500,000, oversubscribed; Eastern, Carpathian Oil, £50,000, nearly 80 per cent.; Argentine Iron and Steel, £150,000, rather under 50 per cent.; British Portland Cement, £350,000, about 15 per cent.

LONDON PAPERS ON CALGARY OIL STRIKE

*London, December 6.—The Globe and Pall Mall Gazette both comment favorably to-day on the outspoken warning of a Calgary paper on the Alberta oil strike, which is accompanied by many wildcat schemes.

Advice is given to British investors to be wary until the commercial value and the quantity of oil is known. Experts say that there is undoubtedly paying oil in Alberta, but consider it is to be found in the northern part of the province.

EVIDENCES OF IMPROVEMENT

*London, December 6.—Coats, Son and Company launched the New Toronto loan of $7,500,000 4½ per cents. at 97½ underwritten at 1½ commission. The bonds are redeemable in 1948. This is the first time that Toronto has borrowed on a 4½ per cent. basis. The success of Saskatoon's issue of $850,000 fives is fresh evidence of the improved condition of the Canadian municipal market. The province of Alberta has placed privately $1,250,000 six months treasury bills yielding 5¾ per cent.

ISSUES COME TOO RAPIDLY

†London, December 10.—Financial authorities confirm Hon. W. T. White's statement that the result of the Canadian Government loan is largely due to the new habit among investors to purchase new loans at a discount in the market instead of applying at the time the issue is being made.

Under the influence of these after-issue purchases quotations rose from ⅝ to ¼ discount, and there is talk of one premium in the early future.

Underwriters included leading insurance and kindred companies who were glad to secure such a gilt-edged investment.

Complaint, however, comes from holders of the earlier issue, whose interests Mr. W. Ernest Wright writes to The Times protesting against the depreciation due to the practice of issuing at short intervals Government, municipal and other loans with identically the same security, and bearing the same rates of interest, at diminishing prices

He adds:—"Canadian authorities are following the practice of the suburban shopkeeper, but he only marks down prices when he becomes overstocked or goods have become soiled."

MANY NEW YEAR ISSUES EXPECTED—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

NEW ISSUES WERE CHECKED

Canadian Pacifics in London Market—Trouble Over Cobalt Shares

(Central News cable to *The Monetary Times*).

London, December 12.—Stock market operations this week have been of a restricted character, but signs of a healthy undertone are not lacking. One of the most reassuring happenings of the week was the flat rejection of the labor firebrand Larkins by the trades union leaders of the Kingdom. This action removed what threatened to become a serious industrial menace and the whole labor field is now in a much more restful attitude.

Canadian Pacifics have remained unsettled since the fall caused by disappointment over the loan financial plan announced early in the week. It is suggested by bulls that this plan is only the forerunner of a bigger development to be announced later. Otherwise they say, the fall would have been more severe. The company's new notes' rights are quoted at 4½.

Cobalt Shares Cause Brokers' Suspension.

Something of a sensation was caused on the stock exchange yesterday by the suspension of three stock brokers for long terms for irregularities in connection with the introduction of certain Cobalt silver shares.

Money is in fairly ample supply, and discounts are easier owing to expectations that Paris will commence Balkan financing shortly without waiting for the floating of the French loan next May.

The failure of the Canadian Government loan this week has appreciably checked the local flood of new issues

No Change in Bank Rate.

The anticipated reduction to five per cent. was not made to-day by the Imperial Bank of Germany in its minimum rate of discount, but it is announced that the directors of the bank will meet to-morrow to take action on the matter.

No change was made by the Bank of England in its 5 per cent. minimum rate of discount to-day. The bank's weekly statement to-day shows an increase of £206,000 in the total reserve.

PRINCE ALBERT IS HOPING.

†London, December 11.—Considering that the interest works out at nearly 5¾ per cent., Prince Albert ought to have no difficulty in securing the £200,000 asked for to-day. The issue is in hundred pound bonds at 90, redeemable at various periods, spread over 20 years following 1923.

BORROWINGS IN LONDON.

†London, December 11.—Application has been made for a settling day for Toronto's new 4½ per cent. loan.

The Daily Telegraph, in an article on Canadian borrowings, shows that money advanced to Canada this year, apart from semi-private operations, makes the following totals:—

Dominion—Seven million pounds sterling.
Provinces—Nearly three million pounds.
Municipalities—Fifteen and a half million pounds.
Railways—Twenty-six million pounds.
Miscellaneous—Ten million pounds.

This is a total of sixty-two million pounds. Pointing out how the price against Canada for money has steadily risen in the last two years, the Telegraph remarks that Canada must judge whether development is not proving too costly.

[The above total, £62,000,000, is larger than is shown in the records of *The Monetary Times*, a fact probably accounted for by the inclusion of Canadian Pacific Railway stock payments and short term borrowings.—Ed. *The Monetary Times.*]

CANADIAN BONDS ABROAD

†London, December 8.—Changes in Canadian funds occurred during the past week as follows:—

Provinces of Alberta sterling, 1938, 5 per cent., 91 to 93, ex-dividend.
Alberta ten-year debentures, 93 to 95.
Dominion of Canada, 1909-34, 3½ per cent., 89 to 91.
Province of British Columbia, 1941, 3 per cent., 75 to 77.
Dominion of Canada registered, 1938, 3 per cent., 81 to 83, ex-dividend.
Dominion of Canada registered stock, 90 to 93.
St. John, N.B., 1946, 4 per cent., 88 to 90, ex-dividend.
Province of Nova Scotia, 1949, 3 per cent., 96 to 98, ex-dividend.
Province of Nova Scotia, 1934, 3½ per cent., 80 to 82.
Province of Ontario registered, 1946, 3½ per cent., 85 to 87, ex-dividend.
Edmonton, 1917-29-49, 4½ per cent., 89 to 91, ex-dividend.
Regina City, 1923-38, 5 per cent., 96 to 98.
Toronto, 1919-20, 5 per cent., 101 to 103.

LONDON AND CANADIAN PACIFIC LAND SCHEME

†London, December 9.—Pending some further explanation by the directors, it is difficult to appreciate the advantages of the Canadian Pacific Railway land scheme. Disappointment is shown at the terms of the offer made to holders of Canadian Pacific Railway shares, it having been hoped in many quarters, says The Times, that something of the nature of a generous "melon" derived from the "segregation" of land and other properties might be looked for. "Rights" were quoted yesterday at from 4⅜ to 4½ per existing share.

There is nothing here to arouse enthusiasm. Opinion in the market was that there is very little, probability that the company will ever part with control over its land, though "segregation of hotel and steamship properties may be effected some day." In the meantime fresh money is needed, which the directors prefer not to raise in either debenture stock, which would probably be the cheapest way of borrowing, or in shares. They wish also to give something to the shareholders, and the present issue represents the method of attaining all the objects desired.

◆

UNION LIFE INQUIRY CONCLUDED.

The government investigation into Union Life affairs, concluded on Thursday. Mr. C. A. Masten, K.C., representing the Dominion government, announced to Referee Kappele that, following this inquiry, a report would be prepared by Liquidator Clarkson and be submitted to the department of finance. In his report Mr. Clarkson will make certain recommendations looking to the prevention of a recurrence of a similar financial disaster by further regulations curtailing loans which may be made by insurance companies.

At the conclusion of the session, Mr. Pollman Evans, former president of the Union Life, furnished the investigation with a detailed statement, in which he gave his reasons for the collapse of the company and its allied corporations. Mr. Evans stated that the failure was due to the Scottish bondholders of the Imperial Loan and Investment Company entering suit to recover the half-million dollars which they had invested in the corporation. This, he maintained, resulted in the public losing confidence in the investments made by the Union Life.

◆

Boston capital may build a cotton mill at Welland, Ont.

The Dominion Railway Commission will give a hearing on December 16 to discuss railway cartage service.

The Home Life shareholders and policyholders will meet on January 8, 1914, to ratify reassurance agreement with the Sun Life. Mr. Frank Sanderson, the well-known consulting actuary, has made a report on the matter.

NEW CANADIAN PACIFIC TRUST FUND CREATED

Stockholders Will Be Offered Note Certificates at Eighty—What It Means—Record of "Rights" Given By the Corporation.

A trust fund, to be known as "The Special Investment Fund," made up of deferred payments on land sales and securities in which the cash proceeds of land sales are invested, to the aggregate of $55,000,000, was created this week by the Canadian Pacific Railway at a regular meeting of the directors at Montreal. The Royal Trust Company of Montreal is named as trustees of the fund.

It was decided to offer the holders of the ordinary capital stock of record December 23, 1913, in proportion to their respective holdings, $52,000,000, note certificates, carrying interest at the rate of 6 per cent. per annum, payable semi-annually, at the price of 80 per cent., of their par or face value.

The Canadian Pacific Railway engages and promises that the interest on the note certificates will be promptly paid and that all of the note certificates will be redeemed at their face value on or before March 2nd, 1924, but they may be redeemed in part, by drawings, at any time when the trustees have funds in hand for the purpose.

As to Amounts Accruing.

The amounts accruing from time to time, from deferred payments on lands heretofore sold, and the interest thereon, and from securities in which the proceeds of land sales have been invested, will be utilized by the trustees, in so far as may be necessary, or will be supplemented by the company, if required, to effect the payment of interest on the note certificates, and the repayment of the principal on, or before, maturity.

The creation of the new trust fund had a depressing effect on the stock markets. This may have been due to hasty conclusions as to the exact significance of the fund. A decline occurred in Canadian Pacific shares in the London market upon receipt of the announcement, one cable message stating that this was due to disappointment over the new scheme. The New York market followed suit and the shares opened nearly four points lower. The disappointment there was explained because the value of the subscription privilege to the new note issue was not greater. The stock also became weak in Berlin. The Montreal and Toronto markets acted in sympathy with the leading markets.

As the market had been prepared somewhat for the announcement, first by the address of Sir Thomas Shaughnessy at the recent annual meeting and a few days ago by a statement issued by Sir George Paish, which could have come only from Sir Thomas Shaughnessy, it is reasonable to suppose that the stock should recover rapidly. The trouble appears to be that market followers expected more than was given.

What Shaughnessy Says.

Discussing the new scheme, Sir Thomas Shaughnessy says: "Railway companies in the United States are required to segregate their railway earnings proper and their income from other sources, and, while there is as yet no similar legal requirement in Canada, we have, as you know, recently made such a change in our system of accounting as to practically conform to the practice of other railway companies, but we still include in the earnings of the railway the returns from our commercial telegraph system and our Pacific Coast steamships. In the next annual report the revenue from these sources will be treated as special income, and, of course, there will be a corresponding reduction in the gross and net earnings of the railway.

Instalments and Income.

"To prevent large areas of your land from being purchased and held for speculative purposes, regulations were adopted last autumn limiting sales to actual settlers, and, in order that it may be as easy as possible for settlers to purchase and develop lands, only one-twentieth part of the purchase price is required to be paid down and the balance is spread over a period of twenty years, with interest at six per cent. This policy should have the effect of bringing your lands under cultivation with increased rapidity, and, while the cash instalments will be less than heretofore, the deferred payments carrying interest will yield a larger income."

After explaining that the present estimated market value of these lands and townsites still belonging to the company was $129,021,500, Sir Thomas continued:—

"Your directors have been considering the desirability of conveying these lands, townsites and other interests to a company in exchange for all its capital stock, to be held in your treasury and taken into the balance sheet with your other assets, but a conveyance of that description has its disadvantages, particularly with reference to the lands, and it is probable that the same end may be accomplished by the creation of an investment fund to be administered by trustees or by officers of the company specially designated. In any event your directors will endeavor before the next annual report is published, to devise some plan for reconstructing the special income account and showing your extraneous assets in more definite and tangible form. Meantime, while the present policy, in dealing with your land sales, will remain unchanged and the proceeds will be conserved as heretofore, it is felt that the cash proceeds of sales in your townsites, which last year amounted to $1,409,737.44, may, with propriety, be taken into special income, to be dealt with as the directors, in their discretion, deem best.",

What the Fund Means.

In an interview at Toronto, Sir Edmund Osler, director of the Canadian Pacific Railway, said: "We are simply putting aside the deferred payments upon Canadian Pacific Railway lands already sold, together with the securities bought with money for lands already paid for, issuing $52,000,000 ten-year notes against that security, allowing them to shareholders at 80 cents on the dollar, and netting the railway company some $40,000,000. This fund is to be used for railway purposes. The Canadian Pacific Railway will require money. It is double-tracking the system, building tunnels, constructing branch lines, and so forth. The idea is to get the money needed for future work of this kind now.

"This plan was considered as a good way of raising money. It is the policy of the Canadian Pacific Railway always to look ahead, and always to have money. Where would the Canadian Pacific Railway have been this year if it hadn't had lots of money, with all the new works it has on hand, and the money market as it is? The man that waits to borrow money until he wants it has to pay dearly for it. The Canadian Pacific Railway always looks ahead and raises money before it is actually in need of it."

Ten Millions for Shareholders.

Sir Edmund explained that shareholders were offered these new notes at the ratio of one to five of their Canadian Pacific Railway shares. They would pay 80 for $100 notes. So that if a Canadian Pacific Railway shareholder owned 100 shares of Canadian Pacific Railway valued at a par value of $10,000 he could buy $2,000 worth of notes for $1,600. The notes bear interest of 6 per cent. on their par value, which is equal to 7½ per cent. on the money invested, as they are to be issued at 80. Thus the shareholder would get $400 bonus if the notes could be sold at par, which bonus would be equal to 4 per cent. on the par value of his 100 shares of Canadian Pacific Railway stock. The total bonus to shareholders who take up the new trust fund notes will amount to $10,400,000.

The notes, it is anticipated, will sell at about 95 when they are issued next March. The credit of the Canadian Pacific Railway is excellent, and as the notes may be redeemed in part by drawings at any time, their market price is not likely to drop much below par. A speculative element is given in the fact that the investment return offered by subscription at $80 is 7½ per cent. In ten years at the most the holder of the note receives par for it, and this appreciation of $20 may come at any time, within one or two years, through the operation of the drawing plan.

Deferred payments on land and townsite sales, which are now to be capitalized, according to the last annual statement of the Canadian Pacific Railway, amounted to $44,499,115, in addition to which are the securities held by the company in which the proceeds of land sales have been invested. Fuller details of the assets which will form the basis of the fund to be administered by the Royal Trust will be made known shortly.

◆

The Grand Trunk Pacific are erecting their temporary depot at the head of Main Street, Moose Jaw, and will give a passenger and freight service. The company have their line completed forty miles north-west of the city and are hauling grain east over their new line. The Canadian Northern Railway have their buildings erected on their temporary station site on South Hill, and have made application for permission to operate on their new line from the south into the city and a daily service will be given immediately. The company are making headway on their viaducts across the Moose Jaw River. The work of making an entrance to the city has been hampered by the trestle work necessary in making the double crossing of the river.

PAYMENT DATES OF NOTES

First Will Be in February, 1914—Record of Previous Canadian Pacific Rights

Further information was handed out at the Canadian Pacific Railway offices, Montreal, late in the week, regarding the new trust fund, as follows:—"The trust fund that has been created by the company is to be devoted to the payment of the note certificates and to their redemption at par, at or before maturity, as composed of the deferred payments and the securities in which the proceeds of land sales heretofore made are invested, and does not include any of the unsold lands or other extraneous assets of the company. These remain intact for the future benefit of the shareholders, and the directors are quite satisfied that the special income from these sources will be sufficient for all the purposes of the company.

"It has been decided that the dates of payment will be February 2, 1914, for the first instalment of 32 per cent., and March 2, 1914, for the final instalment of 48 per cent. of the face value of the note certificates will be due and payable."

Of the Arithmetic Value.

Subscription rights to the $52,000,000 of 6 per cent. special investment fund notes, to be offered at 80 to common stockholders of Canadian Pacific Railway at the ratio of 1 to 5, possess an arithmetic value of 4 on a basis of par for notes 4.40 on a basis of 102, the quotation price on the London Stock Exchange.

The offer to participate in the issue of notes is the tenth offer of this nature to be extended to stockholders since 1902. The last offer occurred in November, 1912, when stockholders were offered the right to subscribe to $60,000,000 of new common stock, the rights to which were traded in on the Exchange at 20.77. These rights, incidentally, were the most valuable ever recorded to stockholders.

Record of Rights.

The value of preceding rights accorded to stockholders during the last ten years are as follows:—

Year.	Rights.	Dividends %	Rights and dividends.	Yield on average price.
1912	20.77	10.0	30.77	7.84
1912	8.37	10.0	18.37	7.22
1911	8.33	10.0	18.33	7.57
1910	.....	9.5	9.50	4.29
1909	9.56	7.0	16.56	9.36
1908	7.69	7.0	14.69	9.17
1907	.....	7.0	7.00	4.21
1906	11.69	6.0	17.69	9.94
1905	.....	6.0	6.00	3.89
1904	5.62	6.0	11.62	9.45
1903	.....	5.5	5.50	4.33
1902	4.75	5.0	9.74	7.46

MINNEAPOLIS IS BUYING CANADIAN OATS.

Minneapolis chamber of commerce firms have bought this week half a million bushels of Canadian oats that will go to Minneapolis and pay the six per cent. import duty under the new tariff law, thereby recording the largest business of the kind since the first Canadian oats began to go across the boundary after the Underwood bill went into effect. A movement that the Great Northern Soo and Northern Pacific roads have handled, wherein a car or two of Canadian oats appeared on nearly every ingoing train from Canada, has taken about 1,000,000 bushels in Minneapolis so far, but trains arriving over the Soo and Great Northern in the last few days have had ten to twenty cars of Canadian oats. That the total importation by Minneapolis will have reached 2,000,000 bushels before the end of the year, is the prediction made.

Saskatoon Saturday Press recently issued an interesting "Progress and Development Number." Several firms utilized this issue, mailing them to those interested in Saskatoon's growth, among them being the investment house of Messrs. A. H. Hanson & Company, Limited, Saskatoon.

In an address to Calgary business men, Mr. Eugene Coste, president of the Canadian Western Natural Gas, Heat, Light and Power Company, stated that with their present equipment, they could furnish 15,000,000 cubic feet of gas per day, equivalent to 60,000 horsepower, at a cost to manufacturers of $18 to $18.50 per horsepower. In addition to this, Calgary has other power plants capable of developing 68,000 horsepower.

CANADIAN PACIFIC RAILWAY'S RIVALS

There Are Two Now and That Fact is a Rate Factor, Says Counsel

Contending that the solitary position of the Canadian Pacific Railway in western Canada is at an end owing to the fact that two rival companies will be in the field next year, Mr. F. H. Chrysler, K.C. and E. W. Beatty, counsel for the Canadian Pacific Railway, continued their arguments at the western freight rates case before the Dominion Railway Commission at Ottawa. "It is impossible to say," said Mr. Chrysler, "what the effect of this will be on the Canadian Pacific Railway earnings. Neither is it possible to say what effect on traffic conditions will be brought about by the opening of the Panama Canal.

Rates are Reasonable.

"The rates charged by the Canadian Pacific Railway in the west are fair and reasonable charges for the service performed for the shippers," he insisted. "There is a large spread in rates that may be regarded as reasonable. The question must be, what might a tribunal find is a proper charge for a carrier to make against a shipper for the services performed, that is, on value of the service? So long as the railway keeps its charges within the realm of reasonableness, the board has no jurisdiction to interfere with such rates except on the one ground of discrimination, and discrimination does not exist under the circumstances of this case.

Movement in Tonnage

"The movement of tonnage in the west itself," he continued, "will be effected by the establishment of the Grand Trunk Pacific and Canadian Northern and their respective branches, which will continue to radiate into the territory now served by the Canadian Pacific Railway. The growth of the country will have to be enormous and rapid, to offset within any reasonable time the disadvantage to the Canadian Pacific Railway by reason of its having to share this class of traffic with the two new lines and their subsidiary companies.

"The board cannot adjust rates because of anticipation and problematical increase in general traffic.

Density of Traffic.

"Some three years ago the Canadian Pacific Railway embarked upon a policy of extension to existing lines and facilities, double-tracking, tunnels, etc., which involved the appropriation of huge sums of money, all of which is to be spent within the next two or three years, amounting to over a hundred million dollars.

"It must not be forgotten that the success of the company and of every other railway company in the west depends upon the natural products of the country, and therefore the hazard of the undertaking is very much greater than in the east or in any country in which there is denser population and consequently much more diversity of traffic," declared Mr. Chrysler.

LIFE

An unusually attractive Christmas issue of Life, the agents' monthly of the Canada Life Assurance Company, has just been published. It contains much information which will prove of value to the agents, and it has a little Christmas spice. The Canada Life's bulletin is always interesting, due largely to the supervision of Mr. J. K. McMaster.

SARNIA IS A PORT OF PROMISE

The steamer "Noronic," of the Northern Navigation Company, has laid up at Sarnia to have the final interior fitting completed. This will employ some 200 hands. A number of large freighters are laying up and the numbers will steadily increase. This is one of the few ports where boats can be moved from one berth to another during the winter months at little cost, and is proving a favorite with steamship companies. There is a government wireless station located there, and it is also the home of the Reid Wrecking Company.

Sarnia is developing as a manufacturing centre, possessing the large plant of the Imperial Oil Company, Limited, employing 1,200 men, large lumber mills, two stove foundries, a branch plant of the Mueller Brass Company, of Decatur, Ill., the Goodison Thresher Company, and many other industries, while it is a terminus of the Grand Trunk Railway and the home of the Northern Navigation Company, with its splendid fleet.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Cereal and Milling Company.—The response to the appeal of the committee appointed on October 28 to look after the interests of bondholders of the Canadian Cereal and Milling Company is stated to have been satisfactory.

Nova Scotia Steel and Coal Company.—The output of the Nova Scotia Steel and Coal Company for November is as follows:—Coal mined, 68,000 tons; iron ore mined, 56,436 tons; pig iron made, 6,480 tons; steel ingots, 7,750 tons; steel rolled, 8,000 tons.

Canadian General Electric Company.—The directors of the Canadian General Electric Company met on Saturday morning and declared the regular quarterly dividend of 1¾ per cent. and an additional bonus of 1 per cent. payable January 1 to shareholders of record December 15. This places the stock on an 8 per cent. basis for 1913, which was the same as the company paid last year.

Toronto Structural Steel Company.—The plant of the Toronto Structural Steel Company at Weston will be nearly completed by the end of the year, and at the end of January hoped that it will commence turning out structural steel. The company has a contract to construct the new customs house at Ottawa, which with other small contracts will keep their plant busy for three months.

Smart-Woods, Limited.—A meeting of shareholders of Smart-Woods, Limited, has been called for December 22, to approve a by-law passed by the directors providing for the purchase of the Empire Cotton Mills of Welland, Ont. Smart-Woods, Limited already own a controlling interest in the Empire Mills, but intend to acquire the remaining stock. No new capital will have to be secured to complete the purchase, which will be made with treasury funds.

Lambton Loan and Investment Company.—This Sarnia company has declared a dividend of 8 per cent., plus a bonus of 1 per cent., payable January 2nd, 1914. It is the oldest loan company in Ontario, their books dating back to 1844. Known originally as the Port Sarnia Building and Savings Society, it has passed through many interesting experiences and since 1881 it acquired its present title. It has a paid-up capital of $790,000, a reserve of $600,000, and a record of steady conservative growth.

Grand Trunk Railway.—The Grand Trunk Railway Company will apply to Parliament at the coming session for authority to create an issue for the general purposes of the company nearly $10,000,000 consolidated debenture stock, bearing interest at 4 per cent. The application reads, "to an aggregate amount, the annual interest upon which shall not exceed £100,000."

The act also authorizes directors, if profit be deemed sufficient, to declare and pay interim dividends for the first half of any year, even though account and balance sheets for the period shall not have been previously submitted to the stockholders; and provides for one general meeting of the company each year, at which a financial report shall be made to stockholders.

SHAUGHNESSY ON NOTE ISSUE

Says Treasury Must Be Kept Filled and Present is Bad Time to Borrow in London

Of the proposed Canadian Pacific Railway note issue, Sir Thomas Shaughnessy says:—

"The company is not short of funds by any means, its bank account being of very comfortable proportions, but it has for many years been the company's policy to be strong in its cash resources, and, considering the magnitude of the enterprise, this is manifestly prudent.

"Works of improvement now in progress to provide for its traffic will require a considerable sum to finish. The additional railway mileage constructed and nearing completion represents an expenditure of upwards of $40,000,000. To meet this expenditure the directors have authority to issue and sell 4 per cent. consolidated debenture stock, but this is not the time to go into the market with a large issue of that security to the prejudice of the commanding position that it has always had in the London market, and will again have when normal conditions are restored. Any issue of debenture stock, excepting such small amounts as may be required to meet the demands of the market, must be postponed until some more opportune time. Neither would an increase of the company's capital stock be desirable just now.

Decided to Ask Shareholders.

"In view of these circumstances, the directors decided to ask the shareholders to loan the company the money likely to be required for its purposes during the next year or two on terms that would be advantageous to them, and the issue of $52,000,000 of note certificates was determined upon accordingly.

"When the proceeds of land sales, to an amount exceeding $62,000,000 had been invested in the property, the land assets were permitted to accumulate, and these now constitute the special investment fund of $55,000,000 that has been set aside and ear-marked as applicable only to the principal and interest of the note certificates.

Could Get Better Terms.

"Were the company to go into the market to borrow money on its own credit in the ordinary way, better terms could be arranged, but this was a special transaction between the company and its shareholders, and it was intended that the shareholders should have the distinct advantage to which they are entitled.

"These note certificates will constitute no permanent charge against the company's revenue; indeed, they make no demand whatever on the income from the company's traffic. It is a debt that will obliterate itself in the course of a few years.

"The unsold lands and other extraneous assets will remain undisturbed for the future benefit of the shareholders, and it is evident that the income from them will be sufficient for the purposes to which it has, for some years, been largely devoted."

EDMONTON'S MUNICIPAL IMPROVEMENTS.

Edmonton has completed the following work this year:—

	Miles.	Cost.
Street paving	22.2	$1,442,800
Sidewalks, plank	16.9	44,682
Sidewalks, concrete	10.9	79,035
Boulevarding	10.3	105,168
Street grading	10.5	22,651
Water main laid	24.4	270,000
Trunk sewers (approximate)	10	1,750,000
Lateral sewers	26.1	500,000
Street railway: permanent track laid (basis of single track)	20.7	....
Temporary track	13.3	....

The Edmonton, Dunvegan and British Columbia Railway is said to be practically completed to Mirror Landing, at the junction of the Athabasca and Little Slave River, 120 miles from Edmonton, and that this portion of the line will be opened for traffic about the first of January.

GOOD NEWS FROM THE WEST

Many Homes Are Being Built, Agricultural Education Provided and Railroads Constructed

Monetary Times Office,
Winnipeg, December 10th.

The trend of events in the Winnipeg building inspector's department tends to show that the tight money period is wearing itself out.

In spite of the fact that funds have been scarce, hundreds more small dwellings have been constructed by the people this season than last, and the owners have been able to secure the necessary funds with which to do this work, and the inspector has expressed the opinion that there will be a revival of business in the near future in Winnipeg, and this will be established on a much more solid basis.

Over $8,000,000 have been expended in actual building operations. If this condition has happened during the money stringency, it is reasonable to suppose that, now the clouds are disappearing from the financial horizon, early next season Winnipeg will experience a progressive period. One must also keep in view that the many indiscriminate deals that were in evidence in many quarters at that time have been eliminated, and the business basis of Western Canada is, as a result, on a more sound foundation.

Manitoba's Agricultural College.

A further indication of progression in the west is to be found in the record amount of money now in circulation as recorded by the Winnipeg clearing house.

I am sure that the province of Manitoba cannot make a better investment than they have done in the institution of the agricultural college.

"They are building, not for to-day only, but for the future, and I venture to predict that the people of the province will find that, ample as the provision is, it will not be large enough to accommodate the students who will flock to the college within the next ten years, which, I understand, is the period for which the accommodation is supposed to be sufficient," said Dr. Carlyle, acting president of the University of Idaho.

Railways Have Been Busy.

During the year 1913 the railways of Canada have had in hand, fully 6,000 miles of new construction. By June 30 last, when the year for railway statistics closes, between 1,800 and 2,000 miles had been taken into operation as finally completed, and since that date there has been immense activity. Including lines which have been surveyed, lines for which the contracts have been let, and lines for which the contracts have been completed, the total will run to the extraordinary figure quoted. At present the Canadian Pacific has well over 1,000 miles in hand, the Canadian Northern not far short of 2,000, and the Grand Trunk Pacific about 1,000, while there also is to be considered the 500 miles of the Hudson Bay Railway, and the National Transcontinental, which is now nearing its completion. The present activity in construction work constitutes a record.

BUT WE CANNOT EAT RUBBER.

The most noteworthy feature of the November wholesale prices was the advance in eggs, for which different reasons, but more especially a diminished production, have been assigned.

In butter, potatoes, coal, milk, and prunes the tendency was upward. In a number of Canadian cities, fresh pork and lard declined, but beef, veal and mutton advanced.

Higher than a year was the level in animals, meats, dairy products, textiles, hides, leathers, boots and shoes, lumber, miscellaneous building materials, furniture and crockery. On the other hand, a lower level than last year was registered in grains, fodder, fish, paints and oils. Miscellaneous groceries were somewhat lower than last year, while fruits and vegetables were slightly higher.

The month's increase was attributable to advanced prices in grains and fodders, beef, cattle, sheep, dairy products and fresh vegetables. Most notable was the increased price of eggs. To offset these advances, however, were declining prices in flour, glucose, raw cotton, silk, honey, coke, iron pipe, linseed oil, resin and raw rubber.

The monthly bulletin of the Labor Department shows a ratio of increase, but not nearly so marked as compared with the sharp advances at different periods within the past few years. The index number for November stood at 138.4, as against 136.8 in October and 136.6 in November, 1912.

DEMANDS FOR POWER SUPPLY

Output of Plants in British Columbia All Absorbed—Better Feeling in Coast Cities

(Staff Correspondence.)
Vancouver, December 6th.

Statistics for November in different of the coast cities show an increase over those of the month previous. This is taken as an indication that the tide of depression has passed the ebb and that better conditions will obtain. The increase of fees in the land registry office in Vancouver was nearly $3,000 over October. The timber officials report on the amount of logs scaled to date since the first of the year, show an excess of 17,000,000 feet over the same period of last year. But, while the cut of timber in the coast district is greater, the surplus on hand is larger. Big mills are cutting and putting in large stocks. This with the several proposed mill projects, would seem to indicate that prominent lumbermen have little fear for the future.

Since the recent visit to the coast of the heads of Yarrow's, the big shipbuilders in the Old Country, there has been talk of the establishment of a large industry here. Mr. Yarrow stated that the party came to the Pacific Coast with a full knowledge of labor conditions, but found that the price of sites was too high.

Reports are current that they have purchased the Wallace shipyards in North Vancouver, a concern that has been established for many years. The representative of the Yarrows, states, however, that while a number of propositions have been offered, no decision has yet been taken.

Western Canada Power Company.

Steady progress is being made by the Western Canada Power Company, the Montreal concern that is developing the Stave River Falls. Because of the increased demand for power, the company has placed orders for two more 13,000 h.p. hydro-electric generating units. One of these will be installed early next year, and the other a year later. More than 25,000 h.p. is now being generated by the two large units now in operation. The company is developing a radial system which will supply electricity to all points on the lower mainland. The height of the dam at Stave River Falls was raised 10 feet this year, next year it will be raised another 10 feet while in 1915 it is expected that the ultimate capacity will be reached when another raise of 10 feet is made. The maximum output is placed at 110,000 h.p., the capacity when the units now planned are installed to be 43,000 h.p. The expenditure involved in next year's improvements will amount to about half a million dollars.

This development shows the great advance made during the last 10 or 12 years. That length of time ago, the British Columbia Electric was just starting its power plant at Lake Buntzen, and it was thought then by that company that when this scheme was carried to completion it would have ample power for all the purposes required. Growth, however, has been such, not only in Vancouver, but all over the lower mainland, that with the Lake Buntzen working to capacity, and millions of dollars spent to perfect the project, power has to be purchased from the Western Canada Power Company. Even at that, there is a big field left for the new concern, which in the end will develop more power than the British Columbia Electric does, exclusive, of course, of its big Vancouver Island plants. The power question on the coast is a big one, for at Victoria, the British Columbia Electric has the immense plant at Jordon River, and in addition a large supplementary steam plant at Brentwood Bay, about 10 miles north of the capital city.

Granby Purchases Snowshoe.

Expansion of mining companies is shown further by the purchase of the Snowshoe Mine at Phoenix by the Granby Company. This company has been making very large investments in British Columbia during the past two years, operating in three different locations. The Consolidated Mining and Smelting Company had the Snowshoe under lease, but ceased operations a year ago. The Granby has been working on the property and has such ore reserves in sight that it was decided to take over the property. Another purchase by the Granby is the Midas mine at Valdez, Alaska, which will be worked in connection with its plant at Hidden Creek, on the northern coast. The new smelter there will be blown in early in January.

The Shawinigan Water and Power Company is in the market for bonds to be retired by the operation of the company's sinking fund. Tenders are being asked for the sale to the company of $62,000 of the five per cent. bonds, due 1934.

PROVINCIAL SECURITIES AND TRUSTEE LIST

Text of Resolution Passed by Canada's Nine Provinces—Dominion Government is Next Move

The following is the full text of the resolution passed at the recent interprovincial conference of premiers and other ministers at Ottawa, regarding the desired inclusion of Canadian provincial secretaries on the British Trustee List. It was moved by Hon. Mr. Mackenzie, provincial treasurer of Quebec and seconded by Hon. Mr. Lucas, provincial treasurer of Ontario:—

"Whereas by the Imperial Colonial Stock Act, 1900, the powers of Trustees in the United Kingdom under the Trustees Act, 1893, have been extended and provision made for the investment of Trust Funds in Colonial Stocks under regulations to be made by the Lords Commissioners of the Treasury.

"And whereas the Regulations in question were in due course promulgated by the Treasury, in the London Gazette, and are as follows:—

> '1. The Colony shall provide by legislation for the payment out of the revenues of the Colony of any sum which may become payable to Stockholders under any judgment, decree, rule or order of a court in the United Kingdom.
>
> '2. The Colony shall satisfy the Imperial Treasury that adequate funds (as and when required) will be made available in the United Kingdom to meet such judgment, decree, rule or order.
>
> '3. The Colonial Government shall place on record a formal expression of opinion that any Colonial Legislation which appears to the Imperial Government to alter any of the provisions affecting the stock to the injury of the Stockholders, or to involve a departure from the original contract, in regard to the Stock, would properly be disallowed.'

Others Have It.

"And whereas all or nearly all of the Self-Governing Colonies and most of the Crown Colonies, have taken advantage of the Act, and have passed the necessary legislation and have given the assurances that are required under the Treasury Regulations.

"And whereas the financial position of the Colonies which have come under the provisions of the Act, has been much improved and their securities have obtained a wider market.

"And whereas both as regards the prices realized by the Canadian Provinces, on the original issue of their loans, as on the selling prices of their existing securities on the London Market, other Colonies or dependencies of the Empire whether of equal or less importance in wealth or population are presently able to dispose of their issues at great advantage, and their securities are quoted at much higher figures.

"And whereas the Provinces of Canada by their union have formed the Dominion of Canada, which is justly regarded as one of the most important portions of the British Empire.

"And whereas the said Provinces of Canada have so far been unsuccessful in their endeavors to obtain for their stocks the advantages conferred by the Act of 1900, and they alone among the constituent parts of the Empire are, in consequence, prejudiced, and their financial interest adversely and seriously affected.

Can Readily be Passed.

"And whereas the securities of the Provinces of Canada are eligible for registration under the Colonial Stock Act, 1877, and amending Acts, and the necessary legislation can readily be passed to comply with the first two of the Regulations that have been issued by the Treasury under the Colonial Stock Act of 1900.

"And whereas the only difficulty in the way of extending the benefits of the Act of 1900 to the Provinces of Canada, is found in the provisions of the third Regulation.

"And whereas it is stated to be held by the Imperial authorities that they have no direct right of disallowance, so far as the legislation of the Provinces of Canada is concerned, and that the position in that respect, is therefore different to that obtaining in the case of the Colonies to which the provisions of the Act of 1900 have been applied.

Power of Disallowance.

"And whereas under the British North America Act, the power of disallowance in relation to the legislation of the Provinces is reserved to the Governor General-in-Council but the Provinces of Canada, are therefore, in a position to place on record a formal expression of opinion under the third of the Regulations "that any of its legislation which appears to the Dominion or Imperial Government to alter any of the provisions affecting the stock, to the injury of the Stockholders or to involve a departure from the original contract in regard to the Stock, would properly be disallowed by the Governor General in Council," or to take such other and further course as may be suggested with the view of meeting any objection.

"And whereas if this assurance or formal expression of opinion is not deemed to be sufficient, the Provinces of Canada will be prepared to give favorable consideration to any suggestions that may be made by his Majesty's Government to the Dominion Government, in order that the Colonial Stock Act of 1900 may be extended to the stocks it may have already issued, or which may be issued in the future.

His Majesty's Government.

"And whereas the Provinces of Canada cannot but believe that there is every disposition on the part of his Majesty's Government to extend to their stocks the benefits of the Act of 1900, if necessary and proper assurances are given in the spirit of the said Act, and of the Regulations that have been promulgated under its provisions.

"And whereas it also appears that under the provisions of the Imperial Statutes, known as the Irish Land Act, 1909, and the National Insurance Act, 1911, the Trustees and Commissioners appointed thereunder respectively are empowered to invest the purchase money and investments arising thereunder in any of the public stocks, or funds, or Government securities of any Foreign Government and in any securities in which Trustees are for the time being, by law empowered to invest trust funds, and that under the provisions of the said Acts investment in the securities of the Provinces of the Dominion is likewise excluded, the whole prejudicial to the interests and credit of the Provinces.

Up to the Dominion Government.

"Be it therefore resolved, that in the opinion of this Conference that the authorities of the Dominion Government be requested to submit this statement to the Imperial Government, in order that it may be brought formally to the notice of the Secretary of State for Colonies for the consideration of the Government of his Majesty with a view to the laws and Regulations that have been made under the Colonial Stock Act of 1900, and the Irish Land Act, 1909, and the National Insurance Act, 1911, being applied—or if necessary amended, modified or extended to meet the circumstances, and permit of their being made applicable—to the securities of the Provinces of the Dominion of Canada."

SASKATCHEWAN TAKES THE PLUNGE

Is First Province To Appoint Board of Local Loan Commissioners

Under an act entitled "An act respecting the control of loans by local authorities," the Saskatchewan legislature will appoint a municipal board of control having considerable powers. The bill has been printed and distributed in the legislature. It provides for the appointment of a board of three commissioners, to be styled "The Board of Local Loan Commissioners," with a ten-year tenure of office, terminable, however, by the lieutenant-governor on address of the legislature. Associated with the board, for advisory purposes, will be a committee of two members, to be appointed annually—one by the executive of the provincial organization representing rural municipalities, and the other by the executive of the provincial organization representing urban municipalities. The commissioners are to be disqualified from holding certain securities, such as stock in any Saskatchewan local authority, or interest in any concern dealing in contracts with local authorities. They are also to be disfranchised, both in municipal and provincial elections.

Powers of the Board.

The board will have the following powers:—

To inquire into the merits of any application of a local authority for permission to raise money by way of debenture or upon security of stock, and to grant or refuse such permission.

To act as agent for any local authority in selling its debentures of stock.

To manage the sinking fund of any local authority which desires to entrust the same to the management of the board.

Will Supervise Expenditures.

To supervise the expenditure of moneys borrowed by a local authority under this act.

To obtain from a local authority at any time a statement in detail of its assets and liabilities and office revenue and expenditures for any definite period.

WESTERN FREIGHT RATES CASE

Government Expert Says His Figures Are Not Intended To Be Absolute

That a government should be in a position to prevent ruinous competition by allowing no extensions without approval, was the attitude taken by Mr. J. P. Muller, government expert in the western freight rates case, being heard at Ottawa.

As to the method he recommended the railway board to adopt in fixing freight rates, in the first place, he considered the Canadian Pacific Railway, as the only standard in the West, should be accepted as being as near perfection for present requirements as possible, and that the Canadian Northern should get enough in the way of rates to enable it to reach the Canadian Pacific standard. This is a broad way of summarizing Mr. Muller's remarks in this regard. The rate, as Mr. Muller would fix it, would cover costs of operation, provide a percentage to take care of capital investment and a guarantee fund for rainy days, in the ratio of 4 and 2 per cent. respectively. In the present condition of the money market he thought these proportions were reasonable, but if the money rate should rise it would be necessary to add to the allowance for a guarantee fund. Mr. Muller afterwards made it clear, however, that he did not propose a limitation of railroad profits to six per cent., but was rather indicating the ratio.

Fixing Western Rates.

The question whether rates should be fixed in the Western provinces on the assumption of a sufficient existing railway mileage to enable the grain crop to be properly carried and afford facilities for future settlement, or whether rates should be fixed on a basis such as would encourage future development, also elicited some interesting evidence. In explaining his statements in his exhibit in this connection, Mr. Muller stated: "I have in mind that existing rates should be increased to provide excess funds which the carriers could use in constructing further lines."

It would be bad for shippers, carriers and consumers if the rates were either so high or so low as to retard development. Their interests were identical, and unless a proper level was established one of them would suffer.

Getting at the Expert.

The commencement by the Canadian Pacific Railway through its senior counsel, Mr. F. H. Chrysler, K.C., of its attack on the exhibits and testimony presented by Mr. J. P. Muller, the government expert, was the feature of another session. Mr. Chrysler succeeded in demonstrating that the series of figures and synthetic rates which Mr. Muller has put in are not conclusive in their results, as would appear at first reading. The government expert readily acknowledged that many of his figures were not intended to be absolute, but were more for purposes of computation and comparison.

NOVEMBER COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore during November:—

	Pounds.
Crown Reserve Mine	62,850
O'Brien Mine	85,940
Dominion Reduction Company	64,500
Cobalt Comet Mine	75,138
Right-of-Way Mine	80,520
Peterson Lake	79,334
Cobalt Lake Mine	166,520
McKinley-Darragh-Savage Mine	418,737
Penn-Canadian Mine	290,650
Cobalt Townsite Mine	1,307,500
Trethewey S. Company Mine	93,257
Coniagas Mines	257,500
La Rose Mines	1,033,320
Nipissing Mines	243,270
Kerr Lake—	
Kerr Lake Mining Company	81,170
Total	$4,340,206
Gold Ore—	
Tough Oakes Mining Company	57,010
Porquis Junction—Nickel Ore—	
Alexo Mines	946,300

A splendid sample of Marquis wheat, grown in the Regina district, comes to *The Monetary Times* from Messrs. McCallum, Hill & Company, financial agents, of that city. The wheat ran 66 pounds to the bushel, 48 bushels to the acre.

WHY BRITISH COLUMBIA ISSUED NOTES

Premier McBride Says Province Adopted Best Course When It Obtained Temporary Accommodation

"The British Columbia provincial government has sold £310,000 of six-months treasury notes, bearing 5 per cent. interest, in London, at par. In view of the fact that the British government paid 4¾ per cent. interest on a recent issue of treasury notes, the success attending the British Columbia issue, which was taken up with the greatest promptness, shows beyond contradiction how high our credit stands in the money market, said Sir R. McBride, in an interview.

"Very naturally, the public will ask why necessity arose for the issue of these bills. It is the practice of all governments to put out treasury bills for temporary purposes. The British government very frequently does so, and the Dominion government has done so on several occasions. Such bills are issued in anticipation of revenue, and it has been deemed advisable to follow such a course here. As everyone knows, the province began the fiscal year with a large amount to its credit in the bank, but with a programme of supply intended to exhaust the greater part of it. This programme has been carried out. The government felt that, in view of the interruption of municipal and other work, due to the financial stringency, it was not desirable to curtail the expenditure in any way, and thereby add to embarrassment arising out of the general depression. I have not the exact figures before me, but the total expenditure on public works since the beginning of the fiscal year will probably be found to be somewhere between $8,000,000 and $9,000,000, a truly enormous amount for a province of half a million people and equal to what the Dominion was expending only a few years ago.

Was Good Business Policy.

This expenditure has not exhausted the bank balance, for the province yet has a substantial sum to its credit. Certain large payments, however, must be met shortly after the new year opens, and there are several large sums that will then be payable to the province; but, in order that every bill may be met promptly, it seemed good business policy to make a temporary loan.

"The receipts on account of extraordinary revenue have not been what was expected, owing to the causes that have affected all lines of business, and the government had three courses open. One was to curtail expenditures, and thus accentuate the general depression; another was to force the collection of sums due the province, and thereby embarrass many people; the third was to proceed with the full programme of public works and make a small temporary loan to cover possible deficiencies in the revenue. The latter course was adopted, and I think the public will concede that it was the wisest course of the three. I may add that the province has tied up in the former Songhees and Kitsilano Reserves a sum equal to the issue of treasury bills.

Conditions Arising From Stringency.

"It has also a very large amount of accounts receivable outstanding at 6 per cent. interest. Under all the circumstances we thought it was wise to issue treasury bills rather than to force the collection of debts payable, and thereby possibly have precipitated results which in many instances might have proved disastrous to individuals. We though it best to employ the excellent credit of the province to meet conditions arising out of a world-wide financial stringency. I may add that such issues as the above are ordinary matters of routine and are not usually announced in advance. On some occasions governments arrange with banks for overdrafts; in others they issue treasury bills, and the latter is conceded to be by much the better plan, as it leaves the banks free to employ their funds in commercial loans."

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 5th, 1913:—

Cobalt Townsite Mining Company. 79.000; Crown Reserve, 43.990; McKinley-Darragh-Savage Mine, 78,000; Dominion Reduction Company, 87,900; Cobalt Lake Mining Company, 62,690; York-Ontario S. M., 42,990; La Rose Mines, 246.610; Coniagas Mines, 190,170; Trethewey S. Company Mine, 88,990; Nipissing Mining Company, 120,880; total, 1,042,080. The total shipments since January 1st are now 38,162,763 pounds, or 19,081 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5.835 tons; in 1907, 4,850 tons; in 1908, 29.360 tons; in 1909, 20.941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

VALUE OF LIFE INSURANCE

XLII.

To Those Who Plan Ahead

BY C. A. HASTINGS.

This article will not appeal to those men who do not give compound interest the attention it deserves, and who spend all the income derived from investments every year. The principle is this. For example, the sum of $500 invested at 5 per cent., and if invested for twenty years, the amount of dividend received will equal the capital sum; on the other hand, if the dividends were re-invested, the capital sum would be doubled in less time than twenty years.

By an Insurance Investment.

With most men the amount of interest received is too small to be re-invested, but this circumstance can be remedied by investing in insurance, where dividends will not be paid annually in cash but will be automatically increasing on his behalf.

This method should prove most attractive to the man who is planning ahead and who has to depend upon the capital he can accumulate while he is in active business. To this man annual dividends, while he is in business, are less important.

The example following will show how satisfactory his position is from the very beginning, and if anyone is dissatisfied, he will be most difficult to please.

What Eight Hundred Will do.

Take a man aged 30 who wishes to save $800 a year he should purchase an endowment policy maturing at age 55 or, of course, to his estate should he die prematurely. With this sum he can buy $20,000 of insurance with profits. On the basis of figures before me, this policy, at age 55, would be worth $27,500 and would become payable. This could be then invested safely at 5 per cent. to yield an income for life of $1,375 per annum.

It will, therefore, be observed that by depositing annually for 25 years the sum of $800 it will produce the above results, to say nothing of the protective element—though it is very important to realize that he has also had the benefit of life insurance during 25 years, and had he died after the first payment, his estate would have received $20,000 or sufficient to yield, at 5 per cent., an income of $1,000 per annum.

◆

GOVERNMENT SHOULD ADJUST FIRE CLAIMS.

"Incendiarism is a profession and a money-making proposition, and a fire adjustment court of claims for the province of Quebec, would be one of the most beneficial courts ever established in the Dominion," was the statement of Fire Commissioner R. Latulippe of Montreal. This would be a government fire insurance court to set the amount of fire claims and losses. The commissioner pointed out the fact that the insurance system as now existing is an incentive to incendiarism as it condones the settling of claims by rivel insurance companies, who to avoid court suits, with its attendant publicity which is detrimental in getting new subscribers in the face of stiff competition, settle claims for sums far exceeding the actual damage.

Many of these claims were brought, said Mr. Latulippe, on the advice of agents, who make the owner of the burnt property sign their damage claim over to them, on the understanding that if they get the amount demanded they will go halves with the man owning the burnt premises. The insurance companies' appraisers or adjusters, Mr. Latulippe said could not form a correct estimate of the damage, as in many cases where a dealer with felonious intent increases his stock to raise his insurance, before setting his store on fire, disposes of part of his stock at cost or any price he may get before the match is applied, and that the blame was not attached to the companies because they did not have the stock examined before issuing a higher rate, as the dealer could remove or dispose of part of the stock after the examiner had been around.

"A government court, with a body of expert appraisers could arrive at a definite knowledge of the actual fire loss and could summon the neighbors, commercial travellers, wholesale dealers and others in a position to know just how much the burnt stock was worth, and with its vested authority could set a figure to be paid by the insurance companies that would be reasonable and just in cases of real accidental fires, that would be fair both to the company and the policyholder. Such a court would relieve the companies of the fear of court suits, as the responsibility would not rest on them, but on the government whose duty it would be to adjust all claims brought after a fire and to take the evidence before rendering a verdict."

"CHILDISH," SAYS POLLMAN EVANS AT INVESTIGATION

Comment on Actuary Rusher's Defence of His Actuarial Eulogy—Resumed Inquiry—Canada Provident's Affairs

At the resumed hearing of the Union Life investigation at Toronto this week, a statement was given by Mr. Edmond Rusher, a fellow of the Institute of Actuaries and assistant actuary to the Prudential Assurance Company of Great Britain, to the effect that his name was used in the Union Life prospectus, issued in the United Kingdom, in direct violation of an agreement made with the Union Life. He also stated that the proof of the prospectus furnished to him differed materially from that circulated among British investors. Mr. H. Pollman Evans characterized the statements of Mr. Rusher as "childish." The affairs of the Canada Provident Investment Company were also examined at the inquiry.

The statement of Mr. Rusher in part says: "As far as I am concerned, there are only two main points requiring to be dealt with:—

"(a) The introduction of the name of the Prudential Assurance Company into the prospectus and other documents in connection with the issue of the share capital.

"(b) My reporting favorably upon a company which, at the time I made my report and for some time previously, was, in fact, in bad financial condition."

Was a Breach of Faith.

Mr. Rusher declared that he took every precaution to prevent the introduction of the name of the Prudential in any manner with the Union Life, and that when he was engaged as actuary he accepted the position only upon the terms that neither his name nor that of the Prudential should be published in the prospectus.

Mr. Rusher, in defending his report made to the Union Life, quoted a prominent Canadian actuary's opinion upon the affairs of the Union Life, and takes it as his stand. He says: "At the time I made my investigation, July, 1910, the Union Life could still look forward to a successful future it under capable management. The additional capital from England would have ensured that, but it was essential that the capable management be supplied from the shareholders and not from the government. My statement of assets was influenced by taking them at the value entered in the Canadian Insurance Superintendent's annual report, and I had nothing to show that the insurance commissioners had not justified themselves in valuing the assets. I was also influenced by the fact that just previously the Government had passed a special Act authorizing the Union Life to raise further funds and giving the company additional powers. The draft prospectus shown to me declared that no actual promotion money was being paid."

Evans Says "Childish."

Mr. Evans was called before the investigation to explain the use made by the Union Life of Mr. Rusher's report. He gave the following statement:—

"I think that the facts set out speak for themselves. It was impossible to stop the circulation of the prospectus when I received Mr. Rusher's letter. He must have known it. No one would have gone to an actuary unless his report could have been made use of. It seems to me to be childish."

Of the Canada Provident.

Regarding the Canada Provident, Mr. D. A. Burns, of Toronto, vice-president and trustee, and minority shareholder of the common stock which controlled the company, stated that he and Mr. Rolph, of Toronto, secured the corporation from Mr. T. C. Livingstone, of Winnipeg, a promoter. They bought the stock from him when the company was known as the Canada Provident Assurance Company. All told, Mr. Livingstone received $53,310.

At that time it appears that the two financiers only purchased the charter to do business in Manitoba, and that no active business in assurance was done until some time later. When asked as to the reason for paying so much money for only a charter, Mr. Burns could give no reason, but stated that Mr. Rolph looked after the negotiations. He said that he secured $25,000 worth of common stock on a five per cent. cash basis. Later, when Mr. Evans desired to secure control of the Canada Provident Company, he sold his stock for 80 cents on the dollar.

"You Can Put It That Way."

"Therefore, you paid five cents for the stock and sold it for 80 cents?" asked Mr. Masten.

"You can put it that way," said Mr. Burns, "but the stock had increased very much in value. We had materially changed the charter, and had made the company into a financial organization."

HIGH BUSINESS LEVEL

It Will Prevail Next Year—Views of the Canadian Situation

"I learn upon excellent authority," said Sir George Paish, editor of the London Economist, in an interview at Montreal, "that the directors of the Canadian Pacific Railroad have in view and will shortly announce a financial plan, other than an increase of its capital stock, that will yield shareholders a substantial bonus."

Sir George Paish has cabled to his paper, The Statist:—

"Business in Canada is still active, and is likely to remain at a high level in 1914, although the activity may not be as great as in 1913. A large amount of construction work is still in progress, and part of the funds for its completion are already in hand." The great sum of about £70,000,000 of capital that will have been raised abroad by Canada, mainly in London and New York, in the current year, will provide a large part of the capital required to finance Canada's construction work next year and fresh borrowings will probably be moderate.

Canadian Pacific Will Want Funds.

"Of the railroads, only the Canadian Pacific will need any considerable sum, and the amount required by the latter will be much smaller than in the current year and will gladly be provided on the proposed terms.

"The great Canadian crops of the current year have immensely improved the situation, as they have brought a great income to farmers and have placed everyone in funds. I am authoritatively informed that the crops in the West were much larger than any amount yet calculated.

Influx of Gold.

"The large influx of gold due to heavy sales of produce and to the fact that the country has become more economical is another encouraging feature of the situation. Everyone desires to prevent excessive borrowings by Canada, and, although any curtailment in the amount of new capital obtained from abroad will cause a diminution in the trade activity, the country will have no difficulty in bearing the interest burden resulting from the large influx of capital in recent years."

STEEL COMPANY OF CANADA.

The Steel Company of Canada's net earnings for the first half of the year amounted to $1,108,233, the largest in the history of the company for any six months period.

Bond and note interest of the Steel Company of Canada for the current year will be in the vicinity of $520,000, while preferred stock dividends will take about $450,000. The net earnings for the first half of the year were apparently sufficient to meet both interest and dividends for the full year and leave a balance of about $138,000. Even under unfavorable conditions in the last half of the year, or part of the last half of the year, the company ought to be able to improve materially on the showing of 1912, when $477,000 was added to surplus out of the year's profits.

The Royal Securities Corporation in a circular dealing with the company's affairs says in part:—

"At the time when the Steel Company of Canada was formed in June, 1910, the prospectus showed that the average yearly net earnings were $1,291,917, exclusive of the earnings of the Canada Bolt and Nut Company, which were estimated at $180,000, making total earnings $1,471,917. On June 30th, 1913, three years' operations were completed, and the average annual net earnings showed $1,639,153, or more than $167,000 increase per year over those previous to the formation of the new company. After writing off over $500,000 to depreciation, bond, discount, etc., the average annual net earnings are still in excess of those shown in the original prospectus.

"The following comparative statement of earnings for the past three years shows how the business has steadily increased:—

	Earnings.	Depreciation, etc.	Net earnings.
*1910	$ 783,664	$104,876	$ 678,788
1911	1,373,522	140,610	1,232,912
1912	1,547,039	150,409	1,396,630
*1913	1,213,233	105,000	1,108,233
Total	$4,917,458	$500,895	$4,416,563
Average annual earnings	$1,639,153	....	$1,472,188

*Six months.

CANADA SELLS GERMANY WHEAT

Reichstag and Commercial Agreements—Dominion Treaty With West Indies

Herr Hosch, who opposed in the Reichstag, at Berlin, the renewal of the Anglo-German commercial agreement, argued that:—" It is this continual extension of trade privileges which has seriously injured the German, whose agriculture has suffered because the British colonies give a preference to their mother country," states a Canadian Associated Press cable.

"Recently Trinidad, British Guiana and other British possessions in the West Indies entered into a commercial treaty with Canada whereby the parties to the treaty made tariff reductions in one another's favor, and others of the West Indies seem to be coming into line against Germany. It is true that German exports to Canada have increased since 1907 by 94 per cent., but Canada's exports to Germany have increased by 493 per cent., so that the balance is not in Germany's favor. Germany is powerless without adequate tariff weapons."

Attitude of Colonies was Different.

Here Herr Delbruk replied for the government that the Conservatives offered no practical alternative. Upon the expiry of the commercial treaty of 1901 the government had declared that commercial relations with the British Empire should be cautiously handled. The Reichstag had agreed and had sanctioned a provisional arrangement. The government had not modified its opinion, nor had Britain modified her most favored nation treatment of Germany, although the attitude of her colonies was different owing to the growth of Imperialism.

Since the arrangement with Canada in 1910 Germany's trade with Canada had reached a record figure. Her imports into Canada amounted to £2,700,000, and Canada's imports into Germany to over £2,900,000.

Balance in Favor of Canada.

The balance in favor of Canada was due chiefly to the increase in wheat imports from the Dominion. Wheat imports as a whole had not, however, increased, because there had been a decline in wheat exportation from the United States.

As regarding the other parts of the British Empire it was true that German exports to South Africa had declined in the last two years in some branches, but on the whole it had developed. Where there were moderate differentiations in favor of the mother country the German government did not think it wise to press for their removal.

All the other parties with the exception of the Conservatives supported the renewal of the arrangement.

PERSONAL NOTES.

Mr. Huntly R. Drummond has been elected a director of the Royal Trust Company. Mr. Drummond fills the vacancy created by the death of Mr. James Ross.

Mr. W. F. Learmonth has been appointed manager of the London, England, branch, opened by Messrs. Murray and Mather and Company, the well-known Toronto bond house.

Mr. Gordon Bennett Johnson, engineer, who is well known in Montreal, which has been his headquarters recently, has been appointed Canadian trade commissioner to China and Japan.

Mr. "Pete" Campbell, a son of Mr. Peter Campbell, manager of the Bank of Toronto at Peterborough, will join the staff of R. C. Matthews and Company, bond and debenture dealers, Toronto.

Mr. J. Frater Taylor, president of the Lake Superior Corporation, who was appointed a director of the Spanish River Pulp and Paper Mills, Limited, at the recent shareholders' meeting, has declined to continue to act in that capacity, and has tendered his resignation.

The Dominion Linen Mills Company recently told Guelph that it was the company's intention to ask the city to guarantee the bonds of the Dominion Linen Mills Company to the extent of $120,000 in order to release the Kloepfer estate of a guarantee to the banks, made when the late Mr. C. Kloepfer was alive. In addition to this it is intended to form a syndicate of local men to raise the sum of $50,000 to be also invested in the common stock of the company.

REPUDIATE THE OLIGARCHY

That is a New York View of Canada's Tariff and Commercial Problem

The information that Canadian foreign trade is falling off, and that the increasing expenditures and decreasing revenues will form the subject of an attack by the Opposition in the after-Christmas session of parliament, is merely the further development of a drift that has been increasingly evident for some time. The change in revenue conditions could be easily explained by the business reaction now so much in evidence, but there is a deeper significance in the situation than would be recognized by any such purely superficial interpretation of existing conditions.

The truth is that the revision of our tariff has left Canada in a somewhat peculiar position, economically, comments the New York Journal of Commerce. For many years she has enjoyed lower duties than the United States, and has consequently imported goods from this country under favorable conditions. On the other hand, geographical relationships have been such as to give her a certain control of American markets. Now, with a reduction in our rates all around, and with the entire removal of duties on many food products, conditions have changed. We are in position to import more advantageously from Canada than ever before. Her rates against us, however, persist, and she has gone further in aggravating them by giving a strong preference to Great Britain. She has favored the distant parts of her own territory by keeping up relatively high rates so that her railroads are able to exact a toll upon the transportation of foods and farm products generally, notwithstanding these might be drawn much more cheaply from neighboring districts in this country.

Says Canada Faces Loss of Business.

The United States, moreover, will tend more and more on account of this discrimination (and because of the possibility of getting certain goods elsewhere without duty while Canada still retains duties that result in retaliation by ourselves) to trade with other countries in preference. We shall be much less disposed to accord to the Dominion the unquestioned preference which has hitherto been assigned it in many branches of our foreign commerce.

Canada thus faces a distinct loss of business with her nearest neighbor and best customer. This loss may not be absolute indeed, probably will not be. But it will be relative. Other countries will gain more rapidly in business while Canada will lag behind. For a good while Canada pursued a far more enlightened tariff policy than did the United States, and was well justified in her refusal to concede the lower duties asked for under the Payne tariff law when President Taft practically threatened an advance of 25 per cent. ad valorem in rates. Her diplomats were then more skilful than ours and had besides a far better basis of argument. Retrogression began when for reasons dictated by capitalistic and selfish railway interests she rejected reciprocity with the United States, and to-day as a result of our forward step in the reduction of tariff rates she occupies the same position with regard to us that we did with reference to her five years ago. It is an unpleasant reversal of conditions and the facts have correspondingly strengthened the Opposition as they clearly enough are aware.

Similar Economic Conditions.

There was never any remotest basis for the foolish charges that this country was seeking to absorb Canadian territory, notwithstanding the attention that was given to them during the reciprocity campaign, and despite the unwise and tactless statements contained in the private correspondence between Presidents Taft and Roosevelt which was ultimately published. Wise leaders on both sides of the border have long understood that for the sake of the best interests of the people it is essentially necessary that the two countries should ultimately come as nearly to a free trade basis as possible. Their populations are alike, their standards of living the same, their economic conditions similar, and there is no more reason for duties along our Northern frontier than there would be between our Eastern and our Western coasts. The time has arrived when Canada ought to repudiate the oligarchy of manufaturing and railroad constructing interests which is fastening about her policies, and broaden her tariff and revenue system to correspond with ours, adds this United States Journal. It is a hopeful symptom that many of her people now realize the mistake committed when they rejected the commercial olive branch held out by the United States three years ago.

◆

The Dominion government has dealt with the difficulties of the labor situation in British Columbia by passing an order-in-council which prohibits the immigration of artisans and laborers into that province at coast and boundary ports of entry until the 31st of March next. This order-in-council is of general application, and is not restricted to persons of any particular race or coming from any particular country.

LIFE INSURANCE COMPANIES' CO-OPERATION

Must Educate People Regarding Prevention of Disease and Conservation of Health

For some years prior to 1905 there was little indication of the fact that life insurance companies were interdependent. They seemed to have forgotten the lesson of '76, that "In union there is strength," and many of them gave evidence of the belief that they preferred "going it alone."

Except along medical and actuarial lines, there was little co-operation between home offices. On the contrary, "other companies" were generally looked upon as dangerous rivals to be dealt with only at arm's length.

Rebating, twisting, agency poaching, competitive literature with its misleading effects, and other censurable practices were indulged in freely. These evils were recognized and their existence deplored by many company executives and others engaged in the business, but there was little or no co-operative effort made to eliminate or even to minimize them.

Then came the Armstrong investigation,—the "insurance war of 1905-6," thus did Mr. H. Abels, president of the American Life Convention address the Association of Life Presidents at New York. Following the investigation itself came the renowned "Committee of Fifteen" and the deluge of regulative legislation.

Emerged Stronger and Better.

During all that period of anxiety and uncertainty, frenzied attacks of the guerilla brand were made upon the institution of life insurance in general and certain companies in particular. The effect of this was felt for a time by all the companies and was manifested in an abnormal lapse rate among existing policies and greatly reduced sales of new insurance.

But out of it all life insurance has emerged stronger and better, and more favorably understood by the insuring public, than ever before. The interests of policyholders are more thoroughly safeguarded, underwriting conditions generally are on a higher plane, more capable men are being appointed as heads of our several insurance departments, and more scientific methods have been adopted for departmental supervision and management.

And what has brought about these improvements? A realization by all those having to do with life underwriting of their interdependence, crystallized into active co-operation,—

Co-operation between insurance department heads through the National Association of Insurance Commissioners;

Co-operation between insurance companies through the Association of Life Insurance Presidents, the American Life Convention, Actuarial, Medical and other societies;

Co-operation between agents through the National Association of Life Underwriters.

As the several parts of a building work independently, yet supplement each other, so each company, dependent upon its native ability for existence, is nevertheless a vital part of the structure of life insurance.

Companies Must Educate People.

Human life—the most vital asset of the nation—is the essential element of the institution of life insurance. The growth of humanity is augmented by decreasing the waste caused by needless deaths from improper methods of living. The prevention of disease and the conservation of health are a matter of mutual welfare and advancement for life companies. Their close touch with large numbers of people affords an excellent opportunity for the presentation of hygienic principles and the invaluable results to individuals and communities from an observance of them.

Interdependently must the companies, as benefactors of mankind, seek to educate the masses with regard to prevention of disease and conservation of health,—thus lessening sickness, suffering and sorrow, and promoting the happiness of the race. Plans have been formulated and put in operation by some of the companies for the conservation of life made possible when based upon the principles of right living. Awakened interest, dissemination of knowledge on this vital subject, improved conditions of labor, greater attention to health everywhere, give unmistakable evidence of the serious intent of the people to prolong life and to reap the benefits accruing thereto.

◆

The appointment of a committee of Toronto's citizens to investigate and report on the transportation problem of the Queen City and the solutions suggested was advocated by Mr. R. S. Gourlay, of the harbor commission at a meeting of the Municipal Improvement Association.

GERMAN ACT A BAD MODEL

Too Much Stress Laid On Advantages of Legislation Which Ontario May Copy

Serious objections are being made against the form of the proposed Workmen's Compensation Act for Ontario, which is patterned after the German act. In presenting his report to the provincial government, Sir William Meredith, who has framed the bill, says:—

"I may be permitted to say, in conclusion, as the United States Commissioners said with reference to the bill drafted by them, that I submit the proposed law 'not believing that it is the most perfect measure which could be devised nor the last word which can be said upon the subject, but as the result of careful investigation and the best thought of the Commission and as constituting at least a step in the direction of a just, reasonable, and practicable solution of the problem with which it deals.'

"I regret that some of its provisions do not commend themselves to the judgment of the Canadian Manufacturers' Association, and on that account I have, since my last interim report, again carefully and anxiously considered those which are objected to and the objections that are urged against them, as well as the provisions of the Association's alternative proposition, but have seen no reason for doubting the correctness of the conclusion to which I had come, the results of which are embodied in the draft bill.

Blessing of Industrial Peace.

"In these days of social and industrial unrest it is, in my judgment, of the gravest importance to the community that every proved injustice to any section or class resulting from bad or unfair laws should be promptly removed by the enactment of remedial legislation and I do not doubt that the country whose legislature is quick to discern and prompt to remove injustice will enjoy, and that deservedly, the blessing of industrial peace and freedom from social unrest. Half measures which mitigate but do not remove injustice are, in my judgment, to be avoided. That the existing law inflicts injustice on the workingman is admitted by all. From that injustice he has long suffered, and it would, in my judgment, be the gravest mistake if questions as to the scope and character of the proposed remedial legislation were to be determined, not by a consideration of what is just to the workingman, but of what is the least he can be put off with; or if the legislature were to be deterred from passing a law designed to do full justice owing to groundless fears that disaster to the industries of the province would follow from the enactment of it."

Important Points in German Act.

In a memorandum submitted to Sir William Meredith, Mr. S. H. Wolfe, the eminent New York actuary, says:—

Any consideration of the German type would be defective if it did not emphasize two very important points:

First.—The manner in which the State is regarded by the citizens of Germany and their willingness to recognize its paternalistic rights to an extent which would not be tolerated in this country.

Second.—The gross inequalities which would result in any country which adopted the German type without having a sufficient number of establishments to permit of a successful operation of the law of average.

To attempt to analyze the willingness of the German people to accept the paternal administration of the government, would take us far afield and would require us perhaps to dip into the developments in history together with the psychological and political differences of the various elements entering into that great nation. I doubt, however, whether any country in the western hemisphere is prepared to so completely turn over to the government the supervision of the transactions of every-day life as are the Germans. The police system performs important work in the administration of accident insurance; the post office lends its aid in an effective way; every branch of the huge political structure contributes in some way to the administration of this form of indemnity. In the United States and Canada no such similar inter-dependency exists.

No Obligation Here.

The communes themselves must bear half of the premium payments and are permitted to assess the other half upon the employers engaged in the industries insured. There is no obligation upon the communes to apportion half of the premiums among the employers in proportion to the benefits, but they

> "may assess the other half in such manner as they deem proper; they may, for instance, tax only employers with the larger establishments and exempt the smaller ones."

The reason for assessing half of the premiums on the communes is that

> "The profits of the business are so small that assessing the premiums on the employers would create a serious situation, due to the fact that the risk rate of the industry is very high."

Difference in Make-Up.

Are we prepared in our political structure for the exercise of discretionary power of this kind?

This difference in the political make-up of the two peoples is well expressed by the English railway economist, W. A. Acworth, who, speaking of the management of railroads by the government, says: "'Prussia is Prussia, with a government in effect autocratic, with a civil service with a strong **esprit de corps**, and permeated with old traditions, leading them to regard themselves as servants of the king, rather than as candidates for popular favor. I am inclined to think,' Mr. Acworth adds, 'that the effect of the evidence is that the further a government departs from autocracy and develops in the direction of democracy the less successful it is likely to be in the direct management of railroads,'" (page 748, Atlantic Monthly, Vol. 110, No. 6).

Number of Accidents.

Now as to the question of having a sufficient number in the various employments to permit of the formation of the accident associations among the different industries as now found in Germany. In 1908 there were 696,824 establishments (employing nearly 9,000,000 employees); the number of persons insured in the various associations at that time was as follows:—Mining (Association No. 1), 798,378; quarrying (Association No. 2), 439,719; fine mechanical products (Association No. 3), 224,497; iron and steel (Associations Nos. 4 to 11), 1,210,183; metal working (Associations Nos. 12 and 13), 203,039; musical instruments (Association No. 14), 50,333; glass (Association No. 15), 84,798; pottery (Association No. 16), 89,005; brick and tile making (Association No. 17), 277,955; chemicals (Association No. 18), 216,751; gas and waterworks (Association No. 19), 70,079; linen (Association No. 20), 59,412; textiles (Associations Nos. 21 to 26), 761,866; silk (Association No. 27), 69,235; paper making (Association No. 28), 86,856; paper products (Association No. 29). 131,248; leather (Association No. 30), 76,788; woodworking (Associations Nos. 31 to 34), 428,743; flour milling (Association No. 35), 63,729; food products (Association No. 36), 154,697; sugar (Association No. 37), 93,791; dairying, distilling and starch industries (Associaton No. 38), 50,020; breweries (Association No. 39), 106,035; tobacco (Association No. 40), 175,894; clothing (Association No. 41), 278,866; chimney sweeping (Association No. 42), 5,662; building trades (Associations Nos. 43 to 54), 1,260,270; printing and publishing (Association No. 55), 174,653; private railways (Association No. 56), 28,714; street and small railways (Association No. 57), 69,129; express and storage (Association No. 58), 368,241; drayage, cartage, etc. (Association No. 59), 104,153; inland navigation (Associations Nos. 60 to 62), 59,242; marine navigation (Association No. 63), 77,345; engineering, excavating, etc. (Association No. 64), 306,276; meat products (Association No. 65), 110,251; blacksmithing, etc. Association No. 66), 151,919; total, 8,917,772.

Chasing the German Act.

A study of the above statement must show the large and extended exposure enjoyed by these associations, the effect of which is to cause the "catastrophe hazard" to disappear entirely. It requires no argument to show how serious a matter to a small community, an unusual fluctuation in the loss ratio can be.

I have devoted considerable time to an analysis of the German type, says Mr. Wolfe, for there is a tendency among those who advocate the adoption of some form of Workmen's Compensation Act in new communities, to place great stress upon the advantages of that system without explaining the defects and the possible entanglements which may result from its adoption in communities not prepared to meet the problem.

"To summarize—I am of the opinion that the methods now being followed in Germany, Ohio and Washington are ill adapted to the needs of Canada or to any of the United States."

◆

HIGH COST OF LIVING

Hon. Mr. Lemieux, speaking at Montreal on what he called the present economic crisis, said that such state of things had not been seen in the country during twenty-five years, and that the parties responsible for it were the trusts and the Government, which refuses to reduce the tariff rates. The speaker compared President Woodrow Wilson, whom he called the "Laurier of the United States," staying at his post until the Underwood Bill was passed, and Premier Borden taking his vacation while the people were suffering!

FINANCING CANADA'S UPBUILDING

Trend Should Be Upon Permanently Invested Rather Than Borrowed Capital—Censorship of Securities

Editor, Monetary Times—

Sir,—"Canadian Loans in London," from one of your recent issues, has been reproduced and commented upon by the financial press on this side of the water, and the statements made therein give food for thought to others than those on the street.

A feeling has been growing in Great Britain of late that borrowers from the Dominion have been learning how to make a little money go a long way, and that appeals from Canada would not be heard in the near future along with those from other countries. I feel that your article has rather dispelled this happy vision. That, however, is but a temporary aspect of the case. The real outstanding thought of your whole dissertation is the manner in which you take it for granted that the future development of Canada is to be financed upon borrowed rather than permanently invested capital. Some of us are not too old to look forward to the time, 30 or 50 years hence, when bonds now being disposed of will mature; nor can we rid our minds of the possibility of money in those days being even more difficult to obtain than in this so-called unprecedented stringency. It may be that our successors will say things of those who have gone before them that might not be regarded as affectionate or even respectful.

Have Cultivated Borrowing Habit.

Canadians have of late years engendered the borrowing habit, partly, no doubt, because they have been more or less encouraged into it by the lenders, but mainly because outsiders have not cared to do otherwise than lend their money to Canada.

It would call for but little thought, however, to make it evident that a change in this respect must come, and before long. Moreover, it would seem to be quite in order for those in Canada who are leading in matters of finance and commerce, as well as for those who, like yourself, are studying these questions from an academic standpoint, to endeavor to select the channels through which the new craft will be steered, rather than allow other courses to be followed, which may not be to the advantage of the Dominion or of those most largely interested in its progress.

Possibly this way of expressing the thought may appear somewhat enigmatic, but it will at least be evident that by making the permanent investment in Canadian undertakings in every way desirable to those in other countries who have a supply of surplus money, Canada will place herself in a better position to control her own development and the disposal of her own natural resources than if, when the limit of her borrowing shall have been reached, she shall be compelled to go a-begging for money at almost any price.

What Canada Offers.

It would not be an exaggeration to say that no other country in the world to-day is in a position to offer such splendid opportunities for safe and profitable investment as in Canada, and yet in London and Paris and elsewhere, financial noses are turned up at almost everything Canadian excepting only those of the least interest yield.

To Anglo-Canadians this is the one moving picture that is kept constantly before their eyes, and I doubt if there are many who do not at times at least wish that they had the opportunity to re-group the figures and have the kinematist once more cover the scene with his camera. The "smart young men who saw apparent industrial salvation in amalgamations and, incidentally, fat promotion profits for themselves," so ably described in your closing remarks, would certainly be ushered off the stage, while the stranger who saw millions in ungetatable mountain timber and poorly-equipped sawmills, when attached to the name of the Dominion, would be given the minimum of time in which to take his departure. Artists, too, in out of town planning, "substractionists" from the poor investor's standpoint, who are still crawling like parasites over the body of this country, would certainly be told that they were not clothed in a garb which harmonized with the rest of the picture.

What fools we Canadians are, that we should be willing month after month and year after year to see this game of spoliation going on with our eyes wide open to the fact that, comparatively speaking, a very few people, some of whom are not even Canadians, are enriching themselves at the enormous expense of the many, without so much as even raising our eyebrows in disapproval!

Are Canadian bankers afraid to protest, and in these days of paternal government is it not the duty of those in power in the federal and provincial capitals to take such steps as may be necessary not alone to save the credit of the country from further injury, but to raise it to a level at least equal to that of the rest of the world?

Censorship is applied almost daily to millions of bushels of Canadian grain, while cheese and fruit are being similarly protected. Are these commodities of greater value than Canadian securities and Canada's credit?

Grapple with this question of censorship in the right way—boldly, thoughtfully and with determination—and you will find it child's play compared with such problems as an income tax, a bank act or a customs tariff; and yet we are told that it is too complicated to be put into execution.

The one great force upon which the future progress of Canada will depend is the magnetism for gold from other countries which she may be capable of generating. On the other hand there is nothing that will so surely divest her horse-shoe of its power as the knowledge abroad that she makes no attempt to restrain the wild-catters and the land-grabbers in their unholy work of deceiving the unwary.

If in thus giving vent to my feelings I shall have succeeded in setting your constructive mind and trenchant pen at work, I shall regard myself as having been amply repaid, even at the risk of converting some would-be friends into enemies.

Yours, etc.,
H. K. S. HEMMING.

LONDON MANAGER, BANK OF MONTREAL

Mr. G. C. Cassels, assistant manager of the Bank of Montreal in London, has been appointed manager of that office to succeed Sir Frederick Williams-Taylor, who recently became general manager of the bank. The office is one of the most important in the Canadian banking world, made even more so by the distinguished services therein of Sir Frederick. Mr. Cassels is a comparatively young man, but has had an excellent training in banking and finance, and as Sir Frederick's right-hand man for six years, considerable work of importance fell to his lot.

G. C. CASSELS
Appointed London Manager, Bank of Montreal

Mr. Cassels, who has been associated with the Bank of Montreal during the greater part of his business career, was born in Toronto, and his first position was with the Toronto office of the bank. From there he went to the Halifax office, and then later to the New York office. In 1906 he was transferred from the New York to the London office as assistant manager there, a post which he held until about a year ago, when he left the bank to join the London banking and brokerage house of Messrs. W. P. Benbright & Company in association with Lord Fairfax. He spent seven or eight years in Canadian offices of the bank. His chief experience was in its New York and London offices.

His experience in banking and finance, his invariable courtesy and tact, his attractive personality and his appreciation of the importance of maintaining Canadian credit in London at a high standard, make the new appointment unusually suitable.

Weston, Ont.—December 8—Canada Lumber Company's yard. Loss, $200. Cause unknown.

Cobourg, Ont.—December 7—Mr. G. Scott's residence, Crow Bay. Loss and cause unknown.

Amherst, N.S.—December 6—Canadian Beverage Company's plant. Loss and cause unknown.

Windsor, N.S.—December 4—Mr. R. Maxner's residence, College Road. Loss and cause unknown.

Leamington, Ont.—December 5—Mr. E. Tyhurst's barn. Loss unknown. Cause, supposed incendiary.

Blair, Ont.—December 3—Mr. J. Shearer's residence. Loss unknown. Cause, overheated stove pipe.

East Northumberland, Ont.—December 7—Barns of Brunswick Hotel. Loss and cause unknown.

Halifax, N.S.—November 26—Eastern Trust Company's building, Bedford Row. Loss, $995. Cause unknown.

Edmonton, Alta.—December 3—Lyon's clothing store, Jasper Avenue. Loss, $200. Cause, electrical defects.

Lambton, Ont.—December 5—Mr. McFarlane's block. Loss, building, $300; contents, $800. Cause unknown.

Sainte Foy, Que.—December 4—Mr. A Lacasse's residence. Loss, $2,000. Partially insured. Cause unknown.

Woolford, Alta.—November 30—Mr. H. Bowden's residence. Loss, $25,000. Insurance, $750. Cause unknown.

Medicine Hat, Alta.—December 4—Larder's ice cream store, 2 Real Estate offices. Loss, $2,000. Cause unknown.

Hamilton, Ont.—December 1—St. John Presbyterian Church, King and Emerald Streets. Loss, $500. Cause unknown.

Arkona, Ont.—December 2—Mr. Crawford's building. Mr. W. J. Clark's store. Mr. W. Holmes' store. Loss and cause unknown.

North Vancouver, B.C.—November 29—Mr. J. McEwen's furniture factory, Third Street and Chesterfield Avenue. Loss, $2,500. Cause unknown.

Highland, Alta.—December 8—Messrs. Flett and Pickell's livery barn. Loss, $6,000. Fletcher's restaurant. Loss unknown. Cause, overheated range.

Brantford, Ont.—December 7—Dominion Canners Company's Bow Park farm. Loss, $40,000. Cause, supposed incendiary. Second fire on this farm this year.

Calgary, Alta.—December 2—Messrs. Gorman, Clancy and Grindley's warehouse. Loss, $400. Cause unknown; 440 Fourteenth Avenue, N.E. Chimney fire.

Winnipeg, Man.—December 1—Bently block, Fort Rouge. Loss, $1,000. Cause unknown.

December 7—Leland Hotel. Loss, $50,000. Cause unknown.

New Westminster, B.C.—November 26—Mr. G. E. Seller's Langley motor boat. Loss, $500. Cause, gasoline.

November 27—Mrs. A. Peele's residence, 611 3rd Avenue. Chimney fire.

Saskatoon, Sask.—November 26—Auto Owners League's garage, 213-3rd Avenue N. Loss, $25. Cause unknown.

November 27—Mr. W. Frazer's residence, rear 313 20th Street East. Loss, $10. Cause, hot ashes.

Kingston, Ont.—December 3—Mr. Ross's residence. Loss slight. Cause, hot ashes.

December 6—Mr. J. McParland's liquor store, 339-341 King Street. Loss, $10,000. Cause, explosion of barrel of wine.

Montreal, Que.—December 1—Mr. O. St. Marie's apartment, 19A Hogan Street. Loss and cause unknown; Mr. M. Galler's store, 1137 St. Lawrence Boulevard. Loss, $2,000. Cause unknown.

December 6—St. Lawrence Park and Amusement Company's building, St. Lambert. Loss, $15,000. Cause unknown.

Bedford, Que.—December 1—Bedford Manufacturing Company. Loss, $70,000. Cause unknown. Insurance as follows:—Building and stock—Ætna, $3,663; Atlas, $3,662; British America, $3,663; Caledonian, $4,395; Commercial Union, $3,662; German-American, $3,662; Home, $3,662; Mount Royal, $3,663; New York, Underwriters, $3,663; Niagara, $2,930; Norwich Union, $3,663; Pacific Coast, $3,663; Rochester-German, $3,663; Scottish Union and National, $3,663; Sovereign, $3,663; Springfield, $3,662; Sun, $3,662; L'Union of Paris, $3,662; Western, $3,662; Yorkshire, $3,662. Total, $73,250. Loss practically total.

Toronto, Ont.—November 27—Messrs. F. Doran and G. Crow, 120-122 Harrison Street, owned by F. Willcocks. Loss, $100. Cause, boys and matches.

November 28—Mr. P. Brown's residence, 8 Bellevue Avenue, owned by Messrs. Webb and Granger. Cause, defective grate. Loss, $25; Farmer's Dairy Company's stable, rear 371-3 Queen Street W. Loss, building, $100; contents, $300. Cause unknown; Messrs. Freek Clark Company's storehouse, 120 Munroe Street. Loss, building, $25; contents, $500. Cause unknown.

November 29—Messrs. T. F. Smith's store, 564 Yonge Street, owned by Strathy Company, Limited. Loss, building, $50; contents, $40. Cause, cigar boxes too close to heater; H. V. O. Connor's hotel, 146-56 King Street West, owned by C. R. Palmer. Loss, building, $50. Cause, gas range.

December 2—Antiseptic Bedding Company's factory, 187 Parliament Street. Loss, $25. Cause unknown.

December 3—Residence, 21 Elizabeth Street, owned by H. H. Williams. Loss, $50. Cause, incendiary.

December 5—Fairfield Fur Company's factory, 579 Richmond Street W., owned by Independent Clock Company. Loss, building, $100; contents, $100. Cause unknown; Mr. W. B. Barrett's factory. Loss, building, $100; contents, $200. Cause unknown.

December 7—Canadian Kodak Company's factory, 588 King Street W. Loss, building, $50; contents, $100. Cause, defective wires.

December 8—Mr. F. J. William's store, 56 Arthur Street. Loss, buildings, $50; contents, $200. Cause, overheated stove.

December 9—Messrs. Taylor and Galloway's foundry, 34-6 Pearl Street. Loss, building, $250; contents, $250. Cause, sparks from motor; 186 Adelaide Street West, occupied by Messrs. P. P. Wallace and Son and Colley Company. Loss, contents, $500. Cause, overheated furnace.

◆

The revenue of Toronto for 1913 from its proportion of the receipts of the Toronto Street Railway, from the city waterworks, and from other receipts, apart altogether from the usual sources of taxation at the disposal of the corporation, is estimated to amount to $3,421,788, equal to £684,357—more than sufficient to pay the interest on the entire debt of the city. The present population of the city is estimated at 500,000. The proceeds of the debentures offered are required to meet outstanding treasury notes and general expenditure for public works and improvements in connection with the development of the city.

Toronto's traditional financial policy of paying for current municipal expenses by mortgaging the city's assets was denounced in a speech at the city council meeting by Alderman Morley Wickett, on a point of privilege. He expressed the belief that recent actions in line with this policy would prove to be prejudicial to the city's future. "Paying for current expenses and for deficits in the city's revenue by debenture issues is a practice to be condemned in the strongest terms," he said. "If you heard of this being done in some notoriously badly-managed city in the Southern United States you would say it was just what you expected; but I don't think it is a practice one should expect in this city. If the practice is continued it can have only one result, and next year, if I am still in this council, I shall make it my business to have the matter thoroughly investigated."

CANADIAN CAR COMPANY'S LARGE SALES

When Plants Are in Full Operation, Output Will Be Valued at Forty Million Dollars

Canadian Car and Foundry Company's fourth annual statement shows an increase of $3,800,000 in gross sales, and net profits available for dividends an increase of $331,721 over the previous year.

The balance available for dividends on the company's common stock of $3,975,000, after all deductions, including a special appropriation of $350,000 for a contingent reserve fund, was $913,153, equal to 22.98 per cent. earned, against $616,432, or 15.51 per cent. the previous year. After all disbursements a balance of $754,153 remained to be carried forward out of profits to surplus account, bringing that account on September 30th last up to $2,114,419.

The statements of the two years are comparable as follows:—

	1912.	1913.
Profits	....	$2,351,325
Depreciation, etc.	....	225,072
Balance	....	$2,126,253
Sinking fund	....	124,093
Balance	....	$2,002,158
Bond interest	....	280,505
Balance	$1,039,932	$1,721,653
Special reserve	Nil	350,000
Balance	$1,039,932	$1,371,653
Preferred dividend	423,500	458,500
Balance	$ 616,432	$ 913,153
Common dividend	77,500	159,000
Surplus	$ 538,932	$ 754,153
Previous surplus	901,334	1,440,266
Total surplus	$1,440,266	$2,194,419

Sales were Twenty Millions.

President Curry in annual report states:—

"The gross sales amounted to $20,300,000 as compared with $16,500,000 last year. The profits, available for dividend purposes, after providing for proper depreciation, sinking and contingent reserve funds, were $1,371,653.15, as against $1,039,932.55 last year.

"The volume of business transacted by the company has caused the directors to open a special reserve fund for insurance and contingencies. The sum of $350,000 was, therefore, transferred to this account from the profits of the year and there was added thereto the amount standing to credit of the contingent fund at the close of the previous year, making the total of $500,000 shown on the balance sheet.

"At the last annual meeting the arrangements made by the directors for the construction of a car plant at Fort William, and for the purchase of the Pratt and Letchworth Company, Limited, of Brantford were ratified.

"It was found necessary to build a steel car shop and double the capacity of the rolling mills at Amherst.

"To pay for these capital expenditures and provide additional working capital, the directors authorized the sale of two million one hundred thousand dollars first mortgage gold bonds, and nine hundred thousand dollars preference stock.

"All the preference stock so authorized and one million six hundred thousand dollars of the bonds were sold above par, netting a substantial premium to the company which was credited to the miscellaneous reserve fund. The remaining one-half million dollars of bonds have been subscribed for.

Liabilities and Assets.

"The combined output of the company and its subsidiary companies for the past year amounted to approximately $27,000,000, and when the Fort William plant and extensions to other plants mentioned above, are in full operation the capacity output will be about $40,000,000 in value.

"Current liabilities were reduced within the year by $20,320, and now amount to $3,541,098, while current assets of $7,596,342 show an increase within the year of $261,850. Reserve funds stands at $1,392,470, an increase of $685,260, while surplus is up approximately three-quarters of a million dollars. Total assets of the company at the end of the year were $23,744,896, as compared with $20,797,211 a year ago."

The Imperial Bank of Canada has opened a branch at Niagara Falls South under the management of Mr. J. H. Arkell.

WATERED STOCK AND FREIGHT RATES

Counsel for Winnipeg Board of Trade Raises Question—Canadian Pacific's Arguments

Mr. F. H. Chrysler, K.C., in continuing his arguments on behalf of the Canadian Pacific Railway in the western freight rates case, said that the commission was a regulative body and he did not think that if the freight rates in the west were fair it was for the commission to order a change in the basis of the rates simply because it thought another basis was preferable. If the board found that rates in the west were high, they should be reduced under the basis of fixing rates now in vogue among railway companies. The railway companies should not be compelled to adopt a theoretical basis in place of one that had been proven practical by the companies.

Grain, Oil, and Rails.

"One gentleman would make the companies carry freight in every part of the country at the same rates; that since the grain is carried in box cars, oil in tank cars, and iron rails on flat cars, the same in Nova Scotia as in Manitoba, therefore the rates should be the same," said Mr. Chrysler.

"While the profits of a railway company may be so low that it can be taken as an argument that the rates could not be further reduced without making it impossible for the company to do business, high profits should not be taken as a proof that the rates charged are too high," maintained Mr. Chrysler. "The question is whether the rates charged are too high, higher than the service is worth, not whether the profits are too high."

As to Watered Stock.

Advocating that if the Canadian Northern were to be taken as a basis for fixing western rates an investigation should be conducted to ascertain whether its stock, and particularly that of companies subsidiary to it, was watered, Mr. Isaac Pitblado, K.C., counsel for the Winnipeg Board of Trade, created interest in the closing portions of his argument in the western freight rates case before the Railway Commission.

If the board were to take the Canadian Northern as a standard, said Mr. Pitblado, it could not divest itself of the responsibility of making a further investigation into the capitalization and financial standing of the company. If there was any water in Canadian Northern Railway stock the public was going to be asked to pay interest on it.

What Winnipeg Wants.

He was not asking that all rates in the west be reduced to the eastern level, but that, first, class should be equalized between east and west as regards standard mileage and special rates; second, existing local mileage rates on coal, cement, livestock and such commodities should be reduced along the line of eastern rates; third, commodity rate tariffs should be established where they do not exist on raw materials for home industries, such as pig-iron, sugar, paper, iron and steel, etc.; fourth, that rates should be put on such a basis as to increase production and develop home markets.

TO LIFE INSURANCE MEN

Some copies of the striking article, "Is Your House in Order?" remain for distribution. It contains many telling and unanswerable canvassing points. *The Monetary Times* will be pleased to send copies, gratis, to life insurance men applying to 62 Church Street. State how many are required.

◆

BIG FACTOR IN CANADA'S FINANCING

The Bank of Montreal had been the medium for floating $500,000,000 of Canadian loans on the British market, plus many millions of private money transferred to Canada, and $125,000,000 of Canadian Pacific stock during the past eight years, said Sir Frederick Taylor at a banquet given in his honor at the Canada Club, London, Eng., on the occasion of his appointment as general manager of the Bank of Montreal.

◆

That the board order a reduction of freight rates in the West on the Canadian Pacific Railway and not on the Grand Trunk Pacific or Canadian Northern because the Canadian Pacific Railway had received generous public gifts and the other two roads had not received aid commensurate with the cost of construction, was the suggestion made by James Bicknell, K.C., counsel for the Dominion Government in the Western freight rates case.

CANADIAN EXPORTERS' BUSINESS CHANCES

Relations With Imperial Units—Food Supplies From New Zealand

Mr. J. E. Ray, Canadian trade commissioner in Birmingham, England, sees a chance for Canadian tobacco exporters in the remarkable record of tobacco imports shown by British trade returns for nine months of the current year. These imports totalled £3,971,304 in unmanufactured tobacco and £985,246 in tobacco manufactured. The great bulk of this trade, except in cigars, was held by the United States. Imports from Canada have fallen from $30,730 in 1908 to $2,885 in 1912.

Decrease in British Imports.

In a report Mr. Harrison Watson, the commissioner in London, indicates a marked decrease in British exports for October. A small increase in imports is put down to the increased value of cotton, and Mr. Watson finds that "the pendulum has already begun to swing adversely." Imports of articles of food and drink, grain and flour decreased, but receipts from Canada were only slightly lower. Canada shared in increased imports of wheat meal and flour, and was partly responsible for lower receipts of oats. Canada sent less cheese, and imports of Canadian bacon showed a heavy decline. On the other hand, Canada sold a greatly increased quantity of sawn, split and hewn wood.

Food Supplies from New Zealand.

Canada's trade with New Zealand is growing steadily. The principal increases for the first six months of the fiscal year over the corresponding period last year are found in horned cattle, motor vehicles, pipes and fittings, printing paper, grass and clover seeds, laths and shingles. The principal decreases are in agricultural machinery and potted fish. Paperhangings and furniture about hold their own for this period.

Mr. W. A. Beddoe, Canadian trade commissioner at Auckland, announces the sailing of the steamer Niagara for Vancouver with 264 cases of eggs in cold storage and ten cases as general cargo. The Niagara also carried 17,479 boxes of butter, the largest amount ever carried by one ship to Vancouver. Seventy-three bags of meat, 255 carcases of veal, 212 quarters of beef and 25 carcases of mutton were in the cargo.

New Zealand has begun to import newsprint paper from Canada. For the first six months of the present fiscal year New Zealand imports of all kinds from Canada amounted to $1,035,135, an increase of $144,165.

Trinidad's principal imports from Canada for 1912, compared with 1911, were:—

	1911.	1912.
Flour	£52,286	£56,878
Potatoes	4,453	3,229
Fish	64,478	60,561
Timber	6,204	12,892
Oats	20,473	26,364
Peas	5,814	858
Bread	963	344
Butter	768	200
Cheese	636	572
Live stock	308	47
Oils and paints	865	1,84[illegible]
Soap	2,070	2,527
Cordage and twine	2,040	1,216
Boots and shoes	160	246

VISCOUNT AND FARMERS BANK

Whether Viscount Templetown, London financier, a former shareholder of the defunct Farmers' Bank is subject to $19,500 double liability is a problem which Mr. George C. Clarkson, permanent liquidator, is trying to solve. Before it is settled a special commission may be sent to examine the Viscount. Evidence was taken before Mr. George Kappele, K.C., at Toronto this week, Mr. W. R. Travers being brought from Kingston to testify. It was shown that the Viscount was a director of the bank in 1907, and remained so until September, 1909. He was also elected Honorary President, and had 100 shares of the bank's stock in his name. It was shown that the Viscount, through Mr. Thomas Parker, expressed a desire to resign his office. Following a meeting of the directors it was proposed that Travers should make out thirty fully-paid shares to him and transfer the remaining seventy shares to other parties who could not pay for them, and so the issue would be cancelled. This was done. Travers stated that unless the Peer's conditions were met he would have cabled to the Toronto papers announcing his resignation.

PAYING FOR FARMERS' GRAIN

Method of Canadian Banks in Handling Sight Drafts Are Responsible for Gold Imports

According to statistics published at the Winnipeg grain exchange the farmers of western Canada had marketed 143,000,000 bushels of grain, up to December 1—over 100,000,000 bushels being wheat. The estimate is that the farmers have received $90,000,000 cash. The movement of grain is the greatest ever known in Canada. Its exceptional volume was due to several circumstances—monetary stringency, increase of railway equipment available for moving the crop and very favorable weather.

This movement has been referred to as the principal reason for the large Canadian imports of gold. In November the two Canadian monetary centres took $13,800,000 gold from New York and a further million dollars or so direct from London. Of course there were other factors operating to cause gold imports—window dressing for annual reports, floating of some fresh Canadian loans in London, the new plan of issuing excess bank notes against deposits of gold in a central reserve, etc.—but it is generally thought that on this particular occasion the grain movement has been the most potent agency. A short description of the methods by which the Canadian bankers use the grain drafts as a means of drawing gold from New York is given by Mr. H. M P. Eckardt, in the New York Financier.

Drafts Pouring Into Winnipeg.

As soon as the grain season commences the local grain dealers and agents at all country points begin shipping the produce to one or other of the Lake Superior terminals, Fort William, Port Arthur or Duluth. A car of wheat contains approximately 1,000 bushels; and if sold at 80 cents the sale of a car of wheat will necessitate a sight draft for $800 on a Winnipeg grain company. These sight drafts for one, two and three car lots have been pouring into Winnipeg in a tremendous stream during the past three months. Each country branch negotiates all the grain bills it can lay hands on and forwards them at debit to the Winnipeg branch. The Winnipeg offices collect the drafts from the grain companies the loans of these concerns rising to very large proportions as their purchases increase. Then the grain companies ship the stuff down the lakes, to Buffalo or Montreal, for export as fast as they can. As each boat load leaves the terminal elevators there are bills of exchange drawn on New York or Montreal for large amounts. These bills are succeeded in due time by sterling bills which are forwarded as quickly as possible to New York for negotiation.

Gold May Return Soon.

The bankers state that they have never known these bills come forward in such a rush as occurred this year. The natural consequence was that the balances carried by the Canadian banks with their New York correspondents swelled to large dimensions. Every bank in Montreal and Toronto that had anything of consequence to do with the grain trade wanted to sell drafts on New York so as to bring home a portion of the New York balance. But buyers were lacking, and the only thing to be done was to import gold.

At the same time the New York balances were increased also by proceeds of Canadian bond sales in London. The approach of the year ends of a large number of banks may have had some effect in expediting the gold movement in November, but it is probable that the importations of the yellow metal would have been large in any case. It is not known exactly what influence the new gold reserve plan had upon the November movement of gold; but it is doubted that the gold was needed for that purpose to any great extent. However, there is a disposition in Toronto to look for a return movement of gold from Canada to New York in the course of a month or so.

◆

GOLD FROM NEW YORK

It is of interest to note, as a factor affecting the New York money market, that Montreal exchange on New York has not advanced to the extent generally noted after the first of a month. As a matter of fact, there is some inherent weakness in Canadian exchange at this time, as the rate has declined again from par to a 1-16 of 1 per cent. discount. This position in exchange is significant, showing that there is still a movement of funds between New York and Canada growing out of the large balances built up in New York from the sale of grain bills and pointing to the probability of an early resumption of the gold movement across the border. The weakness in Montreal exchange early last month was pointed out in New York as an indication of heavy gold shipments before the end of November, and the present quotation now may forecast another extensive gold movement before the close of December, says the Wall Street Journal.

NEWLY INCORPORATED COMPANIES

Four Large Corporations Are Responsible for Fifty Per Cent. of This Week's Capitalization

New incorporations number 61; the head offices of these companies are located in five provinces. The total capitalization amounts to $13,037,900, the largest companies being as follows:—

Canadian Bartlett Automobile Company, Limited, Toronto	$1,000,000
Cleary Mines, Limited, Toronto	1,000,000
Canada Provident Securities Corporation, Limited, Winnipeg	2,000,000
United Motion Picture Theatres, Limited, Toronto	2,750,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	16	$ 2,227,900
Ontario	23	7,440,000
Manitoba	8	2,460,000
Saskatchewan	10	560,000
British Columbia	4	350,000
	61	$13,037,900

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning ot each paragraph. The persons named are provisional directors:—

Regina, Sask.—G. Moors & Company, Limited, $15,000.

Hawarden, Sask.—Western Tow Company, Limited, $20,000.

Elfros, Sask.—The Elfros Hall Association, Limited, $10,000.

Kamloops, B.C.—Kamloops Baking Company, Limited, $10,000.

Victoria, B.C.—Alliance Securities Company, Limited, $300,000.

Wadena, Sask.—The North-West Hotel Company, Limited, $50,000.

Bromhead, Sask.—The Long Creek Grain and Supply Company, Limited, $50,000.

Springwater, Sask.—The Badger Co-Operative Supply Company, Limited, $20,000.

Beauport, Que.—La Compagnie J. A. Gaulin, Limited, $49,900. J. H. Fortier, L. Terreau, J. Savard.

Prince Albert, Sask.—The Scottish Canadian Fisheries and Cold Storage Company, Limited, $100,000.

Vancouver, B.C.—Western Brokerage Company, Limited, $20,000. Rainier Beer Agency, Limited, $20,000.

Walkerville, Ont.—Cott-a-lap Company, Limited, $200,000. R. N. Woodruff, R. C. Jeffcott, F. W. Woolrich.

London, Ont.—The Mallagh Bookshop, Limited, $40,000. W. J. Fraser Mallagh, W. W. Holmes, H. E. Burnett.

Windsor, Ont.—Moloney Electric Company of Canada, Limited, $300,000. R. W. Hart, A. Chenier, P. Stokes.

Val Barrette, Que.—La Compagnie de la Riviere Kiamika, Limited, $25,000. D. Girard, H. A. Chevrier, N. Page.

Exeter, Ont.—The Exeter Manufacturing Company, Limited, $20,000. S. Hanna, J. Murray, W. J. Murray.

Windsor, Ont.—Mechanics' Building Company, Limited, $40,000. F. H. Thomas, G. A. Sanderson, E. D. Palmer.

Sherbrooke, Que.—Two Miles Falls Water Power Company, $500,000. I. L. Lafleur, J. E. Roberge, O. E, Dorais.

Kingsville, Ont.—The Champion Brick and Tile Company, Limited, $75,000. D. Wigle, R. M. Wright, G. Pearse.

Burlington, Ont.—The Burlington Skating Rink Company, Limited, $10,000. E. Dickenson, J. C. Smith, W. J. Brush.

Collingwood, Ont.—The W. A. Tom Construction Company, Limited, $45,000. J. T. Loftus, W. H. Ford, A. 1. Naftel.

Guelph, Ont.—Ontario Agricultural College Students' Co-Operative Association. J. E. McLarty, C. S. Brown, W. J. Bell.

Saint Joachim, Que.—La Manufacture de Conserves de Saint Joachim, Limited, $20,000. G. Filion, F. Morel, G. Dionne.

Sainte Edwidge, Que.—Compagnie Electrique de Sainte Edwidge, Limited, $20,000. A. Comptois, E. Berard, N. Masson.

Mount Dennis, Ont.—The John A. Marshall Brick Company, Limited, $40,000. J. G. Marshall, B. B. Hunter, T. Goddard.

Dundas, Ont.—The Dickson Building Company, Limited, $40,000. J. Wolverton Dickson, W. J. Dickson, C. E. Dickson.

Vineland Station, Ont.—Vineland Growers' Co-Operative, Limited, $10,000. A. Honsberger, Culp; E. Honsberger, N. Patterson Moyer.

St. Catharines, Ont.—The Consumers' Tire and Rubber Company, Limited, $800,000. A. W. Marquis, W. McA. Marquis, K. M. Peters.

Saskatoon, Sask.—The Borden Farm Company, Limited, $125,000. Northern Brick and Supply Company, Limited, $150,000. Argue, Limited, $20,000.

Quebec, Que.—The Canadian Fireproofing Company, Limited, $250,000. A. C. Casgrain, E. M. McDougall, J. J. Creelman. Compagnie Sportive de Quebec, Limited, $3,000. J. E. Larochelle, A. G. Picard, A. Emond.

Winnipeg, Man.—The Suffield-Pain Investment Corporation, Limited, $250,000. J. Devereux, Suffield; E. Pain, R. E. Campbell. Federal Underwriters, Limited, $20.000. W. T. Alexander, F. H. Alexander, W. E. Fudger. The National Clothing Company, Limited, $40,000. H. Narovlansky, L. Narovlansky, S. H. Narovlansky. Ruttan, Alderson & Lound, Limited, $30,000. C. M. Ruttan, W. F. Alderson, H. A. Lound. American Club, Limited, $5,000. W. E. Blachley, B. Bowes, R. S. Brown. Boston Dairy Lunch, Limited, $15,000. F. Wyker, C. J. Doud, P. Christopher. Consolidated Music Stores, Limited, $100,000. J. W. Hummel, S. Semple, F. H. Wray. Canada Provident Securities Corporation, Limited, $2,000,000. E. B. Eadie, R. Siderfin, D. Wilson.

Montreal, Que.—Brick and Construction Products Company, of Montreal, Limited, $600,000. R. Taschereau, T. Rinfret, N. Z. Cordeau. Transcontinental Construction Company, Limited, $50,000. W. J. Interest from July 1st, 1913, and payable half-yearly on the last days of June and December.

Principal payable June 30th, 1943.

Coupons attached for Interest

Denomination of debentures, $1,000 each.

Principal and Interest payable in Peterborough, Toronto, or Montreal.

The highest or any tender not necessarily accepted.

F. ADAMS,
City Treasurer.

THE QUEBEC BANK

Report of Proceedings of the Ninety-Sixth Annual Meeting of the Shareholders

The Ninety-Sixth Annual General Meeting of the Shareholders of The Quebec Bank was held in the Board Room of the Head Office in Quebec, Monday, 1st December, 1913, at three o'clock.

The following were present:—A. C. Joseph, Major T. C. Hetherington, A. E. Scott, John Shaw, J. F. Burstall, Gaspard Lemoine, R. MacD. Paterson, Thomas McDougall, John T. Ross, B. B. Stevenson, Herman Young, Vesey Boswell, Reginald C. Patton, Col. Erskine G. Scott, J. G. Scott, Captain L. R. Demers.

Mr. Andrew C. Joseph moved, seconded by Mr. H. J. McKeon, that the Chair be taken by Mr. John T. Ross, and Mr. R. C. Patton be requested to act as Secretary of the Meeting.—Carried.

The Chairman read the Report of the Directors as follows:—

The Directors beg to submit to the Shareholders the Ninety-Sixth Annual Report, covering the year ended 31st October, 1913, together with the Balance Sheet of the Bank as on that date.

The net profits for the year, after making provision for interest due to depositors for all bad and doubtful debts and operating expenses, amounted to $309,228.14. There has been paid out of this, quarterly dividends amounting to $185,721.76; the sum of $5,000 has been added to the Pension Fund; $22,841.20 has been expended on premises at the Branches; $20,339.51 has been paid out for business taxes, and the sum of $75,000 has been reserved for depreciation in the value of bonds and securities held by the Bank.

The sum of $56,962.50 has been received as premium on new Capital Stock issued, and this sum has been transferred to the Rest Account, making it $1,306,962.50.

The New Bank Act calls for certain changes in the form in which the General Statement is presented.

During the year Branches have been opened at St. John, in the Province of New Brunswick; at Cedars and St. Catherine Street, West, Montreal, in the Province of Quebec; at Elrose, in the Province of Saskatchewan; at Edmonton and Empress, in the Province of Alberta, and at Victoria, in the Province of British Columbia.

The Branches at Victoriaville, in the Province of Quebec; Craven, in the Province of Saskatchewan, and Bassano, in the Province of Alberta, have been closed.

In order to furnish facilities for our Shareholders in the Province of Ontario and to meet the desire of the Finance Department, a registry for our shares has been opened at Toronto Branch.

Some modification in our By-laws is advisable in order to meet the requirements of the New Bank Act. This will be duly submitted to you.

Under Section 56 of the New Bank Act you are required to appoint auditors for the Bank and you are also required to fix their remuneration.

The Head Office and all the Branches of the Bank have been duly inspected during the year.

We desire to express our appreciation of the loyal and capable manner in which the present staff have performed their duties during the past year.

All of which is respectfully submitted.

JOHN T. ROSS,
President.

The General Manager read the Statement of the affairs of the Bank, as on the 31st October, 1913.

W. H. SCOTT,
Chief Accountant.
B. B. STEVENSON,
General Manager.

JOHN T. ROSS,
President.

Before moving the adoption of the Report, remarks were invited by the Chairman, to which Mr. John F. Burstall stated that as no Shareholder had any comment to make, it showed that the Report and Statements presented, must be considered as very satisfactory.

Mr. John T. Ross, moved, seconded by Mr. Vesey Boswell, that the Report and Statements now read be adopted and published for the information of the Shareholders.—Carried.

The General Manager informed the Meeting that it would be necessary to propose a Resolution amending By-law No. 6 in order to conform with the New Bank Act.

It was therefore moved by Mr. Arthur E. Scott, seconded by Mr. Gaspard Lemoine, that By-law No. 6 be amended by striking out the word "Thirty" following the word "least" and by substituting the word "Twenty" in place thereof.—Carried.

The General Manager stated that in accordance with the New Bank Act, it is necessary for the Shareholders to appoint an Auditor or Auditors and that written notification had been received on the 24th October, 1913, from Messrs. J. G. Scott, Andrew C. Joseph and John F. Burstall that they intend to nominate Mr. James G. Ross, Mr. John W. Ross, and Mr. A. F. C. Ross, Auditors, for the coming year.

It was moved by Mr. J. G. Scott, seconded by Mr. Andrew C. Joseph and Mr. John F. Burstall that Messrs. James G. Ross, John W. Ross, and A. F. C. Ross, be appointed Auditors of the Bank for the coming year, and the remuneration fixed, including all expenses, shall not exceed Three Thousand Five Hundred Dollars per annum.—Carried.

It was moved by Mr. H. J. McKeon, seconded by Col. E. G. Scott, that the thanks of this Meeting be given to the President, Vice-President and Directors for their valuable services during the past year. In reply to which the President expressed his thanks on behalf of the Directors.

It was moved by Col. E. G. Scott, seconded by Mr. Herman Young, that the thanks of this Meeting be given to the General Manager and other Officers of the Bank for the efficient manner in which they have discharged their duties. In reply to which the General Manager expressed his thanks on behalf of himself and the other Officers of the Bank and stated that the staff in general had performed their duties very satisfactorily during the past year.

Mr. G. Lemoine moved, seconded by Mr. Thomas McDougall, that Mr. John Shaw and Mr. Arthur E. Scott, be appointed Scrutineers of the Ballot and that the Ballot-box be now opened and remain open until 4.30 o'clock of this day, for the election of Directors, and that if five minutes elapse without a vote being cast, the Scrutineers be empowered to close the Ballot-box.—Carried.

The Scrutineers reported as follows:—

B. B. Stevenson, Esq.,
General Manager,
The Quebec Bank.

Dear Sir:—

We have to report that having acted as Scrutineers at the election held this day, the following gentlemen have been elected Directors for the ensuing year:—John T. Ross, Vesey Boswell, Gaspard Lemoine, W. A. Marsh, Thomas McDougall, G. G. Stuart, K.C., J. E. Aldred, R. MacD. Paterson, Peter Laing.

(Signed) JOHN SHAW,
ARTHUR E SCOTT.

Mr. Thos. McDougall moved, seconded by Mr. R. MacD. Paterson, that the thanks of this Meeting are hereby tendered to the Scrutineers for their services.—Carried.

The Meeting then closed.

At a subsequent Meeting of Directors, Mr. John T. Ross was re-elected President, and Mr. Vesey Boswell, Vice-President for the current year.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

RECORD OF TRADE DISPUTES

The Department of Labor reports that the industrial situation from the standpoint of the number of trade disputes in existence, was better in October than at any time during the year. The loss of time to employees through trade disputes actually commencing during that month was small, and in all there were only eight disputes in existence, this number including those already in existence at the beginning of the month, and those which commenced during October. On no occasion during the present year has the number been as small as this; the next best record being in September, when eleven disputes were reported. About 3,657 employees were directly and indirectly involved in the disputes of the month. About 70,000 working days were lost through strikes and lockouts during October as compared with 83,380 during September, and 98,000 in October, 1912. As in the previous months the most important dispute was that of coal miners on Vancouver Island. It is difficult to estimate the loss of time through this dispute, as it is probable that the strikers obtain work from time to time in other localities and that other men are taken on by the operators concerned. An estimate would show about 2,000 men out of work directly as a result of this dispute during October.

◆

BUSINESS IN AND AROUND CALGARY.

(Special Correspondence.)

Calgary, December 10th.

Calgary's business conditions during the month of November were fair. Although twice as much grain had been marketed, and shipments of livestock surpassed anything previously recorded, merchants were inclined to say that collections from country points had not reached their expectations. This they appeared to think was due to the implement firms and banks looking sharply after their own interests. Trade in groceries and provisions was normal; in heavy winter wear, light—the season so far having been very mild; in building and construction materials, demand is decreasing.

◆

The regular quarterly dividend of 1 per cent., payable January 1st, 1914, was declared on Dominion Steel.

A British Dominions Exhibition will be held at Crystal Palace, **London, in 1915.**

ONE THOUSAND MILLION POUNDS

That Amount Will Be Invested Here Within Fifteen Years, When Our Population Will Have Doubled

In an address to the political science students of the University of Toronto last week, Sir George Paish stated that one-quarter of the wealth of England lies in all the great cities and countries of the world, but mainly it lies in Canada. Britain has £500,000,000 invested in this Dominion, which gives to her in turn an income of £20,000,000. But Britain must increase her income in order to allow the maintenance of her increasing population. "England," declared Sir George, "is not a rich country. Then how can she supply all this capital if she is poor, it may be asked. It is due to the fact that we are normal human beings. We in England, looking to the future, set aside a certain portion of our possessions and earnings. This invested capital does not come from accumulated wealth. Out of an income of £2,400,000,000, there is a saving of £400,000,000."

Should Help to Increase Capital.

One-third of the population of the British Isles does not receive an income sufficient to keep it in bare necessities. This condition must be improved upon in the next generation; every man in the country should be doing something and having something to increase the capital of the country.

The speaker then turned to Canada's duties to the motherland. Out of the British Isles has come the capital for the great Canadian railroads, and in the current year the amount will be in excess of all previous investments, totalling nearly £60,000,000. Canada, besides owing £100,000,000 to the United States, owes £500,000,000 to Britain—in all $3,000,000,000. Now Canada must begin to pay interest on this sum. With increased agricultural products the Dominion will be able to justify the faith which England has shown in thus financing her.

Must Pay Interest.

"We have trusted Canadians," said Sir George. "We realized that they are our kinsmen and have a national sense of honor; and so we lent on practically a 4 per cent. basis. Had Canada been outside the empire this would not have been done. Over 5 per cent., is charged on the very considerable sums invested in the Argentine Republic and elsewhere. If we have trusted you, you must keep your trust. If we have openly speculated we should have no right to demand this; but this is gilt-edged money, and you must justify the character which has been ascribed to you."

Looking to the Future.

In answer to a doubt expressed by Professor Lloyd, of the political science department of the university, that a country which lends may be poorer than a country which borrows, Sir George showed how the income of Great Britain, an essentially lending country, is £7,000,000,000, divided amongst 46 millions of people, while that of the United States, a borrowing country, is only £2,400,000,000 divided amongst 96 millions.

Sir George completed his speech with the remark that in 15 years over 1,000 million pounds will be invested in Canada, and that the population of the country will in that time be doubled.

DEBENTURES AWARDED

Dryden, Ont.—$5,000 15 years, to Messrs. G. A. Stimson & Company, Toronto.

Yorkton, Sask.—$16,000 7 per cent., to Messrs. Wood, Gundy & Company, Toronto.

Prince Albert S.D.—$26,000 6 per cent. 30 years, to Messrs. Morton, Bartling & Company, Prince Albert.

Port Stanley, Ont.—$10,000 30 years, $3,449 5 years debentures, to Messrs. W. L. McKinnon & Company, Toronto.

Saltfleet, Sask.—$1,400 8 per cent. 10 years, to Messrs. H. O'Hara & Company, Toronto.

Elkwood, Man.—$1,500 6 per cent. 10 years, to Messrs. H. O'Hara & Company, Toronto.

Pittville, Sask.—$1,900 8 per cent. 10 years, to Messrs. H. O'Hara & Company, Toronto.

Bickleigh, Sask.—$1,800 8 per cent. 10 years, to Messrs. H. O'Hara & Company, Toronto.

Cornwall, Ont.—$32,476 6 per cent. 30 years, to Messrs. A. E. Ames & Company, Toronto.

Solsgirth S.D., Man.—$5,000 6 per cent. 20 years, to Messrs. H. O'Hara & Company, Toronto.

Duck Lake, Sask.—$11,000 6 per cent. 20 years, to Messrs. H. O'Hara & Company, Toronto.

Perth County, Ont.—$51,000 5 per cent. 10 years, to Messrs. H. O'Hara & Company, Toronto.

Bruce County, Ont.—$20,000 5 per cent. 20 years, to Messrs. Browse, Mitchell & Company, Toronto.

BUSINESS MEN MUST BE CAUTIOUS

So Advises a Leading Authority in Canada—Productive Power

To the Canadian Club at Toronto last week, Sir George Paish reminded his audience that with the completion of the lines now under construction, Canada would have by 1915, 35,000 miles of railway, a vast machine which would enable the people to increase their production and help them to pay the interest on their indebtedness. The farming, mining and other industries should then make very great progress. The burden of interest would become light until the country would be justified in going ahead again with railway construction and importing still more capital.

"With regard to the situation, I have feelings of great confidence," continued Sir George. There was only one matter about which he was in any way disturbed, and that was the coming of the time when there was a serious diminution in the influx of capital. He hoped that Canadian business men would use caution. A nation in a period when it was borrowing less than it was accustomed to borrow usually drew upon its gold supply and exported because its traders went on buying without thinking that the capital from which to pay had been reduced.

Must Act With Caution.

"I advise Canadian traders to act with caution," said Sir George. "If stocks are not allowed to increase there will not be any serious monetary stringency. It will be merely a marking time until you can go ahead again. I hope you will act as if you were ship captains and take in a little sail when a little extra breeze is coming. I think the period of reaction will be short, because I cannot think that people will sit down on their capital and keep it at home when they can send it to Canada at attractive rates."

Sir George said that if gold was imported into Britain and the new gold was placed on the market, banking money would soon become so easy that the spirit of enterprise would be awakened again. So in a very short time trade would once more take an upward course.

To the Canadian Club at Montreal, Sir George stated that he attached a great deal of importance to exports, because it is by this means "you are going to pay us our interest."

"I hope," he continued, "you are going to develop your minerals faster than in the past. The development has not been as fast as the agriculture. The increase in mineral production, nevertheless, in a short time—1901-12, has been from $65,000,000 to $133,000,000—a very large and satisfactory growth.

Productive Power of Canada.

"Granting all these increases. What of the future? Well, in my judgment, the productive power of Canada in the next decade will be even more remarkable than it has been in the past ten years. In recent years Canada has been laying the foundations for a great business. She has borrowed vast sums of money, and has spent this money in preparing for a great expansion in her productive power.

"In the last ten years an unusual large proportion of population has been engaged in constructive work. In the next decade a greater part of your population will be engaged in productive work. In other words, you will bring into operation the great quantity of machinery that you have produced and constructed. Your railways, etc., are the machinery I refer to."

◆

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Windsor, Ont.—Up to December 22 for $32,000 6 per cent. 20-year separate school debentures. D. Gourd, secretary-treasurer. (Official advertisement appears on another page.)

Vancouver, B.C.—By-laws totalling $264,000 will be submitted to the electors at the municipal elections.

Minnedosa, Man.—Up to December 29th for $10,000 5 per cent., 1941 debentures. G. T. Turley, town clerk.

Port Arthur, Ont.—Ten by-laws totalling $639,000 are to be submitted to the electors at the municipal elections.

◆

It is understood that the Canadian Northern Railway the other day sold a large sized block of five per cent. equipment trust notes to Wm. A. Read & Company, of New York. The issue amounted to several million dollars and is now being successfully placed in the United States. Philadelphia took about $750,000 of the issue.

THE Modern Scrooge felt himself growing old. His was a wintry smile. The shadow of the Spirit of Christmas was thrown across his path. The shadow loomed larger, its outline grew plainer. The date leaves of the black lettered calendar shed near unto the Twenty-fifth. The Modern Scrooge took it as proved, that red, warm blood flowed in his veins, because when he pinched himself, it hurt somewhat. He had never heard of the notorious tango or the high cost of existing, although the ten thousand tingle and the price of being relieved of being bored were well known. Children were obstructions to automobiles and automobiles were fast gaits to dividends. The club was a clearing house for business information and the office a convenient place within the meaning of the act to capitalize conversational scraps.

When he went to Europe he figured what the annual income would be if the Atlantic could be diverted to the edge of Niagara Falls; also how much the steamship company wasted on its captains' gold lace. On these trips, he glanced at the ocean only once, and spoke to the captain twice to get advance information as to the speed of the vessel to win a couple of bets. He had been human, but had gradually become twisted into a walking S with a couple of straight lines to keep him on directorates,—thus, $.

No matter how freely money flowed money was always tight to the Modern Scrooge. When it was tight, too, with Tom, Dick and Harry, money was abnormally tight with the man of the wintry smile.

Imagine this poor fellow, as the shadow of the Spirit of Christmas came nearer and materialized into the Spirit itself. On it came, with the lisp, and prattle, and innocence of life's burdens, of tens of thousands of children and tens of thousands more. The dawn of the Twenty-fifth brought them face to face with the Modern Scrooge. For an instant, their eyes met. He would have capitulated but the wintry smile made them impatient. So down he went in the rush of the Spirit of Christmas and the lisping, prattling army, trampled upon in thoughtless haste; for that particular Spirit had a knack of warming the cockles of the heart towards what was to come and the hurry thereto was great.

Nobody pitied the Modern Scrooge—not on that day anyhow. He was pitied every other day when he thought he did not need it. On the three hundred and fifty-ninth day, (in Leap Year, three hundred and sixtieth), he got not a thought. The thought was all going to the Spirit of Christmas.

And the Modern Scrooge may learn before he ceases to be, that it is good to walk with the Spirit at sundry intervals during the year.

Postscript.—A Merry Christmas to YOU!

WESTERN FREIGHT RATES

The closing sessions of the western freight rates inquiry, which has extended during broken intervals over nearly two years, were marked by gladiatorial combats between opposing interests. Mr. Phippen, counsel for the Canadian Northern Railway, presented some figures, rather startling in their nakedness, showing that the three principal railroads of Canada would next year face a total deficit of over $26,000,000 after the payment of capital charges and interest on investments. Mr. Lafleur joined hands with his colleague, adding that a reduction in Grand Trunk Pacific rates at the beginning of that road's operation would ruin Grand Trunk Pacific credit. These statements elicited strong arguments from Mr. Pitblado, counsel for the Winnipeg board of trade, and from Mr. M. K. Cowan, counsel for the Saskatchewan and Alberta governments. Mr. James Walsh, on behalf of the Canadian Manufacturers' Association, cooled the jingling armor of the combatants by submitting a very reasonable demand for the readjustment of freight rates.

There are strong arguments for leaving freight rates, generally speaking, as they are. These might have been used without the figures submitted by Mr. Phippen, with his admonitory "Hush!" The railroads of Canada generally are in the process of building. Evidence submitted at several sessions of the inquiry tended to show that the Canadian Pacific is the only one which can be regarded as a standard road. Even that road has before it large expenditures on extensions and improvements. The Grand Trunk Pacific and the Canadian Northern, as transcontinental are about to begin their careers. Mr. Lafleur properly suggested that it was injudicious to interfere at this critical stage. On the other hand, he admitted that the Grand Trunk Pacific was to a large degree a creature of the Dominion Government, as the route followed had been imposed by the government. We think, therefore, that the government can scarcely afford to allow Grand Trunk credit to be "paralyzed completely," as suggested by Mr. Lafleur. With our railroads still in the formative process as big systems, it is obvious that railroad balance sheets will not look as healthy as they should do some years hence. It is equally plain that a reduction in rates will not help matters in that direction, but the citation of figures by Mr. Phippen does not assist railroad credit.

Of recent utterances on this question that of Mr. A. W. Smithers, chairman of the Grand Trunk Railway System, is by far the most reasonable. Mr. Smithers said in part: "All over the world the railways are asked for more service and more accommodation for the same or less money. That the cities, with their manufactories, and the country, with its agriculture, could not exist, as at present without the railways—in fact, would not have existed on anything like the present scale but for the railways—never seems to enter anyone's head. To hear public men and the general public talk all over the world one would think the railway companies consisted of unscrupulous capitalists, rolling in wealth, whereas they are composed of investors who have invested their hard-earned savings in these undertakings—the return for which, throughout the world, does not, I suppose, average 4 per cent.

"I fully realize railways must be under control and must conform to the law, and that the many and intricate questions relating to them must be argued before special Courts or Commissions, but I most respectfully ask that more consideration should be given to what the railways can really afford. Before petitions to lower rates and raise wages are granted, before extra service, extra equipment and extra facilities are ordered, let the commercial aspect be considered, and I ask this as much in the public interest as in the interest of the railways, for nothing can be better for the railways, or for the public, than that the railways shall be in such a financial position as to be able to satisfy all the reasonable demands of its customers. Our first consideration is, and always must be, the safety of the travelling public, and it is our desire to do all that is possible to ensure safety; but, remember, the public are always demanding more speed, more trains, and fewer stops, and every such demand must make it more difficult to ensure perfect safety, and must cost the railway more money.

"Compare the luxury and speed and frequency with which we travel by sea and land to-day with the way our fathers travelled, and the rates charged to-day are lower on the average than they were then; yet the demand for more service and more luxury never ceases. In every other business a better article justifies a better price, and if the railways are to continue to put in new and expensive appliances, to increase the safety of the public, to run more trains, and to meet the ever-increasing demands of their employees for higher wages and shorter hours, and of the public for increased facilities, an increase of rates must be given to enable the railway companies to find the capital to meet such demands. The necessity of higher rates is so urgent, and the demand is so just, that I cannot believe the people of Canada and America will long resist it."

Western Canada also has a just call. Its growth obviously will be crippled if unfair freight rates prevail. The Dominion Railway Commission now has the herculean task of digesting the facts, figures and arguments submitted in favor of the railroads leaving the rates where they are, and those in favor of western Canada obtaining a rate reduction. It has also the delicate task, later of adjusting, fairly to both interests, freight rates in western Canada. Mr. James Walsh, representing the Canadian Manufacturers' Association, seems to have placed the matter in a nutshell, saying:—

"We would be glad if your Board, having due regard to all the circumstances, and considering carefully the interests of all concerned, would readjust rates in a way that would conserve and promote the welfare of the western producer, and carry that readjustment just as far as it would seem practicable to carry it, consistent with the axiom that bona fide capital investment must always be afforded a reasonable return."

That is the problem with which the Dominion railway commission has to deal. *The Monetary Times* feels confident that the Commissioners will find a just solution.

COST OF LIVING DRAGON

The Ontario government is making a good move by adding to its department of agriculture a new branch, which will devote its energies to promoting co-operation and scientific marketing. Those who have given even a superficial glance at conditions in the rural districts and in the cities, concerning the growth of agricultural produce and its sale to the consumer, know that there is something radically wrong. The difference in the price received by the producer and paid by the consumer is large, and no one yet has satisfactorily accounted for it. The farmer gets too little, the consumer pays too much. Between them are a number of agencies, such as labor, middlemen, transportation. Somewhere on the journey from the soil to the table, loose marketing allows someone to extend unduly the price gap.

Mr. F. C. Hart, B.S.A., has been appointed director of the new Ontario department. We are told by the party press that the provincial government will throw its support into the fight against the high cost of living dragon. The trouble in the past with other dragon slayers has been that they have dropped their spears, ceased beating tin pans and taken to their heels as soon as the dragon roared. Mr. Hart has an excellent opportunity to help solve a problem which has remained with us too long. The proper solution should provide the farmer with better marketing conditions, larger profits and the consumer with a cheaper meal table.

CANADIAN PACIFIC FINANCING

Whenever the Canadian Pacific Railway directors formulate a new financing scheme, invariably they are subjected to drastic criticism. This railroad, aside from grievances, real or otherwise, which the public, through its operation are alleged to carry, has on several occasions accomplished financing which has excited the admiration of those who know of the intricacies of credit and finance. Before the average man was dreaming even of financial stringency, the Canadian Pacific Railway made a new stock issue, obtained its funds, consequently being in monetary clover when most others were stalking over stubble with bare feet. Too many critics of Sir Thomas Shaughnessy and his associates imagine that a transcontinental railroad with its numerous interests, such as steamships, and hotels, and so on, can be financed as easily as a peanut barrow and cans.

The Canadian Pacific Railway has done a great deal to maintain abroad a high standard of Canadian credit. European financiers and investors know that it is a first-class business organization, operated by business men and financiers of keen ability. They know that the future of the railroad and its credit are as safe as the Bank of England. Yet whenever Canadian Pacific directors announce good financing, and often in times of stringency, critics in Canada commence to wail. Other railroads may do what they will, governments may make blunders in financial arrangements, municipalities may borrow heavily without any check, industrial incorporations may plunge into debt—all with scarcely a word of protest. But when the Canadian Pacific Railway accomplishes real financing, beneficial to the company, to its shareholders, to the country at large, to Canadian credit, criticism is loosened.

Of the latest method to raise funds it is said that the company could have secured all the money it required by issuing 4 per cent. debenture stock at par. Yet the Dominion of Canada only a few weeks ago offered a 4 per cent. issue in London for subscription at 3 per cent. below par—and the underwriters took 83 per cent. of the offering. Following that result, it cannot be asserted that the railroad directors would have made a wise move in going to London with a 4 per cent. debenture issue. On this point Sir Thomas Shaughnessy says: "This is not the time to go into the market with a large issue of that security to the prejudice of the commanding position that it has always had in the London market, and will again have when normal conditions are restored. Any issue of debenture stock, excepting such small amounts as may be required to meet the demands of the market, must be postponed until some more opportune time. Neither would an increase of the company's capital stock be desirable just now.

"In view of these circumstances, the directors decided to ask the shareholders to loan the company the money likely to be required for its purposes during the next year or two on terms that would be advantageous to them, and the issue of $52,000,000 of note certificates was determined upon accordingly."

The new note certificates will constitute no permanent charge against the company's revenue. They make no demand whatever on the income from the company's traffic, and constitute a debt that will obliterate itself in the course of a few years.

SUPERVISING MUNICIPAL LOANS

Saskatchewan is leading the way with legislation seeking to supervise municipal financing. The bill is before the provincial legislature, and, being the first of its kind in Canada, the full text is printed on another page.

It provides for the appointment of a board of three commissioners, to be styled the board of local loan commissioners, with a ten-year tenure of office, terminable, however, by the lieutenant-governor on address of the legislature. Associated with the board, for advisory purposes, will be a committee of two members, to be appointed annually—one by the executive of the provincial organization representing rural municipalities, and the other by the executive of the provincial organization representing urban municipalities. The commissioners are to be disqualified from holding certain securities, such as stock in any Saskatchewan local authority, or interest in any concern dealing in contracts with local authorities. They are also to be disfranchised, both in municipal and provincial elections.

The board will have, among others, the following powers: To enquire into the merits of any application of a local authority for permission to raise money by way of debenture or upon security of stock, and to grant or refuse such permission; to act as agent for any local authority in selling its debentures of stock; to manage the sinking fund of any local authority which desires to entrust the same to the management of the board; to supervise the expenditure of moneys borrowed by a local authority under this act; and to obtain from a local authority at any time a statement in detail of its assets, liabilities, receipts and expenditure.

The general principle of supervising municipal finance is excellent. Doubtless, the municipalities are willing to admit that mistakes have been made and are anxious to remedy them. There are important matters, such as the size of municipal debts, the purposes for which loans are issued, sinking funds, and so on, which should have early and mutual consideration.

The provincial government will probably find it unwise and unsatisfactory to act as agent in selling the debentures of local authorities in the province. Having examined and reported on a proposed municipal loan, the proper duty of the government, we contend, has been fulfilled. Every provincial government has sufficient financial work in marketing its own bonds.

The Saskatchewan legislation should prove of great benefit to municipal credit in that province, so long as politics are eliminated. Once let the so-called "political pull" enter, and the legislation will do more harm than good.

Alberta will follow Saskatchewan's example, and British Columbia is considering its municipal finance questions. All such moves will tend to enhance Canadian municipal credit.

SMALL CHANGE.

Merry Christmas!

* * * *

The Monetary Times Annual proposes to enjoy Christmas time fussing in front of the mirror.

* * *

Sir George Paish has the distinction of being the first "leak" on record, of Canadian Pacific Railway news.

* * * *

The government will not investigate the high cost of living, as sufficient aviating investigators are not to be found.

* * * *

New England fishermen are already fearing high fish in Lent—although we have not got past rich pudding at Christmas yet!

* * * *

Mr. W. F. Maclean, M.P., and the German papers will now sing Christmas carols about Canadian Pacific Railway financing.

* * * *

Talking of bonds for Christmas presents, there are some bonds we know, the recipients of which would like a hole in the bottom as well as in the top of the stocking.

* * * *

Sir Lomer Gouin says he will kill the library Bill in the Quebec assembly; the Ottawa Senate will kill other Bills. And then someone will get a gun and stalk the short terms of the same family.

CANADA GOT $95,000,000 IN PAST TWO MONTHS

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

QUESTIONS RAISED BY DOMINION'S BORROWING.

(Central News cable to *The Monetary Times*).

London, December 10.—Canada has ranked so importantly in the new borrowing movement that it is beginning to be asked, what will be the position of the many other colonial and foreign interests with requirements to be satisfied, if the output of Canadian emissions be maintained at anything like its present rate? Nevertheless since it is reported that part of the proceeds of the Dominion's new loan will be utilized for the purpose of financing the Grand Trunk Pacific Railway, it is to that extent regarded with satisfaction, because the money market would rather have a Canadian government emission than a Grand Trunk Pacific stock issue to digest. In this connection, however, it has been freely pointed out that the action of the government in borrowing for railway purposes clearly indicates its appreciation, both of the European monetary position and of the situation created by recent over-financing in the Dominion—which is regarded as satisfactory in one sense, even if it gives rise to some discouraging reflections in another. The first news of the loan was followed by quite a sensational break in existing Canadian four per cents, which abruptly gave way 2 to 3 points, and took other Dominion securities and various new scrip quotations with them. The quotations have now steadied somewhat, but they have not recovered, and British gilt-edged securities have also been adversely affected, so much so that consols have only been lifted slightly from a new low level record by support extended on the part of the government broker.

BRITISH COLUMBIA ELECTRIC'S FINANCING.

*London, December 12.—The British Columbia Electric Company's report is regarded as disappointing, especially in view of the absorption of the increase of £207,174 in gross earnings by the higher prices of materials and labor troubles.

Nobody supposes the shareholders at the approaching meeting will refuse sanction to an increase of the capital to £5,000,000 sterling, by creating 400,000 additional pound shares, but The Times, in a lengthy special article, suggests that the company should set its face against new enterprises until conditions improve.

The Times further discusses the consequence if the corporation of Vancouver purchases the railway in 1919. It says that the company suffers relatively very little because it retains its various lines and entry into the city, also its outlying lines and lighting franchises.

This, however, The Times thinks, is not the time for further capital commitments.

TRUSTEE AND CANADA'S LOAN.

†London, December 15.—Though little credence will have been given to the widely circulated report of a news agency alleging that the British Public Trustee in his capacity as government official had gone out of his way to advise a number of would-be investors to withdraw the application which they had made for stock recently issued for the Dominion of Canada loan, he considers that the public here and in Canada are entitled to an explanation.

"In one case," he says, "where the co-trustee proposed to apply for an allotment he was advised by telegram that the Public Trustee would agree to an investment of £1,000 nominal in the new issue. Confirmation of this telegram followed by letter the same day.

"The co-trustee, having understood the telegram to be an authorization to apply for an allotment, did so. It therefore became necessary to advise him that the application should be withdrawn. This is the only incident in which the Public Trustee has been concerned in connection with the new issue."

While thus denying the statement that he was issuing broadcast advice not to subscribe for the Canadian loan, the Public Trustee states that he did himself buy several lots of the new issue at a discount before the allotment.

CALGARY POWER ISSUE IN LONDON.

†London, December 15.—The Calgary Power Company to-day offers £156,400 5 per cent. mortgage bonds at 90.

ENGLISH CUTLERY FIRM IN CANADA.

†London, December 15.—In a prospectus published to-day inviting subscriptions of £150,000 further preference capital, Messrs. Mappin and Webb, the well-known Sheffield cutlery firm, state that important interests have been acquired in Canada in which direction they consider there is scope for further development.

BORROWING TOO FREELY.

*London, December 15.—Commenting on the poor public response to the million-dollar city of Prince Albert issue, 66 per cent. of which has been left with the underwriters, the Daily Mail says the explanation is to be found largely in the criticism directed against the loan, it being contended that Prince Albert is borrowing too freely in proportion to its size and importance.

CENTRAL RAILWAY RETI[illegible]G BONDS

†London, December 16.—The Central Railway Company of Canada to-day resolved to retire existing bonds replacing them by a new issue covering the whole main line between Montreal and Midland.

Mr. C. N. Armstrong, vice-president of the company, told the bondholders, that the railway was now negotiating with an important shipping company which proposes to put nine steamers on the Great Lakes and from Montreal to British ports.

He stated that negotiations were also proceeding with an important new railway from Montreal to the north.

Canadian bondholders, Mr. Armstrong added, had never attempted to sell their holdings. They had every confidence in the future of the company.

LONDON PAPER ON CANADIAN CREDIT

†London, December 16.—Discussing "Canada's Depreciated Credit," the Daily Mail to-day refers to the relative prices which now obtain for Canadian securities and other colonial stocks in London. These, says the writer, furnish an unmistakable object lesson as to the serious effect of heavy borrowing on Canada's credit.

Canadians until quite recently, the writer goes on to say, stood easily highest among the colonial securities and not many months ago the Dominion of Canada 3½ per cents. (there were no 4 per cent. borrowing then), stood some half a dozen points higher than corresponding Western Australian stock, whereas, now the Western Australian 4 per cents. recently issued at 97, stand at 2 premium, while Canadian 4 per cents. issued at the same price stand at ½ discount.

MORE DUCAL DUCATS FOR CANADA

*London, December 17.—The Times comes very near the mark when it hints that the Duke of Bedford may follow the example of the Duke of Sutherland and invest in Canada part of several millions sterling coming from the sale of the nineteen acres of London's most valuable sites in and around Covent Garden.

The Duke sold, between 1909 and 1911, 20,000 acres of fenland in Cambridgeshire, realizing nearly five million dollars; also the Devonshire town of Tavistock, with its water supply, markets, Town Hall and other public services and 8,500 acres, realizing $2,830,000.

It is understood that a considerable portion of this money has gone quietly into Canadian Pacific and other high-class Canadian securities and mortgages, the Duke thereby getting from 5 to 7 instead of from 2 to 3 per cent. on his capital.

**Montreal Star* cable.

†Canadian Associated Press cable.

GRAND TRUNK MAKING ISSUE—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

PLANNING STEAMSHIP ISSUE

*London, December 17.—Arrangements are afoot to issue $6,106,000 5 per cent. debentures of Canada Steamship Lines, Limited, as a result of the amalgamation, payable in 1943 at 105.

WAITING FOR DISCOUNT

*London, December 17.—The result of the Prince Albert issue of £200,000 fives at 90, two-thirds of which was left with the underwriters, is partly due to new public habit to wait allotment in expectation of discount.

Taking twenty of the latest new issues, about half are quoted premium, half discount. Brazilian new fives are 7 discount; Prince Alberts, 7; Ottawa four-halves are 3⅛ premium.

GRAND TRUNK ISSUE

*London, December 17.—The underwriting is being arranged for £2,000,000 Grand Trunk Pacific 5 per cent. seven-year notes at 97. The issue is guaranteed by Grand Trunk.

British Consols registered a new low level record, when they were quoted at 71⅛ for cash and 71 5-16 for the account. The decline in the premier security of the London Stock Exchange is attributed to the ceaseless stream of new issues with attractive yields to which holders of Consols are transferring their money.

The immediate cause of to-day's low record was the announcement of the Grand Trunk Pacific issue within a few days of $10,000,000 of seven years five per cent, notes at 97.

This brings the total of Canadian issues along during the month of November and December to the considerable aggregate of $95,000,000.

WHITE PASS RAILWAY PASSES DIVIDEND

*London, December 17.—President Dickeson, speaking at the White Pass and Yukon Railway meeting to-day, said the competition of the North Navigation Company had become so serious that it was inevitable that the White Pass Company would immediately have to consider the establishment of a permanent first-class line of steamers to handle freight and passenger business between Seattle, Vancouver and Skagway. The year 1915 would be especially appropriate for the inauguration of such a service, coinciding with the Panama Pacific Exposition. The company would then be free from all risks of discrimination on the ocean and able to pursue unhampered the development of the route.

Mr. Dickeson confidently anticipated a Dominion Government appropriation for the construction of a dam at Miles Canon near White Horse, to control flood waters.

Chairman Charles Colin Macrae said the rate war had proved very costly. Gross revenue at the end of 1913 would be $1,215,000, a slight increase over 1912, but in order to maintain cash resources to carry on the fight forced upon them, no dividend would be paid for the present year.

The report was adopted unanimously.

◆

GOOD EXAMPLE IN BOND SELLING

In offering a block of Alberta bonds, referred to on another page, the circular, map and views relative to the issue, contain more information in regard to the financial position of the province of Alberta than has previously been given in any financial circular. The $3,600,000 Alberta ten-year 4½s were purchased by Spencer Trask and Company, N. W. Harris and Company, Inc., and the Equitable Trust Company. The market in Canada is being handled by N. W. Harris and Company, Inc., Montreal, N.B., Stark and Company, Montreal, and Murray, Mather and Company, Toronto. These United States and Canadian bond houses have set a good example in giving the fullest information pictorial and otherwise, to prospective investors.

BANK OF OTTAWA REPORT

Strongly emphasized, in the annual bank reports now being published, that legitimate business credit has been granted in Canada during the past year of stringency, good profits have been made, and the banking position generally strengthened. These points are again illustrated in the annual statement of the Bank of Ottawa. At the end of November, this bank had on loan in Canada, $36,472,199, its net profits for the twelve months were $706,740, as compared with $640,220 for 1912, and its position had been improved considerably. For instance, the reserve fund stands at the substantial sum of $4,750,000 while paid in capital stock totals $4,000,000.

After payment of dividends at the rate of 12 per cent., the transfer of $250,000 to rest account and $15,000 to officers' pension fund, a balance of $202,759 was carried forward to the credit of profit and loss account. The rest account amounting to $4,750,000, was increased during the year by $174,520 premium on new stock (5,000 shares were sold), in addition to the $250,000 set aside from profits.

Total assets at November 29 were $54,674,231, an increase of $3,764,988 during the year. Of this total, $15,153,634 is in liquid assets and $36,472,199 in current loans. Deposits increased during the year from $38,157,676 to $40,807,499, a gain of $2,649,823. Notes totalling $4,468,075 were in circulation at the end of the fiscal year.

The Bank of Ottawa, one of Canada's strong, conservative and well-managed financial institutions held its thirty-ninth annual meeting of shareholders on Wednesday, and great satisfaction was expressed in the bank's report.

◆

WHY IT COSTS MORE TO LIVE

The Dominion government has appointed Messrs. J. McDougald, commissioner of customs; C. C. James, agricultural commissioner, and R. C. Coats, statistician of the department of labor, as a commission, to ascertain the causes of the increased cost of living.

◆

NOVEMBER BANK CLEARINGS

◆

The Great West Life Assurance Company has opened a new branch office in the Boyd Building, Portage Avenue, Winnipeg. Mr. J. W. MacDougall being in charge.

STATE ADMINISTRATION OF COMPENSATION IS A MISTAKE

Proposed Ontario Law Has Good Foundation, but also Defects Regarding Administration and Limitation

The introduction of a workmen's compensation act in Ontario is a matter calling for serious consideration. First, the necessity of a workmen's compensation measure must be admitted. The point is conceded, we believe, by most employers that their employees are entitled to compensation for accidents. The desirability of legislation is, therefore, recognized by the government by employers of labor, and by the workmen. It remains to put upon the statute books a law which gives the workman his most generous due and one which steers clear of the dangerous pitfalls which have been noted in the working of similar laws in other countries

Capital is extremely sensitive to injurious legislation. Canada is dependent upon British and foreign capital for its industrial development, and this must be the case for many years to come. Approximately £500,000,000 of British money has already been invested in the Dominion. Sir George Paish, an eminent English authority, and a recent visitor to Canada, estimates that fifteen years hence over 1,000 million pounds of British money will be invested here. It is, therefore, but common justice to frame our laws with due regard to these colossal investments, at the same time protecting the interests of our industrial workers and captains of industry.

Sensitiveness of Capital

The sensitiveness of capital may be illustrated by citing a typical example, without mentioning the names of the provinces concerned. A manufacturer of the United States, with an extensive plant in one of the largest cities, proposed to build a branch in Canada in order to handle more expeditiously his Canadian business. He was attracted with the facilities afforded by a certain Canadian city, and the enterprising citizens had selected a site for his factory. They were surprised when he suddenly determined to go to a neighboring province to build the plant. He had no desire to make a secret of his reason —the unfair workmen's compensation law.

Sir William Ralph Meredith, the commissioner appointed by the Ontario government to investigate the subject of workmen's compensation and to draft an act for the province, has spared neither time nor energy during the course of his investigation. He has drafted a bill in which is a strong foundation for a compensation measure satisfactory to all interests concerned. Views naturally differ as to the details of the proposed legislation. *The Monetary Times* is of opinion that the measure is a good one, with the exception of one or two features, those particular features, however, being, in the light of experience in other countries, extremely unsatisfactory.

Objections to State Administration

There will surely be a strong objection to State administration of the act. The draft bill as it stands, with its feature of State administration, is of the worst paternalistic type, and would be the most drastic measure of its kind in Canada. There is sufficient faith in the individual responsibility of the Canadian citizen, be he industrial worker or industrial captain, to assert that there is not a Canadian citizen in favor of pauperizing legislation, which has had such disastrous effects upon national character, individually and collectively, in European countries.

We agree with Sir William Meredith that in the event of State administration, commissioners could be found who would impartially and according to the best of their ability, discharge the important duties which would devolve upon them. On the other hand, there are more practical arguments against State administration. Presumably, the argument in favor of the State, is that employers can obtain cheaper insurance than if insurance companies were patronized. In his final report, Sir William Meredith says: "I could understand that there might be economic waste if it were incumbent on . . . an employer to insure with a joint stock company, which would require him to pay a premium sufficient to provide for the cost of securing the business and a reasonable dividend to its shareholders, as well as to indemnify against the risk undertaken."

Insurance Companies' Good Records

The State of Washington and its State Compensation Law were frequently referred to in the hearings of the Ontario Commission. The cost of administering the insurance in that State during the first year was 9.9 per cent., with an admittedly inadequate staff. It was estimated by the auditor that the cost would increase to 12½ per cent. or more during the following year. Excluding agents' commissions, we believee that the casualty insurance companies writing workmen's compensation in Canada can show better results regarding the administration cost of the insurance they sell. The State does not employ agents. By eliminating the State as an administrator of the act, we have this position, one eminently satisfactory to all concerned. Workmen's compensation would be compulsory—that is, if a workman is injured, he will obtain compensation. At the same time, the employer of labor automatically assumes liability for accidents to his workmen, but whether or not he takes insurance, is optional to him, just as in the case of fire or life insurance. The State, therefore, would not be burdened with the troubles of administering a workmen's compensation law, the workmen would be entitled to and would receive compensation, and the employer would have freedom of action in the matter of taking inurance, as he should have.

Lack of Limitation

Another serious defect in the proposed Ontario legislation is the lack of limitation of compensation. Without limitation, the act is dangerous. Sir William Meredith says: "The limitation to $1,500 of the amount of compensation in case of permanent partial disability (an amount proposed by a witness at the hearing) is, I think, unreasonable." Even supporting Sir William in that contention, the important point overlooked is that there should be limitation of some kind.

Sir William Meredith says he has no fear that if the bill should become law it will handicap Ontario manufacturers or that it will divert manufacturing from the province. He cites the Quebec compensation law as imposing upon employers greater burdens than those of the suggested Ontario law. But there are features of the Quebec law which redeems its character, namely: The maximum amount recoverable is $2,000.00; the maximum weekly indemnity is $10.00; capital settlement under the approval of the Court not permissible; the first week's disability is not covered, thus preventing a very large number of petty cases which might be put forward and the amount involved in each case so small that complete investigation would not be considered warranted.

Injustice of State Administration

Of State insurance Mr. J. V. Paterson, president of the Seattle Construction and Dry Dock Company, one of the largest industries in Washington State, a man who has had a full dose of the evils of the act, says—

"The freedom of contract is abridged. The State has established a monopoly. If the State has a superior insurance scheme it needs no monopoly. If it is inferior, it should not be so favored. The employer is entitled, and should especially be in the State of Washington, to transact business subject to State supervision, but not State control. He should not be forced into the insurance business with which he is not familiar. His business requires that he be permitted to insure his own risk, form associations with his neighbors for mutual protection, or buy his insurance in the open market from licensed competitors or from the State, should the latter be engaged in such business."

(To be concluded.)

BANQUE HOCHELAGA AUDITORS.

Mr. Geo. Gouthier, L.I.A., and Mr. S. Roper Mitchell, C.A., have been appointed auditors of La Banque Hochelaga under the provisions of the new act.

DICKORY, DICKORY UP TO DATE.

"Finally a farmer, John Dunlop, residing on the Bayfield Road, took him in, and when Dunlop went away on business Lewis found money in the clock and absconded with it," says an Ontario dispatch. How much money is being held in the clocks and stockings of America?

SIR WILLIAM WILL KNOW

"Halifax has always been our port and we have no reason to change it. I do not know what considerations brought the Royal liners to St. John, for I was away when the change was made, but I will know when I reach Toronto.

"For a long time we have regarded the Intercolonial as the logical eastern end of the Canadian Northern Railway. We want to buy it and you can make this as strong as you like, but I am afraid it will be some time before that occurs. The government holds to the idea that the railway being the people's road should not be sold to a private company." These are reported remarks of Sir William Mackenzie in an interview printed in the St. John Standard.

KIRKLAND LAKE OFFERING COLD-SHOULDERED

The offering in London of 75,000 shares of £1 of the Kirkland Lake Proprietary, is given a dig by The London Economist, which says:—

"The company acquires the right 'to negotiate for the acquisition of certain mining interests' in Ontario, and for this precious right it pays the very tangible sum of £25,000 in cash and an additional £1 in cash or one fully-paid share, at the vendor's option, in respect of each two shares over and above the present issue up to a further 50,000 which may be hereafter allotted. The details of the contracts which convey the benefit of the 'right to negotiate' are not given. The prospectus contains sufficient condemnation in its statements and its omissions to make any further warning to investors necessary."

The company's capital is £200,000.

CANADIAN LAW OF BANKS AND BANKING.

Falconbridge's Banking and Bill of Exchange is well known in banking and commercial and law circles. A second edition becoming necessary, the book has been revised and leading decisions on the law of banking and bills of exchange which have been reported in England since the first edition was issued, have now been included.

The book is divided into Book I, Banking and the Bank Act; Book II, Negotiable Instruments and the Bills of Exchange Act.

H. M. P. Eckardt, the well-known banking expert, has written a valuable chapter on Branch Managers and the changes in the Bank Act. There are included a list of authors cited, and table of cases.

Banking and Bills of Exchange, 2nd Edition. J. D. Falconbridge, M.A., LL.B.: Canada Law Book Company, Limited, Toronto.

VALUE OF LIFE INSURANCE

XLIII.

Insure Your Insurance

BY C. A. HASTINGS

Insuring your insurance is equivalent to purchasing a government annuity on the instalment basis. The main object of insurance is to protect one's dependents by depositing an annual premium with a life office, who, in turn, guarantee to pay to your beneficiary the face value of the policy purchased. You have bought protection so as to make sure of your dependents being in a position to keep the wolf from the door, having fully realized that all your investments may not turn out trumps and that by laying on one side 10 per cent. of your income you have shifted the responsibilities on to an office of unimpeachable power and gigantic resources (assuming you have made proper choice); therefore you are safe as regards guaranteeing an estate to your dependents.

But do you realize that at your death you have put your dependents in the same position as you wished to avoid, namely, the possibility of depreciation of capital, and as a matter of actual fact your dependents are faced with greater problems than you ever experienced, for they have never had to handle financial affairs—they are as helpless as a ship is at sea without a helm. It is true that there may be exceptions, and it is equally true that your executors are perfectly competent—but do they know all about your possessions, all the many and various strings of the markets in which you are interested? It is obvious they cannot know. Furthermore, you must remember that they have also grown old since you appointed them your executors, and they have probably retired from business at the time of your demise. Of course, you may have appointed a trust company to look after your estate, which is an excellent method—but you have to pay for such service.

For an Income of Twelve Hundred.

A concrete example of how any man can relieve his dependents of all financial worry, and at no extra charge whatsoever follows. That is to say, no fee of any kind is due or payable, and the insurance company acts as your trustee for nothing, and without any legal formalities, or expenses, or delays.

Brown wishes to leave his wife an income of $1,200 per annum, payable monthly, said income to commence at his death, for a period of twenty years. He will find that the commuted value of such an income is a little over $18,000; he, therefore, applies for this amount of insurance on the whole-of-life-with-profits plan, which, assuming his age to be 35, will mean an annual deposit of about 2¾ per cent. on this amount, viz., $18,000; or, say, $466 per annum. By this means Brown knows that as soon as he has paid his first premium, a cheque for $100 will be paid monthly to his wife, from the time of his demise, and will continue monthly for the same amount for a period of twenty years—wherever his widow may be residing—at no expense to her, and without her ever having to worry.

Now, then, let us assume that Brown lives the average expectation of life—about 31 years—he will then have deposited with that life office—31 x 446—viz., $13,826; but I am assuming he has made proper choice, and that he has been credited with bonuses at the rate of 1½ per cent. per annum. Such being the case, and Brown having died after having made thirty-one payments, his widow would receive, not only the monthly income, which I have already explained, but a bonus of not less than $8,370—which sum she could either take in cash, or increase her annual income by notifying the life office to that effect.

Apply Profits to Pay Premiums.

Brown has yet another alternative, and that is, assuming he lived thirty years, and had so increased his possessions that it was not necessary to increase—at that period of his life—his insurance protection, he could then apply his profits towards extinguishing his premiums, and if he has bought in a company that is paying a 1½ per cent. bonus per annum, he will find that the said accumulated bonuses will entirely extinguish all future premiums, and that in the future—so long as he lived—the company would be paying him, instead of him paying the company.

An annuity may thus be purchased for one's dependents without having to pay spot cash for it, and this can be accomplished without any extra cost to the estate. This form of protection, combined with its relief from anxiety, is commended to the readers of *The Monetary Times*.

Winnipeg electors defeated these by-laws:—$275,000 for hospital; $110,000 for public parks; and $85,000 for garbage destroyer.

ROYAL BANK HAS STRONG POSITION

The business of the Royal Bank of Canada reached a new high record in the year ended on November 29th last, as shown in the 44th annual statement, just issued. During the period mentioned the profits crossed the two-million-dollar mark, reaching a total of $2,142,100.22, after deducting all charges of management and other expenses, accrued interest on deposits, full provision for bad and doubtful debts and rebate of interest on unmatured bills.

The profits for the year, together with the $610,219.36 brought forward in profit and loss account at the beginning of the year just ended, made a total of $2,752,319.58, from which to meet the dividends and appropriations. These were as follows:—

Four dividends at the rate of 12 per cent. per annum	$1,387,200
Transferred to officers' pension fund	100,000
Written off bank premises account	250,000

This total of $1,737,200 being deducted from the sum at the disposal of the bank, left a balance of $1,015,119.58 in the profit and loss account at the end of the year. The net result of the year, therefore, is that the profit and loss account has been increased by $404,900.22, after all deductions for expenses, dividends and appropriations have been made.

As the paid-up capital of the bank amounts to $11,560,000, it will be seen that the profits for the year are slightly in excess of 18½ per cent. on the capital.

Equally pleasing are the figures contained in the statement of assets and liabilities. As against total liabilities to the public, amounting to $154,761,440.04, are cash reserves of $21,466,209.72, being 13.83 per cent., while the liquid assets amount to $72,385,791.71 and bear the ratio of 46.66 per cent. to the liabilities.

A new item in the cash assets this year is the amount of $2,000,000 deposited in the central gold reserve. This deposit gives to the bank additional powers in the matter of note circulation, the total of which at the end of November, amounted to $13,176,634, or $1,616,000 in excess of the paid-up capital. The amount which the Royal carries in the new central gold reserve is the largest of any Canadian bank.

Deposits bearing interest are well above the hundred-million-dollar mark, being $101,900,790.87. When this is added to the sum of $36,726,871.60 on deposit but not bearing interest, total deposits of $138,177,662.47 are reached.

An interesting comparison in the liabilities to shareholders is seen in the fact that as against a paid-up capital of $11,560,000, the reserve fund of the Royal Bank is $12,560,000, or just $1,000,000 in excess, or, if the profit and loss fund be added to the reserve, the total becomes $13,575,119.

Call loans reach a total of about $19,819,600, of which $10,817,496 was elsewhere than in Canada, the balance of $9,002,193 being on call in Canada. The current loans, however, amounted to no less than $98,606,925, and in addition to this was the sum of $3,686,624 loaned to cities, municipalities and school districts and $247,435 to provincial governments, making total loans of $102,716,658.68. Altogether, the assets of the bank now reach the large total of $180,246,785.73. These assets have been mounting up from year to year in a manner which must give satisfaction both to the management and the shareholders and places the bank in a favorable position to meet the growing commercial requirements of the country.

CANADA'S BANKING INSTITUTIONS

Profits Show That Busy Year Was Experienced—Four Recent Annual Statements

The returns of the four banks given below, together with those of the Royal Bank and Bank of Ottawa, elsewhere in this issue, with the returns of the Bank of Montreal and the Quebec Bank previously published show that Canada's financial institutions have come through an arduous year with excellent results.

The Bank of Toronto's annual statement is one of progress, it shows net profits totalling $850,694, adding to this balance of $166,578 brought forward and $200,000 recovered from debts previously written off there was available $1,227,272, and this was distributed as follows:—Dividends at the rate of 12 per cent., $600,000; transferred to officers' pension fund, $20,000; written off bank premises, $300,000; and $307,272 was carried forward to next year.

Deposits amount to $43,306,595 and notes in circulation are $5,439,107.

The annual meeting of shareholders will be held on January 14th.

Northern Crown Bank's Year.

At the annual meeting of the shareholders of the Northern Crown Bank, the financial statement presented for the year ending November 29 showed good progress had been made during the year. Net profits, after providing for all expenses and for bad and doubtful debts, amounted to $281,167.47. The balance carried forward to the credit of the profit and loss account was $92,276.20.

Assets, $21,302,105; rest account, $350,000; deposits, $14,732,865; capital stock, $2,811,804. During the year two semi-annual dividends at the rate of 6 per cent. per annum were paid.

Earned Fifteen per Cent.

The report presented to the stockholders of the Union Bank of Canada for the 12 months ending November 30 last showed the institution earned a little more than 15 per cent. on its paid-up capital of $5,000,000. The net profits were $750,095, an increase of $43,263 over 1912, while the assets at the end of November were $80,766,532, as compared with $69,408,227 for 1912; rest account, $3,400,000; deposits, $64,595,288.

The shareholders, in addition to their regular dividend of 8 per cent., received a bonus of 1 per cent.

New Capital from Shareholders.

The annual statement of the Bank of Hochelaga, shows total profits, after all deductions for expenses of management, bad debts, adjustments, etc., of $534,700. This compares with $481,616 a year ago, being an increase of $53,083 or 11 per cent. as compared with those for the year ending November 30th, 1912.

The subscribed capital of the bank is now $4,000,000, so that the earnings, if based on this capital—which, however, was not paid up during the entire year—would amount to 13.37 per cent. upon it.

During the year the $1,000,000 capital stock, issued at $150, has been subscribed and paid up in full. Deposits on November 30th were $20,105,622 as compared with $20,417,146 in 1912. This is a decrease of $311,524, but it is pointed out that the $1,500,000 new capital obtained from shareholders during the year must be taken into consideration as the shareholders were nearly all depositors and the greater part of the money put into capital account was therefore withdrawn from deposits.

Other results may be tabulated as follows:—

Cash assets, November 30th	$2,559,204	Inc.	$921,930
Note circulation, November 30th	3,213,616	"	527,551

The reserve fund was increased $625,000. This brings the total reserve fund to $3,625,000.

◆

The railway commission has issued an order reducing express charges for the handling of freight bills of lading and collection of moneys thereunder.

In the prospectus issued in connection with Toronto's loan of £1,200,000 4½ per cent. general consolidated loan debentures at 97½, some interesting information is given. The loan is due on July 1st, 1948. The debentures are for £100 each to bearer. The following details were furnished by the city authorities: Estimated assessment subject to taxation for 1914, $510,000,000. Value of municipal assets, $40,293,846. The sinking funds represent approximately $13,000,000. Gross bonded debt of the city (including present issue), $61,437,975. Estimated gross revenue for 1913, $11,744,800.

WHAT STEAMSHIP LINES EARNED

Navigation Merger Has Been Complete—What Balance Sheet Shows

The capital of the Canada Steamship Lines amounts to $25,000,000, divided equally into 7 per cent. preferred and common stock, with an authorized issue of $9,000,000 5 per cent. consolidated first mortgage debenture stock which is convertible into bonds at the option of the holder. Of this debenture stock $6,106,300 will be issued.

The Canada Steamship Lines, now that the sale of the Richelieu and Ontario Navigation Company's assets has been completed, has a fleet of over 100 steamers operating on the Great Lakes and St. Lawrence River, and from Quebec to the West Indies, and from New York to Bermuda and the West Indies, and also owns the valuable docks and wharves which had formerly been the property of the different companies.

Debentures Remain in Company's Hands.

The balance sheet of the company which follows is certified by Messrs. Marwick, Mitchell, Peat and Company, the well-known accountants, have made a thorough audit of the accounts to the different companies for the last three years:—

Assets.

Present physical value of properties as going concerns as valued by the Canadian Appraisal Company of Montreal:—	
Vessels (excluding SS. Noronic)	$16,866,834
Real estate, buildings and dock properties	5,450,267
	*$22,317,101

*For the purpose of the valuation of the assets as security for the debenture stock, this figure is reduced by the Canadian Appraisal Company to $19,250,405.99

Sundry merchandise	150,000
Amount paid on account of cost of SS. Noronic in course of construction	280,078
(Balance of cost provided for by debenture stock reserved below.)	
Investments, stores, supplies, notes and accounts receivable and other currents assets, after allowing for bad and doubtful debts	1,167,856
Cash in banks and on hand	500,000
Balance, representing leases, contracts and goodwill covered by the ordinary shares	8,589,646
	$33,004,683

Liabilities.

Accounts payable	$ 555,538
Capital:—	
7 per cent. preference shares	12,500,000
Ordinary shares (issued)	12,000,000
5 per cent. debenture stock to be issued	6,106,308
Underlying bonds and loans of the Inland Lines Limited, Northern Navigation Company, Limited, Niagara Navigation Company, Limited and Canada Interlake Line, Limited, against which debenture stock will be reserved at 90 per cent.—$2,047,598	1,842,837
Balance of contract price of SS. Noronic	269,921
Against this and other payments $311,111 debenture stock is to be reserved.	
	$33,004,683

Note:—$534,983 of the $9,000,000 debenture stock will remain in the hands of the company for future issues and in the meantime will be available for financing purposes.

Assets Three Times Debenture Stock.

"The combined net earnings for this year for the different companies now owned by Canada Steamship Lines amounted, up to November 1st, to over $1,450,000, and the company's officials report that the total net earnings for the current year notwithstanding the hard times and other adverse circumstances, will amount to between $1,650,000 and $1,700,000," states Mr. J. Carruthers, the president.

"The company will publish an exact statement of the earnings as soon as all the returns are in after the closing of the navigation.

"The balance sheet shows that the company has physical assets valued by the Canadian Appraisal Company, Limited, at over three times the amount of the debenture stock, and net earnings, even for the current year, without the advantage of any of the benefits of the consolidation, of over three times the amount of the bonds, and sufficient to meet the fixed charges, the 7 per cent. dividend on the preference shares, and a small dividend on the ordinary shares, which latter, however, it is not the intention of the company to pay for the present.

"With the savings that can be effected by the consolidation, the net earnings should amount to approximately $2,000,000 per annum on the basis of the business that the different companies have done this year.

"Captain J. W. Norcross, who has been so successful in connection with the Merchants Mutual Line and the Canada Interlake Line, has accepted the position of managing director."

◆

MOTIVES OF INCENDIARISM

The State Fire Marshal of Indiana has issued a brief compilation of 123 cases of incendiarism examined by his office since May 10th, 1913. The motives of causes are given as follows:—

To defraud insurance companies	68
Malice	42
Pyromaniac	3
Careless or mischievous boys	9
Fire sale	1

These do not apply to all the losses in the state, but only to those taken up and investigated by the authorities. Of all the countries considered in these investigations Marion and Vigo have reported the largest number of incendiary fires. In proportion to population Orange County heads the list.

Ontario will probably have a fire marshal next year. Manitoba already has one.

◆

REGARDING THE COST OF LIVING

The Department of Labor index number of wholesale prices stood at 138.4 for November as compared with 136.8 in October, and 136.6 in November, 1912. The increase was due to advances in prices of grains and fodders, cattle, beef, sheep, dairy products, (especially eggs), and fresh vegetables. These increases, however, were somewhat offset by declines in flour, glucose, honey, raw cotton and silk, coke, iron pipe, linseed oil, resin, and raw rubber. The level was higher than a year ago in animals and meats, dairy products, textiles, hides, leathers, boots and shoes, lumber, miscellaneous building materials, furniture and crockery. A lower level than last year appeared in grains and fodders, fish and paints and oils. Fruits and vegetables were slightly higher, but miscellaneous groceries were somewhat lower than last year. The feature of the month in retail prices was the advance in eggs, but the movement was also upward in butter, potatoes, coal, milk and prunes. Beef, veal and mutton advanced in some localities, but fresh pork and lard declined in a number of Canadian cities.

◆

SPONTANEOUS COMBUSTION NOT ACCIDENTAL.

Carelessness, incapacity and crime are responsible for the majority of fires, said Mr. H. Lye, the well-known fire adjuster, in an address before the Vancouver board of trade. Once in a while one was purely accidental. He did not class spontaneous combustion on the accidental list. Spontaneous combustion, he said, was generally due to the carelessly leaving together of materials that in the natural course of events, if left long enough, would produce a blaze. Flimsily wooden buildings in business districts were always a menace, and he said he knew of wooden buildings of some pretensions that were so flimsily constructed that it was a wonder that they held together. Carelessly handled pipes and cigars and the matches used in connection with them were dangerous, but the cigarette, he added was a greater menace.

Two Vancouver fires in October, he declared, were caused by cigarettes. A cigar butt may go out when thrown down, but a cigarette being made of different material, only smoulders. He thought that there should be a regularly constituted fire inspection board. He did not approve of the suggestion of an alderman that firemen should be fire inspectors in their spare time.

"You can not," he said, "fix the times when fires will occur by by-law, so you can not fix the spare time of a fireman. Every firehall must have an adequate staff always on duty."

He thought that Vancouver should have its by-laws dealing with fire protection consolidated and brought up to date. Those in existence at present, he said, "had been passed spasmodically and were systematically ignored."

RAILROAD DEFICITS, RUINED CREDIT AND LAPPING CHARTERS

All These, and also Hints of Bond Defaults, had an Airing at Closing Sessions of Western Freight Rate Inquiry

After sessions extending over two years, the inquiry by the Dominion Railway Commission into Western freight rates, was concluded last week. Counsel for the railways asked that no action be taken by the Commission until it has been ascertained what the effect of the completion of two new transcontinental roads will be.

Hon. E. H. Phippen, counsel for the Canadian Northern Railway, presented a statement showing that the three transcontinental railways, the Canadian Pacific, Canadian Northern and Grand Trunk Pacific, would next year face a total deficit of over $26,000,000 after all capital charges had been met and interest on investments paid.

Mr. Eugene Lafleur, K.C., for the Grand Trunk Pacific, contended that to reduce the Grand Trunk Pacific rates at the very outset of that road's operation would defeat the whole object the Government had in view when it planned the road. Moreover, it would ruin Grand Trunk Pacific credit.

Mr. James Walsh, representing the Canadian Manufacturers' Association, asked for a readjustment of rates as far as practicable consistent with a reasonable return to bona fide capital investment.

Mr. Pitblado, for the Winnipeg board of trade, and Mr. M. K. Cowan, for Saskatchewan and Alberta, severely criticized the statement put in by the Canadian Northern Railway.

"I state on the authority of Mr, Hanna," said Hon. Mr. Phippen, for the Canadian Northern Railway, "that not one dollar has been made out of the transfer of securities which has not gone into the road. Not one share of the company has been issued except for full value. We are willing that any competent accountant should see our books." There had been criticism of Sir William Mackenzie, he said, but the fact remained of his marvellous ability in getting high prices for Canadian Northern Railway securities. The president had given all his time and services to the road without charge. Mr. Phippen urged it was in the interest of Governments which had endorsed Canadian Northern Railway bonds and of the people not to reduce rates. It would be impossible, said Mr. Phippen, in view of increases in wages to employees, a thing which could not be controlled, increasing cost of fuel, etc., to reduce rates.

Railway Capital Invested.

The Canadian Northern statement showed the capital invested and to be invested to complete transcontinental lines as follows:—

Canadian Pacific Railway, $635,229,094; Grand Trunk Pacific, $175,000,000; National Transcontinental, $200,000,000; Canadian Northern Pacific Railway, 600 miles at $80,000 per mile, $48,000.000; Canadian Northern Ontario Railway, north of Lake Superior, 900 miles at $50,000 per mile, $45,000,000; additional equipment for Grand Trunk Pacific and National Transcontinental Railway, $40,000,000; additional equipment for Canadian Northern Railway, $35,000,000. These figures give a total cost of $1,178,229,094. The statement of earnings showed: Net earnings of Canadian Pacific Railway, $42,403,340; net earnings of Grand Trunk Pacific, $2,691,402; total earnings, $45,094,742, less Canadian Pacific Railway taxes of $1,382,420, giving a balance of $43,712,322. To this is added the surplus net earnings of the Canadian Northern Railway, $400,651, leaving the total net earnings available to pay interest on capital investments as $44,112,973. That the Canadian Northern Railway's surplus net earnings are only $400.651 was shown by the following statement: Canadian Northern Railway's gross earnings, 1912, $20,860,093. less operating expenses of $14.979,047, leaving a balance of $5,881,046. This, less fixed charges of $5,480,395, leaving a total available surplus from all sources of $400,651.

"Mr. J. P. Muller" (the government expert), says Mr. Phippen's statement, "allowed six per cent. on outstanding obligations as necessary to maintain the credit of the railway. Six per cent. on $1.178.229.094 amounts to $70,693.745, for which there is available only total net earnings as shown of $44,112,973, leaving a deficit of $26,580,772.

On Outstanding Obligations.

"Assuming interest on $200,000,000 capital invested in the National Transcontinental to be a direct charge and to be assumed by the Government, this would leave a deficit of $14,580,772. An average earning of 4 per cent. on the amount of capital invested as above amounts to $47.139,160. or $3,026,187 more than total earnings by the roads. If Mr. Muller's standard of six per cent. is to be adopted, there should be added to the above deficit of $26,580,772 an additional $2,500,000, representing two per cent. of the outstanding obligations of the Canadian Northern Railway. In this estimate the outstanding stock of the Canadian Northern Railway Company has been omitted, the fixed charges on outstanding obligations only being taken into consideration.

Even allowing for the growth of the country, continued the Canadian Northern Railway counsel, not more than 300,000 people would come into Canada in a year. Adding ten per cent. for this number to Canadian traffic would simply mean reducing the deficit from twenty-six to twenty-two millions odd. With the wheat out of the country and a general drop in other traffic owing to business depression, what would the earnings of Canadian roads be in the next five months? asked Mr. Phippen. Even if bonds were guaranteed by governments, they would not sell unless the road offering them could show a remunerative business.

Hinted at Bond Defaults.

Mr. Phippen again appealed to the Board not to take any action which would jeopardize the credit of the Dominion. It would be difficult to imagine, he said, what might happen if at some time one of the provinces of the Dominion should be called upon to provide for the payment of a guarantee of bonds. The Grand Trunk Pacific, he said, had fixed charges of $87,000 per mile and could not be expected to earn a fair rate of interest on that sum for some time to come. Should the Board take such action as would seriously affect existing conditions, Mr. Phippen feared that it would have a bad effect upon the people in the Old Country, who lend their money to railways. Investors would be frightened and shocked. At present, the railways cannot sell their securities to advantage on the British market, even when they are guaranteed by Government.

Might Put Road Out of Business.

Mr. Eugene Lafleur, K.C., Montreal, following on behalf of the Grand Trunk Pacific, said that at the very outset a reduction in rates at the present time might put the Grand Trunk Pacific out of business; an order reducing rates might become a matter of life and death to the company. In connection with the consideration of the case of the Grand Trunk Pacific there were several things of which notice should be taken. Owing to obvious reasons the company could not submit any statistics relating to traffic. It was to be borne in mind, however, that the position of the Grand Trunk Pacific differed from the ordinary railway company. It was to a large degree a creature of the Dominion Government. The route followed had been imposed by the Government, by whom it had also been provided that traffic must be routed through Canadian channels.

The record of the Grand Trunk Pacific up to the present time had been one of expenditure rather than of receipts. On the most profitable section of the line, that between Winnipeg and Edmonton, the fixed charges of the road for 1911 were $6,100,000.

Was Big Deficit.

The earnings were $4.600,000, leaving a deficit of nearly one and a half million dollars. Mr. Lafleur said that in order to pay interest on capital charges the Grand Trunk Pacific must earn $20,000 per day. This it was not doing. The company should not be interfered with at this critical stage of its career. The Canadian Pacific Railway had been protected for a period of twenty years, and it would be suicidal and destructive of the whole object which the Dominion Government had in view when it planned the Grand Trunk Pacific to reduce the rates at the present time.

"I ask you," he said, "to stay your hands at this critical juncture. When the situation has been adjusted, when you know how much through traffic there is to divide between the three transcontinental lines, when you know how much the branch lines can earn, then it will be time to act. Any reduction of rates at the present time would paralyze our credit completely.

Rate Reduction and Capital.

The argument of Mr. James Walsh, representing the Canadian Manufacturers' Association, said in part:—

"The railways must receive a reasonable return on the capital which they have actually invested. To compel them to carry the traffic at unremunerative rates would not only be unjust, but would immediately place an effectual check upon the extension of rail transportation, which the people at large are so anxious to encourage.

"In a word, therefore, we would be glad if your Board, having due regard to all the circumstances, and considering carefully the interests of all concerned, would readjust rates in a way that would conserve and promote the welfare of the Western producer, and carry that readjustment just as far as it would seem practicable to carry it, consistent with the axiom that bona fide capital investment must always be afforded a reasonable return."

Mr. Pitblado, for the Winnipeg board of trade, criticized the final argument of Hon. Mr. Phippen for the Canadian Northern. Mr. Phippen had practically taken the stand that the public must provide the capital and buy the bonds of the road. What about the owners themselves? asked Mr. Pitblado. Why should they not do some of the financing, and suffer some of the reduction themselves? He also opposed Mr. Phippen's statement that the railways should be allowed to obtain a surplus by the sale of their securities to provide a margin of safety. This was a wrong principle on which to base rates, said Mr. Pitblado. The older portions of a country could not be asked to pay for new lines.

Mr. M. K. Cowan, K.C., for Saskatchewan and Alberta, said Mr. Phippen had raised the hospital cross in one hand and the crossbones and black flag in the other in regard to provincial government guarantees of Canadian Northern Railway bonds, but Mr. Cowan assured the Board Saskatchewan and Alberta had no fears in this regard. Dominion Government assistance had been given the Canadian Northern for transcontinental lines, said Mr. Cowan, yet it had gone on building the Canadian Northern Ontario. Canadian Northern Quebec, Central Ontario and other eastern roads in face of statement of its own counsel that there was not enough traffic in Ontario and Quebec to support two railways.

Charters Are Lapping.

"This is mostly due to the system by which Parliament grants charters," remarked Commissioner McLean.

"Charters!" said Mr. Cowan. "We grant them till they lap over the edges."

SUGGESTION OF CHRISTMAS.

An unusually attractive and seasonable photograph has been designed for Messrs. McCutcheon Brothers, Limited, the well-known real estate and investment agents of Calgary, with branch offices at Toronto and elsewhere. It shows Santa Claus, unusually stout, and therefore with an extensive "wheat belt" around his waist, filling Canada's stocking with 207,575,000 bushels of wheat. His Canadian knapsack is so replete with good things that his fur, dairy products, fruit and wool gifts, with a value of $38,000,000, have fallen out of the bulging pack. Another present are the fisheries products with a value of $34,000,000 and forest products with a value of $160,000,000, while minerals and still more gifts are in the bottom of the sack. The various provinces are peeping around the corner to watch what Santa Claus is doing for Canada. Other presents are three locomotives representing the transcontinental railways the Dominion will have in 1914.

KINGSTON'S FIRE WASTE.

Kingston, Ont., fire loss for the year to date as submitted to the council by Fire Chief Armstrong shows that there were 127 alarms answered during the year, four of which were beyond the city limits. This being 18 more to date than last year, which was a record. The loss occasioned by these fires, as far as can be ascertained, with the insurance carried, is as follows:—

Loss on buildings, $15,914; insurance on buildings, $498,766.

Loss on contents, $31,877; insurance on contents, $326,816.

Total loss, $47,792; total insurance, $825,582.

Of the above loss, $43,269 occurred in nine fires where the loss was greater than $1,200 and five of these fires, entailing a loss of $34,824, occurred when the department was shorthanded on account of meal hours, while the other four occurred during the night and the loss was confined to $8,445. There were 11 fires, where the loss was so small that no claim was made for insurance. In addition there were 11 calls to the city dumping ground requiring in all 7,150 feet of hose and the use of water for over 35 hours.

During the year water was used from hydrants for fires other than grass or dump fires, for 40 hours and 40 minutes; 62 fires were confined to the place where they started; 19 extended to other parts of the buildings, 1 extended to adjoining building; 25 fires were extinguished with chemicals using 600 gallons; 28 fires were extinguished with water through hose lines; 5 were extinguished with water and chemicals; 4 were extinguished with garden hose or water pails; and 11 required no attention from the department.

PUBLIC WAITS FOR DISCOUNT

That is Why Large Shares of New Issues, in Falling Markets, Go to Underwriters

The consol market, writes a correspondent to the London Economist, enjoyed mild amusement last month over the alleged "strike" of underwriters, who had determined, so it was seriously declared, to boycott new issues until old ones had been absorbed. To secure co-operation amongst the various rings of underwriters would indeed be a feat. There is the Stock Exchange with its wide circle of clients, of whom some are always willing to do underwriting on a scale of more or less magnitude; there are brokers and jobbers always on the look-out for cheap stock; there are market dealers, not only willing, but anxious, for stocks likely to stimulate business, even though for the time being the new issues depreciate senior securities.

Amongst the brokers' clients will be found banks, insurance companies, trusts and financial houses, besides the smaller individual customers, and a little army of provincial Stock Exchange members who have ready channels for the absorption of good stock at relatively low figures. Foreign banking houses, too, possess keen appetites for such things, and the catalogue of possible underwriters might be extended, were it necessary to show further the large audience that stands expectant to hear of new issues.

Certain of Underwriters.

The essential point is that the stocks shall be offered at cheap prices. Given this, and failing accidents in the world of international politics, a good colonial or similar security can be certain of obtaining underwriters. Probably they will be thankful to get the offer of it, for the possibilities of profit are not at all bad. A reasonably good market after the allotment is pretty well assured, because the stock, offered cheaply to begin with, is bound to attract investors if the price drops to a discount. For the sake of concrete example, it may be supposed that (as in the case of the Toronto issue) underwriters get left with 50 per cent. of a loan upon which the commission is 1 per cent., with an extra ¼ per cent. upon amounts allotted. If the issue price is 96, this means the underwriter gets £50 stock for £46 17s. 6d., or 93¾ per cent., equal, of course, to 2¼ discount. The market, after allotment, would be about 1¼ to ¾ discount, buyers getting the stock at 95¼, which shows the underwriter the useful profit of 1½ per cent. On £10,000 stock this would be £150, obtainable with comparatively little risk. Taking the price as 1 discount, the gain comes to £100.

It is absurd to suppose that underwriters will strike, or enter into a boycotting league, when these results can be achieved. The investor, as usual, determines the matter. If he were to refuse to buy stock at a discount after allotment, the underwriting business would quickly wane in popularity. Occasionally he does decline to be tempted, and when this happens in the case of several consecutive new issues there arise mutterings in the underwriting world, with vague threats of boycott, and so on.

Question of Price.

These, however, merely serve as hints to the next borrower that he must be prepared to offer more liberal terms; in other words, to bring out his forthcoming loan at such a price as will make subscription—either before allotment or after it—a matter of certainty. Apart from the Brazil loan, and one or two other unlucky incidents, London underwriters have not been doing badly. But the public has learnt as a rule to wait until (in falling markets) new issues go to a discount.

WORKMEN'S COMPENSATION IN THE UNITED STATES

A digest of workmen's compensation and insurance laws in the United States has been issued by the Workmen's Compensation Publicity Bureau, 18 Maiden Lane, New York city. This digest deals with the twenty-four compensation laws of the States that have passed legislation of this nature. It is cleverly arranged and unique in character. The pamphlet has been printed in a form which makes it handy for carrying in a coat pocket. Canada being somewhat in the experimental stage, so far as workmen's compensation is concerned, and Ontario now considering a compensation bill, the digest will prove interesting and valuable for reference by all those interested. The pamphlet is copyrighted by Mr. F. Robertson Jones, secretary-treasurer of the Bureau, which is distributing the folder.

WILL DOMINION BUY RAILROAD?

Question Stands Prominent in Trustees' Report on Charing Cross Bank Liquidation

A second dividend of eight pence in the pound was paid to depositors in the Charing Cross Bank, London, last week, which is now in liquidation. This bank was interested in the Atlantic, Quebec and Western Railway, the road being the bank's most important asset.

In connection with the second dividend, the joint trustees, Messrs. W. B. Peat and Wm. Plender, have issued to the creditors a further report on the progress made in realizing the assets. Although several of the assets so far realized have fallen seriously short of the debtor's estimates, one or two of them have come out better than was anticipated. Certain miscellaneous stocks and shares have yielded a few hundreds of pounds more, and various properties in Canada over £8,000 more than in the bankrupt's statement. The net realization to date is £333,376, as against liabilities ranking for dividend amounting to £2,803,779.

Heavy Fees for Trustees.

From the net realization heavy expenses have had to be deducted, the largest item being £12,578 for trustees' remuneration, which seems, from this distance, a very large sum. In addition to expenses of liquidation, amounting to over £25,000, there has been an outlay of nearly £48,000 on the properties. The dividend of 8d. in the pound, paid last week amounts to £93,459, making, with the previous dividend of 1s. in the pound, £235,575 which will have been distributed, and leaving a balance of £26,768 to be carried forward.

The most important of the bank's assets, as stated above, is the bankrupt's interest in the Atlantic, Quebec and Western Railway, consisting of £343,000 nominal of first mortgage debenture bonds and practically the whole of the second bond issue and ordinary share capital. This line, in the province of Quebec, was unfinished at the commencement of the bankruptcy, 20 miles having to be laid out of a total length of 102. After an inspection of the railway by the trustees in 1911 and interviewing the Canadian government on the subject of subsidies the line was completed and equipped by the trustees with the consent of the committee of inspection. The cost of this work was £44,665, but towards this £39,215 has been received in interest on the bonds. The line was opened for traffic in August, 1912, and for the year ending June 30th, 1913, shows a loss of approximately $50,000. The traffic returns have since shown improvement; and, owing to developments in the local pulp and timber industries, it is expected that there will be an increase in the receipts for the current year.

As to the Land Grant.

The trustees have claimed from the Quebec provincial government the land grant of 400,000 acres to which the company was entitled on the completion of the railway, and an order in council has been made for this grant. The trustees, in concurrence with the trustees for the debentureholders of the railway company, have given an option to a responsible group in Canada for the selection and purchase of these lands. The question of the purchase of the Atlantic, Quebec and Western Railway by the government has also been taken up, and there is a hope that legislation enabling the acquisition of this and other lines to be made will shortly pass the legislature at Ottawa. Interest on the bonds of the railway held by the trustees of the Charing Cross Bank liquidation is provided for until 1915 out of cash subsidies in the hands of the trustees of the bondholders of the railway company. On the fortunes of this line and the prospects of a favorable sale of the lands granted, the creditors of the bank have now to depend for any future dividend or dividends, and the trustees point out that the realization of these assets must be a work of time.

Mr. David Burke died recently at his residence, Montreal. The late Mr. Burke was one of the highly respected members of the old generation of Canadian life insurance men. Born in Prince Edward Island in 1850, he entered life insurance in Montreal in 1869, being associated with his brother, the late Mr. Walter Burke, then general manager for Canada of the New York Life. In 1883, Mr. Burke was appointed to this position, which he continued to hold until 1807, when he retired in order to organize the Royal-Victoria Life of Montreal, with which he was associated until its absorption by the Sun Life in 1911. Mr. Burke for many years was a member of the Institute of Actuaries, and a fellow of the Royal Statistical Society of Great Britain. Mr. Burke held the presidency of the Canadian Life Officers' Association for two years.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends

Kirkland Lake Syndicate.—The Kirkland Lake Syndicate, owners of the Tough-Oakes and a number of other properties in Teck and Labelle have successfully floated a company and offered £275,000 to the public in London. The shares were over-subscribed.

International Nickel Company.—For the first time in the current fiscal year, International Nickel Company has felt this month the business depression which has affected practically all branches of industry. As yet the company has not been so seriously affected as to consider the question of reducing forces.

Consumers Gas Company.—At a meeting of the directors of the Consumers Gas Company, it was decided to accept tenders for the unissued capital stock of the company to the extent of 3,140 shares, at a premium averaging 62 per cent., and realizing a total of $254,262.50. At this rate the net return to the investor, on the basis of a 10 per cent. dividend, will be 6.17 per cent. per annum.

Alberta Pacific Grain Company.—An offer of a limited amount of Alberta Pacific Grain Company, Limited, 7 per cent. cumulative preference stock is being made by the Royal Securities Corporation, Limited, for which application for listing on the Montreal Stock Exchange will be made in due course. The issue is offered at par and accrued dividend with a bonus of 20 per cent. in common shares.

Bank of Commerce.—The Canadian Bank of Commerce directors at their regular meeting are understood to have given out, but the staff received an intimation that a 10 per passed upon the profit and loss statement for the year ending November 30. Nothing as to results of the bank's year was cent. bonus would be paid to all members of the service, numbering some three thousand, and this was taken to mean that the profits justified these measures. Last year the Bank of Commerce bonus was 7½ per cent.

The Porto Rico Railways Company, Limited.—The comparative statement of earnings of this company for November, 1913, are:—

	1912.	1913.	Increase.	%
For November:				
Gross	$ 70,477.87	$ 71,044.04	$ 566.17	0.80
Net	29,658.37	34,499.09	4,840.72	16.32
For 11 months:				
Gross	$755,637.10	$778,756.50	$23,119.40	3.06
Net	273,671.64	344,475.97	70,804.33	25.87

Consolidated Mining and Smelting Company.—The report of this company covers a period of 15 months in accordance with the change in the fiscal year

Profits for the 15 months, after allowances for development and depreciation, were $998,367, or roughly 18 per cent. upon the capital issued. In the previous year, ending June 30, 1912, profits were $310,345.

During the last fiscal year the company increased its mineral holdings in British Columbia by the addition of general other properties and the property account is the higher by $232,113.

The Porto Rico Railways Company, Limited.—The comparative statement of earnings of the Porto Rico Railways Company, Limited, for October, 1913, is as follows:—

	1912.	1913.	Increase.	Per cent.
October:				
Gross	$ 69,613.26	$ 70,589.24	$ 975.98	1.40
Net	27,394.38	32,466.87	5,072.49	18.52
For ten months:				
Gross	$685,159.23	$707,712.46	$22,553.23	3.29
Net	244,013.27	309,976.88	65,963.61	27.03

Jupiter Mines.—At an adjourned meeting of directors of the Jupiter Mines, it was announced that the $50,000 bond issue recently decided upon had been over-subscribed by shareholders. It was decided to let the list remain open till January 20, so that shareholders in England may have a chance to subscribe. The funds raised by the bond issue will be used to pay off outstanding obligations.

The bonds bear 6 per cent. interest and are dated December 1, 1913, maturing August 1, 1914. The issue constitutes a first charge on all the company's property. Stockholders subscribed for the issue at 80.

NEW INCORPORATIONS

Three Large Companies—Manufacturing and Sporting Interests Are Prominent

New incorporations number 60; the head offices of these companies are located in five provinces. The total capitalization amounts to $9,858,000, the largest companies being as follows:—

Canadian European Investment Corporation, Limited, Vancouver	$2,000,000
Goldfield Mining Company, Limited, Winnipeg	1,500,000
La Compagnie Mutuelle Universelle, Limited	1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	16	$ 798,000
Quebec	16	2,975,000
Nova Scotia	1	50,000
Manitoba	10	2,335,000
British Columbia	17	3,700,000
Total	60	$9,858,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

New Westminster, B.C.—Marsh-Hutton-Powers Company, Limited, $250,000.

Fort George, B.C.—Fort George Citizens' Water Company, Limited, $25,000.

Galt, Ont.—Galt Knife Company, Limited, $50,000. T. Vair, W. Vair, E. A. Vair.

Saint Vital, Man.—Saint Vital Rink, Limited, $20,000. J. Donnelly, H. J. Hulton, J. C. Hack.

Rodney, Ont.—Windsor Properties, Limited, $32,000. W. N. Lusty, E. J. Schmid, A. C. Schleihauf.

Clinton, Ont.—Solo Player Piano Company, Limited, $40,000. P. V. Rohl, F. J. Hill, H. E. Boyer.

Stratford, Ont.—The Stratford Country Club, Limited, $40,000. J. Steele, J. A. Barron, W. Maynard.

Russell, Ont.—The Russell Arena Company, Limited, $10,000. W. McKay, J. D. McPhail, A. Walker.

Hamilton, Ont.—Canadian Sales Agency, Limited, $40,000. W. A. Welch, A. E. Moore, S. E. Barlow.

Transcona, Man.—The Transcona Rink Company, Limited, $20,000. W. Bell, T. K. Moore, R. O. Esselmont.

Brandon, Man.—Lake Clement Park Company, Limited, $20,000. J. A. Mude, W. G. Anstis, G. B. Tomlinson.

Woodstock, Ont.—Shaw-Wood Knitting Mills, Limited, $50,000. C. G. Greenshields, E. R. Parkins, W. Taylor.

Three Rivers, Que.—Cambridge Knitting Mills, Limited, $50,000. C. G. Greenshields, E. R. Parkins, W. Taylor.

Sudbury, Ont.—The Sudbury Furniture Company, Limited, $40,000. G. Levesque, L. P. Levesque, N. L. Adam.

Sherbrooke, Que.—The Sherbrooke Black Fox Company, Limited, $150,000. W. Farwell, D. J. Steele, J. E. Smith.

Yarmouth, N.S.—Consumers Fish and Cold Storage Company, Limited, $50,000. E. L. Prior, M. P. Shaw, H. F. Phillips.

St. Catharines, Ont.—The Peachland Co-operative Company, Limited, $1,000. C. W. Mason, F. Dale, R. W. Gregory.

Hepworth, Ont.—The Hepworth Silica Pressed Brick Company, Limited, $125,000, J. Douglas, F. Campbell, J. E. Campbell.

Ottawa, Ont.—Lloyd Blackmore and Company, Limited, $40,000. L. Blackmore, V. Belanger, K. F. McGibbon. The Northern Canada and Peace River Development Company, Limited, $100,000. M. E. Arbey, O. H. Jaegar, J. E. Lesteur.

Victoria, B.C.—Colwood Land Company, Limited, $250,000. Vancouver Island Apartment Company, Limited, $55,000. Maysmith and Lowe, Limited, $10,000. Deer Park Land Company, Limited, $35,000. L. C. Adams Company, Limited, $10,000. Victoria Coal Bunkering Company, Limited, $50,000. Cambridge Sausage Kitchen, Limited, $20,000.

Vancouver, B.C.—The Swedish Canadian Press, Limited, $10,000. National Stores, Limited, $200,000. Scientific Canadian Publishers, Limited, $10,000. Thurlow Apartments, Limited, $150,000. The Provincial Hotels Company, Limited, $100,000. Canadian European Investment Corporation, Limited, $2,000,000. Dominion Autophone Company, Limited, $500,000. Finlay-McSweyn, Limited, $25,000.

Toronto, Ont.—Women's College Hospital and Dispensary. A. O. Rutherford, A. B. Fisher, J. G. Wildman. The Toronto Press Club, W. Banks, Sr., C. E. Locke, G. E. Morton. Haldimand Montana, Limited, $40,000. A. K. Goodman, D. G. M. Galbraith, L. Brayley. Stoddard's, Limited, $40,000. A. C. Stoddard, E. A. Berry, H. W. Batchelder. Columb Tyres Import Company, Limited, $50,000. J. W. Best, A. J. Thomson, R. H. Parmenter. Canadian Elevator Equipment Company, Limited, $100,000. G. H. Sedgewick, D. McArthur, R. Forsyth. Toronto Skating Club, A. E. Kirkpatrick, A. C. Burrows, A. K. Macdougall.

Winnipeg, Man.—Hancox Land and Building Company, Limited, $100,000. F. E. Hancox, F. R. Cross, T. Blow. Rex Bowling and Billiard Club, Limited, $20,000. J. Thorsteinson, W. A. Albert, S. J. Masters. Goldfield Mining Company, Limited, $1,500,000. H. A. McDonald, D. A. Duff, G. J. Brimson. The Matthew Kenney Farming Company, Limited, $50,000. M. Kenney, G. W. Allan, A. A. Hobkirk. Scottish Permanent Mortgage Corporation, Limited, $500,000. W. H. Collum, C. D. Corbould, H. Meekling. Strathcona Security Company, Limited, $5,000. R. Burritt, H. T. Cherry, A. T. Hawley. Windsor Land and Improvement Company, Limited, $100,000. H. D. Reisinger, C. S. Sutherland, C. G. Stewart.

Toronto, Ont.—Canada Bonded Attorney and Legal Directory, Limited, $50,000. W. L. Scott, A. M. Wiltsey, G. D. Kelley. Parkhill Investors, Limited, $40,000. A. K. Goodman, D. G. M. Galbraith, L. Brayley. United Motion Picture Theatres, Limited, $2,750,000. J. S. Lovell, R. Gowans, W. Bain. Canadian Bartlett Automobile Company, Limited, $1,000,000. F. Watts, J. Alexander Donovan, O. H. King. Cleary Mines, Limited, $1,000,000. W. H. Garvey, J. A. Rowland, D. H. Stewart. White Falls Lumber Company, Limited, $40,000. J. Lauder, J. Spears, N. Sommerville. John T. Hepburn, Limited, $200,000. J. F. Boland, F. J. Boland, C. Inrig. Marburg Brothers, Limited, $40,000. O. Veit, M. Cudahy, Lamburn; M. Calder. R. G. Long & Company, Limited, $150,000. C. F. Ritchie, J. H. Oldham, W. J. Beaton. The Royal Motor Supply Company, Limited, $50,000. W. Gilchrist, W. Lawr, J. Stewart. Wellington Comox Company, Limited, $500,000. G. Ruel, R. H. M. Temple, S. P. Biggs.

Montreal, Que.—La Compagnie Mutuelle Universelle, Limited, $1,000,000. H. Salomon, M. Caron, G. Dutaud, A. Neveu. The Consolidated Realty Company, Limited, $500,000. J. Brailey, V. McFall, E. COMPANIES INCREASING CAPITAL.

The following company in Canada has increased its capital stock:—

Curtis's and Harvey (Canada), Limited, from $250,000 to $500,000.

The following company in Quebec has increased its capital stock:—

La Compagnie J. A. and M. Cote, from $40,000 to $99,000.

The following company in Ontario has increased its capital stock:—

Gunn, Langlois and Company, Limited, from $250,000 to $500,000.

The following company in Saskatchewan has increased its capital stock:—

The Leader Publishing Company, Limited, from $250,000 to $500,000.

The following company in Manitoba has increased its capital stock:—

The Manitoba Cold Storage Company, Limited, from $150,000 to $200,000.

LONDON SEEMED DISAPPOINTED

Canadian Pacific Railway Note Issue Scheme Was Surprise—Sir Frederick Taylor's Comment

"The new financial proposals of the Canadian Pacific Railway have at once surprised and disappointed the market," says the London Financial News. "The issue means in effect," the paper declares, "a bonus of about four points on each Canadian Pacific Railway share. The market is disappointed with the rather small plum after the often handsome bonuses granted in the past on issues of new stock. Moreover, the official statement leaves many points in doubt still uncleared. The market cannot understand for what purpose the company needs such a large amount.

Some More Questions.

"Again, the question is asked, 'Will the segregation of land assets have any effect on the payment of the regular annual dividend at the rate of ten per cent?' It has been hinted that this somewhat involved financial scheme has been put forward as a means of hiding the large profits earned, and so delaying the day when freight rate concessions will be demanded by the government. Possibly on further reflection the scheme will be better liked. Improvement should set in soon."

Was Misunderstood, Says Banker.

Sir Frederick Taylor says that London was doubtless somewhat disturbed by the announcement, as it was not realized that the Canadian Pacific would so soon ask for fresh money. There was also at first some desultory criticism on the form the present financing was taking, but this would be short lived, for it was generally realized now that Sir Thomas Shaughnessy could not, under all the circumstances, have devised a better plan for getting fresh money and at the same time giving the shareholders a bonus.

Spending Capital Rapidly.

Speaking of the "alleged" bonus The Financial Times, London, says:—"It will be observed that the net effect is to raise a further £8,320,000 for the moment, a much more important matter than a bonus." The paper thinks Canadian Pacific Railway is spending its capital far too rapidly, and does not wonder capital is becoming distrustful.

The Daily Mail says that "allowing for redemption in 1924, the company is paying shareholders 9 per cent. interest on their subscriptions to this issue. For what are the proceeds required?"

The Times says there is nothing in the plan to arouse enthusiasm, and adds:—

"In the meantime fresh money is needed, which the directors prefer not to raise in either debentures stock which would probably be the cheapest way of borrowing, or in shares. They wish also to give something to the shareholders and the present issue represents their method of attaining all the objects desired."

Paid Nine Per Cent.

The Morning Post says that why it was that the Canadian Pacific should elect to pay nine per cent. for money was the principal problem puzzling the market.

The Standard urges that the case is one for the allowance of a good deal of latitude to a board of exceptional ability and straightforwardness which controls the equipment and the finances of one of the greatest industrial corporations of modern times which has made fortunes for its original shareholders and almost created an Empire.

CANADIAN PACIFIC'S CASH RESOURCES

What London and New York Says Regarding Company's Note Issue—Stockholders Receiving Genuine Bonus

By March 2, 1914, Canadian Pacific will have added $41,600,000 of new cash to its already large treasury resources. On that day the second instalment, 48 per cent. of the face value of the $52,000,000 6 per cent. notes offered to stockholders at 80, is due. First instalment of 32 per cent. is due February 2, when the "right" to subscribe to the notes expires.

The above transaction is perhaps the first financing by Canadian Pacific since that line was placed on a trans-continental basis to occasion something akin to disappointment here as well as abroad. Dissatisfaction was openly manifest in London, and was subsequently reflected in a reaction of 4 points in the price of Canadian Pacific common within two hours after the creation of the special investment fund was announced. It is more than likely, however, that this feeling of disappointment will disappear as the transaction itself becomes better understood, so that a continued good market for the "rights" may be looked for, thinks the Wall Street Journal.

Value of Stockholders Bonus.

Investors still seem to be in doubt as to the value of the bonus extended to stockholders or whether or not a real value should be extended to it. But the stockholders' position in the transaction seems to be clearly defined as to the profits that will accrue. On the assumption that a person will hold to maturity a note representing an investment of $80, that person will receive $100 in principal and ten years' interest at 6 per cent., or a total return of 100 per cent. on the original investment of $80. If he holds a note for one year and that note is then drawn for payment, he will receive $20 in addition to 6 per cent. interest on the par value of the note, or $26, equivalent to 32½ per cent. on his original investment of $80 for that one year. For each additional year the notes remained unredeemed, his income would decline toward the 10 per cent. average for the ten years. This calculation would seem to establish the fact that Canadian Pacific stockholders are receiving a genuine bonus.

The disappointment manifested at Monday's financing was no doubt due to the expectation that the company would segregate all of its extraneous assets, as intimated by Sir Thomas Shaughnessy in his annual message to stockholders last October. However, only the deferred land sales and securities in which proceeds of land sales were invested, have been segregated, leaving intact, for the future benefit of stockholders, these other assets, the income from which, as Sir Thomas explains, is believed to be quite sufficient for all purposes of the company.

Strong Treasury Position.

It is a significant fact that within a period of about four months Canadian Pacific will receive two amounts of new cash totalling $146,600,000. This total is made up of the $41,600,000 which the company will have in hand by March 2 next, and the $105,000,000 received October 21 last, when the final instalment of 20 per cent. on the $60,000,000 of new common stock, sold at 175, fell due.

On June 30 last the company had still to receive $42,000,000 on account of the new stock issue. At that time the balance sheet of the company showed cash on hand of $30,274,848, so that at the present time there is in the company's treasury something over $72,000,000 of cash, making no allowances of course for capital expenditures since June 30. In addition to this there is an amount of $10,000,000 temporarily invested in government securities. Adding to this about $44,500,000 due in the form of deferred land payments up to the end of October, it would appear that the company has in hand cash resources totalling $127,000,000, or, deducting deferred land payments, something in excess of $82,000,000. Adding to this the $41,600,000 accruing from the sale of the $52,000,000 of notes, Canadian Pacific on March 2 will have cash resources of about $123,600,000, which places the company in a most secure position regarding the large programme of line extension and property improvement to which it is committed.

Every monetary stringency has within itself the seeds of its own cure. The bankers are the doctors. The patient is now aware of his own condition, and is disposed to take the advice of experts. His convalescence, I think, is not far off. Hon. W. T White, at New York.

UNION LIFE'S PRESIDENT SPEAKS

Imperial Loan Weakened Company's Investment Foundations—Result of Year's Work Was Disastrous

The statement of Mr. H. Pollman Evans explaining the failure of the Union Life Assurance Company given at the government investigation follows:—"Owing to the large debenture indebtedness of the National Agency and the large amount of British capital on which dividends would be expected three years after the issue, it was decided by the board, after full consideration of the facts of the position, and with the concurrence of the London advisory board, that a policy of rapid expansion was indispensable to ensure taking care of these requirements. It was at the same time decided that this policy of expansion should continue over practically the three years, and after that the debt should be consolidated and the expenses thereby be greatly reduced, as the result of which, with the largely increased premium income, there should be a surplus revenue sufficient to provide the payments to the National Agency and the dividends to the British shareholders.

"A statement was at that time prepared and submitted to the board showing that the surplus to the policyholders would, as the result of this expansion, be reduced less than $100,000 before the turning point would be reached. After that the annual net gain would be substantial.

Hard Pressed on all Sides.

"An entirely unforeseen circumstance arose which altered the whole position. On or about January 1, 1912, a suit was commenced against the Imperial Loan and Investment Company of Canada on behalf of the Scottish debentureholders, arising out of the construction of the old trust deed under which the debentures had been issued. Three eminent counsel upheld the contention of the company, but for practical reasons it was thought best to pay off the debentures, which was done. This so weakened the public position of the Imperial Loan, and, as was felt later, impaired its credit to such an extent, as to call in question the investments of the Union Life resting upon the Imperial Loan Company, and in the spring of 1912 the insurance department called upon the company to replace or strengthen their investments.

"It was necessary then to reduce the field staff, and the president had to go to Europe to endeavor to replace or strengthen the assets in question. Vigorous newspaper and competitive comment commenced, and the management of the field staff at the most critical period of the company's career was left in the hands of comparatively inexperienced men. The company was therefore hard pressed on all sides during 1912, and compelled to meet unprecedented situations without experienced guides for the greater part of the time.

"The net result of the year's work was disastrous. The expenditures were heavy, and practically no increase in the premium income was made. This situation, added to the urgency of the demand by the finance minister for strengthening assets, impaired the ability of the company to do so.

Union Life's Parent.

"During the past five months of 1913 the expenses of the company were reduced at the rate of $200,000 per annum, but the improvement in the assets could not be affected by the time permitted by the department of finance. That the business was good was shown from the fact that the company's death rate was the lowest of any industrial company in the world, and the exceptionally sound quality of the business is proved from the fact that for many weeks prior to the reinsurance the collections had averaged over 100 per cent. in face of probably the greatest difficulties that ever confronted an industrial company.

"That result, while a proof of the quality of the business on the books, is also a tribute to the singularly high character of the agency staff, which accomplished such a result, and which had been built up during the preceding years."

The National Agency Company was the parent of the Union Life, and, in accordance with an agreement between the two corporations was to act as managing agent for the insurance company. In return the National Agency was to receive certain commissions on the annual business of the Union Life. When the Union Life went into liquidation, the policyholders were protected by being reinsured in the Metropolitan Life Assurance Company.

◆

The Canadian Pacific Railway Company, has reduced its all-rail rate on flour from Fort William to Atlantic seaboard for export 1 cent per 100 pounds. This makes the rate 21½ cents. The old rate of 22½ cents has been in effect for a number of years.

CANADA'S CROP AND UNITED STATES CARS

Neighboring Railroads Will Help Canadian Pacific Road But Sir Thomas Shaughnessy Says Usual Practice

New York advices stated this week that the eastern railroads of the United States had entered into an agreement with the Canadian Pacific Railway to bring as much of the Canadian wheat as possible down to the seaboard cities after navigation is closed. It will be stored there in anticipation of an expected demand. This arrangement will find use for the accumulating idle cars of the United States railroads. New York, Boston, Philadelphia and Baltimore were said to be included in this arrangement, the possibility being that the elevator capacity at these ports would be taxed to the limit. This wheat would be in bond and held for the expected export demand which an unusual combination of circumstances promises to develop.

What Shaughnessy Says.

Asked by *The Monetary Times* as to this arrangement, Sir Thomas Shaughnessy said:—

"There is no departure from the practice that has been followed for many years. After the close of navigation, we always have divisions with our connections at the international boundary, over whose lines any grain traffic may be routed."

Apart from the surplus of cars which has not been available at this season for several years, other conditions have developed to make the plan feasible and which involve a shifting of the supply positions of the wheat producing countries of the world. These are summarized by the New York Journal of Commerce as follows:—

Supply Positions of Wheat.

"European demands after the close of navigation in the Northern Hemisphere are ordinarily supplied during our winter months from the wheat-raising countries of the Southern Hemisphere. Beginning about January, Argentina takes the place of North America and Russia as shippers and is closely followed by India and Australia. It happens this year that India has a crop shortage, having suffered severely from drought, thus reducing her exportable surplus to a negligible quantity. Argentine has also met with some reverses, and her exportable surplus will, it is estimated, be only 94,000,000 bushels, or about 10,000,000 bushels less than was expected. Furthermore, her wheat now being harvested is turning out to be 3 to 3½ pounds lighter to the bushel than normal. Russian shipments have not been as large as expected, even though her crop was supposed to be a large one. Prices were not to her liking, and government banks rendered aid to growers to hold their wheat for a better market, all of which would indicate that Europe would still have to look to North America for wheat supplies. Her anxiety on this point is indicated by the rush of grain from Canadian lake ports during the remaining day or two of open navigation."

Idle Cars in the United States.

The latest fortnightly bulletin of the American Railway Association, states that on December 1 last, there was a net surplus of 57,234 freight cars as compared with a net surplus of 22,652 on November 15, which means an increase of 34,582 idle cars during the last two weeks.

The rapidly increasing freight car surplus, according to the reports of the United States railroads is not confined to any particular section of the country, but is general. In the last fortnight, it is shown, that the net surplus of 7,949 box cars and 2,043 coal cars reported on November 15, had increased to a surplus of 22,492 and 12,526 cars respectively by December 1.

The large number of idle cars on December 1 this year is a direct reversal of the freight traffic conditions in the United States which existed at the same date last year when a heavy net shortage of cars was reported.

CANADA LOAN SCRIP HAS WANDERED

The Bank of Montreal advertises in the London newspapers that several pieces of the issue of the Dominion of Canada 4 per cent. stock have gone astray from their printers' factory.

It is stated that these may bear the lithograph signature of Sir Frederick Williams Taylor, the general manager of the Bank of Montreal.

The bank has little fear that the missing scrip will be able to find circulation but has adopted the precautionary measure of countersigning the genuine scrip.

Bankers and brokers are warned not to negotiate any of the scrip unless it is so countersigned.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Coniston, Ont.—December 9—Public school. Loss and cause unknown.

Belleville, Ont.—Mr. W. Gilbert's bakery. Loss unknown. Cause, electrical defects.

Jasper, Alta.—December 10—Hotel Fitzhugh. Loss, $10,000. Cause unknown.

Limoilou, Que.—December 10—Garneau block. Loss, $30,000. Partially insured.

Halifax, N.S.—December 12—Messrs. Johnson and Scriven's premises. Chimney fire.

Hope, B.C.—December 3—Mr. J. D. Nichol's store. Loss, $300. Insured. Cause unknown.

Rodney, Ont.—December 10—School. Loss, $4,000. Partially insured. Cause unknown.

Vancouver, B.C.—December 12—Lulu Island shingle mill. Loss and cause unknown.

Nanton, Alta.—December 11—School. Loss, $250. Cause, supposed mice and matches.

New Glasgow, N.S.—December 10—Jackson block. Loss, $1,000. Cause, supposed live coal.

Chatham, N.B.—December 12—Mrs. Kane's residence, West End. Loss and cause unknown.

Hamilton, Ont.—December 13—Mr. T. Scott's residence, Main Street. Loss and cause unknown.

Moncton, N.B.—December 12—Mr. C. E. Taylor's barns. Loss, $500. Cause unknown.

North Kingston, N.B.—December 7—Methodist Church. Loss unknown. Cause, supposed flue.

Port Arthur, Ont.—December 10—48-50 Court Street South. Loss, slight. Cause unknown.

Colborne, Ont.—December 10—Mr. A. A. Gould's barn. Loss unknown. Cause, supposed incendiary.

Paris, Ont.—December 12—O'Brien's farm barns. Loss, $2,500. Insurance, $2,000. Cause unknown.

Brantford, Ont.—December 15—Mr. L. Stander's residence. Loss, $200. Cause, supposed incendiary.

Aylmer, Ont.—December 12—L. A. Ball's store, Bingham block. Loss, $4,000. Insured. Cause unknown.

Todmorden, Ont.—December 12—Mr. W. Johnston's stables, Bee Street. Loss, $2,500. Cause unknown.

Carman, Man.—December 11—Bridge and McCulloch's implement warehouse. Loss, $12,000. Cause unknown.

Regina, Sask.—December 6—Mr. M. Evoy's farm, one mile from city. Loss, $7,000. Cause, lantern exploded.

North Vancouver, B.C.—Mr. Wardroper's residence, 28th Street and Sarson's Road. Loss, $900. Cause unknown.

New Westminster, B.C.—December 5—Mr. V. Spencer's, Vancouver, automobile. Loss, $1,000. Cause unknown.

St. Thomas, Ont.—December 10—Mr. A. Davies' residence, Malahide Township. Loss, $3,000. Cause unknown.

West Hill, Ont.—December 11—Mr. J. Hillier's residence, owned by Mr. M. Lash, Toronto. Loss and cause unknown.

Edmonton, Alta.—December 8—Adams Express Company, 2nd Street and Athabasca Avenue. Loss and cause unknown.

Loreburn, Sask.—December 8—Pool room, butcher's shop, residence and printing office. Loss, $11,000. Cause unknown.

Victoriaville, Que.—December 12—Mr. M. O. Gaudet's residence. Loss, $5,000. Insurance, $3,000. Cause unknown.

Saskatoon, Sask.—December 1—Mr. T. J. McCartney's residence, 408 20th Street East. Loss, slight. Cause, children playing with matches.

Glace Bay, N.S.—December 8—Mr. G. Cunningham's residence. Loss and cause unknown; Mr. S. McDonald's residence, Water Street. Loss, slight. Cause unknown.

Ottawa, Ont.—December 8—Mr. J. S. Hobb's residence, 143 Holland Avenue. Loss, $1,000. Cause, supposed defective chimney.

December 15—217-219 Water Street. Loss, $2,200. Cause unknown.

Sault Ste. Marie, Ont.—December 12—P. Scigliano's store, Murray Street. Loss, $3,500. Cause, supposed elec-

December 16—Pearl Laundry Company. Loss, $2,000. Cause, electrical defects.

Winnipeg, Man.—December 9—Strand Theatre. Loss and and cause unknown.

December 10—Messrs. Blue and Berg's store, 332½ Notre Dame Street. Loss, $300, Cause unknown; Braqmar Apartments. Loss, $500. Cause, match thrown in waste paper basket.

Smithville, Ont.—December 13—Business section. Loss, $30,000. B. and I. Morgan, central store. Loss, $10,000; H. Gracey, furniture and undertaking. Loss, $8,000; Joyner's barber shop. Loss, $3,000; Hay's hardware and jewelry store. Loss, $10,000; Patterson's grocery. Loss, $5,000. The Smithville public library was damaged to the extent of $1,000 and the Masonic Hall suffered a loss of $1,000. Cause unknown.

Montreal, Que.—December 8—Mr. N. Goldstein's store, 848 St. Lawrence Boulevard. Loss, $1,000. Cause unknown.

December 10—Montreal Wood Mosaic Flooring Company. Loss, $2,500. Cause unknown.

December 11—Columbia Rubber Company's factory, 710 St. Dominique Street. Loss and cause unknown; Mr. J. R. Berthiaume residence, Pine and Laval Avenues.

December 13—A. Uevy's store, 384 Beaubien Street. Loss and cause unknown.

Le Pas, Man.—December 13—Business section. Loss, $100,000. The values of buildings and contents burned are approximately as follows:—Lyric Theatre—Loss, $7,500; insurance, $5,000. Imperial Hotel—Loss, $25,000; insurance, $15,000. Halcrow pool room and Mercer jewelry store—Loss, $28,000; insurance on pool room, $13,000; on Mercer store it is unknown. Le Pas Drug Company—Loss, $3,500; insurance, $2,500. Dreamland Theatre—Loss, $7,500; insurance, $4,500. Haight House—Loss, $2,500; insurance unknown. Cause unknown.

Quebec, Que.—December 15—Tourigney and Marvis' boot and shoe factory. The loss of the fire totals $80,000. The insurance on the building is about $15,000, divided between the Liverpool, London and Globe, the Mount Royal, London Mutual and Rimouski Insurance companies. The insurance on the stock, machinery and fixtures, amounts to $70,500, divided amongst the following companies:—Quebec Fire, $10,250; Norwich Union, $6,000; Sun, $5,000; Royal, $7,500; Queen's, $6,100; Western, $3,000; Reliance, $2,750; Scottish Union, $3,000; Union, $1,000; Manitoba, $5,000; Yorkshire, $3,800; German American, $1,000; London, $5,000; New York Underwriters, $1,000; British America, $2,000; Rimouski, $2,000; Provinciale, $4,000; Les Industries, $2,000. Cause unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Montreal, Que.—October 1—Mr. J. W. Nelle's cottage. Insurance, $3,000. Cause, servant burning waste paper in open fireplace, and shingles were set alight.

Kingston, Ont.—December 5—Mr. J. McParland's liquor store. Loss, contents, $12,500; building, $3,820. Insurance, stock, $17,000; buildings, $4,000. Cause, leaking wine cask and lighted match.

Winnipeg, Man.—December 1—Leland Hotel. Insurance: Employers' Liability, $1,500; Phœnix of London, $1,500; London Assurance, $1,000; Niagara, $1,000; General Fire, $1,000; Aetna, $1,000; Canadian Fire, $2,500; St. Paul, $2,500; British Dominion, $1,500; North Empire, $1,500; Continental of New York, $1,000; America Central, $1,750; London, Liverpool and Globe, $1,500; handled by Robinson and Black, $19,250; handled through Allan, Killam and McKay, $35,000; total on building, $54,250. Stock—Poyntz and Company, druggists, $4,000; Gunn Brothers, newstand, $300; R. R. McComb, barber shop, $500; Stock—White and Manahan, $1,000; total, $60,050.

NEW SCHOOL DISTRICTS.

The following are the names of new school districts, together with their senior trustee:—

Saskatchewan.

Pleasantdale, No. 3161. W. Palmer, Pleasantdale.
Bjorkdale, No. 3162. Geo. Alexander, Bjorkdale.
South St. Gregor, No. 3163. J. Biensfield, St. Gregor.
Fedkowich, No. 3164. John Panchuk, Sheho.

◆

Mr. C. F. Roland, Winnipeg's industrial commissioner, recently gave an illustrated lecture on "Citizenship in

UNDERWRITERS REPORT ON VANCOUVER FIRE

The Mainland Fire Underwriters' Association of British Columbia, shows an insurance loss of approximately $300,000. The fire apparently originated on the fourth or fifth floor from a cause unknown. The report says that the fire chief report on the Kelly Douglas fire, Vancouver, stated, and others are of the same opinion, that this fire demonstrated the urgent necessity of a water tower, a powerful fire boat on Burrard Inlet and hydrants on large mains in the Canadian Pacific Railway railway yard.

The serious and far-reaching results of this fire, continues the report, furnish abundant proof that merchandise of a highly inflammable or explosive nature should not be stored in quantities in the principal retail or wholesale districts in any city. The intensity of a fire from burning oils and varnish and the density of the smoke therefrom renders it very difficult to successfully cope with a fire of this character, and, as in this case, the damage from flowing paints and oils may easily extend to buildings at some distance from the actual fire. In fact, the unthought-of dangerous hazard which developed by the flowing streams of varnish and oils, depositing these fire-carrying properties in the basements of other wholesale buildings a full city block and more away from the burning building, is an entirely new feature, and demonstrates the care that should be exercised by the authorities and the public to see that no such dangerous substances are stored in the congested or high value district of the city.

The following is a list of interests insured:—

Kelly, Douglas and Company, Limited.—Building—East section—Fidelity-Phœnix, $3,500; L'Union of Paris, $2,500; Willis, Faber and Company, $31,500. Insurance, $37,500. Loss, total. West section—Fidelity-Phœnix, $1,500; L'Union of Paris, $7,000; Willis, Faber and Company, $29,000. Insurance, $37,500; approximate damage, $7,500. Most westerly section—Fidelity-Phœnix, $10,000; General of Paris, $5,000; Willis, Faber and Company, $22,500. Insurance, $37,500. No loss.

Kelly, Douglas and Company, Limited.—Stock—East section—London Underwriters, $4,000; Phœnix of London, $5,500; Northwestern Mutual, $5,000; Willis, Faber and Company, $34,500; Insurance, $49,000; approximate loss, $36,000. West section—British America, $2,500; Continental, $5,000; Fidelity-Phœnix, $13,000; Globe and Rutgers, $5,000; Insurance Company North America, $10,000; L'Union of Paris, $15,000; Niagara, $5,000; Queen, $10,000; Rochester German Underwriters, $5,000; Dominion Fire, $5,000; Factories, $5,000; Northwestern Mutual, $2,500; Republic Underwriters, $2,500; Willis, Faber and Company, $184,000. Insurance, $269,500; approximate loss, $38,000.

Cigars, Cigarettes and Tobacco.—Globe and Rutgers, $2,500; Michigan Commercial, $2,500; Willis, Faber and Company, $50,000. Insurance, $55,000; approximate loss, $20,000. Northern Electric and Manufacturing Company, Limited, Wholesale Electrical Supplies.—North British and Mercantile, $5,000. Loss probably total.

Chess Brothers, Wholesale Fruit and Produce.—Commercial Union, $3,000; approximate damage, $55.

◆

The Mount Royal Hotel Company, owners of the southeast corner of Windsor and St. Catherine Streets, Montreal, have secured authority to issue $90,000 in 6 per cent. bonds, to finance the erection of a two-story store and office building on that site. The bonds will be taken up privately at about 90. Final payment is being made to-day to the Windsor Arcade Company, from whom they purchased the property.

Prince Albert, Saskatchewan, has been offering a million dollar 5 per cent. loan in London at 90. This means that on the money actually received the town will pay over 5½ per cent. interest, and that when the time of redemption comes $100 will be handed to the lenders for every $90 received. Money for a municipality should be badly needed when the borrowers are willing to pay such a price for its use.—Montreal Gazette.

I think if you tell the consumer in the towns that he is going to benefit at the expense of the farmer, which class constitutes the majority of the people, you are raising a tempest. You have not only to consider the farmer and the consumer, but the man between, who makes most of the profit between the two; but you must secure to the farmer his share of the national policy which we call protection.—Hon. Pelletier at Montreal.

The argument of Eugene Lafleur, K.C., counsel for the Grand Trunk Pacific, at the freight rates enquiry was, that if the board ordered a reduction of freight rates in the west at this time, which is so critical in the career of the Grand Trunk Pacific and the Canadian Northern, it would be a serious thing for the country at large. He urged that nothing be done to interfere with the revenue of the Grand Trunk Pacific just now, because at present the road is not yet completed, and the revenue it yields is insignificant compared with the enormous expenses.

The Dominion Government is considering a measure to provide for federal supervision and inspection of all cold storage plants throughout the Dominion. The government exercises certain jurisdiction over cold storage plants that have received or are receiving a federal subsidy. During the past few years there have been organized throughout the country independently of government assistance, some large cold storage companies, and these are subject only to whatever inspection may be provided by the local boards of health. Often this has been found to work unsatisfactorily.

FARMERS ASK TARIFF REDUCTIONS

Deputation Visited Ottawa—Importance of Agriculture

A deputation from the Dominion council of agriculture representing organized farmers and grain growers of Western Canada and of Ontario, waited upon Premier Borden and his ministers on Tuesday. Mr. R. C. Henders, president of the Dominion council of agriculture, introduced the delegation. They sought, he said, an honest solution of the most important questions now before the Dominion, namely, to improve conditions so that Canada would be the best place in the world to live in. They did not desire the benefit of any one class or industry, but of the whole of the commonwealth.

The resolutions which they presented to the government were as follows:—

"Whereas the progress and development of the agricultural industry is of vital importance to the general welfare of the state, all other industries being largely dependent on its success, and as the government has the interest and welfare of the country at heart and is desirous of improving conditions; and

"Whereas the cost of the production of all farm products is materially enhanced and the development of our agricultural resources retarded by the excessive cost of agricultural implements and other commodities, due to customs duties; and

"Whereas an import tax on foodstuffs increases the cost of living to the extent of the tax imposed, and enables dealers and manufacturers to form combines and create artificial restrictions in the distribution of commercial commodities: and

"Whereas the best interest of the people of Canada, and our loyalty to the British Crown, demand that the tariff barriers of trade with the motherland be removed and thus cheapen the cost to Canadian consumers of goods manufactured in Great Britain; and

"Whereas the free interchange of all natural products between Canada and the United States would tend to reduce the cost of living to town and country people alike; and

"Whereas the United States Congress has passed an act, which is still in force, offering free interchange of natural products between the two countries; therefore be it resolved:

Suggestions for Free List.

"(1) That we urge the government to recommend to parliament at its next session a reduction in the tariff on imports from Great Britain to one-half the general tariff, and to provide for a further gradual reduction until there is free trade with Great Britain in five years.

"(2) That parliament accept the offer of the United States of free interchange of all agricultural and animal products between the two countries.

"(3) That all foodstuffs not provided for in the above referred to offer of the United States be transferred to the free list.

"(4) That agricultural implements, lumber and cement be transferred to the free list.

"(5) That, pending the passage of legislation asked for herein, any duties now imposed under the Canadian customs tariff which are the cause of countervailing duties being imposed against any food products of this country by any foreign country be immediately removed.

"(6) That any tariff or trade concession granted to any other country be immediately extended to Great Britain."

Other points covered in the resolutions were:—

That the government introduce next session a comprehensive co-operative act which would permit the establishment of co-operative societies of all kinds, whether for purposes of credit or trade.

Transportation of Grain and Live Stock.

That a general utility agent be appointed by the government with full power to adjust claims between shippers and railway, elevator and commission companies, relative to shortage on grain shipments, leakage, overcharges, etc.

That the government investigate lake and ocean freight charges on grain and flour, for the relief of producers and millers.

That the grain act be amended so as to transfer inspection and control of grain scales from the inland revenue to the trade and commerce department, under jurisdiction of the railway commission.

That the railways act be amended to make companies liable for full value thereof to owners of live stock killed or injured on the railway's lands through operation of the rail-

animal; also where a railway passes through enclosed lands that it be the duty of the company to protect the crops and prevent live stock from entering or escaping from such lands.

Cannot Continue Borrowing.

The memorial presented by Mr. Roderick Mackenzie read in part:—

"Canada imported for home consumption in the year ending March 31, 1913, in round figures, $685,000,000 worth of merchandise, and exported $375,000,000 worth, which to that extent paid for her imports, leaving a balance of $310,000,000 to be provided for in some other way.

"In addition to this adverse trade balance Canada has to provide for interest charges on borrowed money. That interest charge is now estimated to be $75,000,000. The total amount, therefore, which had to be paid otherwise than by export was $385,000,000. How was this to be done? We are paying for it now by borrowing. Clearly we cannot continue borrowing to meet the balance against us, which is increasing year by year at an alarming rate. From 1896 to 1906 we exported more goods than we imported, and money borrowed during that period went into public works to improve conditions. Since 1903 the percentage of imports over exports has increased alarmingly, and now stands at 43 per cent.

Stop Borrowing Money.

"Clearly the sensible thing for the Canadian people to do is to stop borrowing money to pay for what we buy, and produce for export to meet our obligations.

"But being protected from ouside competition by customs duties, the manufacturers have seen a gain to themselves in a combination of interests, and the outstanding economic fact in the last few years in our country is the consummation of a large number of industrial amalgamations. In four years previous to January, 1913, 56 industrial mergers were negotiated, with an aggregated authorized capitalization of $456,938,266.

"The 56 amalgamations absorbed 248 individual companies. The aggregate capitalization of 206 of these individual companies was approximately $167,289,182, indicating that whereas the people of Canada had to provide dividends on $167,000,000, they have now to provide dividends on three times that amount. This enormous increase in capitalization is almost wholly made up of common stock, which admittedly represents very little real investment being simply protection capitalized."

The Premier said the recommendations would receive careful consideration in so far as they came within the scope of legislation which it is within the right of the federal parliament to pass.

DEBENTURES FOR SALE

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

FOR SALE.

SEPARATE SCHOOL BOARD DEBENTURES OF THE CITY OF WINDSOR, ONT.

$32,000, 6 per cent., payable 20 equal yearly payments Principal and Interest. Debentures bearing date, December 26th, 1913

Sealed tenders will be received by Secretary-Treasurer of Board, D. Gourd, No. 158, Wyandotte Street E., Windsor, Ont., up to December 22nd, 1913.

Highest or any tender not necessarily accepted.

DEBENTURES FOR SALE

TOWN OF MORINVILLE, ALTA.

Sealed tenders addressed to the undersigned will be received for $16,000 6 per cent. local improvement debentures, $10,000 payable in 19 years and $6,000 payable in 20 years.

J. B. DALPHOND,
Secretary-Treasurer.

Morinville, Alta.

The Royal Bank has opened a branch at Thorold, Ont.

Regarding the recent issue of $700,000 city of Toronto 4½ per cent. debentures, the old cumbersome sheet form has been abandoned and the book form adopted.

I WOULD LIKE TO OBTAIN an agency for a company having money to loan on permanent buildings, and residences of the better class in the city of Weyburn. I can obtain eight per cent. interest, and have had eleven years experience in business as a loan valuator. Frank B. Moffet, Weyburn, Sask.

WANTED—A young, energetic man, with Banking, Investment and Insurance experience, desires a position of trust with a Brokerage or Bond House, highest references. Further particulars from A. S. M., 116 West Francis Street, Fort William, Ontario.

MARITIME PROVINCES CLEARING THEIR THROATS

We reproduce an article from *The Monetary Times,* in which that very excellent journal pays rare tribute of the Maritime Provinces, says "The Busy East of Canada." One paragraph is certainly worthy of repetition:—

"The Maritime Provinces do not always get their due, and we sympathize with their request for more adequate representation in the Federal House. If any criticism were offered here, it would be only that the Maritime Provinces are too modest. We should like to hear their voice more frequently, and above a whisper."

"To this we might add," continues our contemporary, "that we would like to see a copy of those words laid on every member's desk in the House of Commons. It is a good thing, and well worth passing along.

"Presently, however, we will serve notice, presently the voice of the Maritime Provinces will be heard above a whisper. By the time another year rolls around a demand, voiced in no uncertain tones, will have re-echoed throughout the Commons Chamber. And we much mistake if it will not be replied to in something more tangible than empty words. New Brunswick, Nova Scotia and Prince Edward Island are just now clearing their throats."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 12th, 1913:—

Beaver Mine, 109,780; Temiskaming Mining Company, 87,220; O'Brien Mine, 82,210; Cobalt Townsite Mine, 82,810; Right-of-Way Mine, 86,300; Cobalt Comet Mine, 66,200; Penn-Canadian Mine, 65,580; McKinley-Darragh-Savage Mine, 60,810; La Rose Mines, Limited, 166,000; total, 806,910. The total shipments since January 1st are now 38,969,673 pounds, or 19,485 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

The Armour Grain Company, Chicago, incorporated in Ontario for the purpose of carrying on an elevator and grain business in this province, has acquired one of the existing storage houses on Georgian Bay for immediate use, and extensions will be made at other places later on.

THE BANK OF OTTAWA

THIRTY-NINTH ANNUAL MEETING

The thirty-ninth Annual Meeting of the Shareholders of the Bank of Ottawa was held on Wednesday, the 17th day of December, 1913, the President, the Honorable George Bryson, in the chair.

Report of the Directors.

The Directors beg to submit the Thirty-ninth Annual Report showing the result of the Bank's business for the year ended the 29th November, 1913.

Balance at credit of Profit and Loss Account on 30th November, 1912, was	$ 269,559.64	
Net profits for the year ended 29th November, 1913, after deducting expenses of management, and making necessary provision for interest due to depositors, unearned interest on current loans and for all bad and doubtful debts, and contingencies	706,740.62	
		$ 976,300.26
Appropriated as follows:—		
Dividend No. 86, Three per cent., paid 1st March, 1913	$ 115,904.82	
Dividend No. 87, Three per cent., paid 2nd June, 1913	117,743.86	
Dividend No. 88, Three per cent., paid 2nd September, 1913	118,254.91	
Dividend No. 89, Three per cent., payable 1st December, 1913	119,346.19	
Applied in reduction of Bank Premises and Furniture	37,291.03	
Transferred to Officers' Pension Fund	15,000.00	
Transferred to Rest Account	250,000.00	
		$ 773,540.81
Balance carried forward at credit of Profit and Loss Account		$ 202,759.45

The Rest Account on 30th November, 1912, was	$4,325,480.00	
To which has been added premium on new stock issued	174,520.00	
Transferred from Profit and Loss Account	250,000.00	
		$4,750,000.00

Your Directors regret to have to record the retirement of Mr. David Maclaren from the Presidency, on account of ill-health. They are glad to be able to report, however, that the Bank will still have the benefit of his counsel and advice as a Director. The Honorable George Bryson was elected to succeed him as President, and Mr. J. B. Fraser was elected to succeed Mr. Bryson as Vice-President.

Since the last Annual Meeting, branches of the Bank have been opened at Estevan, Sask., Fort George, B.C., on the corner of Ashdale and Gerrard Streets, Toronto, and at Dalkeith, Ont., a sub-office has been opened three times a week, under the supervision of the Vankleek Hill Manager. The Branches at Englehart, Ont., South Porcupine, Ont., and Birch Hills, Sask., have been closed.

From the accompanying statement it will be seen that the Balance of the Five Thousand Shares of new stock issued in September, 1912, has been sold.

The revised Bank Act came into force on 1st July last. Under Section 56 of that Act, the shareholders are required to appoint Auditors for the Bank at this meeting, and to vote the amount of their remuneration.

During the year buildings have been erected at Pembroke and Cobden, Ont., and a piece of land next to the office at Prince Albert having been secured, the enlargement of that building is now proceeding. In addition, the premises occupied by the Bank at Arnprior, Ont., and Rouleau, Sask., have been purchased.

The usual careful inspection of the Head Office and branches has been made, and the independent audit continued, as shown by the certificate appended to the Balance Sheet.

The Directors desire to testify to the satisfactory performance of their duties by the officers of the Bank.

GEORGE BRYSON, President.
GEORGE BURN, General Manager.

EDSON L. PEASE,
General Manager.

Russell KNIGHT

To make the Russell completely comfortable was our aim. That we have succeeded is shown by the wide-spread adoption of many features which we ***pioneered*** a year ago.

By a clever, exclusive arrangement, we utilize the heat of the exhaust gases to warm the tonneau. The value of this feature in our severe Canadian winter is apparent.

> "I was at the rugby match at Ottawa," said a prominent owner of a Russell Six. "It was a bitter day. My friends could not see how we were able to sit in comfort in our open car, while they found it unbearably cold in their limousine. I explained the Russell Heating System—how by running the engine slowly the car was most comfortably warm the whole afternoon."

The ***Russell rear windshield***, too, is a wonderful help in protecting the tonneau occupants from dust and biting winds. It is an original Russell feature—now widely copied.

Nothing less than complete comfort, as embodied in the Russell-Knight, should satisfy. Russell owners—not merely pleased, but enthusiastic—have voluntarily written these fine letters.

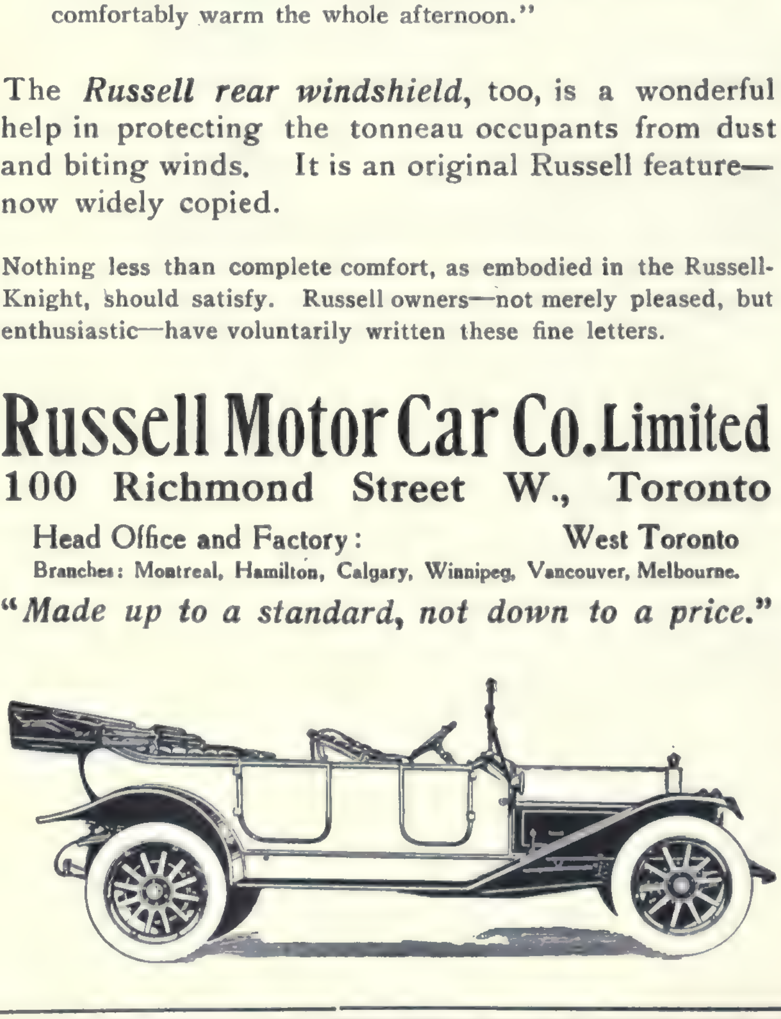
Russell Motor Car Co. Limited

100 Richmond Street W., Toronto

Head Office and Factory: West Toronto

Branches: Montreal, Hamilton, Calgary, Winnipeg, Vancouver, Melbourne.

"Made up to a standard, not down to a price."



NO. 7.

Winnipeg, Nov. 18, 1913.

Russell Motor Car Co., Ltd.
346 Donald Street,
City.

Gentlemen:—

It may be of interest to you to know that I am very pleased with my Russell-Knight "28", purchased from your Company last spring. All being well, I hope to have a second car of your make next year.

One cannot say too much of the comfort of your "28"; it surely has no superior, is a very smooth operating car and easy riding.

I desire to express my fullest recognition of the quality of the Russell-Knight Car and bespeak for you continued success.

Yours truly,

(NAME ON REQUEST)

NO. 8.

Calgary, Nov. 25, 1913.

Russell Motor Car Co., Ltd.
1504 1st Street East,
Calgary.

Gentlemen:—

With reference to the Russell Model "28" purchased from you three months ago, I have driven the car about three thousand miles, and during the time I have had it I have not had a particle of trouble in any way.

The electric starter is a marvel, never having failed me once.

It is the seventh car I have had and needless to say, it is the best. Its finish and riding qualities are much admired by all who see and ride in it.

In my opinion the car is better than any other sold at the price.

Yours truly,

(NAME ON REQUEST)

DIVIDENDS AND NOTICES

The Imperial Canadian Trust Co.

Head Office, Winnipeg.

Notice is hereby given that a dividend at the rate of SEVEN per cent. per annum, upon the paid-up Capital Stock of the Company, has been declared for the year ending December 31st, 1913, payable at the Head Office of the Company and its Branches on and after Friday, January 2nd, 1914.

The transfer books of the Company will be closed from the 17th to the 31st of December, 1913, both days inclusive.

By order of the Board,
W. T. ALEXANDER,
Managing Director.
Winnipeg, December 2nd, 1913.

THE BANK OF TORONTO

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

RECORD OF LABOR DISPUTES

According to a bulletin issued by the Department of Labor, there were only seven trade disputes in Canada during November, 1913, a favorable showing in comparison with October, when there were nine in existence, and also with November, 1912, in which month twenty-five were recorded. There was, however, an increase in the number of working days lost over the previous month, the figures being 89,000 for November, 1913, and 70,700 during October. It is worthy of note that of the 89,000 working days lost during November 67,500 were lost as a result of two disputes in British Columbia, coal miners on Vancouver Island and railroad construction laborers on the Pacific Great Eastern Railway. Three disputes were definitely settled during November, leaving four in existence at the end of the month as compared with eleven at the end of November, 1912.

◆

RAILWAY EARNINGS

The following are the railway earnings for the first two weeks in December:

Canadian Pacific Railway.

ALBERTA BONDS IN UNITED STATES

Big Block of Debentures Issued There—Wall Street's Comment

The latest Canadian issue to be presented in the New York market is the $3,600,000 province of Alberta 10-year 4½ per cent. debentures offered by New York bankers on a 5 per cent. basis.

Commenting on this issue, the Wall Street Journal says:

"Many Canadian bond issues have appeared in the United States investment market in the past year. This is specially true of Canadian municipal bonds, which have received a welcome from some United States investors because of the fact that the yield on them has been higher than on the average United States municipal issue.

"The fact that the London market has not been so ready or able to absorb Canadian securities as it used to be has been one of the factors in sending the issues this way. Canada has to pay more for its money here than it had been in the habit of paying in London, but it has probably been a case of finding the only market open for new securities.

New to United States Investors.

"Canadian government securities have many conditions surrounding them that are entirely unknown in this country. For instance, the prospectus on the new Alberta bonds points out that the Dominion government pays to the province of Alberta $405,375 a year, or the equivalent of 5 per cent. on $8,107,500, inasmuch as the province was not in debt when it was incorporated. Alberta guarantees first mortgage bonds of five railroads at the rate of $20,000 a mile on 176 miles, $15,000 on 701 miles and $13,000 on 60 miles of road constructed within the province. The total railway guarantees that the province has authorized the government to execute cover 3,627 miles, a large part of which is still under construction or only contemplated.

"These guarantees are intended to facilitate the building of railroads within the province. No money is advanced to the roads, however, for this purpose. From the present sale of $3,600,000 debentures by the province $1,000,000 is for extension of the provincial telephone system, $1,000,000 for loans to the Alberta Farmers' Co-operative Elevator Company at the rate of 85 per cent. of the estimated cost of elevators, extensions, etc., and only $1,600,000 for carrying on public works authorized by the legislature.

"This item for loans to an elevator company shows the close connection between Canadian provincial governments and some industrial concerns, as the railroad guarantees show intimate relation with railroad companies. The act incorporating the elevator company provides that these loans shall be secured by first mortgage and shall be repaid in 20 equal annual instalments."

Alberta's Loans this Year.

According to the records of *The Monetary Times*, the following loans have been raised by Alberta this year:—

Amount		Security.	Price.
£1,000,000	....	4½% stock	95
£1,500,000	....	4½% debs	97
$3,600,000	....	4½% debs	—

The first and second issues were made in London and the third in New York. The province also issued treasury bills in London.

◆

DEBENTURES AWARDED

Melfort, Sask.—$34,000 30 years, to Messrs. G. A. Stimson and Company, Toronto.

Chauvin, Alta.—$1,800 6 per cent. 10 years, to Messrs. W. L. McKinnon and Company, Regina.

Sudbury, Ont.—$35,000 5 per cent. 30 years, to Messrs. Wood, Gundy and Company, Toronto.

Tavistock, Ont.—$19,382 5 per cent. 30 years, to Messrs. G. A. Stimson and Company, Toronto.

St. Anne de Bellevue, Que.—$135,000 5 per cent. 40 years, to Messrs. Standard Securities, Montreal.

◆

BOND TENDERS INVITED

James Township, Ont.—The council has passed a by-law to issue $5,000 6 per cent. 10 instalment debentures.

Winnipeg, Man.—The following by-laws have been carried:—$100,000 for public schools; $100,000 for civic contagious diseases hospital; $60,000 for two new fire stations; $50,000 for public lavatories; $1,000,000 for extension of hydro-electric system.

SASKATCHEWAN'S LOAN SCHEME

Premier Scott Will Introduce Bill Which Provides for Co-operative Loaning Efforts

Saskatchewan's co-operative loan proposals will be introduced in the legislature by Premier Scott. The proposed legislation has been discussed in the columns of *The Monetary Times.* It is the result of a commission's investigation in Europe and Canada. The bill provides that any resident of the province, who associates himself with nine other persons, to form a local group, may join the association. He must apply for a first mortgage loan on farm land, and pay a membership fee of $10, returnable if no loan is granted. The association formed by the aggregation of local groups will be administered by three commissioners, appointed by the lieutenant-governor in council. One member only of this board will be employed on a permanent salary, the others will simply be reimbursed whatever expenses they may incur in the service of the association. There will also be an advisory board of 15 persons, three to be appointed by the government, one each by the following organizations:—The University of Saskatchewan, the provincial department of agriculture, the Saskatchewan Grain Growers' Association, the Union of Rural Municipalities, the provincial Winter Fair Board and the Convention of Agricultural Societies and six by ballot of the association.

Government Will Guarantee.

The new organization will not be run for profit, although a reserve fund may be created, that the government will guarantee principal and interest of bonds issued for an amount to be determined on from time to time, that members of the association will be liable for indebtedness to the extent of 50 per cent. in excess of their borrowings, and that borrowers may pay off their loans prior to the expiration of their mortgages if they so desire.

Loans will not be made in respect to more than 40 per cent. of the value of farm property and the commissioners will be the valuators. No loan will be for less than 15 years or more than 35, and all loans will be repayable in equal annual or semi-annual instalments of principal and interest. It is provided, as an offset to the foregoing relation, that on moving three months' notice or a bonus of three months' interest, any member may pay an amount toward the discharge of his loan in excess of the regular payment. He will not, however, in consideration of having made an excess payment be allowed to miss making payments on the subsequent dates when regular payments fall due.

Power to Borrow.

The rate of interest will be designed barely to cover the cost of marketing securities, of conducting the business of the association, and of creating a reserve.

Power will be accorded to the association to borrow, to hypothecate its real and personal property, and to lend to agriculturists. It may also invest disposable funds by depositing the same in any chartered bank, by investing in such securities or ways as a trust company is permitted to lend trust funds in its hands, or by the purchasing of its mortgage bonds.

Borrowers from the association must devote the funds so raised to permanent improvement of their properties, or to productive purposes connected with it. Where land depreciates in value the association has power to require a partial repayment of the loan.

◆

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan.

Keppel, No. 3109. $1,800. J. Winter, Keppel.
Grenfell, No. 150. $1,000. Henry Sayer, Grenfell.
Krupp, No. 2992. $1,000. Wm. Greening, Krupp.
Brant, No. 3018. $1,600. R. A. Bruce, Wild Rose.
Selz, No. 2943. $1,200. Adam J. Meier, Schulz.
Crystal Plains, No. 808. $500. W. Smith, Wild Rose.
Hanna, No. 1946. $600. Robt. Turnbull, Spruce Home.
White Swan, No. 3049. $2,000. Edd. S. Welch, Starview.
Warwick, No. 3080. $2,200. Fred. N. Burke, Kerrobert.
Cochin, No. 1201. $1,200. R. J. Hazlett, Meadow Lake.
MacVille, No. 2985. $1,800. H. J. Daubney, Bengough.
Neigel Plains, No. 3046. $2,000. Thos. Harnwell, Krupp.

INVITING THE FIRE WASTE

Canada's annual fire waste exceeds $20,000,000, and the per capita fire loss in this country is higher than in any other country. Carelessness of every kind, in every direction is chiefly responsible. Mr. Henry Lye, the well-known fire adjuster of Vancouver, in an address to the Commercial Club of that city, recalled conditions which exist in many cities in Canada, and which fan the fire waste. There are aggregations of old wooden buildings, afflicted with dry-rot, with roofs of moss-covered shingles, and streets and lanes presenting a great conflagration hazard. Even where there are good building by-laws they are not always enforced or their infraction punished, otherwise it could not have been that practically unlimited quantities of inflammables of the most dangerous and persistent character, such as paints, oils, varnishes and fuse (warranted to burn under water) could have been, with impunity, stored in the midst of mercantile establishments, and in storage warehouses, notwithstanding the warnings given by previous fires which fully demonstrated the insanity of allowing such conditions to exist.

Mr. Lye sketches this picture of the Canadian city inviting fire: "On one corner of two of the busiest business streets is a bank exposed in its rear by a lot of old wooden shacks, which may cause the destruction of the whole block.

"On another corner of the most beautiful streets is a collection of old lumber and refuse, which has long threatened the existence of two churches and a number of dwelling houses. On a corner of another business street there has been allowed a wooden construction which menaces the safety of a number of comfortable dwellings, the roofs of which are below its level, yet the owners of these dwellings are without recourse against the authorities who issued the permit.

"On a corner of two residential streets, was put up a set of apartments, constructed of materials so flimsy as to surprise one that it stood erect until it was enclosed. Below the level of another street is a sawmill with its appurtenant buildings, its piles of lumber and firewood, all dominated by a cluster of wooden buildings, one of which is an old shack with sewer pipe for chimney. Alongside of some of these piles of lumber and firewood are a number of shacks with pipes through their roofs instead of brick chimneys, yet the mill owners are powerless. In many of the frame buildings, the unobstructed spaces between the studs and between the joists, constitute flues which conduct fires originating in basement or lower stories, all over the buildings.

"Nearly everywhere one goes, one sees smoking pipes, cigars, and still more incendiary, cigarettes, the stubs of which, still burning, are thrown about regardless of consequences. Matches of the most dangerous description are used indescriminately and thrown about everywhere inextinguished.

"Some of the large buildngs have external, iron so-called, fire escapes. Try to imagine women and children attempting to escape by them on a cold wintry night, with a storm outside, fire and smoke bursting from the windows alongside. Contemplate the feeble attempts of old people and of invalids to reach or use these contrivances, or try them yourselves in broad daylight without any cause of hurry. Then you will insist that such buildings shall be divided by fireproof partitions, that hallways and stairways shall have metal doors with wired glass for the purpose of providing refuge from fire and smoke."

Mr. Lye thinks, too, that in too many cases insurance policies are obtained for excessive amounts, containing permits for unlimited amounts of insurance, without any regard to the values at risk, or to the character, circumstances or antecedents of the persons insured. Such policies and such permits are direct incentives to arson which may destroy properties and endanger lives.

HUMAN NATURE AND RED TAPE

If the Union Life Insurance Company's financing operations and those of its allied concerns had been novelized, the reader would have held his breath till the conclusion of the tale, his hair meantime standing on end. If the same story had been dramatized, the playgoer would probably have found too much excitement in one short evening for the good of his heart-beat, refusing also to refrain from hissing the villains, however plausible their appeal to the gallery. But, as the financial operations were not the work of a novelist or a playwright, being of real life, things may be different. The Dominion governments' investigation, which has just concluded, might possibly have delved more deeply. As it was, the outstanding points of an extraordinary story of high finance were elicited. We imagine that Mr. C. A. Masten, K.C., representing the Dominion government, Mr. Kappelle, the referee, and Mr. Clarkson the liquidator have the best idea, outside of the Union Life coterie, of exactly how high the finance really was. Mr. Clarkson will submit a report to the Department of Finance, and will presumably make certain recommendations with a view to preventing a recurrence of similar disasters.

What will the Finance Department do? The question is on the lips of all those who have followed the course of the inquiry. Their action should be known in a few months. They will probably publish the text of Mr. Clarkson's report, adopt his recommendations, give the Union Life directorate a verbal slap on the wrist, quietly telling them not to be naughty boys again. This is scarcely the most complete function of a supervisory government insurance department, but, at the same time, it is human nature trimmed with red tape.

THE BANKER'S OPINION

The interesting addresses at the annual meetings of various banks in Canada, emphasize four points—the fairly good year generally enjoyed here during 1913, having regard to the monetary stringency; the strong position of the chartered banks, acting as a solid foundation and a proper check upon unwise speculation; the satisfactory profits of the banks, and the opinion of bankers that conservative business action and proper economy is necessary during the next twelve months.

Mr. John Galt, president of the Union Bank of Canada, for instance, reminds us that the causes underlying the feeling of anxiety in the financial world are worldwide, and while some of them are now removed, caution is advisable and strictest economy in both public and private affairs is necessary.

"The year 1913 has been a trying one both for borrower and lender," said Mr. Galt. "There has been a general feeling of uneasiness, which has caused financiers to carry an unusually large proportion of their funds in a liquid form. This has curtailed the loaning power of all the banks and has checked the encouragement of new business, but we have been careful to see that our customers have had the money necessary to carry on their legitimate trade, and I do not think we have given any of them reason to complain. The capital available for investment in new fixed forms, such as railways, canals, city and farm buildings, etc., is, of course, limited. Of late years it has been pretty well absorbed. It is clear that when the supply is exhausted, or when causes operate to check it, expenditure in fixed forms must be curtailed. This point seems to have been reached, and Canada will have to mark time until confidence is restored and until the older countries, from whom we draw much of our capital, are in a position to again invest their savings and profits. The natural resources of Canada are so vast and so attractive, that the capital necessary for their development will, undoubtedly, be forthcoming when financial conditions become more settled."

In commenting upon the report presented to the shareholders of the Northern Crown Bank, Sir D. H. McMillan, the president, stated that it was important at a time like the present for every business concern, financial or otherwise, to show by its statement that collections had been good. He added: "In view of the financial situation outside of our own country, the bank will continue to pursue a conservative policy, and will not allow a desire for large profits to tempt it into too rapid expansion. It must be remembered that this country, being new and in the course of development, cannot finance itself upon what it produces at present, and that it must obtain money from abroad until it is on a self-supporting basis; also that temporary checks must inevitably occur from time to time in the supply of money from abroad, which will mean a scarcity of money here."

The opinion of Canada's bankers—and that opinion is one of the most reliable and valuable—is that the Dominion is in excellent condition but that there is necessity for a conservative attitude in order to adjust matters with conditions in the world's money markets.

OTTAWA NEEDS INDUSTRIES

It is somewhat surprising to know that the powers that be at Ottawa are taking a plebiscite next month as to whether or not that city should retain its publicity bureau and grant the small sum of $15,000 for its 1914 work. There is little doubt that the vote will be favorable to the bureau and by a big majority. Toronto a few years ago dispensed with its publicity office. With the right type of man as an industrial commissioner the Queen City might have secured some valuable industries during the past few years. Instead, Mr. Marsh, the energetic hunter of industries for Hamilton, has magnetized a large number, besides building up for Hamilton a worldwide reputation that the city wants new industries and treats them well when they arrive.

Mr. C. F. Roland, of Winnipeg, is another industrial commissioner who has shown what can be done for a city of merit, with a good commissioner and citizens affording proper support. Mr. Hall, of Edmonton, is another industrial missionary who is spreading abroad, with good results, the attractions, agricultural and industrial, of the Edmonton district. Good work can be accomplished for a city or district by a publicity commissioner, but he must have the unqualified support of the civic rulers and the ratepayers generally, and sufficient funds to finance office expenses and legitimate publicity campaigns.

Mr. H. W. Baker has a good record at Ottawa. The single fact that he has received, in a period of two years, considerably more than five thousand specific inquiries concerning Ottawa, is testimony to his straight shooting in the matter of publicity. It is pleasing to know that the plebiscite has received the support of the Ottawa board of trade and a number of the other business organizations of that city.

FOLLY OF THE STRENUOUS LIFE

To the attention of presidents of United States life insurance companies, meeting at New York, Hon. W. T. White, Minister of Finance at Ottawa, under whose jurisdiction also comes the insurance department, brought a serious point for consideration. He spoke of what a great deal science had done in late years in promoting longevity, but emphasized the fact that the gains have all been made in earlier years of life. If we take those people of to-day who have reached the age of forty years and those of a generation or more ago who reached the age of forty, we find that modern science has not increased longevity for that class. There is, therefore, something radically wrong in the American mode of living, and it can be traced largely to the American business life. Listen to Mr. White: "The pressure to-day upon the business man of Canada and the United States is too great. You have men breaking down at thirty-five, forty and forty-five, who ought to live to be seventy-five or eighty. You may say that is inherent in the conditions under which we work, and to a very large extent that is true; but I think much could be done by insurance companies, and they have done much along these lines to prevent those breakdowns among business men, the most productive men in our communities, to prevent those breakdowns at an untimely age.

"It seems to me that the solution of the question is to make them play more, sleep more and eat less. If we could introduce those cardinal practices into the lives of our business men in this busy, material age, we would do very much for the uplifting of the nation, the improvement of its virility, and for the benefit of life insurance. So, if you want to take a message from me, it is to use your immense influence not only with others, but with yourselves, and play more golf. I am not sure that it would not be more valuable for nations to subsidize golf grounds than railways. I suggest golf as a useful avocation—play more, sleep more, eat less, drink less, if you like. I think more men kill themselves over-eating than over-drinking. It is literally true for a great number of our population, that they dig their graves with their teeth. If they would play more, eat less, and sleep more, I think we would be able to achieve longevity in those who have achieved middle age."

Superficially, this may sound like amusing after-dinner talk. Actually, Mr. White's words remind us of one of the weaknesses of American national life—its much-vaunted and deceiving strenuousness. Here, business men work too hard, worry too much "hustle" unnecessarily and do not take sufficient recreation. These have become national characteristics. The first impression here of the leisurely European is that we have almost a business insanity. It is observable from the head of the commercial house to the office boy, in government departments, in professional circles, everywhere. There is a mistaken notion that hustling and worry are work; that unless a professional man stays glued to his desk from nine in the morning till six at night, he is not giving his quota. Whereas, if he would take Mr. White's advice, play more golf, and keep his nose away from the desk for longer periods, his health would be better, his work better. The nation would be taking proper recreation. It would be more vigorous in business, better in health. Instead of Canada having old men at forty, it would have young men at sixty.

OCEAN FREIGHT RATES

Wher the Dominion government asked Mr. H. L. Drayton, K.C., chairman of the railway commission, to investigate the question of ocean freight rates, a big task was placed upon his shoulders. Add to that, the necessity of compiling a report, with a dash of spice, for presentation to the government, on a subject which has proved a reinforced concrete wall to other investigators, and one has an idea of the difficulty of Mr. Drayton's mission. Ocean freight rates have been the subject of complaint ever since Neptune placed steamship rings on the wedding finger of the ocean. There have been investigations by governments and boards of trade and trade commissioners and others, but most of the knowledge seekers have reluctantly concluded that the ocean combine has no vulnerable point.

Mr. Drayton's report, just published, makes a brave showing. He has made a good effort to obtain a commencement with an inquiry which will learn the real whys and wherefors of ocean freight rates. As a matter of fairness to the companies, however, it is due to state, he says, that the expenses of carrying on business in some particulars have largely increased, so that a certain advance would undoubtedly be reasonable if the previous rate afforded only fair returns to the operating companies. Despite that, Mr. Drayton holds the view that an investigation should be held.

Summarized briefly, his report states that discrimination exists against eastbound shipping as compared with westbound. This is "certainly injurious to Canadian exporters and is entirely against the usual basis of rate adjustments, at least so far as a land haul is concerned."

The claim that importers have made to the effect that the British preference was absorbed by increased rates does not appear to be borne out, but, Mr. Drayton has no doubt, that on articles sold on the Canadian market by the British exporter in close competition with exporters in other countries, the increases in rates of recent years has a detrimental and injurious effect on the traffic, and may account in part for the fall in ratio of British exports.

The Dominion's trade commission will have sessions in Canada in 1914 and will probably consider this subject.

SMALL CHANGE

Happy New Year!

* * * *

By that same token, the sole symbol of the cost of living is +, meaning plus.

* * * *

The Monetary Times Annual is putting on the finishing touches of indispensability.

* * * *

The announcement of more new transcontinental railways for Canada should be taken with a green light and a grain of salt.

* * * *

Sir Rodmond Roblin has issued a semi-apology to British Postmaster Samuel, to the effect that talking in one's sleep cannot always be avoided.

* * * *

Vancouver judge gave a creditor forty years in which to pay a loan shark a small debt. At the end of the period, the loan shark will probably look like a winkle.

* * * *

Sir William Meredith is too busy putting the finishing touches on his extraordinary workmen's compensation bill, to think about the Ontario Lieutenant-Governor's post.

* * * *

Viscount Templetown held Farmers' Bank stock. Viscount Maitland was on the Union Life's advisory board—which raises the question, "Should a Viscount his financial chickens before they are hatched?"

* * * *

An issue of shares has been made in London of the Koninklijke Nederlandsche Maatschappij Tot Exploitatie Van Petroleumbronnen in Nederlandsch Indie,—probably oversubscribed before pronounced.

* * * *

The results of the high-cost-of-living inquiry by Special Commissioners J. McDougald, C. C. James and R. H. Coats will depend on whether they seek information with an axe, a fountain pen, or both.

* * * *

Two lighthouse keepers will spend the winter in lonely lighthouses waiting for the opening of navigation. This is done to avoid the high cost of living, although most people will consider it a cheap way of dying.

* * * *

The inevitable guessers as to what the Canadian Pacific Railway will do with the funds obtained by its latest financing, are probably right in their surmises. The directors of the road doubtless have something in view. As a matter of fact, this is it. Perhaps, though, we had better wait until Sir Thomas Shaughnessy himself makes the announcement.

MARKET ANTICIPATES CANADIAN PACIFIC SURPRISE

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

WILL CANADIAN INDUSTRIALS GO TO NEW YORK?

(Central News letter to *The Monetary Times.*)

London, December 18.—For the moment it is apparent that the rush of Canadian emissions, following the slight recent improvement in the public investment appetite, has been too heavy to be properly digested. In the case of the Toronto loan, some rather sharp criticism was engendered by the flotation of the Dominion issue while the former was still before the public. In certain well-informed circles the statement is maintained that the Toronto total was over-subscribed at one time, but when the news of the Dominion issue got about, tenders were withdrawn with the result stated above. There were also some cause for criticism in the fact that the new Dominion loan appeared at about the same time as the final heavy instalment on the last Dominion emission fell due. The new Dominion scrip has so far been well looked after on the market, and it is quoted at around ¼ discount, whereas that of the previous Canadian loan is as low as 2¾ discount.

It is evident that with London capital showing hesitancy about going into sound Canadian gilt-edged securities, there is not much chance just yet for any big offerings of Canadian industrial issues. This is a point, which is being a good deal discussed just now, because of uncertainty whether this absence of a big local market for further Canadian industrials, there will be a big development of the movement to sell the latter in the United States. The latest cables from New York seem to suggest that such a probability is entertained in that centre. The Canadian Pacific official announcement regarding its new financial plan has been a great disappointment to dealers in the market for Canadian Pacific stock, and the latter has slumped about 6 points from the recent top level, in spite of vague statements that the creation of a trust fund, into which the proceeds of land sales are to be placed, and the issuance of $52,000,000 6 per cent. notes at 80 represent only the commencement of the directors' new financial proposals. The point, which the market cannot get over is that whereas it had been hoped that stockholders would get some sort of substantial bonus in connection with the segregation of land assets without subscribing any further capital, such an idea does not appear to have been held by the Canadian Pacific directorate at all.

RESULT OF GRAND TRUNK ISSUE

†London, December 23.—Thirty-four per cent. of the Grand Trunk Pacific issue of two million sterling five per cent. notes has been left with the underwriters. The issue is being dealt in at a small premium. It is understood that many holders of Grand Trunk preferences hold out to exchange into the new notes.

CANADIAN MINING MERGER IN PROGRESS

†London, December 23.—A Canadian mining fusion is in progress, according to to-day's Times, which states that a meeting of the shareholders of the Northern Ontario Exploration Company has been called for a week from to-day to consider a proposal for the absorption of the company by the California Exploration Company, in which it has a large interest. The California Company, it is explained, has for the past two years been opening up Plymouth Consolidated Mine in California. The terms on which the absorption is to take place are briefly:—

It is proposed that the shares in the California Exploration Company should be split into shares of 10s. each, and the capital increased to £120,000, the Northern Ontario Exploration Company receiving 156,177 shares for their assets, exclusive of their existing holding in the California Exploratino Company. As the latter will represent 22,060 shares, this will give for distribution to the shareholders of the Northern Exploration Company 170,137 shares in Californina Exploration Company. In other words, three shares in the California Exploration Company for every two shares in the Northern Ontario Exploration Company.

ASKS GOVERNMENT TO ANSWER.

*London, December 18.—Regarding circulars of Freeholds of Canada Corporation, offering blocks of freehold land at Medicine Hat, the Financial News says that the Canadian Government should promptly state whether it is a fact, as the Corporation advertises, that the Government guarantees not only the title but the security afforded by the land for the amount invested in purchasing it.

LONDON INCENSED AT DEFAULT ON LOAN.

*London, December 19.—British debenture holders of the Imperial Loan Investment Company of Toronto have received banker's notice of the non-payment of the 5 per cent. interest due October 4th.

Debentures were introduced here through the Stock Exchange brokers. The directors are Douglas Burns, president, Edward Brown, K.C., Pollman Evans, W. M. German, M.P. and E. L. Taylor, K.C.

A writer in the Financial News advises the English people to boycott Canadian companies having no British domicile.

HORNE PAYNE SAYS GOOD WORD.

†London, December 19.—In view of the criticism of Canadian finance passed a few months ago by Horne Payne, his remarks to the shareholders of the British Columbia Electric Railway to-day will be followed with interest. Horne Payne, owing to illness, did not attend personally, his speech being read for him. After regretting that the report was not more satisfactory, he proceeded:—

"Unfortunately I cannot tell you that the period of hard times is over. I do not expect to see any improvement until the end of the Canadian winter, but I do think we shall then see a gradual general improvement in commercial conditions, with a complete return to prosperity and progress. In 1915 I believe this halt will in the end prove good for the country and the company, and will result in cheaper conditions of living and a very sound economic position in British Columbia.

"We have perhaps been a little spoilt with too much prosperity, and are inclined to be unduly alarmed by a comparatively unimportant decrease. There is nothing to cause selling by stockholders whose fears have been aroused by the general fall in Canadian and all other securities, by a decrease in earnings and especially by newspaper reports of agitation in British Columbia to induce Parliament to enact certain measures restricting our rights to fix rates and charges. I believe I can safely say these fears are needless. We rest confidntly in a responsible British Government who are not in the least likely to lend themselves to any such proceeding which would destroy the good name of the province throughout the financial world.

"There is nobobdy of responsible public opinion behind this agitation, which is the word of certain noisy, ill-informed individuals.

"I have received letters from shareholders urging that we should not invest any further money at all in British Columbia. This, of course, is neither desirable in the interests of the company nor possible. I look to the future of the company with confidence, and would urge you in your own interests not to allow your confidence in the future of British Columbia or in Canadian investments to be in the least degree shaken by the present discouraging circumstances, which are almost exclusively due to disturbed financial conditions. Canada has this year again amply justified every claim made for her. The production of wealth from field crops, farm produce, mineral and other natural resources has been greater than ever before, and the only trouble has been of a monetary nature, the recurrence of which, it is hoped, will be prevented in future."

PUBLIC TOOK 66% OF TRUNK ISSUE—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

CANADIAN GROUP IS SOMEWHAT FEVERISH.

(Central News cable to *The Monetary Times*).

London, December 26.—For the season rates for loans and bills are easy, and it is not expected that the pressure at the end of the year will be severe. The Bank of England continues to gain gold, obtaining all the £1,100,000, that was available in the open market yesterday. No change was made in the Bank of England's 5 per cent. minimum rate of discount on Wednesday (Thursday being Christmas day). The weekly return of the Bank will be made public to-morrow. The enactment of the new United States currency law and the remarks of President Wilson have helped sentiment here.

The stock markets have been of the usual holiday character, but the feeling in the city is cheerful. The improvement in consols, which has been brought about by organized support, has had a good effect.

The Canadian group has been somewhat feverish. The bears have re-attacked Canadian Pacific successfully. Bad earnings have caused weakness in Grand Trunks, offsetting the partial success of the £2,000,000 Grand Trunk Pacific note issue, 34 per cent. of which was not subscribed for. The result was better than had been expected.

A shadow has been cast on Dominion securities by the capital requirements of the country, which are estimated at £100,000,000.

The Stock Exchange will open to-morrow until 2 p.m., but many members of the Exchange will not attend the session.

BRITISH MOTOR TRADE IN CANADA

†London, December 22.—In view of the fact that Great Britain supplies only 3½ per cent. of the motor vehicle trade with Canada, makers here are considering a scheme for small groups to amalgamate and float a subsidiary Canadian company with a Dominion charter.

QUESTIONS ABOUT IMPERIAL LOAN COMPANY.

†London, December 18.—"A Canadian episode which requires to be thoroughly proved" and "the directors seem in no hurry to issue an explanation" is the comment made by the Financial News to-day in connection with complaints that are being received regarding the Imperial Loan and Investment Company. One subscriber writes:—"This company has issued a sort of prospectus inviting applications for £200,000 debentures of 5 per cent. and written in fairly glowing terms, one point being that the estimated net earnings for 1913 would cover the interest on these debentures three times over. The interest coupon in April was duly met, but coupon No. 2, due on October 4 and duly presented through the bankers on that date, is returned to me by them on the 4th inst. of December unpaid, with a note 'not being paid.' I have applied to the bankers and brokers, and neither of them has any information as regards what would appear to be an extraordinary default in payment of interest. I have written to Toronto. In the meantime it is just as well that British subscribers should take concerted action in the matter and trace the channel by which the prospectus came to be placed before the British investing public. Douglas Burns, Edward B. Brown, K.C., Pollman Evans, W. M. Gorman, K.C., M.P. and E. L. Taylor, K.C., are named as directors."

COBALT SHARES INVOLVED IN SCANDAL.

*London, December 18.—Quite a flurry was caused on the Stock Exhange as a result of the sentences passed by the committee on the members concerned in the Casey Sutton Cobalt shares, to which a special settlement was recently refused.

It is understood the decision includes a five year's suspension in two cases, and a four years' suspension in one case; two other adjudications three years and one year respectively.

The committee is determined to stop scandals arising from the introduction of shares on the market without the proper prospectus.

MONTREAL MILLIONAIRE'S ESTATE.

One of the largest estates filed for probate in the Surrogate Court, Toronto, is the $14,316,526 estate of the late James Ross, of Montreal, who died on September 20th, 1913. Of this amount $649,180 is held in Ontario in the following stocks: 5,080 shares of Brazilian Traction, Light and Power Company, $457,200; 1,844 shares of Electrical Development Company, $129,080; 629 Canadian General Electric, $62,900; 400 Lake Erie and Northern Railway Company, and 250 Canadian Shipbuilding Company, given as having no market value.

The rest of his estate is made up of 17,500 shares of Canadian Pacific Railway, $3,937,500; 5,250 new issue of 1913, $971,250; 538 shares Canada Cement, $46,140; 1,711 Bank of Montreal, $249,975; 2,000 Montreal Light and Heat Company, $420,000; 380 Royal Trust Company, $152,000; 1,900 Laurentine Company, $304,000; 5,700 Dominion Bridge Company, $570,000; 570 Lake of the Woods Milling Company, $97,500; 1,000 Dominion Textile Company, $80,000; 200 shares Ritz-Carlton Hotel Company, no commercial value; 25 shares Montreal Jockey Club, $1,250; 500 Eastern Cafeterias, Limited, $1,250; 721 shares St. John Railway, $72,100; 4,321 Great Northern Railway, $540,725; 4,195 Northern Pacific Railway, $472,450; 3,000 Union Pacific, $465,000; 1,500 United States Steel, $410,250; 2,000 International Harvester, $200,000; 2,449 Dominion Coal Company, $224,900; stocks held in England, $279,595; State of New York, $324,000; 108 shares Southern Pacific, $99,360.

Secured by mortgages is the amount of $39,141. The real estate holdings in Montreal represent $720,729, and $322,100 in Calgary and Edmonton.

His "Lone Butte" ranch is valued at $6,400; $250,000 is held in Winnipeg; and his residence in Nova Scotia is valued at $10,000. Household effects and pictures in his Montreal residence come to $487,700; cash, $159,246; three steam yachts, $246,233; life insurance, $32,675.

Among the bonds held by the deceased are: New York Central and Hudson River, $78,000; Chicago, Rock Island and Pacific, $14,000; Atchison, Topeka, and Sante Fe, $42,000; New York, Chicago and St. Louis, $63,750; Wisconsin Central Railway, $42,000; New York Gas Company, $50,000; Interborough Rapid Transit, $53,000; Central Leather Company, $23,250; Southern Pacific, $26,400; United States Rubber, $50,000; Minneapolis and St. Paul Railway, $45,500; New York, New Haven and Hartford, $53,000; Lake Shore and Michigan Southern, $22,500; Chicago and Great Western, $35,500; Indiana National Gas Company, $52,700; Atlantic Trust Company, $35,000; Mexican Electric Light Company, $138,750.88; Dominion Coal Company, $324,425; Niagara Falls Railway Company, $29,100; Dominion Cotton Mills, $50,000; Rio Janeiro Light, $49,500; Mount Royal Club, $12,000; Canada Cement, $77,900; P. Burns and Company, $45,000.

CANADA'S TRADE.

An increase in Canadian trade for the month of November is shown in the statement issued to-day by the Hon. J. D. Reid, Minister of Customs. For November the total Canadian trade was $111,459,000, compared with $106,072,000 for November, 1912. For the eight months of the present fiscal year, ending November 30th last, the total Canadian trade was $777,624,000, as against $713,614,000 for the corresponding eight months of the fiscal year 1912.

Domestic agricultural products exported in November last totalled $33,417,000, as against $24,175,000 for the corresponding month of 1912. Exports of domestic animals and their produce for November last was $7,795,000; for the corresponding month of 1912 these exports were $4,939,000. The exports of manufactures for November also show a substantial and healthy increase. They were: Domestic manufactures, $4,841,000, as against $3,830,000 for November, 1912. There is also a substantial increase in the exports of the products of the mine, fisheries and forest.

The grand total exports for November last were $57,762,000 and the grand total imports of dutiable and free goods, $50,202,000. During November Canada imported $1,814,000 of coin and bullion and the imports of coin and bullion for the eight months ending November 30th last were $5,422,000, compared with $3,634,000 for the eight months of the previous fiscal year.

STATE ADMINISTRATION OF COMPENSATION

Ontario's Proposed Law, While Properly Making Employer Liable, Should Give Him Also Freedom of Choice as to Insurance

(CONCLUSION.)

Regarding the cost and the burdens of the German system after which the Ontario act is modeled the British Consul-General at Berlin in a report says:—

"A further element of uneasiness was introduced into the industrial life of Germany by the proposed revision of the German insurance schemes. The burden on German industry under the existing scheme already amounts to approximately 800,000,000 marks per annum. Under the new scheme the classes included in the various schemes have been further extended and the additional cost is calculated at 135,000,000 marks, so that the daily burden will in future amount to 3,000,000 marks per working day. A number of chambers of commerce in their annual reports complain that the social schemes which have been extended without any reference to employers are approaching the limit of a bearable burden; that the expenditure which they entail is becoming so serious a matter in the cost of manufacture that it must tell against Germany in foreign markets."

Some Industries Omitted.

In several parts of the final report of Sir William Meredith there are indications that he recognizes, to a degree, objections to State administration. For instance, the inclusion of railways in schedule 1 (Industries the employers in which are liable to contribute to the accident fund) was opposed by the three principal steam railway companies and by some of the other railway companies and Sir William Meredith omitted them from the schedule as, in his opinion, that action would "work no injustice to anyone and not less beneficially to the employees, owing to railways being excluded from the schedule." Schedule 2 includes other employers of labor besides the railways and these are liable individually for the compensation payable to their employees. Having admitted the principle of allowing some employers a freedom of action in this way, why should others be compelled to pay collectively the compensation?

The "others" are to be tied to the grouping system which has proved extremely unfair.

Mr. J. V. Paterson, previously quoted, says that under the state of Washington workmen's compulsory compensation system, his company has been arbitrarily placed in eight of the groups, namely, general construction, construction of power plants, etc., shipbuilding, logging, dry dock, electric and power plant operation, woodworking, and metal manufacturing. Mr. Paterson's company therefore has to insure not under one but under eight groups. Comparing this example with a mutual fire insurance, Mr. Paterson says:—

Grouping System is Bad.

"Some one hundred and fifty lumber and mill owners have a mutual fire insurance association in this State. They insure each other's plants, but they prudently limit their liability to $1,000 per member for each risk, and they select their risks, requiring plants of a certain high standard and owners financially safe men. Suppose such an association were to be compelled by the State to insure every mill, no matter how bad the risk, or reckless or insolvent the owner, and suppose there was no limit to the liability of the members and that a State commission would handle their business, making their investigations of risks by correspondence. Such a supposition illustrates the position in which this law has placed the Seattle Construction and Dry Dock Company."

Sir William Meredith proposes also that if the State administers the act, the compensation commissioners may exclude any one industry or more from its group. As an example, they might exclude from the boot and shoe manufacturing group, a certain boot and shoe manufacturing firm. This firm could not obtain insurance from the State. It would go to the companies and naturally they would say: "We cannot take your business. You are an isolated risk. We have no data upon which to base your rates." By allowing the State commissioners this action, Sir William Meredith again concedes, to some extent, the necessity of the employer of labor assuming individual liability—only in a case such as cited, and possibly under the suggested act, it would work very unfairly to the employer.

German System Unsuitable.

The Ontario bill is modeled after the German system of compensation. That system is practically the only one which has been in operation sufficiently long to allow conclusions of practical value to be drawn. In a memorandum submitted to Sir William Meredith by Mr. S. H. Wolfe, a notable consulting actuary, and who holds that position to the New York State Insurance Department, he says:—

"I am of the opinion that the methods now being followed in Germany, Ohio and Washington are ill-adapted to the needs of Canada or to any of the United States." Mr. Wolfe also draws attention to an important point, namely, the difference in the make-up of character in America and in some European countries. He reminds us that the manner in which the State is regarded by the citizens of Germany and their willingness to recognize its paternalistic rights would not be tolerated in this country. He adds, too, that gross inequalities would result in any country which adopted the German type without having a sufficient number of establishments to permit of a successful operation of the law of average.

The German act has also had a remarkable effect upon national character. In spite of the great advance in the methods of treating disease, in surgical science and hygienic knowledge, and in sanitary conditions generally, the length of the illness following any given accident among the classes that benefit from government insurance has increased enormously. For example, among insured persons in Germany the average length of time required to recover from a broken collar-bone is understood to be more than eight months. Formerly, in the case of young people, it was fifteen to twenty days, and in the case of older persons, from twenty to forty days. The slower cure is not due to fraud. It is due wholly to the patient's mental attitude toward his ailment.

Capital and Labor Are Agreed.

It is unnecessary here to go into further details. Sufficient information has been given, it is thought, to cause Ontario labor employers to give far more consideration individually to the subject than apparently they have done. The proposed Ontario act, as it stands, is unfair to them and to invested capital. There is no question as to justice for the worker. *The Monetary Times* freelv admits, as previously stated, that he is entitled to a good compensation law and to adequate compensation. But the employer is also entitled to consideration, more than he is given in the draft bill.

We believe that the chief defects of the bill are the feature of State administration and the absence of limitation. It is to be hoped that the Ontario government and its commissioner, Sir William Meredith, will meet these objections at the forthcoming session of the legislature. There is no dispute between capital and labor as to the fairness of compensation.

PENNSYLVANIA WATER AND POWER COMPANY

Several Canadians are Interested—Capital is Eight Millions.

Monetary Times Office,
Montreal, December 24th.

The first sale of the stock of the Pennsylvania Water and Power Company made publicly in Montreal took place on the unlisted department of the Montreal Stock Exchange on Wednesday of this week, when 25 shares sold at 67½.

President Aldred of the Shawinigan Water and Power Company is also president of the company; also President Holt of the Montreal Light, Heat and Power Company; Mr. E. R. Wood, of Toronto, and R. M. Aitken, of London, England, are on the board of directors.

Little is known of the company in Canada outside of those more especially interested in it. It is likely that the securities will be dealt in from this forward and will later on be listed on the regular stock exchange list.

Latest Statement of Assets and Liabilities.

The latest statement issued by the company shows assets and liabilities as at the end of November last.

Assets.

Plant, property and power development	$16,254,995.59
Securities in other companies	1,191,620.00
Loose plant and stores	139,702.70
Prepaid charges	19,444.03
Accounts receivable	409,135.43
Cash in banks	86,279.03
	$18,101,076.78

Liabilities.

Capital stock		$ 8,495,000.00
First mortgage 5% bonds	$9,135,000.00	
Less held in treasury	680,000.00	
		8,455,000.00
Bills payable		52,870.00
Current accounts payable		279,259.03
Contingent account		179,625.78
Depreciation and renewal account		100,000.00
Reserve and sinking fund		100,000.00
Profit and loss		439,321.97
		$18,101,076.78

The latest statement of profit and loss available is that of date of December 31st, 1912. This shows the following results for the year 1912:

Gross income from all sources	$721,883.09
Operating expenses and taxes	101,974.95
Net earnings	619,908.14
Interest on bonds	384,138.89
Surplus	235,769.25
Transferred to contingent account	50,000.00
Balance at credit profit and loss	$185,769.25

The profits carried forward at the end of the year were in the vicinity of 2.20 per cent. on the capital stock of $8,495,000.

New Units Were Installed.

The latest unit installed in 1912 only became revenue producing at the end of the year, having been put into service only in November. As the unit consisted of 16,000 horsepower it is easy to see that it will have been productive during the past year. Including the unit referred to, the total installation at the end of the year 1912 amounted to 73,000 horsepower. It was the intention at that time to install a further unit during 1913, and this has been undertaken, making the total amount available at the end of the present year 89,000 horsepower.

The company operates in the vicinity of Baltimore, in which city the bulk of the power produced is sold. However, transmission lines reach other towns in the vicinity and provide an outlet for the power produced by the company at its plant on the Susquehanna River.

◆

The money market position is fairly satisfactory, says a London cable to the New York Journal of Commerce, but the capital market is completely overloaded with new issues, actual or impending. Canada has during the last two months offered £20,000,000 worth of securities at this centre and there can be no question but what borrowing by the Dominion is being wholly overdone. The recent issue of £10,000,000 6 per cent. notes for Canadian Pacific Railroad to stockholders at 80 has brought the extent of Canadian borrowings into the spotlight. Conservative people are beginning to look around to see where the increased business and increased population is to come from to pay the rental rates for the tremendous sums that Canada has taken in recent years.

TERMINAL FACILITIES AT ST. JOHN

Shipping Trade is Growing—Railway Right of Way

(Special Correspondence.)

St. John, N.B., December 24th.

St. John is now a Canadian Atlantic mail port. In former winters the mail steamships called at Halifax and landed their mails and some passengers, and then came on to St. John to discharge and take on cargo and passengers. This winter Canadian Northern liners and two steamships of the Allan Line are carrying mails direct to and from St. John.

The shipping trade of St. John has grown faster than terminal facilities have been provided. This caused congestion towards the close of the last winter season, and similar conditions are anticipated this winter, although the facilities have been considerably improved during the year.

For Railway Traffic.

The most important move was made in connection with the development of terminal facilities at Courtenay Bay since seventy acres were purchased as a site for terimnals for the Grand Trunk Pacific, when plans were filed for a right of way one hundred feet wide from a point a little over a mile from the city, on line of the Intercolonial Railway, to a point on Courtenay Bay. It is estimated that this right of way will cost between $150,000 and $200,000. Nearly all of the property needed is under option, but some must be expropriated. It is believed that this action has been taken in order that the St. John Valley Railway may come to terminals at Courtenay Bay; and, as the St. John traffic of the Grand Trunk Pacific is expected to come over the St. John Valley Railroad, this spur would be used in connection with the traffic of that road as well.

Grand Falls Company's Proposals.

The Grand Falls Company, Limited, will begin work soon and erect large pulp and paper mills at Grand Falls on the St. John River, where immense power can be developed, and where it is proposed by this company to build up an extensive industry. It will be possible to develop electric power at Grand Falls and transmit it long distances to towns and villages along the river. Sir William Van Horne is associated with this enterprise. Various companies have secured rights and powers at different times with a view to development such as is now proposed, but for one reason or another nothing practical was accomplished.

SMART-WOODS ABSORBS EMPIRE COTTON MILLS.

At a meeting of the shareholders of the Smart-Woods Company held at Montreal the Empire Cotton Mills was formally taken over by the Smart-Woods Company, which already held the controlling interest.

Lieut.-Col. C. A. Smart, president of the Smart-Woods Company, stated after the meeting that the Empire Cotton Mills would continue to do business under the same name, but would become one of the five properties of the Smart-Woods Company.

Col. Smart said that the mill is doing well, and 50 per cent. of its machinery is already in operation and turning out fine stuff.

Another meeting is to be held on Monday next, when a two million and one-half bond issue will be discussed. This bond issue would be at the rate of 6 per cent., and would be secured by all five properties of the company. The money procured would be used in improvements to plant and in other ways.

The Empire Cotton Mills Company, which is now a part of the Smart-Woods Company, is situated at Welland, Ont., and was constructed less than a year ago.

PRINCE EDWARD ISLAND FOX FARMS.

The progress of the Prince Edward Island fox farming industry is shown in the following figures:

Companies chartered in Prince Edward Island	$14,930,900
Companies chartered elsewhere, estimated	500,000
Non-incorporated ranches, estimated	3,750,000
	$19,180,900

Two companies having their ranches in Prince Edward Island obtained charters in Maine and Nova Scotia respectively, the two having a capitalization of approximately $500,000.

◆

The Toronto Paper Manufacturing Company, Limited, will reduce its dividend of December 31st from 2 per cent. to 1½ per cent., putting it on the yearly basis of 6 per cent., as against 8 per cent. as formerly. The directors have decided upon the reduction for the present at least, owing to the unsettled condition of trade in general.

VALUE OF LIFE INSURANCE

XLIV.

Reinsure Your Insurance

BY C. A. HASTINGS.

Last week's article showed how any man can relieve his wife and family of all monetary anxieties by shifting the responsibilities on to a life office of repute, and pointed out in this article are some more details in connection with the same plan of insurance.

Any one may die prematurely and therefore it is possible for a wife to live more than 20 years after the death of her husband, in which case we must take care of that event as well, and it can be guarded against in the following manner.

Making Provision Doubly Sure.

For the sake of example, take for granted that Brown has decided to purchase an annuity of $1,200 per annum to take effect for 20 years, on a monthly basis, as described previously. Nevertheless, he wishes to make doubly sure of his wife being protected for all time; he therefore buys, in addition to the annuity already purchased, a policy that will provide the sum of $10,000 cash at the end of the 20 years, that is to say immediately after the payment of all the annuity instalments payable for 20 years. He accordingly purchases $5,500 more insurance on the same plan—namely, whole of life with profits, and pays the same rate of premium for this as he does for the other.

Many Canadians Could do This.

To summarize, Brown has purchased $18,000, plus $5,500, or in total figures, $23,500, at the rate of 2¾ per cent., which will guarantee his wife and heirs a monthly income of $100 for 20 years, and then a cash sum of $10,000, making a grand total of $34,000, to say nothing of bonus additions, which if purchased from a company paying at the rate of 1½ per cent. per annum would produce a further sum of about $10,000—should Brown die at the end of 30 years—having deposited in annual instalments approximately only $18,600.

In short, $44,000 in return for $18,600, and there are many men to-day in Canada who could easily afford to follow Brown's example and put on one side the sum of $620 annually—in fact to whom such a sum would never be a burden or cause any temporary embarrassment.

◆

WESTERN FIRM OPENS LONDON OFFICE.

Messrs. J. H. C. Willoughby Sumner Company, of Saskatoon, have opened a permanent office at Trafalgar House, Waterloo place, London, England.

This branch will be under the personal management of Mr. A. J. E. Sumner. This company is in a position to furnish information upon all types of Canadian investments. This company states:—

"An extended field exists at present for investment in first mortgages upon freehold lands and buildings for fixed periods of three to ten years. No advance is asked or recommended upon more than 40 to 45 per cent. of the appraised value of the buildings.

"From agreements for sale, an exceedingly high rate of interest, averaging 12 to 15 per cent. can be obtained with perfect safety over one or two years in this manner.

"Large profits have been obtained from the cautious and skilful purchase of farm lands and central property in growing established Canadian cities during the past ten years."

SUBSIDIZE GOLF COURSES

Suggests Finance Minister White, While Telling Insurance Company Presidents of Canadian Investment Field

To the presidents of United States life insurance companies assembled for their annual meeting at New York, Hon. W. T. White, Canada's minister of finance, extended an invitation to look towards Canada as a fine field for the investment of their surplus funds.

Mr. White dwelt on the obligations of trusteeship which should animate, and generally does animate, those entrusted with the administration of the affairs of insurance. If he might give any advice, he added, it would be that the insurance companies should inaugurate a campaign to prolong life. Great progress had been made in saving children, he admitted, but too many business men broke down at 35 and 40. Business life on this continent is too strenuous, he added, and the insurance men should use their best endeavors to have people sleep more, eat less and play more. He was not sure, he said, that governments would not do more for the human race by subsidizing golf courses than by aiding the building of more railroads.

Field for Investment.

"It would never do," he said, "if I did not improve this occasion, with Scotch prudence and forehandedness, to call your attention to the surpassing excellence of Canada as a field for investment of your surplus money. It seems to me that I have heard less of financial stringency—of course, I have not come down on business—down here in New York than possibly you have, but your surplus money—and if you have it not now, why you may have it in the near future—cannot be put to better or more productive or profitable use than in investment in that great Dominion to the north. Not so many years ago, when we came down here we found that the Americans looked upon Canada as we to-day look upon Labrador, but that time has gone by.

Of a Great Country.

"When the United States had the same population that we have, settlement had just crossed the Alleghenies—no steamships, no railroads, no telephones, no telegraph, no West. Now, we have the same population that you had at the beginning of the last century, but the country is settled from the Atlantic to the Pacific. We have three transcontinental lines of railway, with a railway network in each province. We have the same area as you, capable of sustaining as large a population as that of the United States. Some of it, to the far north, could hardly be described as good, arable land, even in a prospectus, but we have a country as great, potentially, as your own.

Expansion of the West.

"Take our three prairie provinces. We used to give you good Canadians, but now we are getting back good Americans. Ours came from the East, yours are going into our West. Some of the most practical citizens, the best Canada has to-day, are the Americans. We received last year no less than one hundred and forty thousand. You may not have informed yourself of the extent of our western territory. Manitoba, Saskatchewan, Alberta, three provinces, have each a larger territory than modern Germany, less than ten per cent. under cultivation. This year they had a crop of over two hundred million bushels of wheat. I draw your attention to that country. You cannot get better security than you will get in Canada—western or eastern Canada. You cannot get any country where contracts are more faithfully regarded or obligations more carefully safeguarded by law than in Canada."

◆

WATSON GRIFFIN GOES TO INDIES.

Mr. Watson Griffin, industrial commissioner of Brandon, has been selected by the government at Ottawa to visit the British West Indies as special commissioner of the department of trade and commerce to investigate the possibilities of developing Canadian trade with these countries. The minister of trade and commerce desires to develop new markets for both Canadian food products and Canadian manufactured goods and to cheapen the cost of those tropical foods and materials which Canada cannot produce, by encouraging direct importations from the colonies with which the Canadian government has recently made preferential trade agreements.

Mr. Griffin will probably leave Canada for the West Indies early in the new year. He will visit all the British West India islands and British Guiana in South America. Mr. Griffin has occupied prominent journalistic positions at Toronto and Montreal, and is the author of several books and pamphlets on various Canadian questions.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Kaministiquia Power Company.—This corporation proposes to increase its authorized capital stock from $2,000,000 to $2,500,000, and will make an issue of about $200,000 to defray the cost of an additional installation of 12,000 horsepower.

The company in the year recently closed showed gross earnings of $302,741, as compared with $243,886, an increase of about 24 per cent. The increase in operating expenses was slight, and net amounted to $262,638, against $212,197, the preceding year. The amount available for dividends was $180,039, an increase of $50,843, or about 40 per cent.

Dominion Trust Company.—Dominion Trust Company's stock is to be listed on the Montreal Stock Exchange, and it is expected it will be called early next week. The Montreal Trust Company will act as registrar and the transfer agency will be in the Dominion Trust Company s office.

The Dominion Trust Company is a good example of the growth of western Canada's financial institutions. Established in Vancouver in 1906, this company now has a paid-up capital of over two million dollars, and a rest account of eight hundred thousand.

This will be the first trust company stock to be included in the Montreal open market.

Calgary Power Company.—For the 11 months ending November 30th, 1913, this company shows satisfactory increases over the corresponding period of last year in both gross and net earnings, as will be noted from the following:

	Gross earnings.	Net earnings.
1912	$178,486	$145,583
1913	213,672	171,318

The fourth unit at Bow Falls is now practically completed and everything will be ready to commence generating power from this additional unit early in December. By the installation of the fourth unit the capacity of this plant is increased to 19,000 horsepower.

Dominion Bridge Company.—Net profits of $832.778, representing 18.8 per cent. on the common stock, was reported at the annual meeting of the Dominion Bridge Company.

These were disposed of as follows: $5,750 in bonuses voted by shareholders, $565,699 in dividends, $153,053 was added to reserves and $15,714 written off organization expenses, and $92,561 was carried forward to profit and loss, bringing that account up to $409,276, against $316,715 the previous year. Reserve accounts have been increased from $619.393 to $756,870.

Business entered during the past year totalled approximately $6,500,000, and the gross value of the contracts charged up as fully completed and considered in the profit and loss statement for the past year is $5,621,010, while work to the approximate value of $8,650,000 is being carried forward into the new year, on which expenditures amounting to $5,446,471 have been made.

Ready's Breweries, Limited.—The annual statement of Ready's Breweries, Limited, a St. John, N.B., concern, which was reorganized about a year ago, shows a net profit for the year ended October 31st of $45,716.

Interest charges for the year amounted to $16,786, $2,000 was set aside for sinking fund and $5,000 for bond redemption fund; $1,786 was appropriated for organization expenses; $126 was reserved for bad and doubtful debts and a reserve and depreciation account of $2,000 was set up. After all these deduction a balance of $18,735 remained for dividends.

The full dividend of 7 per cent. was paid on the preferred stock of $121,500, leaving $10,450 available for the common stock, or about 8.6 per cent. on the $121,500 issued. On this a dividend ot 3 per cent. was paid, leaving a balance of $6,815 to be carried forward.

The balance sheet shows accounts payable, which represent the only liabilities other than those to bondholders and stockholders, amount to only $8,948. Accounts receivable, after provision for bad and doubtful debts, amount to $35,296, stock in trade to $46,499, casks, etc., $15,000, and the company has cash on hand and in bank of $22,887. Real estate, plant, etc., are set down at $417,262, making total assets of $536,946.

PERSONAL NOTES.

Mr. E. G. Pratt, assistant general manager of the Molson's Bank, will succeed the late James Elliot as general manager of the institution.

Mr. George D. Perry, general manager of the G.N.W. Telegraph Company, has been elected vice-president of the Toronto Carpet Manufacturing Company, succeeding the late Dr. Charles S. Murray.

Mr. James Patton, who was sales manager of the Canadian Cereal and Flour Mills, Limited, Toronto, will shortly move to Montreal, where he will take up his new work on the sales staff of the St. Lawrence Flour Mills, Limited.

Mr. J. B. Sutherland is to take charge of the agency department of Messrs. Macdonald, Marpole and Company, of Vancouver, British Columbia. For the last five years Mr. Sutherland has held an important position in comptroller's department of the British Columbia Electric Railway Company.

NORTHERN CROWN BANK'S PROGRESS.

The policy of the Northern Crown Bank, one of the most progressive of our chartered institutions, was well described at the annual meeting of that institution by Sir D. H. McMillan, the president. The bank has in liquid assets the large sum of $7,710,000, being 52 per cent. of its deposits and 42 per cent. of its total liabilities to the public. In other words, it could pay more than half of its deposits on demand, should the necessity arise, without calling in any of its $12,000,000 of current loans.

"It may occur to some," said Sir D. H. McMillan, "that we have erred on the safe side by keeping so much money in a liquid or immediately available condition, but in view of the extreme financial stringency that has existed for some time, and in view of the fact that the bank is young, it seemed to your directors to be in the best interests of the shareholders to keep the reserves at a figure that would make it quite independent and easy under any circumstances that might arise. It is gratifying to be able to state that at no time during the past year has any difficulty been experienced in maintaining this position. As a matter of fact, it was not our intention to come to you with a statement showing 42 per cent. of our liabilities, for we do not think it necessary to carry such heavy reserves, but having kept our reserves up to a high point through the year, we found ourselves during the last three months, face to face with an unusual influx of money caused by the rapid liquidation of loans and increase of deposit in the west, combined with an accumulation of funds through the expansion of our note issue during the movement of the crop, which placed us in the position we now occupy. While maintaining this position of high reserves, we have nevertheless been able to make profits of $281,000, which is only $10,000 less than we made last year under the more favorable conditions which then prevailed. We make no apology for this comparatively small difference. You have seen in previous years the very high earning power we have under normal conditions, and the statement now before you is an evidence of what the bank can do in the way of strengthening its position when occasion arises."

The net profits of the bank for the year ended November 29th totalled $281,167. Payment of substantial dividends and contributions to the reserve contingency and pension funds, a reserve of $10,000 for depreciation in securities and a reserve of $40,000 for unearned interest, absorbed $370,563, leaving a balance of $99,276 to be carried forward.

The bank now has capital stock paid in amounting to $2,811,804 and a reserve fund of $350,000. Its deposits have reached the substantial sum of $14,732,865. Its influence in the western financial field is illustrated to some extent by its large amounts of current loans and discounts in Canada, totaling $12,890,873. The bank has a capable general manager and excellent directorate, and has come through a trying year generally in a most satisfactory manner.

Premier Sifton stated that the sum of $3,600,000 had been placed to the credit of the provincial government in the Imperial Bank at Edmonton as the proceeds of a loan sold to the firm of Messrs. Spencer, Trask & Company and some New York associates.

Fire Chief Melhuish's (of Brandon) report showed that for the year ending November 30th, the department had received 122 calls, of which two were false alarms and three were outside the city limits. This was 38 more than last year. The total loss was estimated at $27.680, being $4,070 more than for 1912. Excepting for the heavy loss occasioned by fires at George White & Company's, the Windsor Hotel, and the Manitoba Government telephones' building, the total was small. In the report it was stated that during the last four and a half years there had been 474 fires here with a loss of $100.550.

OPPORTUNITIES FOR EUROPEAN INVESTORS

Funds Must be Placed Through Reputable Firms—Good Returns Obtainable

The money stringency in Europe, principally brought about, as far as I can see, through the Balkan trouble, undoubtedly brought about a reaction in Canada owing to the fact that money came in less abundantly, industries, land propositions, real estate and mortgage deals consequently suffered. People on the other side realize more than ever that Canada is a borrowing country and will be a borrowing country for several years to come. This situation opened the eyes of many investors and showed them that Canada is not yet as far advanced as some of them might think it is; and to build up its great future it has still to depend upon an inflow of money.

I explained to those interested in Canadian matters, such as bankers, financial brokers, etc., in the Netherlands, provided the basis of a country is solid, people who have money and who wish that the money which they have available should bring them good revenue, should not hesitate in sending their money to a country which has a sound foundation, which foundation is based upon the riches of the soil, not only for agricultural purposes, but also as far as the mineral part is concerned.

Will Prove Good Investment.

It is merely a business proposition, and people on the other side of the ocean should understand that it only requires money and labor in Canada to produce a good revenue from their capital invested, says Mr. L. D. Fortuyn, managing director of Netherland Transatlantic Mortgage Company of Winnipeg, which has also a European office at Amsterdam.

The basis must be sound, however, and that those who are interested and will be interested in Canada can rest assured that such is the case with the Dominion of Canada, provided, of course, the money which they send over is entrusted to men, firms, or friends who are trustworthy and capable. They should be men who understand the situation and who know the country.

It may be taken for granted that those men will fully realize their responsibility and will act with the necessary carefulness and conservatism, and will be fully equal to this responsible task.

There has been much talk on the other side about the trade balance of Canada and about the total import being so much higher than the total export, but those who take this argument to Canada's disadvantage, in my mind, were not fully conversant with the situation and did not know that Canada is still too much in its making to guarantee a more favorable trade balance. Those people were disappointed because apparently they thought that Canada was in a more advanced stage than it really is.

When in Holland, though I could not deny that in some cases there was some truth in the unfavorable reports as to the speculative tendency, I pointed out that things were exceedingly exaggerated, and the rumors only could originate from some special cases, though on the whole there was no reason for mistrust by people on the Continent. In a way, it is certainly a good thing that money has been tight for awhile, because it shows the people interested in the real estate business in Canada that the source of money cannot always flow, and therefore capital sent to this country for investment purposes should not be abused for speculating purposes on an unsound basis.

Co-operation in Protecting Credit.

This money tightness has done away with a lot of unsound business transactions and it is sincerely to be hoped that the present state of affairs has been a warning, so that transactions without a sound and business-like foundation will belong to the past. Canada in its present stage wants a great deal of credit still, and it is only through fair deals that such a credit can be maintained, and this credit can be easily spoiled by deals which lack of business-like and sound principles, and by too optimistic ideas as to the future.

The good crops have contributed a great deal to restoring confidence, and before long those who intend to invest their money in this country, either direct or through buying bonds and debentures issued by concerns on the other side who do business in Canada, will not hesitate, because there are any amount of sound opportunities for the investor to produce good revenue.

I have great confidence in this country, with its splendid opportunities, and I only hope that Canada's citizens will cooperate in trying to keep up the Dominion's reputation as the land of hope and of unlimited possibilities for those who want to work and who are willing to display the necessary energy and initiative, whilst for the investor it should be the land of good and safe securities with satisfactory revenue.

◆

Messrs. Oswald Brothers of the Montreal Stock Exchange will open a branch office in Quebec early in the new year. Capt. B. J. D. Auckland will be manager of the new branch.

IRRIGATION IN SOUTHERN ALBERTA

Engineer Reports Satisfactory Progress—Canal System Can be Enlarged

The Southern Alberta Land Company, Limited, has issued a general report on the operations of the company to date, based on information received on December 1st from Mr. D. W. Hays, the chief engineer. This report is intended to serve as the basis for future reports. A map, illustrating the report, is in course of preparation. The local management have been collecting data, and will submit to the board in due course final estimates for the completion of the work.

The report recalls that in July, 1912, an accident occurred at the intake and dam. The consulting engineers, who were called in at that time, were requested, in addition to advising as to the repair of the damage at the intake, to report on the undertaking in general. Their reports recommended various modifications and improvements and other works necessary for the completion of the project.

Nearly Two Hundred Thousand Acres.

As part of a general programme of work, a new structure was designed to replace the old intake and that part of the weir which failed. At the present time this reconstruction is practically completed and will be serviceable for operation by January, 1914. Good progress has been made in the other sections of the irrigation system during the past season.

Surveys have been conducted throughout the summer to ascertain the area of irrigable lands and to plan an estimate on the cost of irrigation for the various sub-districts within them. From preliminary estimates a total area of 197,000 acres is considered to be irrigable. It is proposed to commence the construction of lateral ditches during the early spring, so that a system for the irrigation of, say, 25,000 or 30,000 acres may be available during 1915. The company has bored seven gas wells. Gas has been found in two of these—one at Suffield, which is producing approximately 250,000 cubic feet per twenty-four hours, and the other near the Bow River, in the southern portion of the Bungalow District, which produces 14,000,000 cubic feet per twenty-four hours. The well at Suffield, while small, is ample for any immediate requirements of that town. It is intended to re-lay part of the pipe lines, install meters and sell the gas to consumers from 1st January, 1914.

Development of Land is Slow.

It is hoped that water may be turned into the reservoir during the coming summer. The canal system, while probably much too small for the ultimate requirements, can be enlarged without interrupting the flow of water, and this work may be undertaken at any time as required. The entire main canal system from the south dam to the western boundary of the irrigated lands will ultimately require enlarging. Development of irrigated land is slow, and until such time as the irrigation will actually require the increased quantity of water, it is proposed to utilize the present constructed ditch as far as possible. By the use of excavators or floating dredges it will be possible to make any enlargements in the future in an economical manner. During the winter of 1914 every effort will be made to put that part of the main canal, from the south dam through the Little Bow reservoir, to a point on the old canal immediately below drops 1 and 2, in working condition, so that water may be available to the lands by the year 1915. It is intended during the coming year to construct a lateral system for twenty-five thousand or thirty thousand acres; then to extend from this as the demand for irrigated land may require.

SHOULD SAY "GOVERNMENT REGISTERED TITLE."

Secretary Griffith, of the High Commissioner's office in London, questioned with regard to the criticism of the London Financial News, under the caption "Freeholds of Canada, Does the Dominion Government Really Guarantee Security?" stated that while his office had exercised the greatest care in looking into statements where the Dominion Government was introduced unwarrantably, they obviously could not undertake to correct all the misrepresentations which appeared. Such interference would be unworkable, as in the case of an oversight it could result in claims for damages being made. There was no law existing to check ill-advised and misled people from acting against their own interests.

The criticism referred to a suggestion that a statement ought to be made on this side denying or confirming the statement in a circular of a Medicine Hat land company that the Dominion Government guarantees not only the title but the security afforded by the land for purchase money invested.

Mr. Griffith said the ground he took was that if the title had been granted by the Government the claim of the company might be justified on the ground that the title was officially registered under the Land Titles Act of the Provincial Government. The possessor of such a title was absolutely secured under the above Act, but there might be a misuse of terms in the claims of guaranteed security. The words "Government Registered Title" would in his opinion more correctly describe the position. The question of the value of the land secured would not arise so far as the Government was concerned.

SUN LIFE'S RECENT ACQUISITION

It Reassured the Business of Two Companies—Difficulties in the Insurance Field

An agreement has been concluded whereby the total policies of the Home Life Association of Canada are to be reassured by the Sun Life of Canada, which will take over, at a satisfactory valuation, the assets of the Home Life and assume its liabilities, as previously noted in *The Monetary Times*. The provisions of the Dominion Insurance Act require that notice be given to policyholders and shareholders and the consent of the government treasury board obtained, before the reassurance goes into effect; but upon the completion of these formalities certificates of reassurance and guarantee will be sent to all Home Life policyholders, to be attached to their policy contracts.

The completion of this agreement will be a source of much satisfaction to the friends of both companies.

In a statement on the matter, the Sun Life Company says:—"The interests of the Sun Life policyholders have been carefully safeguarded, while the position of the Home Life policyholders will be immeasurably improved. The safety of their policies has been put beyond question, as there are now placed behind them the enormous resources of the Sun Life of Canada. They can now look forward to the time when they will receive profits, and handsome profits, on their assurances. The policyholders of the Sun Life of Canada, who know how very excellent are the profits paid by their company, will appreciate how sincerely the policyholders of the Home Life are to be congratulated on this improvement in their prospects; and on behalf of the Sun Life of Canada we heartily welcome our new friends to our ranks as members hereafter of the great Sun Life family.

Previous Reassurance Benefited Policyholders.

"The taking over of the business of the Home Life means the acquisition by the Sun Life of Canada of assurances of a volume slightly under $5,000,000, an annual premium income of about $200,000, and assets of over $1,200,000. This is, of course, an important addition to our business, but some idea of the vastness of the business of the Sun Life of Canada may be obtained when it is considered that the total assurances in force in the Home Life are only about one-seventh of the new business which will go upon the Sun's books during 1913.

"The experience of the policyholders of the Royal Victoria Life Insurance Company, which was reassured by our company three years ago, augurs well for the policyholders of the Home Life. The Royal Victoria policyholders had never received a dollar in profits during the sixteen years of the company's existence, and in view of the heavy impairment of capital, they would probably have not received a dollar in profits for another sixteen years. Under the Sun Life management, however, the 'Royal Victoria branch' soon got on its feet, and profits have begun to accumulate from the date of the transfer and every policy which has been entitled to participate in profits since then has received substantial and very satisfactory allotments.

Sun Life Was Once Young.

"Another important result is that, with other assets taken over, we secure one of the handsomest and most centrally located office buildings in Toronto. It has long been felt that the Sun Life of Canada, as the largest and most important life company of the Dominion, should be worthily housed in a building of its own in that great centre. The old Home Life building will soon change its name and become the headquarters of the Sun Life for Western Ontario.

"The Home Life's experience emphasizes the difficulties which now confront a new company in the effort to establish itself in these days of keen competition when the field is already so completely occupied by old, strong and prosperous companies. Even with the best of management a new company cannot hope to accumulate a surplus from the profits of its life business for several, probably many years. The prospects of profits to either policyholders or shareholders in such a newly established office are not as a rule encouraging. We say this sympathetically, for we were once young ourselves, but times have changed and facts are facts."

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station for the week ended December 19th, 1913:

Cobalt Comet Mine, 59,960; Cobalt Lake Mining Company, 125,130; McKinley-Darragh S. M., 257,310; Nipissing Mining Company, 370,740; La Rose Mines, Limited, 166,680; total, 979,820. The total shipments since January 1st are now 39,949,493 pounds or 19,975 tons.

The shipment from New Liskeard for the week ended December 19th was: Casey Cobalt Mines, 55,507.

The shipment from Elk Lake for the week ended December 19th was: Miller Lake O'Brien Mines, 55,200.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

HOW BANKERS SEE WESTERN CONDITIONS

Municipal Borrowings and Legislation — Powers of Trust Companies—Anticipated Improvements

The report of the Western sub-section of the Canadian Bankers' Association to the parent body states:—

The action taken in December last with the view to the checking of the heavy and increasing expenditures of western municipalities on public works, often entered upon without reference to their bankers and without making any adequate provision for the meeting of the obligations to result therefrom. Resolutions were adopted, recommending that branches carrying municipal accounts should be instructed by their respective head offices or superintendents to come to a definite understanding with their clients that no expenditures for public improvements would be undertaken until the programme had been submitted to them and the necessary financial arrangements made, and, further, that they should take no part in the financing of expenditures for public works in districts outside the reasonable limits of a municipality.

As to the question of the regulation by some central authority of the capital borrowings and expenditures of western municipalities, the western bankers unreservedly endorse the proposal that steps should be taken to constitute a competent tribunal in each province, the function of which would be to pass upon each proposed issue of securities, having regard to the surrounding circumstances, and which would have power to prevent its being offered, if it were not approved by them. Also, the desirability of the enactment of legislation under which municipalities would be enabled to make their assessments for taxes earlier in the year than is now practicable, so that they may be in a position to prepare their estimates of revenue, decide upon their expenditures, and arrange for the meeting of their credit requirements with definite information at hand, instead of upon such indeterminate data as, under present regulations, is now only available to many.

It is believed, too, that advantage would accrue to municipalities if their power to encourage the prompt and to penalize the tardy payment of taxes were considerably enlarged. At present, with some exceptions, they are debarred from allowing a discount of any kind for early settlement, and the only penalty for delinquency now allowed to be imposed, having once been incurred, the debtor cannot be further prejudiced by continued default until a considerable additional time has elapsed.

So-called Trust Companies.

Steps have been taken during the past year to ensure the careful watching of proposed legislation in the provinces of Saskatchewan and Alberta and the prompt notification of the requirements of that which becomes effective from time to time, as has been hitherto done in Manitoba.

Another matter discussed was the wide powers granted to the so-called trust companies, which were being formed in such large numbers throughout the west, and which powers were being so largely added to, in some cases, as to include practically any act and the conduct of any business that a company could, under any conceivable circumstances, find it convenient to perform or engage in. Some of the powers given might, in certain eventualities, prove to be seriously inimical to the interests of the general public, as they are already in some degree, to the chartered banks, upon whom are placed restrictions that are not made to apply to these trust companies and private banking firms. This matter was thought by the western bankers to be of more than local importance.

Some Anticipated Improvements.

The new powers given by the Bank Act, under which advances may be made to farmers on the security of their threshed grain, will prove to be of advantage, if it tends, as it is expected to do, to the steadying of the market and the easing of the pressure on the railroads, for the low prices and traffic congestion are almost inevitable when it is attempted to sell and forward the whole of a crop during the few weeks intervening between harvest and the close of navigation.

In common with all other communities the west has felt the effects of the world-wide financial stringency. One marked effect of it has been the placing of a decided check upon real estate speculation, which had previously attained to large proportions. In this direction, the scarcity of money has had an influence that is believed to have been entirely beneficial upon the ultimate future interests of the west as a whole.

◆

INSURANCE ACT IN SASKATCHEWAN.

An insurance act for Saskatchewan is passing the provincial legislature. The licensing of all insurance companies, lodging of deposits, the administration of same, resident agent's clause, issuance of certificates of authority to agents and the requiring of the license fee from underwriters' agencies and the regulation of their policies are outstanding features of the bill. The question of insurance of the person has been left over until next session, the act aiming at the improvement of present conditions. By the terms of this act, Dominion licensees are scarcely affected. Deposits are required from fraternal societies whose head office is outside of Canada. All fraternals must pay a license fee and must be registered in the province.

PULP AND PAPER ON PACIFIC COAST

Amalgamation of Interests—Three and One-Half Million Bond Issue—Large Salmon Pack.

(Staff Correspondence.)

Vancouver, December 13th.

An amalgamation that means much for the pulp industry in British Columbia has been effected to include the Ocean Falls Company and the Quatsino Pulp Company of this province, and the Crown Paper Company, of Portland, Oregon. This merger might be said to have arisen out of the financial difficulties in which the Ocean Falls Company found itself, and was engineered by Mr. I. Hamilton Benn, M.P., of London, who spent some time at Vancouver in connection with the company's affairs and is now on his way from London to San Francisco to consummate the deal. The principals in the matter are Messrs. Herbert Freishhacker and Mortimer Fleishhacker, and William Pierce Johnson, all of San Francisco, who are interested in the Crown Paper Company and the Quatsino Pulp Company, Mr. Herbert Fleishhacker being president of the first-named concern. In addition to his pulp and paper interests, Mr. Mortimer Fleishhacker is president of the Anglo-London and Paris Bank of San Francisco, while Mr. Johnson is president of the National Bank of California. This group has agreed to guarantee fifty per cent. of the bonds of the Ocean Falls Company in addition to the guarantees on the property, and to spend $3,000,000 on developing the plant and in erecting a paper mill at Ocean Falls. This will mean a big industry at that point on the coast, and possibly development of the holdings at Quatsino Sound.

Capital for the Lumber Industry.

The pulp and paper industry is gradually coming to the fore in British Columbia. A large and active concern is the Powell River Pulp and Paper Company, which has a large investment at Powell River. The principals are Messrs. M. J. Scanlon and D. F. Brooks, of Minneapolis. This company lately increased the capacity of its plant, and may make more additions. A pulp mill and sawmill in connection was built at Swanson Bay a few years ago, but has been shut down for the past two years or so. This is a big plant, and the holdings of 83,000 acres contain some of the best pulp timber to be found anywhere. British capital is interested in this also.

The British Canadian Lumber Corporation, the principals of which are Montreal people, has arranged for a bond issue of $3,500,000. The bonds are to be deposited with a trust company as security for an eight per cent. note issue for the term of three years, amounting to $3,600,000. The directors asked for a minimum subscription of $1,000,000, and this was over-subscribed by the shareholders. This company made a payment of $200,000 on November 15th on timber purchases, and will pay another $500,000 on January 1st. All outstanding current liabilities may now be paid off and a working capital provided of $700,000. The company has a large mill in Vancouver, and a new plant at New Westminster, with a mill on the Little Slocan River, not far from Nelson.

The reorganization of the Progress Club, with the object of unifying public service bodies in Greater Vancouver, has been successful in so far as obtaining members, and the outlook is that a permanent and strong organization will be effected. There may be some difficulty in adopting the name of chamber of commerce, since the Vancouver board of trade has first right to this name. A temporary directorate has been appointed.

Grain Exports Grow.

Export of grain is steadily becoming a greater feature of shipping out of this port. There has been a grain exchange in existence in Vancouver, but offices are now being opened and every effort will now be made to augment the business. In 1912 three million bushels were exported to the Orient, and there are large possibilities in this trade. California is making enquiries about Canadian wheat, and it is hoped with favorable rates a considerable amount will be shipped south. The grain exchange has just elected new officers as follows: president, Mr. J. E. Hall, of the Vancouver Milling Company; vice-president, Mr. C. S. Meek; treasurer, Mr. James Sclater; secretary, Mr. C. P. Fegan. It is expected that as occasion arises elevators will be built on Burrard Inlet on the Fraser and at Port Coquitlam.

Salmon fishing on the Fraser in 1913 was the best for eight years, the pack amounting to 732,059 cases. Perhaps one of the reasons for this, in addition to the fact that this was the year of the big quadrennial run, was that the close season was not observed. This action was decided upon, as well as last year, because no close season is observed in Puget Sound, despite a mutual agreement to that effect. While the pack on the Fraser was much larger than in 1912, when it was 173,921 cases, it was smaller in other districts. In 1912, on the Skeena 254.258 cases were packed, while this year there were only 164,055 cases; Naas River, 137,697 and 53,423 cases, respectively; outlying districts, 359,638 and 336,268 cases, respectively, and Rivers Inlet, 71,162 and 68,096 cases respectively.

POWER DEVELOPMENT AT CALGARY

Possibilities of Elbow and Bow Rivers—Calgary Power Second Installation—City's Future Requirements.

(Special Correspondence.)

Calgary, Dec. 23.

In the last annual report of the Calgary Industrial Bureau, it was urged that steps should be taken by the city to secure cheaper power for the manufacturer and other users, and an investigation was suggested as to the possibilities of the development by the city of water power in the Bow river tributary to Calgary. At the annual meeting of the Bureau this week, the executive report referred to the question in this way:—

"While it cannot be claimed that the city authorities have taken very aggressive steps in that direction, it is gratifying that extensive investigations which have just been completed by government engineers, under the direction of Mr. J. B. Challies, superintendent of the water power branch of the department of the interior, as to the power possibilities of the Bow and Elbow rivers within feasible transmission distance of Calgary, show that in the Bow river alone it is economically feasible to so regulate the flow as to warrant the development at four power sites, of over 40,000 dependable 24 h.p., all within 50 miles of Calgary. This, of course, means at least 60,000 h.p. at peak load periods."

Supply for Half-Million People

"The Calgary Power Company has completed an installation at Horse Shoe Falls of a maximum output of 18,000 h.p., which is mainly transmitted to Calgary and sold for manufacturing purposes. This company will within a few weeks have a second power installation completed at Kananaskis Falls, capable of an additional maximum output of 11,000 h.p. With these water powers developed, there would, if the government figures are correct, be 70,000 h.p. available in the Bow river alone, or ample for the requirements of a city of half a million people.

"Fortunately, a well considered and cautious policy of water power administration has been determined upon, and regulations put in force which afford considerable protection to the public in the way of rentals, control of rates for power, limited grants, etc., which at the same time provide sufficiently attractive opportunities for investments of capitalists.

Importance of Cheap Power

"Furthermore, the importance of cheap hydro-electric energy to the domestic and industrial activities of this section of the west, has induced the government to reserve all land contiguous to power sites on the Bow and Elbow rivers to be disposed of only under power regulations. The future of Calgary depends to a very great extent on the supply of dependable hydro-electric energy; and it is a satisfaction to know that not only is this supply assured in satisfactory quantities, but the government has exercised sufficient foresight to inform itself fully of the latent power possibilities under its control, and at the same time put into practice a progressive policy of power administration."

◆

BANK OF HAMILTON

The report of the Bank of Hamilton shows that it has strengthened considerably its position, which had already been placed on an enviable plane. As at the close of business on November 29 last, the bank shows total assets of $46,327,000, of which $14,809,821 are in liquid form. The reserve has been increased during the year by $100,000, to $3,600,000, and is $600,000 in excess of the paid-up capital. The earnings of the bank, after the usual provisions, amounted to $498,273. This compares with $495,860 earned in 1912, and $443,506 earned in 1911. The net profits of the year were at the rate of 16.6 per cent., a slight gain on 1912, when they were 16.53 per cent. The bank's dividend of 12 per cent. took $360,000; there was carried to reserve from profits $100,000, and to depreciation of securities $100,000, and to pension fund $34,529.

◆

The Western crop totals in all its grades and grains some 300,000,000 bushels. There has been an appreciable extension of the wheat acreage during the year, and greater extensions will show next spring. In a decade from the present date, the North-West should be producing 500,000,000 bushels of wheat. Russia produced this year 873,751,000 bushels of wheat; barley, 549,071,000; oats, 1,306,657,000. Lord Strathcona said recently that the West would shortly, in his opinion, be producing 500,000,000 bushels, with a population of 5,000,000, that would need the Canadian Pacific Railway to produce almost 150,000 freight cars to handle its share of the crop. It has now something like 87,000 cars, and there are constant additions being made the year round to this grand total; but the advent of the Grand Trunk Pacific and the Canadian Northern will make it possible to overtake the demand, however large it may be.

CANADIAN BANK OF COMMERCE.

Another of Canada's prominent financial institutions, the Canadian Bank of Commerce, shows a satisfactory record for the past year. Profits of $2,992,951, an increase of $181,145, or almost 20 per cent. on the paid-up capital of $15,000,000, and 10.5 per cent. on the paid-up capital and reserves, were realised. The shareholders received this year a 10 per cent. dividend and two bonuses of one per cent. each, the whole equal to $1,800,000. There was written off bank premises $500,000. There was transferred to rest $1,000,000, as compared with $2,500,000 last year, and the reserve is now $13,500,000. The amount transferred to pension fund was increased to $80,000, and the remaining balance of $384,529 was carried forward, compared with $771,578 in 1912.

Loans amount to $154,576,889, and show a falling off of over $9,000,000 from last year.

Aggregate deposits of the bank at the close of the year were $192,813,000.

Liquid assets are set down at $97,308,000, an increase of over $20,000,000 upon 1912, and of $30,000,000 upon 1911. Approaching one-third of this amount, namely, $30,415,000, is held in gold and legals, these gold reserves being roughly $3,000,000 in excess of 1912.

The Canadian Bank of Commerce has therefore enhanced considerably its already strong position and high reputation.

◆

SIR FREDERICK TAYLOR'S FAREWELL TO LONDON.

At a complimentary dinner of the Canada Club in London to Sir Frederick Williams-Taylor, a distinguished audience was present. Sir Frederick, replying to the toast to him, made a witty speech. "I am sure you are all surprised—I certainly am—to hear that I was the possessor of so many admirable characteristics," he said. "When I read the other day in the Bobcaygeon Courier that I was a hustler, and in the Calgary Eye Opener that I was a live wire I did not recognize myself; but when I find the staid eastern press of Canada referring to me as a brilliant banker and financier—God save the mark! —I am appalled at this giant's robe thrust on my unworthy shoulders by well-meaning friends. Appalled at the thought of returning to live among my discerning countrymen, who sooner or later are bound to find me out. Now, when I hear the description of the paragon I am supposed to be I feel like flinging away ambition, to live out the rest of my life in this land of pure delight surrounded by friends capable of conceiving such pleasing hallucinations. Perhaps the sanest remark made about me was in a paper here, which described me as a plain matter-of-fact Canadian. A pretty shrewd fellow that. But this let me say: The fact that I have been appointed to my position is evidence that the directors of the institution believe me to be possessed of the necessary qualifications. I am myself only positive of possessing one of the necessary qualifications, and that is a clear conception of the great responsibilities which my position involves, coupled with a grim desire to do my best.

"In the position I have occupied representing the institution in question in London I have merely tried to do my duty according to my own interpretation thereof. And, after all, as some philosopher says: 'Life lies not in the events that fall to a man, but in that man's handling of them.' It may interest some of you to learn that when I came here to this position I had not one word of instructions, written or verbal, from my great chief, the late lamented Sir Edward Clouston. Our critics might say: 'This is the Bank of Montreal's awful way of doing business'—but Sir Edward Clouston knew, and I knew, that instructions were unnecessary, for my long training in the Bank of Montreal had taught me merely to be true to the best traditions of the institution; and I could not then be false to my beloved Canada, nor false to the people of this country. Lord Strathcona would tell you, and my friend Sir Thomas Skinner would confirm it, that the policy of the Bank of Montreal has ever been to assist in maintaining by every proper means in its power the credit and well-being of the Dominion of Canada. During my eight years of office in London the Bank of Montreal has been the medium through which Canadian loans aggregating no less a sum than $500,000,000 have been floated in this market, plus many millions of private moneys transferred to Canada, and some $125,000,000, the proceeds of Canadian Pacific stock issues.

"I would not suggest that the bank has not made a modest turn on this business, for it is not a charitable institution, but we have made more than a financial profit, we have made a respected name for ourselves in this great money market of the world, and played an important part in maintaining the prestige of Canada in this old Motherland. It is a great pleasure, and a great privilege, and a great education for me to have lived in this country. I came here with an inherited affection for old England, with a deep-rooted respect for Anglo-Saxon laws and tradition and for British character. I return with those feelings accentuated and intensified; I feel that I am a better Canadian for having lived in London, that I have a clearer and broader view of Canadian and Empire problems, and that I am in a better position to assist to the extent to which I am capable in strengthening those links which were forged by the immortal Wolfe on the plains of Abraham—links that will stand to the day of Armageddon—to the last great fight of all."

WHAT MONTREAL FIRE INVESTIGATIONS SHOW.

Of the fires recently investigated by Fire Commissioner Latulippe at Montreal, three were said to have been started by the children dropping matches, while to the fourth one no cause could be ascribed. That his little daughter accidentally dropped a match in the cellar when she was sent for some sugar, was the opinion of Mr. I. Goldstein, whose grocery store at 848 St. Lawrence street was gutted by fire on the evening of December 7th.

Matches, as far as could be ascertained, were also responsible for a fire which originated in the dressmaking establishment of Mrs. Alfred Lafortune at 549 Ontario street east. Matches were the cause of another blaze in the sheds in the rear of 264 Delaroche street.

No cause could be assigned to the origin of the fire which caused $2,000 damage in the home of A. Barthiaume, 2165 St. Denis street, on December 9th.

Regarding the outbreak which occurred at 10.14 p.m. on December 12th, at the premises of Max Levy, tailor, 384 Beaubien street, it was stated that the fire broke out in the cellar. None of the witnesses could advance any theory as to the cause of the fire, but as it had been stated by Mrs. Levy that she had taken from the stove ashes which were "a little hot" the commissioner thought it was possible that in this way the fire might have been started. The stock in the shop was estimated at about $900, and the fixtures at $200. The sum insured for was $1,000. No damage was caused to the stock, only to the cellar and staircase.

By the fire which occurred at the shop of Arthur Menard, butcher, 3152 Verville street, Bordeaux, at 12.37 a.m., on December 7th, loss of $500 was caused, while the insurance figure was $250. The outbreak was believed to have been caused by a cigarette falling on the floor.

The other cases were house fires at 1989 St. Denis street, occupied by Joseph Armand Mongeau, and at 1491 St. Andre street, occupied by Amede Courtemanche, the damage being $400 and $100 respectively.

That the fire in the Columbia Rubber Company, 710 St. Dominique street, on December 10th was set, and that this opinion was not only held by himself but by others who had heard the evidence at the inquiry, was the assertion of Fire Commissioner Latulippe when adjourning the investigation sine die.

Harry Benjamin, the last witness examined, testified that he was traveller for, and also a partner in, the firm. At the time of stocktaking in October, the value of the goods was about $4,000, he said. He could not explain the origin of the fire, nor the fact that two separate holes had been burned in the hardwood flooring, there being no evident connection or trace of fire between them.

Questioned by a representative of the Caledonia Insurance Company, he admitted he had telephoned to the company's offices before the fire and asked if the insurance was all right. He had done this, as he was under the impression that there had been an increase in the premium of $30, which he wished to settle up. The inquiry then adjourned.

As to the fire in the premises of Douglas Brothers, Limited, 19 St. Maurice street, on December 16, at 3 a.m., Fireman P. Munro, of No. 1 Station, Youville square, testified that the fire broke out in two places on the second story, and that one of these was twenty feet from the other, with no trace of fire between.

Fireman Achille Laporte, of the same station, testified that there was no material about, which when burning would be likely to fly and scatter sparks.

Alexander Hogan, superintendent of the place, stated that men had been working until 10 p.m. the night of the 15th. After the men had gone, he and Mr. Douglas had left together. Everything at that time had appeared all right. The firm had been established for years in Montreal, and had never before had a fire.

In giving evidence before Commissioner Latulippe there was no doubt in the mind of Philip Lescarbeau that the fire at his furniture store, at 765 St. Catherine street east, early on the morning of December 16th, was caused by thieves, who in their attempt to seek out the valuable articles had apparently lighted a match and thus set fire to the place. The owner had been in business for thirty years, and never had a fire before. He had stock for $2,000 and was insured for $1,000. Everything was burned. A fireman stated that when he arrived at the scene of the fire the front and back doors were open.

Another blaze which was the subject of inquiry was that which occurred at 1.45 a.m. on December 16th at the premises of Philip Grossman, merchant, 1071 St. Catherine street east. It was thought that the outbreak was caused by the heat from the electric light, which was near the ceiling. The proprietor of the house, Philip Milo, was also of the opinion that the draught between the two ceilings fostered the flames. The stock, valued at $3.000, was insured for $2,000, and the damage was between $800 and $1,000.

Mr. R. W. Steele, having been appointed to the position of secretary of the Dominion Securities Corporation, Mr. J. M. Wood succeeds him as western representative of the corporation.

LOSSES DUE TO SMOKE AND WATER

How to Prevent Them—Some Excellent Safeguards Suggested.

There is little fire insurance literature on the subject of smoke and water damage. Therefore, the paper read to the Toronto insurance institute by Mr. F. E. Roberts, inspector of the Norwich Union Fire Assurance, was of unusual interest. His paper, while devoted mainly to the question of what is called "smoke and water damage," covers some points of interest in regard to smoke and water in connection with fire problems. Smoke and water damage to buildings and machinery is not touched upon, only that to stocks in mercantile buildings and factories. The fact that while a loss on a building may be moderate, the loss on stock is liable to be heavy, leads to this proposition—"Given even an ordinary brick or concrete building, with good fire protection, a moderate loss on building may be expected, and a relatively large loss on stock. This discrepancy is due in most cases, not so much to the actual fire damage to stock, as to the effects of smoke and the water used to extinguish the blaze." The majority of stocks are held liable to material damage by smoke or water and a number may be considered as specially liable. In this latter class are mentioned hardware, millinery, ladies' and children's whitewear and goods of a similar nature, general stocks of dry goods, tea, coffee, spices, wholesale drug stocks, tobacco and many others.

Prevention of Smoke and Water Damage.

A sure way to prevent this damage is to extinguish the fire when it is of small proportions, which means a small amount of water used, and a minimum of smoke. Private fire extinguishing apparatus, and the "first-aid" from the fire department, consisting of hand chemical fire extinguishers and the chemical engine, one or both, have saved millions of dollars worth of property and are especially effective in saving smoke and water damage. Some good system for discovering and giving notice of a fire promptly is advised, as a watchman reporting to central station or a thermostat system, similarly connected.

The point of most interest, however, is how to lessen smoke and water damage in the many fires where a large amount of water has to be poured on blaze and where smoke is abundantly in evidence. It is now mainly a question of good building construction, and the rules for preventing spread of fire should be followed more closely than is generally the case. The most important point is that of lessening smoke and water damage to stock on floors where fire does not penetrate. This means whole floors, with only the necessary openings for elevators and stairways, same to be enclosed by brick or concrete walls, entrance by fire doors. It is evident that unprotected vertical openings allow free passage for smoke and water as well as for fire chutes, dumb waiters, etc., if absolutely necessary, to be treated exactly like elevators. Belt holes are a serious defect, cannot be satisfactorily protected, and are not necessary with electrical power.

Smoke of Penetrating Nature.

Absence of concealed spaces on walls or ceilings, and of easily combustible partitions, finish, etc., the division of large areas by fire walls with fire doors at openings, skylights at head of elevator and stair shafts not entirely of wired glass, but partially of ordinary thin glass (protected where necessary by wire netting), easily broken to let the smoke out—all of these have a beneficial effect in lessening smoke and water damage.

Construction recommendations apply to both smoke and water damage and indeed are about all that can be done to lessen smoke damage. They will do so materially, but not wholly in some cases, as smoke is of a very penetrating nature and fire doors will not keep it out entirely. Another requisite applies to water damage—waterproof and drained floors, for even heavy mill constructed floors will leak. The first is accomplished by a waterproof layer between the upper or wearing floor and that underneath. The method advised by National Fire Protection Association and others is explained in detail. The second requires floors to be laid with a slight pitch or incline towards outer walls, or elevator and stair shafts, or to necessary number of drains in centre of floor. The water is drained by scuppers passing through outer walls, or inserted in elevator and stair shafts, or by piping connected to said shafts, possibly to down pipes that may pass through the building.

Raising stock from floor on skids or platforms, tarpaulins kept for the emergency of fire and used to cover stock at night, are advised. A municipal salvage corps, reporting immediately on alarm of fire with necessary equipment could render valuable service. Reducing damage to property, as well as extinguishing fire, seems a proper part of a fire brigade's duties.

What has been said applies also to fireproof buildings as well as to those of ordinary brick or mill construction. The specifications for some buildings erected in the past might read as follows: "Build a tall stove, possibly neglecting any protection to such an unburnable article as cast iron columns, put in more or less kindling in shape of partitions, finish, etc., fill it with the necessary contents, generally not bad fuel, leave the draughts open and go away with the proud consciousness of having solved the fire problem at last." Although this idea has been thoroughly exploded, not only by conflagrations, but by isolated fires, resulting in practically a total loss on contents, the lesson of protecting floor openings does not appear to be fully learned, judging from some comparatively recent erections. It is evident in such a "fireproof" building that smoke and water can do as much damage as in any other kind of building with similar floor openings. Floors in fireproof buildings have leaked badly, inflicting great water damage, and unless properly waterproofed, which it is entirely feasible to do, are probably no better than the ordinary non-waterproof wooden floor of mill constructed buildings.

Use of Sprinkler System.

A sprinkler system is the best yet devised for preventing a large fire loss, and necessarily averting large smoke and water damage. But good building construction, as outlined in part, must be followed to get the best results from this system, and is followed to a great extent, or the gratifying record shown by statistics would not be attained. Five sprinkler heads opening in a fire, with a flow of twenty minutes, may be considered a satisfactory average. These sprinklers, under a pressure of forty pounds to the square inch, will discharge 3,400 imperial gallons of water in that time. With non-waterproof floors it is reasonable to expect considerable loss to damageable goods on floors below that where fire occurs. It is also a reasonable conclusion that the highest type of efficiency of a sprinkler system cannot be reached unless floors are waterproof and drained.

(To be concluded.)

SOVEREIGN BANK TO BE WOUND UP.

The Sovereign Bank is to be wound up. Notice has been served to the effect on behalf of International Assets. This is merely a formal step and done in order to collect from the shareholders of the Sovereign Bank who have not subscribed to the stock in the International Assets, the double liability, which should net the salvaging concern a substantial sum of money, and in turn the assisting banks.

UNION BANK IN STRONG POSITION.

An unusually satisfactory report and statement was presented to the shareholders of the Union Bank at the annual meeting held at Winnipeg. Hon. W. H. Montague, P.C., minister of public works for Manitoba, who was present at the meeting, described the statement as one which added "Our pride and confidence in the bank and one which speaks in no uncertain terms of the prosperity of our people." Mr. Montague then paid this well-deserved tribute to the management and directorate: "To this prosperity, of course, the bank owes much; nevertheless, it owes much also to the men under whose management it has been so successfully conducted. The directors of this bank are big men, they are strong men financially. They are intimately acquainted with Canadian conditions, they are associated actively with business and big undertakings. They are men of good judgment, of foresight and of undoubted business probity. Indeed, they are just such men as are capable of managing an institution such as the one under whose auspices we meet to-day. Their connection with the bank inspires confidence, not only among the proprietors of the bank, but also among the general business public, upon whose good will the bank must depend largely for its success."

The net profits of the bank for the year ended November 29th, amounting to $750,095, were 1 per cent. larger than those of 1912 and equal to over 15 per cent. on the paid-up capital. This excellent showing allowed the directors to declare a bonus of 1 per cent. in addition to the regular dividend of 8 per cent. (2 per cent. quarterly). Owing to monetary conditions, prices of securities generally have declined during the year, and it was considered advisable to set aside the sum of $125,000, out of profits, to a special reserve account, to meet the depreciation in market value of stocks, bonds and debentures owned by the bank as an investment, a wise provision.

To the rest account $100,000 has been added, which now stands at $3,400,000, and $50,000 has been written off bank premises.

The usual contribution of $10,000 has been made to the officers' pension fund and $90,579.03 is carried to the new profit and loss account, as against $75,483.76 brought forward from 1912.

Deposits have increased by $8,952,000 and now amount to $64,595,288.19. Current loans in Canada have increased by $1,780,000 and amount to $46,798,969. Loans and discounts outside of Canada total $1,640,472 as against $779,000 last year. The bank's total assets amount to $80,000,000.

The Union Bank, which not long ago moved its headquarters from eastern Canada to Winnipeg, is in a strong position, is well managed and is helping considerably to finance the growth of western Canada, agricultural and commercial.

CANADIAN PACIFIC RAILWAY ACHIEVEMENTS

Many Benefits Have Come to Canada Through Grants Made to the Company

By H. M. P. Eckardt.

In an editorial on the subject of the Canadian Pacific Railway note issue, the Toronto Star characterizes the action of the directors in selling the notes to its shareholders at a price to net from 9½ to 10 per cent., as a breach of trust. Sir Thomas Shaughnessy and Sir Edmund Osler are taken to task for proceeding as if the land and other assets of the railway company were a piece of private property with which the people of Canada have nothing to do. Then the editorial goes on to say: "The people of Canada invested in the Canadian Pacific Railway twenty-five million dollars in a cash subsidy, twenty-eight million dollars worth of completed railway, built by the people of Canada, and twenty-five million acres of land." By means of some remarkable figuring the conclusion is next reached that the people of Canada have "invested" in the Canadian Pacific Railway "well over two hundred millions of dollars." This figure is arrived at by taking the cash bonus, $25,000,000, plus the value of the completed work taken over which is stated to be $28,000,000, plus $93,000,000 (the net amount of proceeds of land sales, less $8,000,000 expended in irrigation works). That gives $146,000,000; and the lands yet remaining unsold are put in as more than $54,000,000—to bring the total well over $200,000,000.

After thus exaggerating the amount of the grants or payments to the Canadian Pacific Railway by the government, the newspaper takes the ground that the moneys and property transferred to the company represented an "investment" by the people, by virtue of which they attained a sort of partnership right to the returns or revenues to be derived by the railway company from the property in question, and from such other property as it might acquire subsequently with its own resources. As various other newspapers have been taking the same ground, it is worth while to subject the arguments they put forward to the light of common sense and reason.

Large Measure Due to Railway Building.

In the first place, let us examine the contention that the people of Canada have put over $200,000,000 into the Canadian Pacific Railway property. We may pass without question the item of $25,000,000 cash. The next is the $28,000,000 placed on the completed work taken over. One might question this figure on remembering that the first attempt to build the transcontinental was a failure, and the completed portion something like a white elephant on the hands of the people of Canada. If no persons of substance had come forward undertaking to build through the thousands of miles of lone land, that part of the undertaking might have become valueless, or nearly so. But set it down as $28,000,000.

Now we come to the land grant. If the party criticizing the company has any desire to be fair and just, he must place upon the land grant the value it had when it was made over to the company. For a purpose of this kind to take it at the present value is grossly unfair. Everybody knows that a large measure of the prosperity of the western provinces and the increase in values of the whole land area there, is to be ascribed to the building of the Canadian Pacific Railway main line and branches. Before the railway was built the lands were practically valueless. The Canadian Pacific Railway directors and stockholders have poured their own money by hundreds of millions into the western lines and branches, terminals, and various other things calculated to develop the west. And to a large extent the increase in value of their land grant is due to their own expenditures and work. In other words, they themselves put much of the enlarged value into the land.

Have Received Value.

Taking into account the fact that the lands were inaccessible and could only be made accessible through the building of the railway main line and numerous branches, it is probably fair to value the 25,000,000 acres at $1.50 per acre, or $37,500,000 in all. One-quarter of the whole grant was re-transferred to the government in 1886, a year after the main line was built, at that price. Thus we get a total "investment" by the people of Canada of $90,000,000 instead of over $200,000,000.

The next thing to consider is whether this represented the investment of a partner entitled to share to some extent in prospective profits, or whether it was simply one side of an exchange of values or property. We all know that the whole arrangement is in the form of a contract or agreement between the government and the Canadian Pacific Railway Company. The right of the company to the land is clearly set forth; no sane person would dream of contesting it in the courts. And besides being safe in its possession of the property from the legal point of view, the Canadian Pacific Railway stockholders are well aware that the people of Canada have reaped a rich return for the money and property turned over to the company. If ever there was a case of value received it is here.

Let us glance for a moment in conclusion at the benefits or advantages which the people of Canada have acquired in exchange for the property delivered to the company. In the first place, the province of British Columbia was gained. Nothing but the prompt building of the Canadian Pacific Railway main line would have kept British Columbia for the Dominion. So when they delivered the land, etc., to the Canadian Pacific Railway people, the government of the day expected to get returns in one way through the retention of the Pacific coast province in the Dominion. Next, as mentioned above, the people of Canada have the three prairie provinces populous and wealthy instead of a lone land, as a result of the grants made to the Canadian Pacific Railway. Largely because they made that grant to the Canadian Pacific Railway the hundreds of millions of acres owned by the people of Canada, apart from the 25,000,000 acres granted to the company, have increased to ten and even twenty times the value they possessed at the time the bargain was struck. The people of Canada have probably gained anywhere from $500,000,000 to $1,000,000,000 in this way as the direct fruit of $90,000,000 worth handed to the company. That is a good return. And there is also the matter of profits made by farmers and producers in the west as a result of the transportation facilities supplied by the railway company. This, too, would foot up to a vast total. One could multiply the instances in which the people of Canada have gained, but space does not permit further discussion in this article.

A consideration of these points should go far to reveal the weakness of the contention that the company is not the absolute owner of the land grant.

◆

DEATH OF JAMES ELLIOT.

Seventy-three years of age, Mr. James Elliot, General Manager the Molsons Bank for the past thirteen years, died at Montreal last week. Mr. Elliot, who was a prominent banker, was born in Montreal in June, 1841. He was the eldest son of the late Andrew E. Elliot, contractor, of Montreal. After being educated at the Montreal High School, he entered as a lad the dry goods establishment of the late Mr. Alex. Molson, going from thence to The Molsons Bank in 1860. In 1870 he became accountant, and was appointed manager of the Montreal branch in 1879. In 1900 he became general manager, and this position he held until his death, but was contemplating retirement at an early date. He was for many years a councillor of the Canadian Bankers' Association.

THE LATE JAMES ELLIOT.

◆

NATIONAL BANK OF SCOTLAND.

The annual statement of the National Bank of Scotland, Limited, shows a net profit of $1,160,250 and a balance brought forward of $164,440, making a total of $1,324,690 available for distribution. The dividend at the rate of 15 per cent. plus a 3 per cent. bonus took $847,500, the reduction in the bonus being made in view of the continued depreciation of the bank's investments. There was transferred to heritable property account $50,000, officers' pension fund $50,000, investment account, $200,000 and $177,190 was carried forward. The reserve fund is given as $4,500,000 and the bank's assets total $107,543,280. The head office is at Edinburgh and subscribed capital amounts to $25,000,000.

December 20—Shed in Union Station yards. Loss, $3,000. Cause unknown.

December 22—Strachan Avenue Crematory. Loss, $1,000. Cause unknown. Ruby cigar store. Loss and cause unknown.

A federal bankruptcy act would be a desirable innovation in Canada, is the opinion expressed by the Hon. C. J. Doherty, minister of justice, in a communication to the Builders' Exchange of Montreal. This opinion comes as a result of a resolution adopted by the exchange, which pointed out the hardships worked on the manufacturer and others who distributed goods over the whole Dominion.

VANCOUVER'S NOVEMBER FIRES.

Vancouver's estimated loss by fire, smoke and water during November was $391,190; the estimated insurance loss was $320,680, leaving the loss above insurance $70,510. The total value of property involved was approximately $1,783,800. Owing to the insurance adjusters not being through with their work yet, on the two large fires which occurred during the month, the figures quoted above are the closest estimate the department could make. The department responded to 51 alarms during the month as follows:—False alarms 3, chimney fires 8, small fires where no damage occurred 9, fires outside city limits 2, smoke scares 5, fires where damage resulted 22, second alarm 1, general alarm 1.

A complete list of fires where damage occurred follows:

November 2nd.—Alarm from Box 144 at 3 a.m. Fire in two-story frame dwelling at 20 Kamloops Street, corner of Powell, owned and occupied by J. McKenzie. The blaze started from an overheated stove in the dining-room and the house was almost destroyed before the fire was extinguished. Damage, $1,300, partly covered by insurance.

November 5th.—Verbal alarm at 9.40 a.m. to 239 Hastings Street E. Fire in rear of W. A. Brown's plumbing shop, caused by lighted cigar being thrown in bundle of oakum. Building owned by Mr. Spooner and used as a plumbing shop with furnished rooms above. Damage, $100, covered by insurance.

November 7th.—Alarm from Box 42 at 7.15 a.m. Small fire in floor of office at the Vancouver Milling and Grain Company's plant, Smythe and Cambie Street, caused by hot air pipe from furnace becoming disconnected, slight damage resulting. Damage, $20. Telephone alarm at 9.43 p.m. Small fire in front room at 920 Pender Street W., caused by sparks from burning chimney falling on bookcase. Building owned by C. E. Berg and occupied by J. T. Foster and used as a dwelling. Damage, $175, partly covered by insurance.

November 8th.—Verbal alarm at 5 a.m. Fire in one-story frame dwelling at 4078 St. George Street, owned by A. Lambie and occupied by A. Williams. The blaze apparently started from an overheated stove pipe in the kitchen and had a good hold when the apparatus arrived, the roof being practically destroyed besides other damage to the interior of the house. Damage, $750, covered by insurance.

November 12th.—Verbal alarm at 6.57 p.m. to 1469 Broadway W., a two-story frame store and apartments above, owned by C. R. Gilbert and occupied by the Mission Fixture Company. The blaze started in some rubbish in the basement from some cause unknown and the building was full of smoke when the apparatus arrived, slight damage resulting to both building and contents. The stock in Clark Brothers and Venn's hardware store adjoining was also slightly damaged. Damage, $243, covered by insurance.

November 13th.—Telephone alarm at 1.05 a.m. to 1233 Eighteenth Avenue E., owned by James Stanley. The house was vacant and the fire was evidently caused by a stove which had been left burning near a freshly varnished wall, considerable damage being done to the interior and roof of the house. Damage, $1,031, covered by insurance. Telephone alarm at 8.02 a.m. Small fire at the Vancouver Gas Company's plant at the foot of Keefer Street, caused by a leak in a gas main, slight damage to the building resulting. Damage, $20. Telephone alarm at 2.44 p.m., to 641 Granville Street. Fire on roof caused by blaze getting beyond control of man who was repairing roof. Building owned by Percy Charleson and occupied by (upstairs) Mrs. Burke, and used as tea rooms. The main floor was occupied by stores. Slight damage was done to the contents upstairs by water. Damage, $240, covered by insurance. Telephone alarm at 4.40 p.m. to 1253 Eight Avenue W., owned by J. A. Knowling and occupied by A. LePage. Small fire in upstair rear room, caused by grease catching fire when frying meat, the walls being scorched. Damage, $15, covered by insurance.

November 15th.—Telephone alarm at 1.13 p.m. to 1541 Sixth Avenue W., a two-story frame dwelling owned by G. St. Quinton and occupied by Mrs. K. Collins. Small fire in wall of dining room caused by stove pipe coming out of chimney. Damage, $25, covered by insurance.

November 16th.—Telephone alarm at 1.25 a.m. to 365 Water Street, a seven-story and double basement brick warehouse, owned by Kelly, Douglas and Company, and occupied by the following firms:—Basements, K. D. and Company, H. Donkin, wholesale grocery; 2nd floor, Mussens, Limited, machinery and supplies, Imperial Varnish and Color Company, Hotpoint Electric Iron Company, Chambers Brothers, Nicolas and Company, electrical supplies, Ontario Lamp Company, Clark and Stuart, stationery supplies. The fire started in the rear of the building apparently on the third or fourth floor, from some cause unknown, the three top floors were burning fiercely when the apparatus arrived, the building being gutted and practically the whole of the contents were destroyed before the blaze was brought under control. The adjoining building on the east, No. 361, also owned by Kelly, Douglas and Company and occupied by Gault Brothers, wholesale dry goods and D. Spencer in the basement, was damaged slightly on the top floor, while the stock in basement and top floor was damaged by water. The stock and building on the west side, No. 367, was also damaged, principally by smoke and water; this building was owned and occupied by K. D. and Company. The following basements on the east of 365 were flooded and damage resulted to the contents:—135, 153, 157, 173, 175, 181. A general alarm was turned in for this fire. Estimated damage, $300,000, practically all covered by insurance.

November 17th.—Verbal alarm at 11.55 p.m. to 267 Hastings Street E. Small fire in kitchen of restaurant caused by grease boiling over on to gas stove. Building owned by The Orange Hall Company and occupied by (restaurant) Mrs. Elsey. Damage, $10, covered by insurance.

November 18th.—Alarm from Box 716 at 10.42 p.m. Fire at 837 Broadway E., owned by Hong Wo and occupied by J. N. Nelson and used as a dwelling. The blaze was of unknown origin and started under the front stairway and burnt the paper off the dining-room wall, the contents being also slightly damaged. Damage, $105, covered by insurance.

November 23rd.—Telephone alarm at 4.27 a.m. to 1184 Nelson Street, a two-story frame building, owned by E. W. McLean and occupied by Mrs. Fagan and used as the Rainier Club. Fire started in hallway at foot of staircase from some cause unknown, considerable damage being done to both building and contents before being extinguished. Damage, about $7,310, covered by insurance.

November 25th.—Telephone alarm at 2.46 p.m. Small fire in two-story frame building at 343 Alexander Street, owned by D. A. Patterson and occupied by Mr. Proudcott and used as cabins. Fire in mattress caused by man smoking in bed. Damage, $6.

November 26th.—Telephone alarm at 8.50 a.m. to the Hudson's Bay store, Georgia and Granville Street. Fire in automobile No. 2399, caused by back fire in carburettor. Damage, about $200, covered by insurance.

November 27th.—Verbal alarm at 7.25 p.m. to 549 Robson Street. Fire in couch in dining-room, caused by woman with match looking for her shoes. Dwelling occupied by Mr. Moss. Damage, $15. Alarm from Box 56 at 8.46 p.m. Fire in four-story brick warehouse at 1057-59 Hamilton Street. The blaze started on the top floor from some unknown cause and had a good start when the fire department arrived, the contents of the top floor being practically a total loss, while the stock in the balance of the building was badly damaged by smoke and water. Building owned by Parsons and Haddock, wholesale produce, who occupied the ground floor and basement. Other occupants of the building were as follows:—Canadian Westinghouse Company, Taylor Belting Company, Vancouver Lamp Company, MacGowan and Company, Canadian Heating and Ventilating Company, Phelps and Company, Montelius Piano House, storage of pianos, Hotson and Gillies and the International Cartage Company. A second alarm was sent in for this fire. Estimated damage, $80,000, practically all covered by insurance.

November 28th.—Telephone alarm at 1.49 p.m. to 857 Howe Street, owned by H. McKee and occupied by Mrs. Trumper and used as a dwelling. Small fire in bath-room caused by spark from fuse block in ceiling falling on clothes beneath. Damage, $30, covered by insurance.

November 29th.—Telephone alarm at 11.53 p.m. Fire in two-story frame dwelling at 1027 Pacific Street, owned by E. J. Judd and occupied by J. H. Anderson. The blaze started in bedroom downstairs and was caused by an electric iron being left turned on, and was confined to room where it originated. Damage, about $1,390, covered by insurance.

November 30th.—Telephone alarm at 5.55 p.m. to 2221 Ontario Street. Fire in mattress in bedroom caused by an electric iron being left on bed. Dwelling owned and occupied by E. W. Graham. Damage, $5.

The total number of alarms was 51; false alarms, 3; chimney fires, 8; value of property involved (estimated), $1,783,800; loss, (estimated), $391,190; insurance paid (estimated), $320,600; loss above insurance (estimated), $70,510; hose laid at fires, 37,500 feet; chemical used, 1,532 gallons.

THE NORTHERN CROWN BANK

Report of the Proceedings
OF THE
EIGHTH ANNUAL GENERAL MEETING OF THE SHAREHOLDERS

Held at the Banking House, Winnipeg, on

Wednesday, the 17th December, 1913

The Eighth Annual General Meeting of the Shareholders of the Northern Crown Bank was held at the Banking House, Winnipeg, on Wednesday, 17th December, 1913, at 12 o'clock noon.

There were present: Sir D. H. McMillan, K.C.M.G.; Mr. J. H. Ashdown, Mr. A. B. Ellis, Mr. J. W. Armstrong (Gladstone), Mr. R. J. Macpherson, Mr. John Stovel, Mr. H. T. Champion, Mr. Kenneth MacKenzie, Mr. S. S. Cummins (New York), Mr. C. E. P. McWilliams (Toronto), Mr. W. W. Evans, Mr. W. A. Anderson, Mr. A. Reid, Mr. J. H. Fargey (La Riviere), Mr. J. Leslie, Mr. W. A. Cockshott, Mr. H. Keech (Stony Mountain), Mr. F. Steele, Mr. R. H. Nunn, Mr. J. Body (Sanford), Mr. W. M. Houston, Mr. Angus Grant, J. W. Hutchinson, M.D.; Mr. D. McArthur, Mr. John Allonby, and others.

It was moved by Mr. H. T. Champion, seconded by Mr. J. Stovel, that the President, Sir D. H. McMillan, take the chair.

The President, Sir D. H. McMillan, K.C.M.G., having taken the chair, it was moved by Mr. A. Reid, seconded by Mr. C. E. P. McWilliams, that Mr. Robert Campbell, the General Manager, be appointed to act as Secretary, and that Messrs. R. J. Macpherson and W. W. Evans be appointed to act as scrutineers.

The President called upon the Secretary to read the Annual Report of the Directors as follows:

THE REPORT

The Directors of the Northern Crown Bank beg to submit to the Shareholders the Eighth Annual Report, showing the result of the Bank's business for the year ended 29th November, 1913, together with the usual statement of Assets and Liabilities as at that date.

R. CAMPBELL, General Manager.

Since the last Annual Meeting, Branches have been opened at: Aneroid, Sask.; Borden, Sask.; Cadillac, Sask.; Lancer, Sask.; Prelate, Sask.; and Branches have been closed at: Aylmer, Que.; Irricana, Alta.; Lumby, B.C.; Papineauville, Que.; Peachland, B.C.

Owing to the Bank's Capital having been increased, it is necessary to amend By-law No. 1 in respect of the number of shares necessary to qualify a Shareholder for election on the Board or Directors, and you will be asked to-day to sanction this amendment.

The new Act calls for some changes, and more detailed information in the Statement of the condition of the Bank.

It provides for the establishment of the Central Gold Reserves, which we have made use of to some extent.

It authorizes loans to farmers against the security of their threshed grain.

It eliminates the office of Local Director.

It provides for the appointment of an outside Auditor under Section 56, and you will be asked to-day to make this appointment, and to fix his remuneration.

It is with the deepest regret that the Directors have to record the death of Mr. W. C. Leistikow.

The Directors have also to record with much regret the resignation from the Board of Sir R. P. Roblin, who, owing to pressure of public affairs, has been for some time unable to devote much time to the Bank's business.

They have also to record with regret the resignation of Mr. F. Nation, who having removed to Victoria permanently, felt that he should resign in favor of a resident of Winnipeg.

The vacancies in the Board, caused by Mr. W. C. Leistikow's death and the resignations of Sir R. P. Roblin and Mr. F. Nation, have been filled by Mr. W. J. Christie, Mr. A. McTavish Campbell, and Mr. John Stovel.

The Bank's Rest Account has been increased to $350,000.

All the Branches of the Bank have been carefully inspected.

In moving the adoption of the Report, Sir D. H. McMillan, the President, said:—

A report has been submitted to you to-day which shows the Bank to be in an exceptionally strong position.

By referring to the Statement of Assets and Liabilities you will see that it has in liquid assets the very large sum of $7,710,000, being 52 per cent. of its deposits, and 42 per cent. of its total liabilities to the public. This means that it could pay 52 per cent. of its deposits on demand in case of necessity, without calling in one dollar of its $12,000,000 of Current Loans.

It may occur to some that we have erred on the safe side by keeping so much money in a liquid or immediately available condition, but in view of the extreme financial stringency that has existed for some time, and in view of the fact that the Bank is young, it seemed to your Directors to be in the best interests of the Shareholders to keep the reserves at a figure that would make it quite independent and easy under any circumstances that might arise. It is gratifying to be able to state that at no time during the past year has any difficulty been experienced in maintaining this position. As a matter of fact, it was not our intention to come to you with a statement showing 42 per cent. of our liabilities to the public in liquid assets, for we do not think it necessary to carry such heavy reserves, but having kept our reserves up to a high point throughout the year, we found ourselves during the last three months, face to face with an unusual influx of money caused by the rapid liquidation of loans and increase of deposits in the West, combined with an accumulation of funds through the expansion of our Note issue during the movement of the crop, which placed us in the position we now occupy. While maintaining this position of high reserves, we have nevertheless been able to make profits of $281,000, which is only $10,000 less than we made last year under the more favorable conditions which then prevailed. We make no apology for this comparatively small difference. You have seen in previous years the very high earning power we have under normal conditions, and the statement now before you is an evidence of what the Bank can do in the way of strengthening its position when occasion arises.

It is important at a time like the present for every business concern, financial or otherwise, to show by its statement that collections have been good. We may congratulate ourselves upon the showing we have made in this respect. Notwithstanding that we have made new loans, amounting to millions of dollars since the crop was harvested, our old loans have been paid off so rapidly that our liquid assets were not reduced.

This state of affairs is attributable to the fine weather we have experienced in the West, which enabled the farmers to harvest their grain early and quickly, and to the unusual rapidity with which the crop was moved by the Railway Companies.

Our deposits, on the whole, show up fairly well under existing circumstances. They reached their lowest level about three months ago, and have been growing steadily since that time. They are still, however, slightly below the figures shown at this date last year. This is only what is to be expected in a new country which depends so largely upon outside capital for its development, when a check is experienced in the receipt of money from abroad for loaning and investment purposes. There is necessarily under these circumstances less money lying in the Banks awaiting investment, and consequently Deposits do not show up so well. Our Total Assets, however, are approximately the same as last year.

It is interesting to note by reference to the Comparative Statement which has been published each year, with our Annual Report, that a very similar condition existed in 1907, the year of the last financial stringency. In that year also our deposits showed a slight falling off compared with 1906, but they recovered quickly and showed a marked increase each succeeding year, up to the present time.

It may not be out of place at this time to review briefly what this Bank has accomplished since its inception, eight years ago.

It was organized in 1905, and began business in November of that year. It paid a dividend of 5 per cent. to its Shareholders in 1907 and each subsequent year up to July, 1911, and a dividend of 6 per cent. from that date. It has accumulated a Rest Account of $350,000 all out of profits, and has paid the Northern Bank Shareholders a stock bonus of $186,000 under the Amalgamation Agreement between the Northern and Crown Banks, in addition to the regular dividend. Its earnings this year are $116,000 over and above the Dividend.

We have to record with the deepest regret the death of Mr. W. C. Leistikow. His place on the Board has been taken by Mr. John Stovel.

Mr. F. Nation, who is at present residing in Victoria, B.C., has resigned from the Board of Directors, owing to his inability to attend the Board Meetings. His place on the Board has been taken by Mr. A. McTavish Campbell.

Owing to pressure of public affairs, Sir R. P. Roblin has for some time been desirous of giving up his position on the Board to someone who can devote more time to the Bank's business. The Board of Directors have at last reluctantly consented to relieve him of his duties, and have accepted his resignation. Mr. W. J. Christie has taken his place on the Board.

While regretting the circumstances that made it necessary for Sir R. P. Roblin and Mr. F. Nation to resign, we feel that the Bank is to be congratulated upon the new Directors it has secured in Messrs. Christie, Campbell and Stovel. All of these gentlemen occupy high positions in the business community, and being residents of Winnipeg, are in a position to give the affairs of the Bank their close attention.

The Board, as now constituted, is a working Board, composed of business men who have made good in the West, and I think the Shareholders may feel perfectly safe in leaving the affairs of the Bank in such good hands.

During the year five Branches have been closed and five have been opened. It is not always possible to estimate how a district may turn out from a banking standpoint, before giving it a trial. It has not been necessary, I am glad to say, to close many Branches since we began business, but when it is found that a Branch is not making much headway, we think it wiser to start somewhere else where business is better. The Branches closed were: Aylmer, Que.; Irricana, Alta.; Lumby, B.C.; Papineauville, Que.; Peachland, B.C., and the Branches opened were: Aneroid, Sask.; Borden, Sask.; Cadillac, Sask.; Lancer, Sask.; Prelate, Sask.

During the year the decennial revision of the Bank Act took place. Amongst the most important changes, as far as we are concerned, are:—

The establishment of the Central Gold Reserves,
Authority to lend to farmers on their threshed grain,
The appointment of an outside Auditor, and
The elimination of Local Directors.

Under the provisions of the new Act, a Bank may continue to issue its own Notes by depositing dollar for dollar in the Gold Reserves, after it has reached the limit of its authorized circulation, and has exhausted the emergency circulation of 15 per cent. of its combined Capital and Reserve, which is available during the crop moving season, between the 1st September and the 1st March.

The existence of the Gold Reserves has been a great convenience to this Bank during the crop movement. It had on the 29th November $750,000 in the Gold Reserves, and its Note Circulation at one time reached the considerable sum of $3,500,000.

The provision in the Act which enables a Bank to lend to a farmer on the security of his threshed grain is also new, and has been availed of by us to quite a large extent. We still, however, regard this class of loan in the light of a moral risk, and we continue to depend more upon the character of the borrower than upon the security.

The independent audit is another innovation which will doubtless work out on the whole both in the interests of the Banks and of the Public. You will be called upon to-day to elect an Auditor for the coming year, and fix his remuneration.

In the new Act the power of a Bank to appoint Local Directors has been taken away. We are, therefore, unable to re-elect the gentlemen who have up to the present time represented the Bank in this capacity in Toronto and elsewhere. We hope, however, still to retain their influence and friendship.

The other changes are unimportant, and do not affect us to any appreciable extent.

In the Prairie Provinces there is quite a noticeable movement taking place in the direction of mixed farming, which is much to be commended. We are endeavoring to do our share in encouraging this movement by making advances to farmers for the purchase of cattle, sheep and hogs, and we are pleased to say that the statements of affairs that are submitted to us by farmers show assets of this class much oftener than formerly.

The fine weather which prevailed during the late Autumn months enabled our farmers to do a considerably larger proportion of their ploughing in the Fall, and it is not unreasonable to expect that the acreage under crop next season will be largely increased.

The crop this season was of the finest quality, and will probably turn out, when all returns are in, to be the largest in the history of the country. There was little or no damage from any cause, apart from some losses by hail. It was harvested cheaply and quickly, the only unfavorable feature being that the price was low.

The returns came at an opportune time, when money in the West was scarce, and helped out the local situation.

The West made good as far as the crop was concerned, and as the crop is really what we all depend upon, I think it may be said that it met its obligations as far as it could be expected to do so.

In Ontario, where the Bank has twenty-five Branches, crops have been up to the average, and our business has been quite satisfactory.

In British Columbia our business continues to be good, as it has been from the first.

The total results of the year's business may be regarded as satisfactory.

In view of the financial situation outside of our own country, the Bank will continue to pursue a conservative policy, and will not allow a desire for large profits to tempt it into too rapid expansion. It must be remembered that this country, being new and in the course of development, cannot finance itself upon what it produces at present, and that it must obtain money from abroad until it is on a self-supporting basis; also that temporary checks must inevitably occur from time to time in the supply of money from abroad, which will mean a scarcity of money here.

Personally, I am quite satisfied with our progress up to date, and I see every reason to expect that we shall continue to progress at the same rate.

I move that the report now read be adopted and printed for publication.

In seconding the adoption of the report, Mr. J. H. Ashdown said: "Mr. Chairman, and Gentlemen,—I regret that Capt. Robinson, the Vice-President of the Bank, is not present with us to-day. He is in the West and could not get here in time.

"The report which has been read by the President is full and covers the ground thoroughly. I do not know that it is necessary to add anything to it. However, I think the Bank is to be congratulated upon holding the position it has during the past year. If the Board had not been so conservative, the profits might have been larger, but in that case we would not have held such large reserves.

"My opinion is that it was well to be on the safe side. As the Bank is young and the capital comparatively small, it was well to be prepared to meet any emergency which might have occurred if the crop which has now been garnered had not come off in the shape it did. If the season had not been so favorable, the situation would have been different, and the wisdom of holding a large reserve would have been seen. Circumstances have turned out such that, if we had foreseen, we might have done better.

"The Bank is to be congratulated upon its known strength in the markets of New York, Toronto and Montreal, where it is important that its position should be well known, and the report is in my mind satisfactory in all respects.

"I have much pleasure in seconding the adoption of the report."

Dr. Hutchinson then said: "As a Shareholder, I think I voice the sentiments of the Shareholders present, when I say that the statement is absolutely satisfactory in every way to the Shareholders, and personally I feel that the Directors should be congratulated upon the strength of the statement, especially our General Manager, Mr. Campbell. It looks satisfactory in every way."

It was then moved by Mr. Kenneth MacKenzie, seconded by Mr. A. B. Ellis: The Northern Crown Bank at its Annual Meeting of Shareholders, held on the 17th day of December, 1913, hereby enacts as follows: That the number of shares to qualify a Shareholder for election on the Board of Directors be increased from Thirty Shares to a sufficient number of Shares to qualify him for election under Section 20 of the Bank Act, and that By-law No. 1, as amended by the Shareholders on the 9th February, 1910, be amended accordingly by striking out the words, "At least thirty" in the fourth line thereof, and substituting the words, "A sufficient number of," and by inserting the words, "To qualify him for election under Section 20 of the Bank Act," after the word, "Bank" in the fifth line thereof.

It was then moved that Mr. Nicholas Bawlf, seconded by Dr. J. W. Hutchinson, that Mr. Douglas Dewar, of Messrs. Marwick, Mitchell, Peat & Co., be appointed Auditor of the Bank for the ensuing year, under Section 65 of the Bank Act, and that his remuneration shall not exceed $3,000.

It was then moved by Mr. S. S. Cummins, seconded by Mr. W. W. Evans, that the thanks of the Shareholders be tendered to the President, Directors, General Manager and Staff. To this motion the President made a suitable reply.

It was then moved by Mr. W. A. Anderson, seconded by Mr. F. Steele, that the annual election of Directors be now proceeded with.

The election of Directors for the ensuing year was then proceeded with, resulting in the following gentlemen being elected: J. H. Ashdown, Hon. D. C. Cameron, A. McT. Campbell, H. T. Champion, W. J. Christie, Sir D. H. McMillan, Capt. Wm. Robinson, John Stovel.

Mr. John Stovel, being called upon by those present, said: Mr. President and Gentlemen,—I do not know that I can say anything other than this, that I thank you for the confidence you have placed in me in putting me on the Board. When I was approached by the President and Vice-President to allow my name to appear on this Board, I did so somewhat reluctantly and yet with pleasure. I have always taken an interest in the Northern Crown Bank, because it is a home institution. I am strongly in favor of supporting our own institutions, and my life has been spent in helping to build up these institutions and the City of Winnipeg. I still feel disposed to spend the rest of my life in that endeavor.

At a subsequent meeting of the Board of Directors, Sir D. H. McMillan was re-elected President and Capt. Wm. Robinson, Vice-President.

RURAL TELEPHONE COMPANIES INCORPORATED.

The following is a list of rural telephone companies incorporated in Saskatchewan, together with their capital and head office:—

Rich Prairie Rural Telephone Company, Limited, Bienfait, $250.

Thorson Rural Telephone Company, Limited, Macoun, $200.

The Elstow Rural Telephone Company, Limited, Elstow, $650.

◆

The adoption of the Knight Motor by the F. B. Stearns Company of Cleveland, seems to have been the beginning of the taking up of this motor by several prominent firms throughout the United States. The achievements of the Knight Motor, both in the United States and abroad, have induced the Moline Automobile Company, of Moline, Ill., to adopt it. This company will have cars equipped with the powerful Knight Motor on the market by the first of the year. Scarcely second in importance to their announcement in regard to the Knight Motor is the recent purchase of a license by J. M. Willys of the Willys Overland Company. This company is one of the largest poppet engine builders of the United States. In the Garford plant at Elyria, Ohio, which was formerly employed in the construction of Garford trucks, they have started to build the Knight Motor. This is significant, for possibly no one motor car company has been more strikingly successful than that directed by Mr. Willys.

COMPANIES CHANGING NAMES.

The following companies in Ontario have changed their names:—

The Ontario Pipe Line Company, Limited, to United Gas and Fuel Company of Hamilton, Limited.

British Canadian Securities Corporation, Limited, to Upper Canada Securities Corporation, Limited.

Wells Adjustable Chaplet Company, Limited, to Wells Pattern and Machine Works, Limited.

The following company in Quebec has changed its name:

Buffalo Securities Company, to J. Ettenberg and Company, Limited.

◆

The jury investigating deaths due to the Great Lakes' storm on November 9th reports, in part:—"Considering the vast amount of lake traffic along this part of Lake Huron, and that Goderich is the second largest grain-receiving port on the upper lakes, and considering all the circumstances appearing before us, we strongly recommend that the government should, without delay, and at any cost, complete and equip Goderich as a real harbor of refuge, first, by fully completing the breakwall now begun; second, by installing up-to-date lights and a fog signal at the entrance of the breakwall; third, by dredging to the necessary depth the outside basin formed by the breakwall so that ships may have some sea room after the stress of entering, to manœuvre and steady themselves before trying to enter the piers."

SEVENTY COMPANY CHARTERS GRANTED

Six Large Corporations Formed—Manitoba Contributes Fourteen New Companies

New incorporations number 74; the head offices of these companies are located in four provinces. The total capitalization amounts to $21,453,440, the largest companies being as follows:—

American Titanic Iron Company, Limited, Quebec	$1,000,000
The Wolthausen Hat Corporation, Limited, Brockville	1,000,000
Pneuma Tubes, Limited, Toronto	1,000,000
The Renfrew Molybdenum Mines, Limited, Mount St. Patrick, Ont.	1,500,000
Marten Lake Mining Company, Limited, Gowganda	2,000,000
Oil Processes, Limited, Ottawa	7,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	33	$16,325,000
Quebec	22	3,251,490
New Brunswick	5	376,950
Manitoba	14	1,500,000
	74	$21,453,440

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Sandwich, Ont.—Keystone Gun Club; J. E. Purser, S. K. Peck, V. Chauvin.

Arnprior, Ont.—Pollocks, Limited, $20,000; H. R. Pollock, A. Bremner, R. Kelley.

Trout Creek, Ont.—Algonquin Ranch Company, Limited, $40,000; G. Trussler, J. Trussler, A. Oldfield.

Gowganda, Ont.—Marten Lake Mining Company, Limited, $2,000,000; W. T. Grose, J. J. Trickey, T. Scott.

Aurora, Ont.—Aurora Rink Company, Limited, $25,000; M. K. Lennox, J. F. Lennox, A. J. Trebilcock.

Upper Sackville, N.B.—Sackville Farmers, Limited, $50,000; A. C. Fawcett, E. A. Wheaton, W. A. Smith.

Jacquet River, N.B.—Chaleur Fox Company, Limited, $27,000; A. H. McLane, C. L. Fenderson, R. L. Ellis.

Melita, Man.—The Melita Flour Mill Company, Limited, $100,000; A. Schneider, G. W. Archibald, A. B. Estlin.

Sherbrooke, Que.—Sherbrooke Tile and Brick Company, $75,000; N. N. Walley, C. Beauchesne, N. E. Walley.

Brockville, Ont.—The Wolthausen Hat Corporation, Limited, $1,000,000; J. S. Lovell, C. D. Magee, R. Gowans.

Saint Stephen, N.B.—St. Stephen Fox Ranch Company, Limited, $75,000; J. W. Scovil, R. T. Horton, H. Murchie.

Port Arthur, Ont.—Troostwyk, Birkin and Greenfield, Limited, $30,000; O. Troostwyk, J. H. Birkin, V. B. Birkin.

Brantford, Ont.—The Canadian Oak Leather Company, Limited, $100,000; P. S. Thornton, E. E. Thornton, J. H. Salten.

Mount St. Patrick, Ont.—The Renfrew Molybdenum Mines, Limited, $1,500,000; S. T. Chown, J. E. H. Barnet, J. Geale.

St. John, N.B.—The Canada Nail and Wire Company, Limited, $200,000; W. A. Johnston, R. L. Johnston, G. McRae.

Coteau Station, Que.—La Compagnie d'Aqueduc de Coteau Station, Limited, $20,000; J. A. Bourbeau, L. Doucet, G. Montpetit.

St. Catharines, Ont.—Russell Jennings Manufacturing Company, Limited, $50,000; A. L. Jennings, J. K. Kernahan, F. J. Graves.

L'Epiphanie, Que.—La Compagnie Electrique de L'Epiphanie, Limited, $49,000; J. A. Bourbeau, J. B. T. Richard, M. Forest.

Lutz Mountain, N.B.—Lutz Mountain Fur Ranching Company, Limited, $24,950; C. L. Somers, H. G. Steeves, G. C. Somers.

Matane, Que.—La Compagnie de Navigation de Matane et Sept Iles, Limited, $90,000; H. Tessier, J. A. Faford, L. H. Levasseur.

Three Rivers, Que.—The Aetna Mineral Water Company, Limited, $49,500; J. A. Peltier, L. P. Normand, J. A. Tessier. La Compagnie Le Bien Public, $45,000; J. Massicotte, J. E. Poisson, P. Cloutier.

Victoriaville, Que.—Begin Manufacturing Company, Limited, $49,000; W. Begin, M. D. G. Begin, J. C. Hoon. Victoriaville Bedding Company, Limited, $150,000; D. H. Pennington, J. Z. Auger, A. G. Letourneau.

Fort William, Ont.—Motor Cars and Supply Company, Limited, $40,000; H. W. Robinson, F. F. Daglish, R. E. Wright, Mount McKay Products, Limited, $600,000; A. H. Davidson, L. Y. McIntosh, W. C. McLean.

Quebec, Que.—La Compagnie du Parc Savard, Limited, $149,000; J. A. Theberge, J. A. Desjardins, J. A. Marcoux. American Titanic Iron Company, Limited, $1,000,000; S. N. Parent, E. Roberge, N. T. Turgeon.

Ottawa, Ont.—Ottawa Valley Trading Company, Limited, $50,000; G. W. Ballantyne, R. G. Code, E. F. Burritt. John M. Garland, Son and Company, Limited, $500,000; J. L. Garland, E. Garland, J. H. Garland. Oil Processes, Limited, $7,000,000; E. Seybold, W. G. Bronson, M. Orme.

Montreal, Que.—The Rigaud Granite Company, Limited, $250,000; E. Fabre, C. G. Ogdon, P. S. Conroy. Union Securities, Limited, $5,000; D. King, L. Caron, M. Shaughnessy. Le Theatre, Limited, $10,000; J. P. Pelletier, J. L. Audet, E. Audet. Langelier Trust Company, Limited, $20,000; L. Langelier, J. A. M. Marin, G. Robert. The Standard Amusement Company, $49,990; S. J. Dunning, A. R. Clapperton, H. G. Goodfellow. Boulter, Waugh, Limited, $400,000; D. P. Gillmour, F. G. Bush, G. R. Drennan. Sanibuild, Limited, $50,000; C. J. E. Charbonneau, A. Blanchard, L. J. M. Dugas. The William Ewing Company, Limited, $250,000; J. H. Davison, W. McWilliam, C. K. Graham. Varyland Investment Company, Limited, $190,000; A. E. de Lorimier, J. E. Morier, E. Charette. Richmond Construction Company, Limited, $100,000; P. Bercovitch, W. P. Kearney, E. Lafontaine. Fraser and Chalmers of Canada, Limited, $100,000; J. J. Creelman, G. S. Stairs, P. F. Casgrain. W. J. Inglis Company, Limited, $150,000; E. E. Howard, J. DeWitt, H. C. McNeil.

Winnipeg, Man.—The Continental Sales Company, Limited, $20,000; W. G. Scott, W. S. Scott, C. G. Scott. Western Assets, Limited, $300,000; G. C. Lindsay, R. M. Fisher, G. Norton. Windsor Investment Company, Limited, $100,000; C. D. Morgan, E. J. Prittie, W. P. Fillmore. J. H. Baird and Company, Limited, $20,000; J. H. Baird, E. B. Reynolds, A. E. Johnston. Guardian Mortgage Corporation, Limited, $500,000; J. H. Baird, E. B. Reynolds, A. E. Johnston. Frankman and Company, Limited, $50,000; J. Frankman, F. J. Sutton, G. Blom. Germain French Bread Company, Limited, $100,000; A. Germain, E. Germain, G. R. Vendome. Good Roads Machinery Company, Limited, $200,000; W. E. Clark, J. Smith, T. C. Parkin. Leon Morris Hardware Company, Limited, $20,000; L. Abramovitch, L. J. Morris, A. W. Myers. The Manitoba Vinegar Manufacturing Company, Limited, $20,000; F. Wilde, H. Dorfman, H. Luginsky. The Robertson Building Company, Limited, $20,000; N. Robertson, H. G. Morson, J. L. Harrison. Winnipeg Broom Manufacturing Company, Limited, $40,000; C. V. Alloway, H. J. Horan, J. Provisor. Canadian Wood Preserving Company, Limited, $10,000; W. Buekler, W. S. Harris, A. E. Larkin.

Toronto, Ont.—Automat Advertising Company of Canada, Limited, $40,000; J. E. Wood, W. H. Denny, J. W. Bundy. The Balmy Beach Gun Club; J. H. Trimble, P. J. Boothe, W. R. Draper. Happy Home Medicine Company, Limited, $40,000; J. Berman, L. Barash, B. Kaminsky. The Queen City Driving and Jockey Club, Limited, $200,000; J. H. Smith, A. N. Garrett, S. A. Proctor. Pneuma Tubes, Limited, $1,000,000; G. H. Gray, W. R. Willard, J. J. Gray. J. E. McDonald, Limited, $40,000; J. E. McDonald, T. Brown, J. C. McKay MacBeth. The Credit Valley Stone Company, Limited, $250,000; R. A. Reid, A. B. Reston, D. J. Coffey. Construction Supply Company, Limited, $60,000; W. Bain, J. Ellis, J. J. Dashwood. The British Home Building Company (Toronto), Limited, $150,000; J. Hughes, W. L. Clark, H. R. Turner. Motor Agencies, Limited, $100,000; D. I. Grant, M. Macdonald, G. W. Adams. Northern Ontario Trading and Ranching Company, Limited, $500,000; H. E. Manning, C. A. McKay, J. S. Duggan. The Eatonia Club; G. T. Wolfe, E. S. Williams, J. A. Haines. Security Realty Company, Limited, $150,000; J. F. Boland, F. J. Boland, C. Inrig. The Dart Cycle Car Company, Limited, $100,000; H. B. Smith, F. M. Lorsch, A. G. Robertson. The Students' Amusement Club, Limited, $10,000; W. A. Proudfoot, A. A. Macdonald, R. S. McCormick. Vaughan Sand and Gravel Company, Limited, $100,000; T. W. Murray, R. Richardes, W. Fairburn. Sulphur Products, Limited, $150,000; V. C. Gordon, T. E. McCraken, J. R. Roaf. Commercial Account Registers, Limited, $100,000; F. J. Dunbar, A. G. F. Lawrence, E. G. Binkley. Non-Nitro Explosives Company, Limited, $180,000; J. J. Flint, G. D. Waters, H. A. Hall. Kawneer Manufacturing Company, Limited, $100,000; H. W. Page, R. W. Rogerson, Shearer P. Crow. Niagara Investments, Limited, $100,000; G. B. Burson, W. P. Good, M. C. Houston.

COMMERCIAL BANK OF SCOTLAND

The Commercial Bank of Scotland, Limited. whose headquarters are at Edinburgh, has an office in London, England, and 169 branches throughout Scotland. Its latest statement shows that profits for the year ended October 31st were $1.202.848 and $102.525 was brought forward. The dividend paid for the second half-year was $500,000, less $29.166 for income tax, the rate being 10 per cent. The assets total $108,815,510.

The Canadian Bank of Commerce

Statement of the result of the business of the Bank for the year ending 29th November, 1913

Balance at credit of Profit and Loss Account, brought forward from last year	$ 771,578 88
Net Profits for the year ending 29th November, after providing for all bad and doubtful debts	2,992,951 10
	$3,764,529 98
This has been appropriated as follows:	
Dividends Nos. 104, 105, 106 and 107, at ten per cent. per annum	$ 1,500,000 00
Bonus of one per cent. payable 1st June	150,000 00
Bonus of one per cent. payable 1st December	150,000 00
Written off Bank Premises	500,000 00
Transferred to Pension Fund (annual contribution)	80,000 00

RAILWAY SECURITIES GUARANTEED

Dominion Notes in Circulation—Record of Dominion Loans.

The list given in the public accounts of securities guaranteed by the Dominion is as follows:—

1. Canadian Northern Railway Company (1903). The guarantee is for the principal of £1,923,287 sterling, and interest thereon at the rate of 3 per cent. per annum for fifty years.

2. Canadian Northern Railway Company (1908). The guarantee is for the principal of £1,622,586 19s. 9d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from July 20, 1908, interest payable half yearly.

3. Canadian Northern Ontario Railway Company (1911). The guarantee is for the principal of £7,493,835 12s. 4d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from May 19, 1911, interest payable half yearly.

4. Canadian Northern Alberta Railway Company (1910, amended 1912). The guarantee is for the principal of £647,260 5s. 6d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years from May 4, 1910, interest payable half yearly.

5. Grand Trunk Pacific Railway Company (1903 and 1904). The guarantee is of 3 per cent. bonds of the railway company to an amount equal to 75 per cent. of the cost of construction of the western division of the National Transcontinental Railway, but not exceeding $13,000 per mile in respect of the prairie section of the said railway. The amount of bonds issued and guaranteed is £7,200,000, of which £3,200,000 were issued in 1905, £2,000,000 in 1909, and £2,000,000 in 1910.

6. Canadian Northern Alberta Railway Company (1912). The guarantee is for the principal of £733,561 12s. 10d. sterling debenture stock and interest thereon at the rate of 3½ per cent. per annum for fifty years, from April 1, 1912, interest payable half yearly.

Advances were made by Canada under statute during the past fiscal year to the Montreal harbor commissioners amounting to $2,200,000.

Under proper authority £2,287,700 or $11,133,473.32, Grand Trunk Pacific Railway 3 per cent. mortgage bonds were purchased by Canada during the fiscal year 1912-13.

Circulation of Dominion Notes.

The circulation of Dominion notes stood at $112,101,885.65 on March 31st, 1913, being a decrease under the circulation at the close of last year of $1,227,747.75.

On May 1, 1912, the 3¾ per cent. loan of 1908-12 for £4,681,870 12s. 4d. or $22,785,103.68 was redeemed and dealt with as follows:—

$17,344,113.05	redeemed in cash.
5,440,990.63	converted into 3½ per cent. loan, 1930-50 (February, 1912, issue).
$22,785,103.68	

The above loan was issued in London for £5,000,000, June 24, 1908, redeemable May 1, 1912, with the option up to September 30, 1910, of converting into 3 per cent. inscribed stock 1938 on the basis of £106 for each £100 3¾ per cent. loan. On the maturity of the Canada reduced loan of 1885, due January 1, 1910, and of the 1875 portion of the 1875-8 guaranteed loan, due October 1, 1910, stocks of the above loan to the extent of £130,435 0s. 10d. and £66,844 6s. 10d., respectively, which were held as a portion of the Sinking Funds of such loans, were cancelled and the amount of the 3¾ per cent. loan then outstanding was reduced by such amounts. Stocks and bonds to the amount of £120,850 were converted into 1938 stock under the terms of the prospectus.

Loan of 1912.

On October 1, 1912, the 4 per cent. loan of 1908-12 for £1,235,000 or $6,010,333.35 was redeemed in cash.

The above loan was issued in London for £1,500,000, December 11, 1907, redeemable October 1, 1912, with option up to September 30, 1910, of converting into 3 per cent. inscribed stock 1938 on the basis of £105 for each £100 4 per cent. loan. On the maturity of the Canada reduced loan of 1885, due January 1, 1910, and of the 1875 portion of the 1875-8 guaranteed loan, due October 1, 1910, bonds of the above loan to the extent of £117,500 and £23,400, respectively, which were held as a portion of the sinking funds of such loans, were cancelled and the amount of the 4 per cent. loan then outstanding was reduced by such amounts. Bonds to the amount of £5,000 were converted into 1938 stock under the terms of the prospectus.

◆

The Bank of British North America has opened a branch at Kandahar, Sask., under the management of Mr. H. Delamater.

"The Busy East" of Canada, the magazine heretofore published from St. John, has been purchased in its entirety by Moncton parties, and will hereafter be issued from that city.

DEBENTURES FOR SALE

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

DEBENTURES FOR SALE

TOWN OF MORINVILLE, ALTA.

Sealed tenders addressed to the undersigned will be received for $16,000 6 per cent. local improvement debentures, $10,000 payable in 19 years and $6,000 payable in 20 years.

J. B. DALPHOND,
Secretary-Treasurer.

Morinville, Alta.

TOWN OF SWAN RIVER, MANITOBA.

Tenders will be received by the undersigned at his office in Swan River, Manitoba up to February 16th at 8 p.m. for $4,000 worth of local improvement debentures of Town of Swan River, Manitoba. Term 20 years, repayable by equal instalments of interest and principal. Rate 6 per cent. Dated September 15th, 1912. Repayable each 15th September.

Highest or any tender not necessarily accepted.

B. E. ROTHWELL.

Swan River, Manitoba

UNITY BUILDING COMPANY

Owing to the recent refusal of the creditors and of the second mortgage bondholders to sanction a scheme that the first mortgage bondholders of the Unity Building Company, Limited, suggested for the raising of $30,000 in bonds, the Montreal Trust Company has been appointed provisional liquidator of the company. On December 2nd, the bondholders of the company met and decided to raise $30,000 to take care of immediate liabilities. Before this could be done it was necessary to receive the consent of creditors and second mortgage bondholders.

Union Bank of Canada

ANNUAL GENERAL MEETING

Held at Winnipeg, December 17th, 1913

The Forty-ninth Annual General Meeting of the Shareholders was held at the Banking House in Winnipeg, on Wednesday, December 17th, 1913.

The Annual General Meeting for the election of directors and other general business, was held at the banking house, in the City of Winnipeg, on Wednesday, the 17th of December, 1913. The meeting was largely attended.

The Chairman read the Annual Report of the directors, as follows:—

FORTY-NINTH ANNUAL STATEMENT, 29th November, 1913.

PROFIT AND LOSS ACCOUNT

Balance at credit of account, 30th November, 1912	$ 75,483.76
Net profits for the year, after deducting expenses of management, interest, due depositors, reserving for interest and exchange, and making provision for bad and doubtful debts and for rebate on bills under discount, have amounted to (being slightly over 15 per cent. on the paid-up capital, during the year).	750,095.27
	$825,579.03

Which has been applied as follows:—	
Dividend No. 104, 2 per cent. paid March 1st, 1913	$100,000.00
Dividend No. 105, 2 per cent. paid June 1st, 1913	100,000.00
Dividend No. 106, 2 per cent. paid September 1st, 1913	100,000.00
Dividend No. 107, 2 per cent. payable December 1st, 1913	100,000.00
Bonus of 1 per cent. payable March 1st, 1914, to shareholders of record as on February 14th, 1914	50,000.00
Transferred to Rest Account	100,000.00
Reserved for depreciation in securities owned by the Bank	125,000.00
Written off Bank Premises Account	50,000.00
Contribution to Officers' Pension Fund	10,000.00
Balance of Profits carried forward	90,579.03
	$825,579.03

G. H. BALFOUR,
General Manager.

JOHN GALT,
President.

The Directors have pleasure in presenting the Report showing the result of the Bank's business for the year ended 30th November, 1913.

The New Bank Act, as revised, went into force on July 1st. You will notice several changes in the form of our statement. Under Sec. 56 of the new Act, you are required at this meeting to appoint Auditors for the Bank, and to vote the amount of their remuneration.

A new set of By-laws will be submitted to you for approval and adoption if thought advisable. It will be necessary to change the date of our Annual Meeting from December to January in order that the Auditors may have sufficient time in which to complete their work.

Your Directors wish to place on record their appreciation of the excellent advice, helpful guidance and valuable work by the Bank's Committee in London, England.

It is with the deepest regret the Directors have to record the death of the Honorary President, the Honorable John Sharples. Mr. Sharples was for many years a Director, and for five years the honored and esteemed President of this Bank. Its present standing is largely due to his great interest in its welfare and sound judgment in business matters.

Mr. Wm. Price, of Quebec, was elected Honorary President, and Mr. Geo. H. Thomson has succeeded him as Vice-President.

The vacancy on the Board has been filled by the election of Mr. B. B. Cronyn, Vice-President of the W. R. Brock Company, Limited, a gentleman of long business experience in Toronto. We feel sure the judgment and influence of Mr. Cronyn will be of great advantage to the Bank.

During the past year thirty-one Branches and Agencies of the Bank have been opened in the several Provinces as follows: Ontario 4, Quebec 6, Alberta 2, British Columbia 5, Manitoba 4, Saskatchewan 10.

Three Branches in Ontario which were not giving satisfactory results have been closed.

The total number of Branches and Agencies is now 313.

The usual inspection of Head Office and of all Branches and Agencies of the Bank has been made.

JOHN GALT, President.

The President, Mr. John Galt, moved that the report be adopted and printed for distribution among the Shareholders and addressed the Meeting as follows:—

The President's Address

In moving the adoption of the Directors' Report, I have an opportunity of placing before our Shareholders a review of general conditions in Canada as they present themselves to us. The financial statement will be dealt with later by the General Manager. I shall only say that this statement is satisfactory, as it shows steady progress, and also indicates the conservative policy, which, in my judgment, is characteristic of the management of the Bank.

The year 1913 has been a trying one both for borrower and lender. There has been a general feeling of uneasiness which has caused financiers to carry an unusually large proportion of their funds in a liquid form. This has curtailed the loaning power of all the Banks and has checked the encouragement of new business, but we have been careful to see that our customers have had the money necessary to carry on their legitimate trade, and I do not think we have given any of them reason to complain.

The capital available for investment in new fixed forms such as railways, canals, city and farm buildings, etc., is, of course, limited. Of late years it has been pretty well absorbed. It is clear that when the supply is exhausted, or when causes operate to check it, expenditure in fixed forms must be curtailed. This point seems to have been reached, and Canada will have to mark time until confidence is restored and until the older countries, from whom we draw much of our capital, are in a position to again invest their savings and profits. The natural resources of Canada are so vast and so attractive, that the capital necessary for their development will, undoubtedly, be forthcoming when financial conditions become more settled.

The causes underlying the feeling of anxiety to which I have referred were world-wide, and whilst some of them are now removed, we still feel that caution is advisable and that strictest economy in both public and private affairs is necessary.

Speculation in real estate is over for the present, but the demand for building sites must continue in a country where the population is steadily increasing, and holders of such property should not be apprehensive of this class of investment. That the inability of speculators to turn over their property has had so little effect on the general business of the country is largely due to the conservative and prudent action of Canadian Banks, for they have consistently discouraged and refused to finance speculative land operations.

CROP OF 1913.

The statistics which are at our command will be furnished by the Superintendents in their reports on the several Provinces. I may say, speaking generally, that the crop results have been satisfactory. In the three great wheat growing Provinces, this has been a banner year. Not only has the yield been large, but the average quality has never been equalled, and the cost of harvesting has been unusually low owing to the magnificent weather we have enjoyed. This has, to some extent, offset the low prices which prevailed. Providence has indeed been kind to us, and that, too, at a time when we needed it most. The railways have done splendid work in handling the crop, and we have had few complaints of shortage of cars. We cannot, with our present facilities, expect much more wheat to be delivered at lake ports before the close of navigation than has been delivered this year, and the need of interior storage for our grain will be urgent for some time to come.

MIXED FARMING.

There is a marked increase in the number of live stock. Farmers are becoming more fully alive to the advantages they derive from this source and are realizing that their borrowing credit is greatly enhanced with their Bankers if they can show a good proportion of cattle in their assets, and banks should look with favor on loans for the purchase and handling of live stock.

BRITISH COLUMBIA.

Trade conditions in British Columbia have not been as bright during the year as we could wish. Conditions in the lumber trade have been unsatisfactory, and coal strikes on Vancouver Island, which have lasted for months, have thrown a great many men out of employment.

The fishing industry has had a good year, and the recent revision of the United States tariff, by which fish now enter that country free, will be of advantage to the trade.

The mining industry has yielded satisfactory returns, a very large increase in the production having taken place over the preceding year.

The fruit crop for 1913 has been a record one, the value of shipments from the Okanagan District alone being in the neighborhood of $1,400,000.

Railroad expansion has been active and about 2,300 miles was under construction during the year.

Stringent money conditions have checked many Municipal undertakings, and this, together with the closing down of lumber camps and completion of railroad work, will add to the number of unemployed during the coming winter.

Large harbor improvements have been undertaken at Victoria which have improved conditions to some extent.

In Eastern Canada, trade conditions have been good, and the crop results have been most gratifying.

PROVINCE OF ONTARIO.

Crops have been of a good average and we have again to report a prosperous year.

PROVINCE OF QUEBEC.

Along both shores of the St. Lawrence and in the Eastern Townships, conditions were favorable, and abundant crops were harvested in good order.

The lumber trade has experienced a good year, and the removal of the United States duty on lumber should stimulate trade.

MARITIME PROVINCES.

Weather conditions have been satisfactory, with the result that all crops have been above the average. The fishing industry has also experienced another profitable year.

GENERAL.

Good Roads.—The question of good roads is of paramount importance, and there yet remains a great deal to be done. We are glad to be able to report that the Legislatures of the various Provinces are giving their attention to this important question.

Immigration.—Reports continue to be of a satisfactory nature. Approximately 400,000 people have entered Canada during the year ending September, 1913. The immigration authorities report favorably on the class of these new settlers, and estimate them to be worth $1,000 per capita to Canada.

Whilst we believe trade conditions to be on a sound basis, and the financial position of Canada in a most gratifying condition, we still consider that it is the duty of this Bank to exercise caution and to discourage any attempts to undertake large commitments whilst conditions in Europe are readjusting themselves after the recent disturbance.

FINANCING OF MUNICIPALITIES.

From our point of view it is very desirable that the Provincial Governments should take action in regard to moneys required for municipal expenditure. A commission should pass on all issues after expert examination of proposed expenditures. If these issues carried the guarantee of the Province, and were sold under its auspices they would have a greatly enhanced value, and the saving to the community would be very large, both in the difference of value and in the supervision of expenditure exercised by the Government. Under the present system the initial financing falls upon the Banks because they have to await the sale of debentures, the disposition of which, in turn, often depends upon the ability and knowledge of men who have had little or no experience in financial operations, and who make their sales in a haphazard instead of a systematic manner. In this way sometimes, for indefinite periods, large sums are tied up which should be employed in the general financial operations of the community.

The proposed legislation by the Province of Saskatchewan along these lines is, in my judgment, likely to prove of benefit.

NEW UNITED STATES TARIFF.

The recent reduction in the United States tariff should result in obtaining a larger market for our products.

In conclusion, let me say that the figures which have been laid before you must be particularly gratifying to our Shareholders. We are now a large institution, and our growth and strength illustrate, to some extent, the general development of Canada. With your help we shall do our best to keep pace with this progress, and to build up a great Bank, which will be in touch with the needs of the country, and a credit to the whole Dominion.

General Manager's Address

The General Manager, Mr. G. H. Balfour, addressed the meeting as follows:—

Gentlemen,—Owing largely to the unsettled financial conditions which have obtained throughout the whole world during the year under review, business has not been normal and has caused bankers much anxiety. Conservative administration and caution have been adhered to, and whilst supplying our customers with their legitimate requirements, we have aimed at maintaining, at all times, a strong financial position in so far as liquid or immediately available assets are concerned.

The early marketing of the Western grain crops has had an important bearing upon collections in that section of the country in which we have large interests and is reflected in the increased volume of deposits.

Dealing with the figures in the Profit and Loss Account and in the Balance Sheet, I am pleased to say that after making ample provision for all necessary reserves, the net profits show an increase of almost 1 per cent. over those of 1912, being slightly over 15 per cent. on the paid-up capital.

In the opinion of the Directors this result has been deemed sufficiently satisfactory to justify the declaration of a bonus of 1 per cent. in addition to the regular dividend of 8 per cent. (2 per cent. quarterly). This bonus will be paid on the 1st March next to Shareholders of record as on February 14th, 1914.

Owing to the prevailing monetary conditions, prices of securities generally have declined during the year, and it has been considered advisable to set aside the sum of $125,000, out of Profits, to a Special Reserve Account, to meet the depreciation in market values of stocks, bonds and debentures, owned by the Bank as an investment.

$100,000 has been added to Rest Account, which now stands at $3,400,000.

$50,000 has been written off Bank Premises.

The usual contribution of $10,000 has been made to the Officers' Pension Fund.

$90,579.03 is carried to the new Profit and Loss Account, as against $75,483.76 brought forward from 1912.

Some changes will be observed in the classification of figures in the Balance Sheet; these were necessary to comply with the provisions under the revised Bank Act.

Deposits have increased by $8,952,000, which, considering financial conditions, is looked upon as very satisfactory. They now amount to $64,595,288.19.

Our immediately available assets are $25,000,000, or 34.59½ per cent. to liabilities to the public.

Current Loans in Canada have increased by $1,780,000, and now amount to $46,798,969.

Loans and Discounts outside of Canada total $1,640,472, as against $779,000 last year.

Real Estate and other Bank Premises has been reduced by $150,000. Property and buildings acquired for the use of the Bank are now at once charged to Bank Premises.

Mortgages on Real Estate sold by the Bank are larger by $47,000 than a year ago, and overdue debts show an increase of $45,000.

In agricultural districts it is difficult to impress upon the farmer the necessity of attending promptly to his paper at its maturity, especially when weather conditions are favorable to plowing and other agricultural pursuits. Bank Premises have increased $200,000. It is found necessary to erect a number of buildings every year for our own occupation, when suitable premises cannot be leased, every effort being made to provide comfortable accommodation for members of the staff at country branches.

The total assets of the Bank are now over $80,000,000, as against $69,400,000 in 1912, showing a substantial expansion in the growth of the Institution during the year.

PROGRESS OF THE BANK.

During the year three Branches were closed in Ontario.

The total number of Branches and Agencies is now 313, as follows: Alberta, 48; British Columbia, 20; Manitoba, 50; Saskatchewan, 90; Ontario, 89; Quebec, 13; Maritime Provinces, 2; London, Eng., 1.

Since closing of the year, we have also opened a West End Branch in London, Eng., in the Haymarket, corner of Panton Street, and at Smithers, B.C.

In connection with the very satisfactory manner in which the railway companies have carried out the grain from the Western Provinces this year, it may be interesting for you to know that up to December 1st, the following quantities of grain have passed Winnipeg for the head of the Great Lakes, namely, 99,000,000 bushels wheat, 32,500,000 bushels oats, 9,500,000 bushels barley, and 6,500,000 bushels flax.

Before sitting down I desire to bear testimony to the efficiency and loyalty of the Staff, not only of the Executive Officers, but the whole Staff of the Bank, to whose energy and ability much of the success which has attended the operations of the past year, is due.

Mr. Geo. H. Thomson, the Vice-President, seconded the adoption of the Report, which was carried.

AUDITORS.

Messrs. T. Harry Webb, C.A., E. S. Read, C.A., and C. R. Hegan, C.A., were elected as Auditors of the Bank.

The ballot was unanimous, and these gentlemen were declared elected.

It was moved by Hon. W. H. Montague, P.C., seconded by Mr. E. H. Riley, of Calgary, that the thanks of the Shareholders are hereby tendered to the Honorary President, President, Vice-Presidents and the Directors of the Bank for their valuable services during the year.—Carried.

Mr. G. H. Balfour, General Manager; Mr. E. O. Denison, of Minnedosa, and Mr. H. J. Pugh, of Virden, replied briefly on behalf of the Staff.

The Scrutineers reported the following gentlemen elected as Directors for the ensuing year: Messrs. Wm. Price, John Galt, R. T. Riley, Geo. H. Thomson, E. L. Drewry, F. E. Kenaston, W. R. Allan, M. Bull, Hon. Samuel Barker, P.C., M.P.; E. E. A. Duvernet, K.C.; Stephen Haas, Lt.-Col. John Carson, F. W. Heubach, B. B. Cronyn, Wm. Shaw. The meeting then adjourned.

At a subsequent meeting of the newly elected Board, Mr. Wm. Price was elected Honorary President; Mr. John Galt, President; Mr. R. T. Riley and Mr. Geo. H. Thomson, Vice-Presidents.

The De Laval Manufacturing Company, of Quebec, with capital of $40,000, has been licensed to do business in Ontario.

The new Canadian Northern line between Ottawa and Toronto will be ready to receive regular freight business on January 3.

A branch of the Canadian Bank of Commerce has been opened at Bath, N.B., with a sub-agency at Bristol, N.B., both under the supervision of the Fredericton manager.

The capital of Curtis and Harvey (Canada), Limited, has been doubled. This company is the Canadian organization of Curtis and Harvey of England, who are the oldest explosive manufacturers in the world. They operate many factories abroad, and their works here are just outside Montreal on the Lake of Two Mountains. There will be no public issue of the company's securities. Only a portion of the authorized increase of stock has been issued, and it has all been taken up privately. The balance of the issue will remain in the treasury to provide for the growth of the business.

A branch of the Canadian Bank of Commerce has been opened at 875 St. Denis street, Montreal, under the management of Mr. J. R. Boivin.

Hon. J. H. Calder, minister of railways in the Saskatchewan Legislature, has made a statement to the effect that actual work on the Grand Trunk Pacific bridge over the South Saskatchewan River will be commenced within thirty days. The Government intend giving the company a further guarantee of $2,000 per mile, and in addition $1,300,000 to cover the cost of two railway bridges, one of which is on the line from Young to Prince Albert.

"At home and in France," one English financial critic writes, "there will probably be some further slackening in trade, and, at home at all events, there will be a slackening in new issues. This country went on lending and forming new companies for the past twelve or fifteen months because other countries were not in a position to do so. But now that France is about to take up her old role, she will be the lender and issuer of companies to a much greater extent than previously."

DIVIDENDS AND NOTICES

The Imperial Canadian Trust Co.

Head Office, Winnipeg.

Notice is hereby given that a dividend at the rate of SEVEN per cent. per annum, upon the paid-up Capital Stock of the Company, has been declared for the year ending December 31st, 1913, payable at the Head Office of the Company and its Branches on and after Friday, January 2nd, 1914.

The transfer books of the Company will be closed from the 17th to the 31st of December, 1913, both days inclusive.

By order of the Board,

W. T. ALEXANDER,
Managing Director.

Winnipeg, December 2nd, 1913.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of Two Dollars per share on the Capital Stock of this Institution has been declared and will be payable at its Head office, in this City, on and after Friday, the 2nd January next, to shareholders of record at the close of business on the 15th December next.

By order of the Board,

A. P. LESPERANCE,
Manager.

Montreal, November 25th, 1913.

NIPISSING MINES COMPANY,

165 Broadway, New York, December 15, 1913.

The Board of Directors has to-day declared a regular quarterly dividend of Five Per Cent. and an extra dividend of Two and One-Half Per Cent., payable January 20, 1914, to shareholders of record as of December 31, 1913. The transfer books will close December 31, 1913, and reopen January 19, 1914.

P. C. PFEIFFER,
Treasurer.

DIVIDEND NOTICE

DOMINION TRUST COMPANY

Head Office, Vancouver, B.C.

Dividend No. 16.

Notice is hereby given that an interim dividend at the rate of 8 per cent. per annum upon the paid-up capital stock of this Company will be paid on January 2nd, 1914, for the quarter ending 31st December, 1913, to shareholders of record 13th December, 1913.

Holders of share warrants will receive dividends on presentation of Coupon No. 5 at any of the offices of the Company.

The transfer books will be closed on 15th December.

By order of the Board,

A. H. BAIN,
Secretary.

Vancouver, B.C., November 29th, 1913.

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the Bank, in Montreal, on **Thursday, the 8th day of January next.** The chair will be taken at 11 o'clock a.m.

E. L. PEASE,
General Manager.

Montreal, November 29th, 1913.

NOTICE.

The Western Central Railway Company will apply at the next Session of the Parliament of Canada for an Act to extend the times for commencement and completion of its lines of railway, and to authorize other railways to guarantee its bonds. Mowat, Langton and Maclennan, Solicitors.

NEW TRANSPORTATION SCHEME FOR TORONTO.

A new transportation proposition was laid before the Toronto city council by Mayor Hocken. This involves an immediate debenture outlay of some eighteen million dollars, the physical assets of the Toronto Railway and the price of the Toronto Electric Light property to be paid in cash at the commencement of the agreement; and a future payment to the company of from eight to thirteen million dollars, in compensation for the "intangible assets," this amount to be determined by the future earnings of the railway system. A minimum of eight millions would be paid no matter what the profits of the system between now and the end of the franchise period in September, 1921, and should the profits exceed eight millions, the company would receive the excess up to a total of thirteen millions, all further profits to go to the city.

It is proposed that the system should be operated during the period by general manager Fleming, under a commission composed of three members appointed, respectively, by the city, the company and the provincial government. The shareholders of the company would be guaranteed, as a first charge on the net earnings, interest at the rate of 5 per cent. on the eighteen millions of original outlay, this to take the place of their present dividend of 8 per cent. on the company's capital stock of eleven million dollars.

Extensions of the system to provide an ideal service would be made and financed in accordance with the original scheme of Bion J. Arnold, co-ordinated with the tube and surface railway proposal of the Toronto Harbor Board.

The Toronto Electric Light purchase would be consummated along the original lines, except that it is proposed that two million dollars of the investment should be written off, being cared for by a debenture charge against the city's general credit, thus leaving but six millions of capital charge for the electric light system to support.

◆

Some 150 ranches not incorporated, which at an average capitalization of $25,000 each, would represent the above capital of $3,750,000.

GERMAN CRITICS OF CANADA.

Replying to adverse criticisms of Canadian matters which have appeared in German newspapers, Dr. Hamman, secretary of the German-Canadian Economic Society, has caused a statement to be published in the press in Germany. The following extracts from the Hamburger Nachrichten are of special interest just at this time:—

"A good deal of adverse criticism of Canada has recently been appearing in the German press, much of it evidently inspired by the Stock Exchange influences and by the Chauvinist tendencies of a certain class of papers. Criticisms have been to the effect that Canada is a much over-rated country, that over-speculation and money stringency have brought the country into a critical position, and there have also been insinuations that the Canadian Government itself and the prominent railway and other interests of the country have been lending themselves to a propaganda of exaggeration."

Dr. Hamman adds "that to say that Canada is in the throes of a financial crisis is absolutely contrary to the facts. Money stringency may well exist there, as in other countries, but the Canadian banks have acted in the most praiseworthy manner by curtailing credit to the most legitimate demands, and have thus been able to finance out of their own resources, without any outside assistance, the moving and the disposal of the very largest crops Canada has ever had.

"That the demand for money in Canada should be great at present was not due to over-speculation, but to the very natural cause that the inflow of capital, which a developing country requires, had been suddenly brought to a full stop owing to the unexpected political crisis which had arisen in Europe."

As to the charge of over-speculation in land, Dr. Hamman gives it as his opinion that "this is not at all true, so far as agricultural land is concerned; that the prices of farms and of land suitable for farming in Canada are not only well sustained, but are steadily rising."

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

RECORD OF LABOR DISPUTES

According to a bulletin issued by the Department of Labor, there were only seven trade disputes in Canada during November, 1913, a favorable showing in comparison with October, when there were nine in existence, and also with November, 1912, in which month twenty-five were recorded. There was, however, an increase in the number of working days lost over the previous month, the figures being 89,000 for November, 1913, and 70,700 during October. It is worthy of note that of the 89,000 working days lost during November 67,500 were lost as a result of two disputes in British Columbia, coal miners on Vancouver Island and railroad construction laborers on the Pacific Great Eastern Railway. Three disputes were definitely settled during November, leaving four in existence at the end of the month as compared with eleven at the end of November, 1912.

◆

The Casualty Insurance Exchange of New York has adopted the scale of brokerage commissions recommended by the Workmen's Compensation Service Bureau as follows: Upon employers' liability and workmen's collective insurance, 12½ per cent. Upon all other liability lines, 17½ per cent. On property damage and collision insurance, 20 per cent. The meeting also approved some amendments to the constitution.

With respect to the recent financing done by the Canadian Pacific Railway Company, entitling common stockholders to subscribe to an issue of $52,000,000 of 6 per cent. notes certificates to the extent of 20 per cent. of their holdings, or in a proportion of one to five, the committee on securities of the New York stock exchange has ruled that all transactions in the stock that were made on December 23rd, except those made for cash, shall be ex-rights, and that rights could be dealt in after that date. Transactions in rights must be settled on Tuesday, January 20th, after which date transactions shall be as in securities. Subscriptions rights expire February 2nd next.

At the opening of the fourth session of the Manitoba legislature, the speech from the throne outlined the legislative programme, which included development of mixed farming and provincial emigration work in England, Scotland and Ireland. The Canadian Northern Railway's branch is to be advanced from Oakpoint to connect with the Hudson Bay Railway, and a government abattoir and cold storage plants are to be provided at the new stock yards of St. Boniface. Agricultural credits, prison reform, new buildings for the Provincial University and extension of the government telephone system are also touched upon

MUNICIPAL BOND NOTES.

Burnaby is Negotiating Treasury Bill Issue

A sale of the 1913 Burnaby treasury certificates has not yet been consummated, although negotiations are now pending. A financial house applied for an injunction to restrain the corporation from selling the treasury certificates, but the application was dismissed.

Owing to a difficulty the sale of Cochrane, Ont., debentures was not effected. Messrs. Burgess and Company, Toronto, had been given an option on the issue of $15,000 debentures, but at the meeting of the council a letter was read from the firm saying they could not take them, giving as a reason that the provincial board of health's approval was not obtained until after the by-law was passed, whereas the provincial health act requires that it should be obtained prior to the passing of the by-law. They stated that they might later be prepared to take up the debentures.

Disapproves Local Government Bill.

Saskatoon city commissioners disapprove of the proposed local government board bill now before the Saskatchewan legislature. They contend that, as now framed, it will defeat the object which it was intended to achieve, namely, the placing of Canadian municipal debentures on the same footing as Old Country debentures of similar character. The commissioners have filed their criticism with the city council.

Saskatoon school board estimates for 1914 will probably total $240,000.

Kamloops has had its third quarterly audit made by Messrs. Crehan and Mouatt, of Vancouver, who state that the city is in a sound condition financially.

Eleven Tenders for Bond Issue.

Peterborough, Ont., received no less than eleven bids for its issue of $120,000 5 per cent. hydro-electric bonds, Messrs. Wood, Gundy and Company being the successful tenderers.

Souris S.D., Man., received three bids for its issue of $5,000 5 per cent. 20-year debentures, two from Toronto houses and that of the Winnipeg Sinking Fund Trustees, which was the offer accepted.

An additional $50,000 of Toronto Housing Company's stock (1,000 shares) must be subscribed for to make available the whole amount ($850,000) authorized to be guaranteed by Toronto.

BOND TENDERS

Morinville, Alta.—$16,000 6 per cent. debentures. J. B. Dalphona, secretary-treasurer. (Official advertisement appears on another page.)

Swan River, Man.—Up to February 16th for $4,000 6 per cent. 20-year debentures. B. E. Rothwell, Swan River. (Official advertisement appears on another page.)

DEBENTURES AWARDED

Souris S.D., Man.—$5,000 5 per cent. 20-year debentures, to Winnipeg Sinking Fund Trustees.

Peterborough, Ont.—$120,000 5 per cent. 30-years, to Messrs. Wood, Gundy & Company, Toronto.

LOOKING FOR CANADIAN PACIFIC RAILWAY SURPRISE

London, Dec. 23.—The Canadian railway market, which has provided a number of surprises during the year now closing, has in store for the early part of 1914, says the Standard, further developments of a character scarcely suspected at present. The construction of trunk lines in the Dominion during recent years has brought about far-reaching and fundamental alteration in the balance of power in the Canadian railway world, and the principal interests concerned are already taking council among themselves with a view to maintaining the status quo. This only can be achieved by the concentration of administration which would eliminate one or other of the groups at present existent. The Canadian Pacific board are anxious that the opening up of the Dominion to modern transport facilities shall be in conformity with their plans, and not in opposition to them. The probability is therefore that eventually the Canadian Pacific Railway may not only run from ocean to ocean, but may extend its operations in other directions.

National Steel Car Company, of Hamilton, has secured the following orders: 500 steel-frame stock cars and 10 steel-frame baggage cars, Grand Trunk Railway; 44 steel-frame box cars and 67 steel under-frame flat cars, Pacific Great Eastern Railway; 10 high-speed interurban electric cars for Montreal and Southern Counties Railway.

CANADA'S PUBLIC ACCOUNTS

Railway Subsidies and Industrial Bounties Were Paid

According to the public accounts of Canada for the year ended March 31, 1913, the receipts on account of consolidated fund for the year amounted to $168,689,903.45 and the expenditure on the same account to $112,059,537.41. The surplus of receipts over expenditure on this account was therefore $56,630,366.04.

In addition to the consolidated fund expenditure, the following outlays were made and charged to capital:—

Railways—Intercolonial Railway, $2,391,987.53; Prince Edward Island Railway, $103,001.03; National Transcontinental Railway, $13,767,011.44; Hudson Bay Railway, $1,099,063.15; total railways, $17,361,063.15. Quebec bridge, $1,512,825.96; new car for the Governor-General, $15,000.00; total, $18,888,889.11.

Canals—Chambly, $12,529.07; Galops, $1,372.82; Lachine, $463,291.97; Quebec canals, $3,809.24; Rideau, $41,565.00; Sault Ste. Marie, $45,941.17; Trent, $1,162,605.75; Welland, $347,711.15; St. Lawrence Cannals, Soulanges, $180,816.28; total canals, $2,259,642.45.

Total railways and canals, $21,148,531.56.

Public Works—Government Buildings, Ottawa, $1,135,022.54; Astronomical Observatory, $19,873.27; Victoria Memorial Museum, $86,912.63; Port Arthur and Fort William harbors, $999,743.61; Quebec harbor, $288,779.60; River St. Lawrence ship channel, $1,324,589.85; Red River improvements, $36,904.62; St. John harbor improvements, $1,100,155 02; Tiffin harbor improvements, $113,159.07; Victoria harbor, British Columbia, $14,919.24; Victoria Harbor, Ontario, improvements, $170,173.84; Bare Point breakwater, $198,660.20; Toronto new Dominion Building, $80,648.90; Vancouver harbor, $487,972.18; total, $6,057,514.57. Total capital expenditure, $27,206,046.13.

Railway subsidies to the amount of $4,935,507.35 were paid on account of the following:—

Canadian Pacific Railway Company	$ 85,546.43
Quebec and Saguenay Railway Company	27,641.60
Ha Ha Bay Railway Company	148,148.20
Northern New Brunswick and Seaboard Railway Company	86,528.00
Canadian Northern Pacific Railway Company	2,705,378.00
Algoma Eastern Railway Company	254,089.40
Orford Mountain Railway Company	9,984.00
Algoma Central and Hudson Bay Railway Company	394,859.44
Quebec Central Railway Company	8,576.00
Atlantic, Quebec and Western Railway Company	414,618.00
Esquimalt and Nanaimo Railway Company	365,440.00
Southampton Railway Company	48,442.88
Kettle River Valley Railway Company	107,138.40
Fredericton and Grand Lake Coal and Railway Company	104,996.04
St. John and Quebec Railway Company	174,120.96
Total railway subsidies	$4,935,507.35

The sum of $235,233.55 was paid on account of bounties on the following:—

Lead	$ 68,064.93
Binder twine	37,917.12
Crude petroleum	129,251.50
Total bounties	$235,233.55

At the close of the fiscal year the balance at the credit of the depositors in the Post Office and government savings banks amounted to $57,140,483.39, a decrease of $1,078,844.67 as compared with the balance held on March 31, 1912. The withdrawals during the year exceeded the deposits by $2,747,768.83, while $1,668,924.16 was added for interest accrued, thus making a net decrease of $1,078,844.67.

The net debt of the Dominion at the close of the fiscal year was $314,301,625.68, or a decrease of $25,617,835.03 from the net debt as it stood on March 31, 1912. The decrease is accounted for as follows:—

Capital expenditure on National Transcontinental Railway		$13,767,011.44
Capital expenditure on other railways, canals and public works		13,438,649.69
Railway subsidies		4,935,507.35
Consolidated fund transfers		255,647.89
		$32,396,816.37
Surplus of consolidated fund receipts over consolidated fund expenditure	$56,630,366.04	
Sinking fund	1,384,285.36	
		$58,014,651.40
Decrease of net debt		$25,617,835.03
